PAPERS RELATING TO MILITARY FINANCE, &c. (EAST INDIA).

EXTRACT, "Calcutta Gazette," 30 June 1860.

Military Department.—No. 684 of 1860.

To HIS Excellency the Governor General in Council is pleased to make the folwing appointments:—

Colonel George Balfour, C.B., to be President of the Military Finance Commission.

R. Temple, Esq., Civil Service, Chief Commissioner of Currency and Chief Assistant to the Finance Member of Council, for special service; and Major R. S. Simpson, Assistant Commissary General, to be members of the Military Finance Commission.

EXTRACT, "Calcutta Gazette," 7 July 1860.—No. 710 of 1860.

HIS Excellency the Governor General in Council is pleased to direct the publication, for general information, of the following Resolution:—

Resolution.—By paragraph 14 of Financial Resolution of the 7th April, it was declared that the accounts of the various departments of the Army should, after examination at the several Presidencies, be transmitted to a Military Finance Department at Calcutta; and that the said accounts having been finally examined by that department in communication with the Audit Board, abstracts thereof would be sent to that Board for ultimate and appropriation audit. Finance.

In order to give effect to the objects thus indicated, the following resolutions have been passed in detail. The functions to be entrusted to the Military Finance Department, as therein described, will, pending the organization of the department, be exercised by the Military Finance Commission now sitting in Calcutta.

1. The Military Finance Department, acting under the immediate supervision of the Government of India, shall be charged with the duty of examining into all sources of military expenditure, and controlling all permanent and contingent military expenses, whether relating to pay, monies, or material, throughout the Presidencies of Bengal, Madras, and Bombay, and all territories under the direct control of the Government of India.

2. The functions of the department will extend to enforcing the observance of the limits of expenditure prescribed by Government for every branch of the military service, also constantly watching the progress of issues of stores, and disbursements of money, in relation to the sanctioned expenditure; and whenever the prescribed limits are in any way transgressed, the said department will take such steps as may be necessary for inquiring into and checking the same, or will report the circumstances for the orders of Government. In like manner, wherever reductions in the expenditure of money or stores, or further economy in the application of means may be considered practicable, it will be the duty of the department to represent the same to the proper authority, with a view to the necessary measures being taken to give effect thereto, reporting their proceedings to Government.

3. The financial examination to be exercised in the Military Finance Department will not affect the functions of the several Local Governments, of the established military authorities, or the executive heads of the several branches of the service, whose responsibilities for ensuring economy and efficiency will remain as heretofore.

4. The said department will exercise supervision over all accounts of military expenditure, and to this end will be empowered to call on the heads of all branches of the service for information, and to require the assistance and co-operation of all departmental disbursing officers; also receiving from each head of department timely notice of every probable increase or decrease in requirements of any kind, whether as regards monies, establishments, or material, and whether contingent, or provided for in the annual estimates. The Military Finance Department will be responsible for inquiring and reporting to Government whether the duties of disbursing, accounting, and controlling officers, involving the issue of money or stores, are duly performed; also requiring the verifications of balances of cash and stores, restricting the cash amounts, either kept in hand or outstanding, and enforcing the carrying to account of all recoveries. It will be the duty of the department to keep themselves fully acquainted with the nature of each service, examining the records of receipt, issue, and consumption of stores, equipment, clothing, &c., and ascertaining whether the workshops, manufactories, and depôts connected with the military service are so conducted, and the allotments of stores, supplies, and equipments so kept up, that the utmost economy consistent with thorough efficiency may be maintained. All requisitions for stores, whether on England, or on authorities in India, will be scrutinised by the department, who will watch over the accumulation of stock, and control the quantities maintained in this country; also examining the terms of all contracts or other arrangements for obtaining supplies entered into on behalf of Government or any military branch, in order to ascertain whether framed with due regard to economy and efficiency, and closely observing all disbursements, so as to be able at any time to furnish to the Financial Department of the Supreme Government returns of all monies received and issued, under the different heads of service, up to the latest date.

5. In order to ensure strict and unvarying uniformity of record in all controlling, examining, and disbursing offices of the military service, the Military Finance Department will see that the forms prescribed for all books, returns, vouchers, and accounts, are adhered to; being at the same time authorised to re-consider all existing forms, and under general instructions from the Government of India, to make such modifications as may be necessary, and lay down new rules adapted to the process of examination, and check as ordered to be carried on, under the new system. The department will also lay down the periods for the submission of these documents, and take measures to ensure their being rendered in a regular and uniform manner, defining and strictly enforcing the responsibility of controlling, disbursing, and accounting officers in this respect, and as regards the correctness of the vouchers and authority for expenditure.

6. The Military Finance Department will determine the mode and form in which the detailed estimate of expenditure and requisitions for stores for each executive military branch are to be framed, for incorporation in the general budget. Those for the Bengal Presidency and for territories under the direct rule of the Government of India, will be forwarded to the department for submission to the Supreme Government; and as regards Madras and Bombay the military portion of the general estimate, together with the detailed estimates received from the Governments of those Presidencies, will be referred to the Military Finance Department.

7. The said department will carefully check and examine all the estimates and requisitions with due regard to financial considerations, and the wants of the several branches of the service, proposing to Government any modifications that may be necessary; and will combine the revised estimates into one general estimate of military expenditure for all India, in which the numerical strength and location of the several arms of the service, and of the army establishments, will be exhibited, with the estimated cost thereof; the proposed charges for army clothing, hospitals, material, provisions, pensions, &c., being also arranged, item by item, in appropriate divisions, so that when the estimates have been sanctioned,

tioned, the disbursements may be at once brought under their respective heads. This general estimate will then be submitted by the Military Finance Department to the Supreme Government, and will, after their orders have been passed, be incorporated with the Imperial Budget.

8. The accounts of all the military branches will, after the prescribed examination has been made, be transmitted, in such forms and at such periods as may be ordered, to the Military Finance Department, with whom will rest the passing and final examination of such accounts; and they are accordingly authorised to institute further inquiries, call for detailed records, vouchers, explanations, and the like, disallow charges, or report the matter to Government. The strict appropriation of all disbursements of money or issues of stores under the head of service for which sanctioned, will be enforced by the department, who will also ascertain that the several amounts are charged against the specific sanction given, and against the year in which the said expense has been incurred. When the accounts have been finally examined and passed, they will be classified and consolidated into one statement for all India, and abstracts thereof will be transmitted to the Audit Board of the Supreme Government in such form as may be prescribed for final audit. The Military Finance Department will also allow such persons as may be deputed by the Audit Board to have access at all times to accounts of all kinds in their office for such examination as may be prescribed.

9. The department will be authorised at any time to inspect any office, whether of control, account, or disbursement, connected with military expenditure of money or stores; to examine the books and investigate the transactions, as also to depute any person from the department to conduct such inspection and report thereon.

10. At each of the Presidencies (Bengal, Madras, and Bombay), and in such other localities as may hereafter be fixed, an officer subordinate to the said Military Finance Department, will be appointed, designated "Controller," who will cause due effect to be given to the orders of the department in the matters described in the foregoing paragraphs; subordinate to each controller, there will be "Examiners" of the accounts of the several military branches, and an officer for classifying and compiling accounts, in such numbers and at such stations as may hereafter be found necessary; and one officer in each compiling office will be specially responsible for the correctness and speedy classifying of the said accounts.

11. Disbursing officers of all the military branches will transmit to the examiners of the branch to which they respectively belong the accounts of disbursements and issues of stores made by them, at such times and in such forms as may be prescribed, accompanied by the vouchers and authorities. The examiners will, under the orders in force, scrutinise and compare all the accounts, obtaining explanations, if necessary, or in the event of doubt existing as to the correctness of any charge, referring to the controller; but if satisfied, will pass the accounts, and transmit them to the compiling officer in the manner prescribed.

12. The compiling officer at each Presidency or in each circle will, under the supervision of the controller, classify the accounts in such form as may be laid down; transmitting them to the Military Finance Department through the controller, at such periods as may be ordered.

13. The special duty of the controllers will be to examine and control all the offices of examination within their respective circles, and to enforce the carrying out of orders under the established system; but they will also inspect all offices of account and disbursement within their respective circles, calling for such information regarding the accounts received from the examiners as they may deem necessary, and in the event of doubt on any point, making reference to the department at Calcutta.

14. In the Bengal Presidency it will be the duty of the controllers to examine and submit to the Military Finance Department the detailed estimates of military expenditure, for incorporation in the general budget of the Empire. In the Bombay and Madras Presidencies, the controllers will submit such estimates

to the Local Government for incorporation in the general estimate of the Presidency.

15. The duties of examination and check now performed by the Military Auditor General, and the Auditors of Commissariat, Medical, Ordnance, and Clothing Accounts, at the several Presidencies, Bengal, Madras, and Bombay, and in the territories directly under the Government of India, will be transferred to the examiners of accounts appointed to those branches respectively; the officers and establishments attached to the above offices being, under instructions from the Military Finance Commission re-distributed, so as to meet the requirements of the new system. The general powers now exercised by the Military Auditor General in each Presidency will be merged in the enlarged powers to be entrusted to the controllers.

16. The officers employed as controllers, examiners, and compilers, will be in future appointed under the same competitive system as that prescribed for the Financial Department, and will be transferable from one Presidency to another as occasion may require.

17. The system of examination and account now laid down will take effect in each Presidency from such date as may be determined by the Government of India; and pending the detailed arrangements for carrying it out, the duties will continue to be conducted as hitherto by the officers in charge, their full responsibility for efficiency remaining undiminished, while at the same time they attend to the requisitions of the Military Finance Department.

18. It is known that, consequent on late events, arrears of accounts have in many cases greatly accumulated, to the detriment of efficiency and the interests of the State. The Supreme Government has hitherto looked leniently on such arrears, but from and after the date of the introduction of the new system, absolute regularity must be maintained, and no arrears permitted to accumulate without being at once brought to notice. In order that existing arrears may be cleared off as soon as possible, special establishments will be entertained for that purpose, under arrangements made by the Military Finance Commission through the several controllers, with strict injunctions that the object is to be speedily accomplished.

Financial Department.

Memorandum.

The Financial Resolution, published on the 17th and 21st instant, is republished, with the following alterations and additions:—

(No. 119.)

Fort William, 16 November 1860.

The following Resolution is published for general information:—

The leading principles upon which it was resolved that a more efficient system of financial control throughout the various branches of the Civil and Military Departments of the Public Service in India should be established, have been fully stated in the Government Resolutions, Nos. 27 and 31, dated respectively 7th and 23d April 1860, and in the General Order of Government of the 6th July ast, No. 710, which is the resolution specially affecting the Military Department.

2. The Military Finance Commission (re-constituted by G. O. G. G., No. 684 of 29th June 1860), on the one hand, and the Budget Committee, convened under the Order of Government of India, No. 39, dated 11th May 1860, on the other hand, have been sedulously engaged in considering how the details of the several measures involved in the new system may best be carried out, with the fullest possible adaptation of the principles prevailing in England to the existing circumstances of this country.

3. In

3. In Resolution No. 710 of the 6th July last, the general functions to be entrusted to the Military Finance Department were defined and described in detail; and these were directed to be exercised, pending the organization of the department, by the Military Finance Commission, as the representative for the time being of the Military Finance Department.

4. In Resolution No. 7371 of the 18th August last, in the Financial Department, reviewing the Report of the Budget Committee, and in the Report No. 7, dated 15th June 1860, of the Military Finance Commission, approved by Government, in letter No. 1309, dated 31st July 1860, the general principles to be followed in approximating the Indian to the English system in all departments were considered and determined; and the formation of a Board of Audit has accordingly been resolved on, with the view to ensure the strict appropriation of the monies in the Civil and Military Departments, in accordance with the grants made, and for the performance of the duties below detailed.

5. The time has now arrived for giving full effect to these resolutions, by such a practical organization of the several subordinate departments, as shall provide efficiency of financial control at the most reasonable cost, and at the same time secure the smooth and uniform action of the system.

6. The functions of the chief of the Military Finance Department, as described in the Resolution of the 6th July, are, in most material points, similar to those that will be exercised in the Civil Finance Department by the Accountant General to the Government of India, who will in future be designated the Auditor General of India. It is desirable, on considerations of economy and efficiency, as well as for the sake of uniformity of system, to assimilate the arrangements which it is proposed to introduce into these two great divisions of the public service, by bringing these two functionaries (Auditor General and Head of the Military Finance Department) into co-ordinate relations, so that, whilst retaining entire freedom of action in matters specially relating to their respective departments, they may act in unison in regard to all questions of general organization, policy, and economy, as affecting estimates, budget, audit, and accounts, and determine together any important questions that may arise in connection with the final appropriation audit, and other arrangements of a general nature.

7. His Excellency the Governor General in Council is therefore pleased to resolve, that the new Board of Audit shall consist of two members, of whom the first will be Auditor General of India, hitherto the Accountant General to the Government of India, and the second, the Chief of the Military Finance Department.

8. The members of the Board will act together in all matters of general organization and control connected with the objects set forth in paragraph 6, and will together be responsible for the right and strict conduct of the final appropriation audit; but in all other respects, as heads of the Civil and Military Finance Departments, they will exercise independent jurisdiction over their respective divisions of the service.

9. The Civil and Military Finance Departments will thus be respectively presided over by a chief, with a seat at the Audit Board; and both these officers will exercise, independently of each other, in reference to the departments assigned to them, all the functions of the character described in the Resolution of the 6th July 1860, passed for the Military Department. Under this arrangement, in the Military Department there will be, in addition to the chief, a controller at each Presidency, who, exercising the general powers laid down for that officer in the same resolution, will supervise and control the Military Accountant, as well as the local auditors, or examiners and compilers. The compilers will be charged with the classification and preparation of the accounts; and there will be independent examiners, who, under the general rules framed for the department, will perform the duties of detailed examination and check of charges, being subject to the final control of the chief of the department, and also, in matters of office detail, to the immediate and close inspection and supervision of the controllers.

10. In nearly a similar manner the Civil Department will consist of a chief

of the department, designated Auditor General of India, of local auditors under each Government, nearly corresponding with the military controllers, and of local examiners or civil paymasters, as defined in paras. 81 to 85 of the Report of the Budget Committee, and already prescribed in Resolution of the 18th August last.

11. In furtherance of these Resolutions, his Excellency the Governor General in Council is pleased to make the following appointments, those for the Madras and Bombay Presidencies being subject to such modifications and alterations as may hereafter, in communication with the Governments of these Presidencies, be deemed necessary :-

BOARD OF AUDIT :	
1st Member and President - - -	Honourable E. Drummond (Accountant General to the Government of India).
2d Member - - - - - -	Colonel G. Balfour, C.B. (President of the Military Finance Commission).
FOR BENGAL PRESIDENCY :	
Controller of Military Finance - -	Lieutenant Colonel E. G. J. Champneys (Military Auditor General), on leave.
Officiating ditto - - - - -	Lieutenant Colonel J. C. Hannyngton (Officiating Military Auditor General).
1st Examiner, Pay Department - -	Major W. S. Ferris (Deputy Military Auditor General).
2d Ditto - - - - - - -	Captain Malleson (1st Assistant Military Auditor General).
3d Ditto - - - - - - -	R. H. Hollingberry, Esq. (2d Assistant Military Auditor General), on deputation.
	Captain F. C. Tombs (Officiating 2d Assistant Military Auditor General).
Examiner of Commissariat, Barrack, Stud, and Clothing Departments.	Major G. Newbolt (Auditor of Commissariat Accounts), on leave.
	Major T. F. Hobday (Officiating Auditor of Commissariat Accounts).
Assistant Examiner - - - -	Major T. James (Extra Assistant Auditor of Commissariat Accounts).
Superintendent of Clothing Department	Colonel H. P. Burn, on leave.
Officiating Superintendent of Clothing Department.	Major M. Turnbull (Army Clothing Agent), on duty.
In charge of the duties of the department.	G. Kellner, Esq.
Examiner, Ordnance Department -	Captain F. D. Urquhart (3d Assistant Military Auditor General), on leave.
Ditto, Officiating ditto - - -	Lieutenant J. Leonard (Officiating 3d Assistant Military Auditor General).
Examiner, Medical Department.	
Officiating ditto - - - -	Assistant Surgeon N. Chevers, M.D. (Secretary to Principal Inspector General).
Military Accountant Compiler - - - - - -	E. W. Hollingberry, Esq.
FOR MADRAS PRESIDENCY :	
Controller of Military Finance - -	Colonel M'Goun (Military Auditor General).
1st Examiner, Pay Department - -	Major J. Stewart (Deputy Military Auditor General).
2d Ditto - - - -	Captain C. H. Drury (1st Assistant Military Auditor General), absent.
	T. E. Greenfield, Esq., officiating.
Examiner of Commissariat, Clothing, Remount, and Barrack Departments.	Lieutenant Colonel W. H. Budd (Auditor of Commissariat Accounts).
Examiner, Ordnance Department -	Captain Fasken (Assistant to Inspector General, and Auditor of Ordnance Accounts), on leave.

For Madras Presidency—*cont*^{d}.	
Officiating Examiner, Ordnance Department.	Captain A. Stewart (Officiating Assistant to Inspector General of Ordnance, and Auditor of Ordnance Accounts).
Examiner, Medical Department.	
Officiating - - - - - -	Secretary to Principal Inspector General.
Military Accountant.	
Compiler - - - - - - -	Captain J. W. Rideout (2d Assistant Military Auditor General), absent. E. Mahoney, Esq., officiating.
For Bombay Presidency:	
Controller of Military Finance - -	Colonel G. Jameson (Military Auditor General).
Officiating Controller of Military Finance.	Colonel G. H. Robertson, C. B. (Officiating Military Auditor General).
1st Examiner, Pay Department and Indian Navy.	Captain A. F. Chitty (Deputy Military Auditor General).
2d Examiner, Pay Department - -	T. Selby, Esq. (Assistant Military Auditor General).
Examiner of Commissariat, Barrack, Remount, and Clothing Departments.	Colonel Swanson (Auditor, Commissariat Accounts), on leave.
Officiating ditto - - - - -	Major R. J. Shaw (Officiating Auditor, Commissariat Accounts).

12. The members of the Board of Audit, in their respective departments, will be in direct communication with Government, and will aid the Financial and other Departments of the Government of India in examining and deciding on the various arrangements for the Budget Estimates and Accounts, and in performing all the functions set forth in the resolutions referred to in paragraphs 1, 2, and 4 of this resolution; and to this end every assistance will be afforded by the several departments of Government to the Board of Audit, by furnishing papers and information of every kind in connection with the functions of the Board.

13. When the Budget Estimates have been sanctioned by the Government of India, it will rest with the members of the Board of Audit, each in his own department, to see that the financial officers of his department efficiently and punctually discharge the duties severally assigned to them. All questions unprovided for by the Budget Estimates or Standing Rules of the department will be referred, through the proper channel, to the head of the Civil or Military Department to which they relate, and will be considered and decided on by him if it be within his own competence to dispose of them.

14. In all cases where the matter referred involves questions which it is beyond the powers of either head of department to dispose of—such as when both Civil and Military Departments are involved, or where the orders of any Local Government are in question—the head of the department referred to will, if necessary, consult his colleague in the Audit Board; and, if the occasion calls for further reference, the matter may be referred to the Government of India for final decision.

15. All questions arising during the course of the year for which the estimates have been sanctioned having been disposed of, the final appropriation audit of the two Departments (Civil and Military) will be conducted independently by the head of that department, who will satisfy himself, and report to Government on the mode in which the several controllers of finance, and all officers subordinate to them, have performed their respective duties.

 16. Whenever

16. Whenever those duties have been efficiently performed, and the limits of the Budget Estimates been carefully observed, the appropriation audit will be effected by the head of the Finance Department (Civil or Military), without reference to his colleague or to any other authority.

17. It is only when there has been a departure from the limits of the Budget Estimate, or when the proceedings of other departments or any orders of any Local Government are in question, that any reference to the Board of Audit in its collective capacity will be necessary; and it will rest with the Board to decide how far their own authority will suffice to dispose of such questions, and when it may be necessary to refer to the Government of India.

18. The direct control of the Audit Board and of the two heads of departments forming it, will however be confined to the offices of audit, finance, and account. No orders or instructions will be issued to any Local Government or Administration, nor will any orders or instructions of such Government or Administration be altered or amended, except by the Government of India, or under its express authority.

19. The Military Finance Department will, with due regard to the requirements of the Audit Board as respects the accounts for ensuring strictness of appropriation audit, be administered, in accordance with this and the resolutions above quoted, by the chief of the department, in association for the present with his colleagues in the commission, R. Temple, Esq., and Lieutenant Colonel R. S. Simpson.

20. The general and executive duties of account, examination, and check, now entrusted to various officers in the three Presidencies—the Military and Medical Accountants, the Military Auditors General, the Auditors of Commissariat, Ordnance, Medical, Clothing, Barrack, and Stud accounts, and others—will continue to be performed by the officers in charge until regularly transferred, under orders from the head of the department, to the officers appointed as above in each Presidency respectively for the several duties; and all orders and regulations hitherto in force will, as far as they may be consistent with the instructions contained in the resolutions of Government, continue to be observed. Such modifications of existing arrangements as may be found necessary will be applied for in due course, but no duty will be discontinued or relaxed until due provision has been made for the interests of the public service.

21. Detailed arrangements will be made by the Board of Audit and the chiefs of the respective departments, for the right performance of the duties for which they are respectively held responsible.

22. The several controllers and examiners will exercise the functions and perform the duties prescribed by this resolution and those herein referred to, from the earliest practicable date, which will be determined by the chiefs of the respective departments, pending which the duties of all departments will continue to be conducted under existing rules.

23. The Military Finance Commission (originally constituted with Colonel Jameson as president, and Colonels Burn and Balfour as members), whose services have already been of great value, and are deserving of the highest commendation, will continue to aid the Government of India in carrying out the work of retrenchment and economic reform for which it was originally constituted; but all functions of direct administration, check, and control heretofore exercised by the commission as a body, when re-constituted, will hereafter devolve on its president, who, in the capacity of a member of the Board of Audit and head of the Military Finance Department, will, in conjunction with the other members of the commission, continue to assist in the general organization of the department.

24. The Auditor General will, in like manner, enforce the principles of economic reform in the civil branch; and the heads of the Civil and Military Departments forming the Audit Board will, in concert, devise the arrangements necessary for the proper rendering of the accounts, and for ensuring strictness of appropriation audit.

25. The subsidiary orders necessary for the exercise of the independent functions entrusted by the resolution of Government to the Auditor General of India and

and the chief of the Military Finance Department (aided by the members of the Commission), will be issued by those officers respectively; and the Audit Board will likewise issue such subsidiary orders as may be requisite in regard to the appropriation audit.

26. It is to be understood by all the departments concerned that, as a general rule, and except in special cases of emergency or in cases in which the Governor General in Council shall otherwise direct, all proposals in the Military, Political, or Financial Departments bearing on questions of military finance, and all proposals in the Public Works Department for expenditure (other than that on ordinary repairs) on military public works, shall be sent for opinion and report to the Military Finance Department before the orders of the Governor General in Council are taken upon them.

By Order of the Governor General in Council.

(signed) *C. Hugh Lushington,*
Secy. to the Govt. of India.

Extract "Calcutta Gazette," 6 March 1861.

Military Department.—No. 171 of 1861.

Fort William, the 4th March 1861.

From references which have come before Government there is manifestly a confusion in the minds of some officers between the Military Finance Commission and the now existing Military Finance Department.

The Governor General in Council desires again to call to the attention of all departments* concerned the position and functions of the Military Finance Department, as detailed in the Resolutions of Government dated 6th July and 16th November 1860.

Extract Supplement to the "Calcutta Gazette," of 26th October 1861.

From the Military Finance Department to the Secretary to the Government of India, Financial Department;—(No. 974 A., dated 8th October 1861.)

Sir,

I have the honour to acknowledge the receipt of your letter, No. 11,563, dated 24th September 1861, annexing extract from a despatch from the Secretary of State for India, No. 122, dated 2d August 1861, and requesting to be furnished, with as little delay as possible, with the revised detailed estimates of military charges for the whole of India for the year 1861–62, and a report thereon.

2. In accordance with these instructions I immediately forwarded the estimates as revised by me for your information, and, having now completed my report on the estimates, I beg to forward herewith 10 copies of the same, as also 10 more printed copies of the revised estimates of the Bengal and Bombay Presidencies, and of the consolidated military estimate of all India. The detailed revised estimate of the Madras Presidency, showing the intended appropriation of the funds required for the expenditure of that division of the empire, was furnished some months since with this department's Report, No. 225 A, dated 5th April 1861, of which several copies have already been sent to Government.

3. These estimates have been nearly in their present state for the last three months, but I have been devoting every hour I could spare to the far more important and urgent duty of controlling and keeping down expenditure.

4. It will be remembered that the General Order announcing the reorganization of the native infantry only appeared on the 4th of May, and that for the cavalry on

* Military Department, No. 710, of 6th July 1860. Financial Department, No. 119, dated 16th November 1860.

on the 31st May 1861; and as these Orders also affected the Madras and Bombay armies, it was necessary to consult the local authorities before the financial effect of the important changes thereby introduced could be correctly estimated.

5. It should not, however, be supposed that in delaying the submission of the revised estimates I entertained any apprehension as to the sum of 1,220 lakhs rupees, accepted by the Government of India as sufficient to provide for the regular military expenditure in India in the year 1861–62, being inadequate to meet these requirements, provided the conditions, as expressed in Note K, appended to Mr. Laing's Financial Statement, dated 27th April 1861, were observed; nor as to the further sum of about 60 lakhs, specially granted for the payment of "gratuities, bounty, pay, and other expenses," during the short period that was expected to elapse before the completion of the reductions (whereby the military expenditure was raised to 1,280 lakhs), being insufficient to cover all these contingencies if the reductions on which the calculations were based had been fully carried out within the time then contemplated. The real ground of apprehension is that, in the absence of precise data on which to calculate, the detailed appropriation shewn in the estimates may not be sustained by the actual course of the expenditure, for this appropriation being regulated on the presumption above adverted to may, consequent on some of the anticipations being as yet unrealised, and from the operation of other causes, be partly vitiated, and the estimates thereby rendered in some degree defective as a means of judging of the extent of certain classes or descriptions of expenditure, and as a guide for some of the purposes of appropriation audit.

6. I may state that I declined an offer made to me by the Honourable Mr. Laing, on the evening before his Statement was laid before the Legislative Council, to allow a further margin of 10 lakhs for the military expenditure of 1861–62, on the ground of two European infantry regiments that it was previously contemplated to send home being detained here, in the expectation, now fully realised, of receiving the support of Government in enforcing all practicable economy.

7. It was in this spirit that, whilst declining the additional grant, I did not shrink from accepting the obligations declared by Mr. Laing to belong to this department, viz, "that the Military Finance Department, who are constituted as a permanent department of the Supreme Government to see to the enforcement of all that relates to estimates and military finance, give us the means, like those which the Treasury and War Office in England possess, of ensuring the observance of estimates and the checking of expenditure."

8. These obligations, I beg to assure Government, I shall do my utmost to fulfil; and whilst soliciting the forbearance of Government for any shortcomings that may unavoidably occur, I may mention that my confidence in the sufficiency of the aggregate amount has been further sustained by the fact of the estimated expenditure of the Hyderabad Contingent (as shewn in the margin), amounting to 20,20,435 rupees, being included in the military estimate of India. This outlay is not a charge upon the revenues of India, being paid out of the revenues of the assigned districts in Berar, instead of being paid and recovered by the Government of India, and accounted for separately to the Nizam; and the sum of 20 lakhs may therefore be held as a reserve credit to meet any excess.

Hyderabad Contingent.

	Rs.
Hyderabad Light Field Batteries	1,55,979
,, Irregular Cavalry	10,56,539
,, Infantry	7,45,659

Supernumeraries.

	Rs.
Hyderabad Irregular Cavalry	74,474
,, Infantry	578
	Rs. 20,33,229
Deductions	12,794
TOTAL	Rs. 20,20,435

9. I need not assure Government that, having bestowed much care in the classification and arrangement of these estimates, it was with great reluctance I delayed their submission; but even at the risk of an imputation of remissness in the discharge of the proper duty of this department, I thought it best, so long as I had the hope of securing better data, to defer laying before Government documents which I felt convinced were susceptible of improvement. In justice to myself I must add, however, that I have never withheld from the financial authorities of the Government of India any information at my command. In May last I placed at the disposal of the Financial Secretary my intended appropriation

appropriation of the aggregate sum (including regular estimate and contingencies) of 1,280 lakhs rupees ; and in June I furnished that officer with manuscript copies of the detailed estimates of the Bengal and Bombay Presidencies, of which the printed copies I now send are nearly counterparts.

10. I may also mention that the Honourable Mr. Laing had before him, and under examination on several occasions, even prior to making his financial statement in the Legislative Council, the detailed estimates of the three Presidencies, prepared in accordance with the instructions contained in the Budget Report of the Military Finance Commission (No. 7), dated 15th June 1860, in minute detail and clearly arranged ; and I much regret not having been able to print these important documents, so as to show Government the success that has attended the efforts of the controllers and other officers of the Military Finance Department in the three Presidencies, in carrying out the original instructions issued for their guidance.

11. Gratefully appreciating the cordial support accorded by the Government of India to all the measures of reduction proposed by me, I am reluctant to allude, even generally, to expectations not yet fully realised, and only refer to them in this report in the hope that the detailed information thus given may be found useful in enabling Government to decide on further economical measures.

12. All the estimates now submitted are for local cash requirements, and exhibit the following results under the two grand heads or titles into which they are divided :—

	Bengal.	Madras.	Bombay.	Total.
Title I.	*Rupees.*	*Rupees.*	*Rupees.*	*Rupees.*
Charges Personal - - - -	5,53,32,043	2,69,73,048	1,91,72,809	10,14,77,900
Title II. - - - -				
Charges Material - - - -	1,03,88,920	48,87,088	52,21,449	2,04,97,457
Rs.	6,57,20,963	3,18,60,136	2,43,94,258	12,19,75,357

13. The total amounts here given for the three Presidencies, and for the whole of India, agree with those entered in the Honourable Mr. Laing's financial statement made before the Legislative Council on the 27th April 1861, showing the aggregate outlay in India at about 1,220 lakhs ; but as the military reductions had not, up to that date, been effected, some of the orders to be issued for reducing expenditure having been only recently decided upon, the sum of 60 lakhs in addition was, as already stated, allowed as a margin to cover payments for gratuities, bounty, pay, and other expenses of the European troops to be ordered home, and the native troops to be disbanded, making a gross military charge of 1,280 lakhs for the year 1861–62. The regular scale of military expenditure may, therefore, be stated at nearly 102 lakhs per mensem, with 60 lakhs for the extraordinary expenses of the year ; and these figures are accordingly used in this report.

14. The aggregate charge for the supply of material to the army is, it will be seen, in the proportion of one-fifth of the charges personal (pay of army and establishments); and a comparison of the relative proportions in the several Presidencies shows that, while the charges material in Bengal and Madras are less than one-fifth of the charges personal, in Bombay they are more than one-fourth. The aggregate cost of the army staff, general and provincial, as will be seen by the enclosed estimates, is in the proportion of one-twelfth of that of the whole army of India ; while the cost of the medical department is fully one-tenth, and that of ordnance supplies about one-eightieth.

15. The revised estimates I now submit provide for an European force as follows:—

	Bengal.	Madras.	Bombay.	Total.
European Infantry:				
Regiments British Infantry	32	8	7	47
,, Indian ,,	3	3	3	9
Total Regiments Infantry	35	11	10	56
European Cavalry:				
Regiments British Cavalry	2	2	2	6
,, Indian ,,	3	- -	- -	3
Total Regiments Cavalry	5	2	2	9
Total Regiments Infantry and Cavalry	40	13	12	65

16. This was the number of corps for India spoken of by Mr. Laing at page 7 of his Financial Statement as admitting of "no discussion," having been "distinctly ordered." The number of European corps now in India (as shown below) is nevertheless larger than the above, and the organization of the force also involves a high rate of expenditure. Imperial considerations, over which the Government of India have no direct control, having determined the military formation which thus affects the Indian charges.

	Bengal.	Madras.	Bombay.	Total.
European Infantry:				
Regiments British Infantry	33	9	7	49
,, Indian ,,	3	3	3	9
Total Regiments Infantry	36	12	10	58
European Cavalry:				
Regiments British Cavalry	4	2	2	8
,, Indian ,,	3	- -	- -	3
Total Regiments Cavalry	7	2	2	11
Total Regiments Infantry and Cavalry	43	14	12	69

17. The above shows four European infantry and cavalry regiments in India more than were calculated on.

18. It must also be stated that, although Government have fixed 106 batteries of artillery as the force of that arm for all India, there are, including the Royal Artillery, but exclusive of the Royal Horse Artillery, officers sufficient for 131 batteries; and it should be remembered also, that each Royal Artillery battery serving in India has a strength in men far exceeding that of the Indian artillery. On the whole, therefore, the excess of strength and establishments that has now to be provided for above that estimated is about 5,000 men; or, when all the reinforcements now under orders shall have come out to India, nearly 9,000 men more than the strength sanctioned, according to the regimental scale fixed by Her Majesty's Government, under date the 23d April 1861, which is as follows:—

	Europeans.	Natives.
Bengal	43,338	69,757
Madras	14,693	40,432
Bombay	13,090	26,180
Total	71,121	136,369

19. This standard is greatly below the effective strength as it stood during the past three months, and at present stands, and the fact of such excess existing will be, and is already being, used by heads of departments as a strong plea against holding them to the limits to which departmental expenditure has been restricted in these Estimates; indeed, this plea may be urged with much justice, considering the number of European recruits arriving from England, whereby the effective strength will shortly be raised to 78,000 or 80,000 men.

20. I need

20. I need not say that I am sparing no efforts, by minute and close scrutiny into every item of expenditure, to enable the Government of India to realise the prospects held out at the commencement of the year by the Honourable Mr. Laing, and the assurances given to the British Parliament by the Secretary of State for India, in regard to reduction of expenditure; but Government will not fail to appreciate the serious practical difficulty presented by the fact of the condition of things under which stringent measures are now resorted to for attaining the desired end of keeping the military expenditure within the estimate, being, owing to unforeseen circumstances over which Government have no control, somewhat different from that under which such prospects and assurances were held out.

21. Government will not be surprised, therefore, to learn that the Commissary General, Calcutta, has objected to the revision of his departmental estimate, as made in the memorandum submitted with my Report to Government, No. 229 A, dated 26th April 1861. The revised calculations for the rationing of troops, under which head a saving of 27,77,273 rupees was expected, have been questioned, and like objections raised in regard to the reductions indicated in the feed of horses, bullocks, camels, and elephants, on the ground of the actual strength in men and cattle being considerably in excess of the numbers inserted in the Estimate. As regards establishments, those fixed by previous orders have been contrasted with those calculated for in the estimate; and assurances of prospective reforms in the administration of the several departmental services, involving the expenditure of money by the Commissariat Department, with heavy responsibility for meeting all demands, have not been considered to weigh against the fact of the numbers to be provided for being greater than estimated for, or against the ascertained expenditure of preceding years, for a given number of troops.

22. The same feeling, in a greater or less degree, pervades departments at all the Presidencies, and although I feel it my duty to combat this impression, and am sensible how much it is to be regretted, I also feel that, being the natural consequence of the course of events for some years past, it cannot in reality be censured; and I can only trust therefore that the result of reforms now progressing will shortly afford the means of entirely removing it.

23. But this is not all that has to be contended against. The influence of measures adopted at home, with respect to the administration of the Indian army, is powerful in India; and the spirit by which measures are dictated in respect to keeping up the European forces on the Indian establishment has a great influence in this country.

24. My Reports, as per margin, which are now, I believe, under the consideration of Government, contain suggestions for the adoption of measures of economy, by reducing the number of troops maintained in India; showing also, with respect to the rate of contribution recently fixed (by the Despatch of the Secretary of State for India, No. 90, of 31st May 1861) to be paid by India to the Imperial Government, that it is only by economical management that the finances of India can meet the necessary military expenditure without embarrassment. I have also brought under notice in my Report, No. 683 A, dated 22d August 1861 (five copies of which are herewith sent), the extensive supplies of stores, which, to a very large amount, have been sent out to India without requisitions of recent date; and I respectfully submit that unless the economy, the necessity of which is so strongly felt by the authorities both in England and in India, be equally strictly observed at home as here, the financial difficulties of India cannot be expected to decrease.

No. 650, dated 18 August 1861.
No. 801, dated 16 September 1861.

25. I now proceed to review the several estimates as originally submitted, as briefly as the subject will allow.

26. It will be observed that the enclosed estimate of the Bengal Presidency, as prepared by the Controller of Military Finance, indicated a probable expenditure of 7,78,77,332 rupees for the year, a scale that could not be entertained consistently with the hope of restoring the balance of Indian finance, especially as it was deemed to all intents and purposes a thorough peace scale. The estimate when received was closely examined, but presented no prospect of reduction in the cost of pay and supplies to the army, unless the numerical strength were at once revised.

 27. The

27. The two items which formed the bulk of the expenditure in the estimate as thus submitted, are as below :—

	Rs.
Title I.—Charges personal of pay and allowances of the army and army establishments	6,13,79,507
Title II.—Charges material or supply to standing army and establishments	1,64,97,825
Rs.	7,78,77,332

But there were also one or two other features requiring notice in connection with recent events and the then existing strength of the army.

28. The aggregate of the pay and allowances of the whole Native army exceeded that of the whole European army, the pay of the former standing at 3,05,98,535 rupees, while that of the latter was 2,02,58,251 rupees. The relative cost of the European and Native cavalry and infantry arms of the service alone was as shown below :—

	Cavalry.	Infantry.
European	*Rs.* 34,64,825	*Rs.* 1,28,33,136
Native	97,95,800	1,98,87,424

No. 294, dated 8th May 1861. And these facts I laid before Government in my Report, as per margin.

29. By the intended reductions eventually resolved on by Government, I was enabled to make the following modifications of charges, which I give in detail, as furnishing the key to the appropriation made in the Bengal Estimate :—

NATIVE INFANTRY.		*Rs.*
Native ranks of Native Infantry, as estimated for prior to May 1861		78,99,630*
Deduct,		
I. Portion of the above sum payable to native ranks of the regiments disbanded or transferred to police		14,82,483
Residue of cost of native ranks of Native Infantry under the former organization		64,17,147
II. Cost of 72 regiments of Native Infantry under new organization, viz., at 712 of all native ranks		52,56,576
Net Saving in native ranks of Native Infantry		11,60,571
Add,		
1. Cost of Corps transferred to Police—	*Rs.*	
(*a*) Mhairwarrah Local Battalion	79,488	
(*b*) Mair Local Battalion	53,856	
(*c*) Kamroop Regiment	1,14,623	
(*d*) Bhaugulpore Hill Rangers	66,121	
(*e*) Arracan Local Infantry	1,56,994	
		4,71,082
II. Cost of Regiments to be disbanded—		
(*a*) Pegu Light Infantry	1,55,106	
(*b*) Three Irregular Regiments	3,62,019	
(*c*) Nusseree Battalion	1,24,852	
(*d*) Punjab Infantry	4,88,793	
(*e*) Cawnpore and Moradabad Levies	2,04,534	
(*f*) Kumaon Levy	1,10,543	
		14,45,847
Total Reductions in Native Infantry arm of the service		30,77,500

30. In

* The sum of 78,99,630 rupees represents the estimated cost of only the native ranks of the native army as estimated for by the Controller. It is therefore necessary, in order to ascertain the cost under the old organization of the residue of the native ranks retained, first to deduct the proportionate cost of the native ranks only of the regiments transferred to the police and disbanded, and then, deducting from this the cost of the native ranks of the native army according to the new organization, the net saving in native ranks on the strength of native infantry retained is deduced. But in order to show the aggregate saving on account of reductions in the native infantry as an entire body, including officers, &c., 4,71,082 rupees is first added to the net saving due to the new organization on account of corps bodily transferred to the police; and, next 14,45,847 rupees on account of the corps disbanded, including native ranks, staff allowances, such as command allowance, adjutant's allowance, &c., and the cost of non-combatant establishments, the pay of European officers alone excepted.

Native Cavalry.

30. In this arm of the service it was decided to disband one regiment of Nagpore Irregular Cavalry, as also Meade's Horse and 10 regiments of Native Irregular Cavalry, and accordingly deductions as below were made from the entire cost of the Native Irregular Cavalry; given in the Controller's Estimate at 56,46,837 rupees.

		Rs.
Controller's Estimate		56,46,837
Deduct,		
I. One Regiment Nagpore Irregular Cavalry	*Rs.* 2,08,051	
II. Meade's Horse	1,99,033	
III. Four Regiments Bengal Irregular Cavalry	8,81,884	
IV. One Regiment Seikh Cavalry	2,01,163	
V. One Regiment Alexander's Horse	2,40,548	
VI. Two Regiments Benares and one Regiment Mahratta Horse	3,85,093	
VII. One Regiment Scinde Pathan Cavalry	2,40,992	
VIII. One Regiment Ramghur Cavalry	1,95,472	
Thus showing, for Native Cavalry disbanded, a saving of		25,52,242
And leaving the cost of Native Cavalry, if retained on the old organization, at	*Rs.*	30,94,595

31. The real extent of saving effected is not quite so much as the above (25,52,242 rupees), because the new organization given to the 19 regiments of Native Irregular Cavalry retained, and the increase of pay to the Silladars, makes the annual cost of these regiments amount to 35,52,924 rupees, instead of 30,94,595 rupees. The difference between these two latter sums (4,58,329 rupees) must therefore be deducted from 25,59,242 rupees (given above as the saving effected by the disbandment of the 12 regiments), leaving a net saving of 20,93,913 rupees; or, in other words, the present pay of the 19 regiments of cavalry retained having been increased by 4½ lakhs of rupees per annum, the actual saving by the reduction of 12 regiments is only about 21,02,242 rupees.

32. In addition to these reductions in the Native army it was proposed to make the following modifications in the strength of the European army, admitting of saving, as below:—

	Rs.
I. One British Cavalry Regiment (proposed to be sent home as soon as the season would permit)	4,05,415
II. Three British Cavalry Regiments proposed to be reduced to a standard strength of 500 non-commissioned rank and file, which would have given a saving for each regiment of 29,984 rupees	89,952*
III. One Battery of Royal Artillery to be withdrawn	85,200
Total *Rs.*	5,80,567

33. The total saving by the reductions, therefore, stood as follows:—

	Rs.
Native Infantry	30,77,500
,, Cavalry	21,02,242
European Troops	5,80,567
Total Reductions in Army Pay and Allowances *Rs.*	57,60,309

Since the Controller's Estimate was framed, however, the Battery of Royal Artillery in China has returned to India, and being a field battery, whilst the one provided for in the estimate, which has since proceeded home, was a garrison company, has caused an addition of 85,200 rupees to the estimate, thereby reducing the net saving in pay and allowances to 56,75,109 rupees, instead of 57,60,309 rupees.

34. The expenditure of the Commissariat Department may be said to be mainly governed by the extent of the European force; and although, as will be seen by the foregoing detail, only a comparatively small proportion of the European force was to be reduced, yet the fact of any reductions being decided on, and the further consideration that, in the present tranquil state of the country, the

* This Estimate was framed before the Order of 23d April 1861 was received, fixing the strength of cavalry regiments at a higher establishment than 500 non-commissioned rank and file.

the rates of articles and wages of certain followers that fluctuate according to circumstances ought to be low, led to a close scrutiny by this Department of the Bengal Commissariat Estimate. This document, owing probably to the novelty of the system, presented some anomalies, and was not prepared with that minute care which I deem essential to the exercise of control over the charges of this important branch of the service; but the measures adopted by the Commissary General for the preparation of next year's estimate will, I fully expect, ensure accuracy.

35. The cost of rations and hospital diet for the European portion of the Bengal Army was set down at 76,77,273 rupees, which appeared excessive. The data collected from the three Presidencies had led to the conclusion that the average cost of rationing a European soldier in India is 100 rupees; and that of dieting a sick one, 180 rupees per annum. Accordingly, these rates were applied to the strength assumed to be maintained during 1860-61, viz.. 45,000 men (40,000 in health, at 40,00,000 rupees; and 5,000 sick, at 9,00,000 rupees); and on this calculation the cost of rations and diet was reduced to 49,00,000 rupees, showing an excess of 27,77,273 rupees in the Commissariat Estimate. I admit that the reduction thus made was large, and is not fully sustainable considering the number of troops that are still kept up in excess of the proposed strength; but yet, looking to the restraints now daily put on commissariat outlay, and the vigilant scrutiny to which hospital expenditure is subjected, I feel confident that the above rates per man need not be exceeded.

36. I have now before me a statement, submitted by the examiner of commissariat accounts, under date the 3d September 1861, which shows the average for victualling Europeans and dieting sick Europeans in hospital to have been in the month of April of the four years indicated, as indicated in the margin. The year 1858 is omitted as having been altogether exceptional; but the expenditure of the other years gives an annual average of 119-5-0 rupees for victualling, and 150 rupees for dieting each man, well and sick respectively, these being rates which may be expected to fall still lower. The reduction made has, therefore, only to be qualified by the difference between the numerical strength assumed, and the actual strength; and taking this difference at 5,000 on the average of the whole year, with one-tenth sick (the proportion of sick not having yet exceeded one-twelfth), the sum of the 49,00,000 rupees proposed by this department will be increased by 5,44,400 rupees (up to 54,44,400 rupees), thus still leaving a saving of 22,32,873 rupees under this head. And the recent measures urged on the Commissary General, in respect to the meat contract held by one individual for supplying the forces located in the various stations extending from Benares to Peshawur, by which a considerable reduction in the rate has been made, will result in a further saving of two and a half lakhs.

	Victualling Europeans.	Dieting Sick in Hospital.
	Rs. a. p.	*Rs. a. p.*
1856 - - - -	8 1 0	12 9 3
1857 - - - -	8 3 3	13 8 2
1859 - - - -	11 11 5	13 15 11
1860 - - - -	11 12 11	9 15 0
	4) 39 12 7	50 0 4
	9 15 1	12 8 1

37. In the cattle establishment reductions to the extent of 15,06,478 rupees were proposed by this department; but as regards this head, I am apprehensive that the amount of saving that will eventually accrue will be considerably less than was calculated on, although aware that an appreciable reduction has already been made.

38. The cattle establishments are at all times very expensive, being maintained even in time of peace on a scale adequate for the immediate prospects of hostilities, and without regard to the abundant resources of the country, which in the most trying times have been pronounced by Colonel Thompson, C.B., the Commissary General of this Presidency, and other officers of experience, to be adequate to all emergencies.

39. The transport train bullocks constitute the heaviest item of expense under this head, being estimated at 10,39,747 rupees. I am now in communication with the Commissary General on this subject, and while admitting that the scale of reduction proposed in my Report, No. 229 A, dated 26th April 1861, was extensive, I am still in hopes that steps will shortly be taken to reduce the number of bullocks kept up, and the present scale of this establishment thus considerably

considerably brought down. According to my view Government bullocks should be maintained only for services of regular recurrence, and for those military exigencies which may arise without a moment's warning; but, as I purpose addressing Government separately on this subject, I shall not here enter further into it.

40. The cost of the maintenance of camels is the next item involving heavy expense under the head of Cattle Establishments, being estimated at 7,74,820 rupees; but by the transfer of a number of these animals to the Madras Presidency where they were required, and by placing many out to graze, I look to the actual expenditure being brought much below the estimated cost.

41. The rates at which the expense of feeding cattle has been estimated are as follows:—

	Highest Rate per Annum.			Lowest Rate per Annum.			Mean Rate per Annum.		
	Rs.	*a.*	*p.*	*Rs.*	*a.*	*p.*	*Rs.*	*a.*	*p.*
Elephants - - - - - -	744	0	0	180	0	0	462	0	0
Camels - - - - - - -	130	8	0	54	0	0	92	4	0
Horses - - - - - - -	109	0	0	60	0	0	84	8	0
Bullocks - - - - - -	168	0	0	66	0	0	117	0	0

These rates are, however, I believe, high, and a large difference between the estimated and the actual cost may be reasonably expected, both on this account and because the rate of hire for Rewaree camels has recently been considerably reduced, independently of a reduction being made in their number.

42. The other items im which I have reason to anticipate reductions of the estimated Commissariat Expenditure are as follows:—

Miscellaneous carriage,	Medical comforts,
Hospital clothing,	Dead stock,
Bedding for European troops,	Purchase of cattle, and
Barrack furniture,	Contingencies,

all of which have already been passed under review in my Report No. 229A., dated 26th April 1861.

43. The Commissariat Estimate for supplies, exclusive of establishments, was originally reduced by this department from 1,41,62,837 rupees to 79,12,400 rupees, and although I do not now hope to realize so large a saving, the outlay under this head will not, I feel assured, exceed 1,00,00,000 rupees; and judging from the present rate of the general military expenditure, the difference between the two sums (about 20 lakhs) will, I hope, come within the aggregate grant of 1,280 lakhs.

44. The other items of reduction are less important; 2,30,711 rupees were deducted from the estimated expenditure of Commissariat Establishments, and 1,41,644 rupees from those of the Barrack Department. The estimate of the Stud Department, amounting for supplies, exclusive of permanent establishments, to 14,61,906 rupees, was left intact, as I had not then sufficient data to guide me in a revision of the estimate; but I have since instituted inquiries, which have already resulted in a reported reduction, and I believe a larger saving will eventually be effected, sufficient probably to cover a great part of the excess beyond my estimate that will be incurred for the cattle establishments of the Commissariat Department, the remounts available being sufficient to meet all demands for three years to come.

45. Even if, however, these aggregate reductions in the Commissariat Expenditure be not realized to the full extent within the present year, the monthly scale of outlay proportionate to the amounts indicated for the year will at least be attained in the last month of the year. This will be a great point gained, for the main difficulty is to get the scale admitted as adequate; and it can only be accomplished by gradually enforcing reductions on the closest scrutiny in minute detail of each item of charge.

46. The Bengal estimate has thus, on the whole, been reduced from 7,78,77,332 rupees to 6,57,20,963 rupees, giving a rate of about $54\frac{8}{10}$ lakhs per mensem, instead of 66 lakhs; and although the expenditure in detail may not entirely accord with the appropriation made under the several heads of the estimate, I still hope, provided it be found practicable to maintain the practice of the stringent economy initiated, to be able, at the close of the year, to inform Government that the average monthly cash disbursements during the year, for the military service of the Bengal Presidency, have not exceeded 55 lakhs for current expenditure, exclusive of gratuities, bounty, pay, &c., which should be covered by the special grant of 60 lakhs. There would, however, be no doubt on either of these points if Government should find themselves in a position to make further reductions in the numerical strength of the military forces, by allowing the departure of the supernumerary regiments of infantry and cavalry and batteries of artillery.

47. The Bombay Military Estimate for 1861-62, as compiled by the military accountant, and countersigned by the controller of military finance, exhibits 2,95,62,347 rupees as the probable amount of local cash disbursements. The two grand divisions which represent the cash requirements are as below: —

	Rs.
Title I.—Charges Personal, or Pay and Allowances of the Army and Army Establishments - -	2,32,18,418
Title II.—Charges Material, or Supplies to standing Army and Establishments - - - - -	63,43,929
Rs.	2,95,62,347

48. Immediately on receipt of this estimate, I felt no hesitation in pronouncing it excessive; and was fully confirmed in this view by the letter from the Secretary to the Government of Bombay, to your address, No. 1105, dated 18th April 1861, which was referred to this department for report (with your docket No. 20 of the 27th idem), as also by other communications received.

49. The effective strength of the Bombay army, on which the estimate is based, is as below:—

Europeans - - - - - - - -	13,557
Natives - - - - - - - -	28,660

or a little more than one-third of the Bengal army as it now stands, for which 6,57,20,963 rupees have been allotted. The proportion for Bombay would, therefore, be 2,19,06,985 rupees, but there are causes which interfere with the strict application of this proportion; and after careful consideration, 2,43,94,258 rupees was proposed by this department, and approved by Government, as the sum to which the military expenditure of the Bombay Presidency for the current year should be restricted.

50. The Bombay Government, in their letter to the Secretary to the Government of India, Military Department, No. 1140, dated 18th April 1861, acknowledged that over-charges exist in many of the items of the estimate; and these I shall now specify, noticing, at the same time, the effect of decisions of the Government of India in reference to the strength of the Bombay army: —

1st. The Bombay Government admit that the cost of the two regiments of Guzerat Horse, which has been transferred to the Civil Department, should have been excluded from the estimate, and the Government of India have decided that two of the 12 regiments of Silladar Cavalry shall be reduced, thus leaving only 10 regiments of Silladar Cavalry to be provided for. The total amount estimated for the 14 regiments of Silladar Cavalry (including Guzerat Horse) is 26,05,592 rupees, and the exact proportion to be deducted on account of four regiments (two transferred and two reduced) would be 7,44,454 rupees; but as the 10 remaining regiments are each to be augmented by 120 Sowars, so as to make up 1,200 per corps, the net amount to be deducted is only 3,28,182 rupees.

2d. The Bombay Government also report that, in consequence of the abolition of the remount depôt, the agent's staff salary and cost of his office establishment, amounting, respectively, to 22,574 rupees, and 6,300 rupees annually, in all 28,874 rupees should be deducted.

3d. The

3d. The sum assigned in the estimate for pensions has been reduced from 17,45,027 rupees to 15,50,000 rupees, making a reduction of 1,95,027 rupees; but as the Bombay Government observe that the actual expenditure will exhibit a large additional reduction, I have felt justified in assuming the reduction, in round numbers, at two lakhs.

4th. The Transport Train Establishment having been reduced, the Bombay Government request that 31,102 rupees may be deducted on that account, under the head Pay of Commissariat Department.

5th. The Bombay Government have further intimated that the estimated cost of the Transport Train, 3,29,480 rupees, has been reduced by 2,54,264 rupees, that is, to 75,216 rupees; and that in the Cattle and Carriage Establishments a reduction of 4,00,000 rupees should be made. Besides the above, the authorities at Bombay declared that the cost of supplying gram to mounted corps has been over-estimated by 40,000 rupees; and in the Clothing Department the tailoring charges are also 7,213 rupees in excess.

6th. The item Contingencies, under Title I. of the Estimate, represents the large sum of 31,24,547 rupees; but judging from the details given, many of the charges thus included under Title I. should properly be classed under Title II., as appertaining to material supplies; and, moreover, should not be exhibited as Miscellaneous Contingencies, but as Departmental Charges. I have separated the two descriptions of charges, viz., "personal" and "material," and have indicated opposite each title how they have been included in the estimate which accompanies this report.

51. In connection with the above items the Bombay Government acknowledge that there is an overcharge of 63,155 rupees on account of stores to the Ordnance Department, the same having been twice charged; it is also admitted that 31,204 rupees have been charged on account of tents, instead of 3,500 rupees, leaving 27,704 rupees to be deducted. The total of these two items of reduction, 90,859 rupees, is taken from the amount exhibited in the Estimate under the head Ordnance Department; and the full amount included under the head Remount Department, viz., 9,96,556 rupees, as also the estimated value of additional forage, 76,997 rupees, making together 10,73,553 rupees, fall likewise to be deducted.

52. Having further carefully considered the details of the Contingencies under Title I. as above particularized, I am confident that they are open to great modification, for many of the charges entered will not, in all probability, be incurred during 1861-62, and the expenditure under others will, in my opinion, fall far below the estimate.

53. Those which may be omitted as not likely, with good management, to be incurred under existing circumstances, are as follows, and need no explanation:—

	Rs.
Compensation for loss of allowances and property	17,588
Troops short embarked	72,060
Demurrage of ships	2,100
Rs.	91,748

And the following items may also be considerably reduced:—

	From,	To,	Difference.
	Rs.	*Rs.*	*Rs.*
Extra establishments	42,555	25,000	17,555
Head money for medical charge of troops, and veterinary charge for horses.	73,510	50,000	23,510
Hutting money	28,077	20,000	8,077
Passage and freight	6,03,452	3,63,633	2,39,819
Rewards and gratuities	1,20,399	46,271	74,128
Rs.	8,67,993	5,04,904	3,63,089

54. The reasons for making these reductions are, briefly, that extra establishments to the extent anticipated will not be required; that head money for the medical charge of troops and veterinary charge of horses will be less, in consequence of the reduced number of troops, and the diminished cavalry force; hutting money being also less, by reason of the smaller number of native troops, and the fewer movements that will take place. The item of gratuities to men discharged, which is set down at 74,128 rupees, will be paid out of the special sum granted for gratuities, bounties, &c.; as also the pay of the troops ordered to be dispensed with so long as they are maintained.

55. The item of passage and freight, as entered in the estimate, amounted in the aggregate to 6,03,452 rupees, from which a reduction of 2,39,819 rupees was proposed by this department, on the ground that the calculations were made on unusual and abnormal circumstances. The items of charge under this head were as below:—

	Estimated for.	Admitted.
Bombay:	*Rs.*	*Rs.*
To Europe	92,564	
From Europe	1,84,276	2,85,115
In India	8,275	
For subalterns on medical certificate	85,261	
Boat allowance	6,832	6,832
TOTAL *Rs.*	3,77,208	
Government of India:		
To Europe	64,312	
From Europe	62,374	
India	6,164	
Subalterns on medical certificate	27,230	
TOTAL *Rs.*	1,60,080	40,000
Madras:		
To Europe	28,496	
From Europe	12,378	
In India	820	
TOTAL *Rs.*	41,694	20,847
London:		
Freight to	600	600
China:		
Passage	10,239	
Table money	13,631	
TOTAL *Rs.*	23,870	10,239
GRAND TOTAL *Rs.*	6,03,452	3,63,633

56. I have deducted 1,20,080 rupees from the amount of passage money (1,60,080 rupees) shown above as debitable to the Government of India, leaving 40,000 rupees, which I consider ample to cover the expense of passage provided in Bombay for officers and men attached to the Bengal army. I have also disallowed 20,847 rupees, or half of the amount (41,694 rupees) charged for passage on account of officers and men of the Madras army, the residue being ample to meet all such probable demands.

I have further disallowed the following amounts:—

	Rs.
Passage money to subalterns	85,261
Table money to officers belonging to China expedition	13,631

The

The former charge must be provided for out of the sum of 2,85,115 rupees admitted for the officers and men of the Bombay army; and it is not necessary now to provide for table money for officers belonging to the China expedition.

57. As regards the vague head of contingencies, it appears to me to be a very objectionable feature in the Bombay accounts that such large sums and charges so clearly appertaining to distinct departments should have been included under that denomination. The arrangement must have rendered the accounts of the Bombay Presidency heretofore very indefinite; but strict orders have been given that all charges shall in future be distinctly represented in the accounts, so that the nomenclature or heading may indicate the nature of the charge, and I shall endeavour diligently to enforce the observance of these orders.

58. The other reductions proposed by the Government of Bombay are not of an effective character, being merely transfers to the other Presidencies and Civil Departments of various items of expenditure incurred on their behalf, and which the Bombay Government desire to have removed from the estimate as not strictly appertaining to the charges proper of the Bombay Presidency. But on the principle admitted to be sound and good, and laid down by the Government of India in letter No. 7343, dated 19th June 1861, Financial Department, to the address of the Military Finance Department, and letter No. 302, dated 10th September 1861, Military Department, to the Government of Bombay,—that the department or Presidency incurring a charge should estimate for it, and that the actual cost of the troops of a Presidency, wherever located, shall be entered in the military estimate of that Presidency,—I am of opinion that these charges, instead of being transferred from the military estimate of the Bombay Presidency to that of Bengal or Madras, or to the estimate of any Civil Department, as desired by the Bombay Government, should be shown, as at present, in the estimate of the Bombay Presidency, and classified under the proper heads. The question of debiting charges of this nature I, however, reserve for a separate report.

59. As regards the further reductions calculated on by this department, the Government of India having decided that the two batteries, one reserve company, and the head-quarters of 13th Brigade of Royal Artillery at Bombay shall be sent home, a reduction of 2,73,117 may be made on this account. By reducing the two regiments of British cavalry to a standard of 500 non-commissioned rank and file, there will be a saving of 58,968 rupees annually, and 7,11,431 rupees by the reduction of the Bombay Native Infantry from 34 to 30 regiments, making altogether a saving of 10,44,516 rupees per annum.

60. The pay of the supernumeraries in the different branches of the Bombay army is estimated at 4,01,148 rupees; but this sum does not appear separately in the estimate, being balanced against the sum deducted on account of grades wanting to complete. Thus, the full amount of pay and allowances of these grades being 5,17,415 rupees, only 1,16,269 rupees have been deducted from the pay of the establishment in consequence of the amount stated to be payable to supernumeraries; but as it may fairly be calculated that half of these will lapse during the year under the operation of recent orders, I have therefore deducted 2,00,574 rupees, being half the amount (4,01,148 rupees), at which, as already shown, their pay is estimated.

61. By the General Order of the Bombay Government No. 123, dated 15th March 1861, the arsenals specified in the margin were ordered to be abolished; and on reference to statements furnished to this department by the examiner of ordnance accounts, Bombay, the cost of the establishments of those arsenals appears to amount to 1,28,525 rupees annually, as marginally indicated, with the exception of the Maulligaum Establishment, which I have not been able to trace. This amount (1,28,525 rupees) I have deducted from the total estimate (7,97,771 rupees) for the pay and allowances of the Ordnance Department; for although aware that the establishments attached to these arsenals cannot be entirely dispensed with at once, many of the grades being only gradually absorbed, yet I am confident that the general diminution

Arsenal.	Monthly cost of Establishments. Rs. a. p.
Ahmednugger - -	1,453 5 11
Ajmere - - -	2,666 3 9
Kurrachee - - -	5,892 14 5
Sholapoor - - -	697 15 8
Maulligaum - -	—
	10,710 7 9
	12
Annual Cost - - Rs.	1,28,525 0 0

to be effected in the cost of the Ordnance Establishments in the Bombay Presidency during the year 1861-62, to which I shall give unremitting attention, will fully equal, if not exceed, the sum thus deducted.

62. The pay and allowances of the Medical Department of the Bombay Presidency were set down in the estimate at 12,79,740 rupees, including the amount (73,510 rupees) that was classed by the controller with contingencies for head money on account of medical charge of troops and veterinary charge of horses. From the latter item I have already deducted 23,510 rupees, as noticed in paragraph 53 of this letter.

63. The pay of the fixed Medical Establishments, as exhibited in the Estimate, is as follows:—

				Rs.	a.	p.
Indian Forces:						
Surgeons in charge of regiments (including those on leave)				1,67,383	0	0
Asistant surgeons, first class, in charge of regiments (ditto)				65,683	8	0
Ditto, 2d class (ditto)				1,51,267	8	0
Ditto, ditto, attached to divisions and regiments				26,964	0	0
Ditto employed as civil surgeons, vaccinators, and in the Civil Department generally.				28,622	4	0
Ditto in charge of Silladar Cavalry				1,10,781	12	0
Surgeons and assistant surgeons under Government of India				23,877	0	0
Ditto under Madras Government				1,461	0	0
Veterinary surgeons				26,708	13	0
Medical warrant officers				1,22,105	4	0
Hospital apprentices (European)						
Hospital assistants (Native)				41,628	0	0
Ditto						
Office establishments				19,010	12	0
			Rs.	7,85,492	13	0
British Forces:						
Pay and allowances of medical officers—						
Medical staff and establishment				22,116	0	0
Surgeons and assistant surgeons				1,74,279	0	0
Veterinary surgeons				10,956	2	0
		Total	Rs.	2,07,351	2	0

64. This appears to be a very large medical establishment for an army of the strength of that of Bombay. If fixed in the same proportion to the present established strength, as are the medical establishments of the other Presidencies, it may bear a reduction of at least one-sixth, and prompt measures should be taken for effecting this reduction, all due consideration being given to individual interests. I would strongly urge that the attention of the Bombay Government be requested to this matter, with a view to a scheme being submitted for reducing the number of surgeons, assistant surgeons, and warrant medical officers, as also the medical staff and establishments. In the meanwhile, I have deducted for the current year 50,000 rupees, or one-fourth of the annual reduction that may be expected to be eventually effected by the changes above recommended.

65. With reference to "Charges Military Material" (Title II.), 25,96,350 rupees is given in the Estimate as the cost of army supplies, that is, the rationing of troops and dieting of sick, feed of horses, maintenance of military prisoners, supplies of bedding, &c. The items for rations and diet of Europeans included in the above sum are as follows:

		Rs.
Victualling supplies		10,75,104
Hospital diet		3,64,284
Commissariat stores		6,57,290
Total	Rs.	20,96,678
The total cost for 11,000 in health, and 2,000 sick, in all 13,000 men, taken respectively at the above rates of 100 and 180 rupees annually, is, however, only 14,60,000 rupees; and, adding to this 4,00,000 rupees for supplies of beer and arrack, to be ultimately paid for by the men (which, therefore, is included among the receipts or income of the Commissariat Department), the aggregate outlay would be only		18,60,000
Leaving a saving of	Rs.	2,36,678

66. Under

66. Under the head of Army Supplies, the feed of horses or cavalry supplies are also included. The amount estimated for the latter is 3,32,329 rupees, and the Bombay Government admit (as noted in paragraph 44 of this letter), that 40,000 rupees should be deducted; but considering the changes ordered in the Native Cavalry, and the recent regulation for keeping the establishment of horses always 15 per cent. below effective strength, a much larger reduction may be made, and I have accordingly deducted 70,000 rupees.

67. Thus, the total sum to be deducted from the amount set down in the Estimate for Army Supplies will be *Rs.* 2,36,678+70,000=3,06,678 rupees; and the amount to be incurred under that head will then stand at 22,89,672 rupees, instead of 25,96,350 rupees, as originally estimated for.

68. In the Estimate of Commissariat Local Cash Disbursements, "Miscellaneous Carriage" is set down at 7,05,393 rupees, and the "Cattle Department" at 3,62,848 rupees; total 10,69,241 rupees; but the Bombay Government, as above stated (paragraph 50), say that this amount is susceptible of reduction by 4,00,000 rupees, and I have consequently taken three lakhs from the amount set down for miscellaneous carriage, and one lakh from that allotted to the Cattle Department, leaving the amounts to be appropriated to these two heads at 4,05,393 rupees, and 2,63,848 rupees respectively, or, together, 6,69,241 rupees.

69. The cost of supplies to Civil Departments is set down at 7,81,125 rupees; but as this includes 4,68,118 rupees, on account of the Marine Department or Indian Navy, which is undergoing very considerable modification, and as, moreover, the cost of supplies to Civil Departments seems to be excessive, I have no hesitation in deducting 1,50,000 rupees from the gross sum, 7,81,125 rupees, thereby leaving 6,31,125 rupees.

70. Barrack supplies are put down at 3,32,066 rupees; but the average cost per man for barrack supplies is known not to exceed 20 rupees per annum, and as there will only be about 13,000 Europeans in barracks, the amount to be appropriated to barrack supplies ought not to exceed 2,60,000 rupees, leaving, consequently, 72,066 to be deducted from this head of charge.

71. In the Estimate of the Ordnance Department, the supplies to be provided for locally (exclusive of contingencies, army accoutrements, and saddlery, and freight), amount, including a transfer from "Contingencies," to 5,48,262 rupees. From this sum (as recorded in paragraph 51 above) 90,859 rupees is to be deducted with the concurrence of the Bombay Government, leaving 4,57,403 rupees as the amount to be appropriated in the provision of local supplies.

72. I have already, in letters from this department quoted in the margin, earnestly deprecated the system recently introduced in the Bombay Presidency of letting Ordnance officers procure the supplies for their own department. I need not here repeat the objections in detail, but I have strong reasons for pronouncing the system to be as detrimental to efficiency as it is adverse to sound economy; and if it be admitted, the only preventive of the many attendant evils is a close scrutiny of the amount to be allotted for such supplies. In my opinion the sum of 4,57,403 rupees for the Bombay Ordnance local supplies is excessive, considering the reduced number of Ordnance depôts, and the diminished strength of the army. In the Madras Presidency, where the army is much larger, and the Ordnance depôts more numerous and more scattered, some being beyond seas, the amount estimated and granted for the provision of local supplies through the Commissariat Department, which in Madras, as recently in Bengal, has been very properly made the Department of Supply, is only 2,73,585 rupees, or 1,83,818 rupees less than the sum demanded at Bombay. I think that the allowance for local supplies to the Bombay Ordnance Department will be liberal, if fixed on the same scale as for the Madras Ordnance Department; and have therefore set down 2,73,000 rupees, being a reduction of 1,84,403 rupees on the amount originally estimated.

No. 57 A., dated 7th February 1861.
No. 162 A., dated 18th March 1861.

73. It has already been noted, that in the Clothing Department the sum of 7,213 rupees has been over-estimated for tailoring charges; but even after this deduction the amount estimated for the Clothing Department at Bombay, including contingencies, viz., 1,98,163 rupees, still appears high, as compared with that granted to the same department in the Madras Presidency (1,59,820 rupees);

rupees); and I consider that the estimated cash requirements on Government for the Clothing Department for material supplies should be reduced by at least 30,000 rupees, including the above reduction of 7,213 rupees. In the revised Estimate I have therefore set down the cash assignment for material supplies for the Clothing Department at Bombay at 1,68,163 rupees.

74. Thus, the Bombay Estimate for the year 1861–62 has been reduced by revision from 2,95,62,333 rupees to 2,43,94,258 rupees, being a total diminution of 51,68,075 rupees, or a reduction of more than four lakhs in the monthly scale of expenditure, viz., from 24 $\frac{2}{3}$ lakhs to 20 $\frac{4}{10}$ lakhs per mensem; but it must be observed, that of the reductions and transfers in connection with the strength of the Bombay army that were reckoned on, when fixing these limits, the following have not as yet been carried into effect:—

Three batteries of Royal Artillery to be sent home.

Two regiments Silladar cavalry, or even three, to be broken up, as there was also some expectation that the number of corps would be reduced from 12 to 9.

75. The Estimate of the Madras Presidency (forwarded to you, as already stated, with letter No. 225A., dated 5th April 1861, reporting thereon) was framed to provide for a European force of 11 regiments of infantry and two regiments of cavalry, besides artillery, and when submitted, after careful revision by the controller, the probable cash requirements amounted to 3,53,50,608 rupees; but as explained in the above letter, by various arrangements, such as using up stores on hand, the requirements were reduced to 3,18,60,136 rupees, being a difference of 34,90,472. In other words, the Estimate of disbursements, giving a rate of nearly 29½ lakhs per mensem, has been reduced to 26 $\frac{4}{10}$ lakhs, and I have every expectation that the actual outlay will fall within this sum. Indeed, judging from the scale of disbursements of the Madras Presidency for the last three months, it might be less if the wishes of the Madras Government for the transfer of two European regiments and two batteries of Royal Artillery be carried out.

76. This Estimate, in common with those of Bengal and Bombay, is divided under two great heads, viz.:—

		Rs.
Title I.	Charges Personal	2,69,73,048
„ II.	„ Material	48,87,088

The proportionate cost of material supplies in the Madras Presidency is below that of the other Presidencies; but the arrangements at this Presidency are so completely under control, that there is good reason for anticipating even more economical results. In illustration of this, I cannot do better than re-produce here the 39th paragraph of this Department's Report to Government, No. 225A., dated 5th April 1861, every word of which I find to be fully sustained by the experience since acquired.

"The economical scale at which the military expenditure of the Madras Presidency has arrived is mainly attributable to the effective measures taken by the Government of Madras during the administration of Sir C. Trevelyan and the Honourable Mr. Morehead, and to the co-operation of the various heads of departments, some of whom have acted so as to have merited the fullest confidence of the Government of Madras. This result, however, does not represent the whole extent to which the Madras Presidency may be made influential in curtailing the general military expenditure of India. By the relief of the Madras troops from Pegu and China, there has become available a larger force than is necessary for the occupation of the territories of the Madras Presidency Proper.

77. At the same time, however, it should be mentioned that, since the Madras Estimate was submitted to the Government of India, the conditions on which it was framed have varied, and the controller at that Presidency has had to meet some additional charges, not regularly provided for in the Estimate, out of the amount of the cash assignment allotted for the expenditure of the Madras Presidency. Among these may be mentioned the return of the 21st regiment Native Infantry from China, the delay in the relief of the Native Infantry regiments in the Pegu division, the retention up to this date, in those provinces, of the two regiments

regiments of Native Infantry, which were to have returned to India at the commencement of the present official year, besides sundry other additional expenses, such as an expenditure of nearly two lakhs of rupees for a supply of beer sent from home.

78. These additional charges, as also any reductions or changes resulting in a decrease of the estimated expenditure, will be more properly subjects for comment when the actual expenditure of the year shall be compared with the Estimate, and the Report of this Department on the appropriation audit thereof submitted; but it may be useful here to compare the relative proportions of a few of the principal items of expenditure at the three Presidencies with a view to indicating the relative economy practised, and the direction in which efforts for further reduction might be made.

79. The relative numerical proportion of the three armies, as calculated for in the revised Estimates now submitted, may be shown as below:

Bengal.	Madras.	Bombay.
1	·60	·40

Madras and Bombay together being thus equal to Bengal.

The principal items of estimated expenditure indicate the following proportions:—

	Bengal.	Madras.	Bombay.
	Rs.	*Rs.*	*Rs.*
	1	·50	·36
Regimental pay and allowances - - -	3,40,44,306	1,73,66,141	1,22,31,055
	1	·56	·45
General staff - - - - - - - -	16,81,768	9,53,309	7,67,771
	1	·25	·67
Garrison and cantonment staff - - - -	9,84,709	2,55,265	6,62,932
	1	·48	·46
Office establishment of general, army, and cantonment staff - - - - - -	5,37,275	2,62,640	2,50,508
	1	·60	·58
Ordnance Department, pay and allowances -	11,50,398	6,97,681	6,69,246
	1	·45	·34
Commissariat Department, pay and allowances -	22,97,486	10,35,273	7,85,772
	1	·28	·24
Clothing Department, pay and allowances - -	1,07,192	30,793	26,295
	1	·53	·37
Medical Department, pay and allowances - -	32,65,376	17,49,046	12,29,729
	1	·53	·55
Supplies to Commissariat Department - -	79,12,400	42,66,609	43,61,048
	1	·54	1·12
Supplies to Ordnance Department - - -	3,29,716	1,78,284	3,71,643
	1	·28	·29
Supplies to Clothing Department - - -	5,62,504	1,59,820	1,68,163

80. In the above comparative statement, the revised scale of expenditure for Bengal is assumed as the correct standard for the number of men given; and although it cannot as yet be looked on as accurate, it may for the present be accepted as a fair approximation, subject to such further reductions and modifications as future experience may point out. Proceeding on this assumption, therefore, and testing the expenditure of the other Presidencies accordingly —a test which ought not to be objected to, as the assumed Bengal scale is still higher than it ought to be—the following are the results:—

	Madras.		Bombay.	
	Above proportion per cent.	Below proportion per cent.	Above proportion per cent.	Below proportion per cent.
Regimental pay and allowances	0	10	0	4
General staff	0	4	5	0
Garrison and cantonment staff	0	35	27	0
Office establishment	0	12	6	0
Pay of Ordnance Department	0	0	18	0
Pay of Commissariat Department	0	15	0	6
Clothing Department	0	32	0	16
Medical Department	0	7	0	3
Commissariat Supplies	0	7	15	0
Ordnance Supplies	0	6	72	0
Supplies of Clothing Department	0	32	0	11

81. The inference to be drawn from the above is, that the rate of expenditure in Madras is considerably below that of Bengal, whilst that of Bombay is greatly in excess of the rate in Bengal, and still more so of the Madras rate.

The most striking instances of the excess in Bombay are as follows:

Garrison and Cantonment Staff,

Pay of Ordnance Department,

Ordnance Supplies,

and to these the attention of the authorities at that Presidency will be directed.

82. The Military Estimates for the three Presidencies for 1861–62, as originally submitted by the controllers, aggregated 14,27,90,273 rupees for all India; but on revision by this department, this aggregate was considered to be capable of reduction to 12,19,75,357 rupees, provided the various reductions then contemplated were carried out, being a difference of 2,08,14,916 rupees. The future strength in Europeans for all India will certainly be below that provided for in these Estimates; and as that of the Native Infantry will probably likewise be eventually lowered by the supernumeraries being absorbed to some extent, a proportionate reduction on the aggregate expenditure may be looked for in the scale of future years if such conditions be fulfilled. The result in the way of reduction, however, as regards the ensuing year, will probably be much influenced by the demand that may be made for the replenishment of stock; for, keeping in view the urgent necessity of at present restricting the demands on the cash balances to the narrowest limits, a very large proportion of the reserve stock of Army Supplies has been ordered to be appropriated for use during this year. No immediate inconvenience will be caused by this measure; but it will be necessary to make arrangements for replenishing the reserve stock on an ordinary scale.

83. The Honourable Mr. Laing, at page 6 of his Financial Statement, stated the

the military expenditure of all India, for 1859-60, at 17,75,00,000 rupees, being an excess of 5,55,00,000 rupees, as compared with the amount (1,220 lakhs) estimated for the year 1861-62. Even after adding to this the special grant of 60 lakhs for covering delay in making reductions, and the payment of gratuities, bounty, &c., there will still be a difference of 4,95,00,000 rupees; but this cannot be considered a net saving, because some portion of outlay hitherto classed under the category of military expenditure is still incurred, although not shown under that head. The newly organised police comes within this class, and as I have not at present sufficient information to enable me to compute the probable expenditure on account of this and other charges heretofore deemed military, I must leave the exact extent of the reduction of expenditure effected in the Military Department to be shown elsewhere.

84. It may, however, be satisfactory for Government to know that if, at the close of the present official year, the scale of 1,220 lakhs for the regular military expenditure of 1861-62 is found not to have been exceeded, there is every hope that in 1862-63 a further reduction of 50 lakhs may be effected on that sum, provided modifications of the excess of military force (noticed in paragraphs 17, 18, and 19) be made, thus rendering it feasible, in case rigid economy continues to be enforced, to fix 1,170 lakhs per annum as the standard for military expenditure in India, not to be exceeded in time of peace. And, as already stated, the charge against the Indian revenues will be further reduced by 20 lakhs, payable (as shown in paragraph 8) out of the revenues of the assigned districts in Berar on account of the Hyderabad Contingent, thus affording the prospect of fixing the future military expenditure in India at 1,150 lakhs; to be met from the Revenues of India.

85. The Right Honourable the Secretary of State for India, in Despatch No. 53, of 8th April 1861 (paragraph 23), considered a prospective saving of 2,500,000 *l.* on the estimated expenditure of 21,999,850 *l.* for military and police purposes in India and at home in the year 1860-61, to be altogether inadequate, and I fully recognise the close connection between the military and police forces, as pointed out in paragraph 22 of the above Despatch. The actual expenditure for 1860-61, has not, I regret to say, yet been ascertained, either as regards the military or police forces; but presuming the military expenditure alone of that year not to have exceeded that of 1859-60—which, as given at page 6 of Mr. Laing's Financial Statement, was 1,775 lakhs rupees in India, and 275 lakhs at home, in all 2,050 lakhs—and deducting therefrom 50 lakhs on account of the augmentation in the police in relief of military force, then the difference between the military expenditure of 1859-60, and the probable outlay of 1,220 lakhs for 1861-62, on the regular scale (making with a Home expenditure of 275 lakhs as in 1859-60, a total of 1,495 lakhs), will be fully 505 lakhs.

86. This sum (1,220 lakhs) is also 3,000,000 *l.* below the Estimate of Indian Military Expenditure, exclusive of police, as given in paragraph 65 of the Despatch of the Government of India, No. 16, of the 5th February 1861; but unless a watchful eye be kept on the reinforcements sent out to India, the proportion of European force reduced, and the Artillery force modified, it may not be in the power of the authorities in India to realise present expectations. Again, assuming the cost of the police force in India at 180 lakhs (a figure that, in the opinion of many authorities, it ought not to exceed), the combined expenditure for the military and police forces during 1861-62 will probably be lakhs 1,220 + 180=1,400 lakhs, which, exclusive of the Home expenditure of 275 lakhs, is 525 lakhs rupees below the Estimate of 1860-61, to which the Secretary of State for India refers; thus affording the prospect of fixing the future scale of expenditure in India, for both military and police forces, at a sum below 1,400 lakhs.

87. I must now briefly advert to the mode of disposing of receipts or cash recoveries of the Military Department, accruing out of the sales of stores, hospital stoppages, compensation for damages, &c. In paragraph 29 of this Department's Report, No. 225 A., dated 5th April 1861, on the Estimate of the Madras Presidency, it was recognised that, in accordance with the principles of the Budget Estimate, and in order to attain clearness of accounting, and a right knowledge of the extent of the liabilities of Government on account of

military expenditure, these recoveries should be treated and accounted for as a part of the common revenue, instead of being directly set off against the military expenditure in abatement of the demand on the Government cash; in other words, that departmental recoveries shall be surrendered to the Government Treasury, and not appropriated in defraying military expenditure.

88. At the same time, however, there is one peculiarity in the receipts or cash recoveries of the Military Department which ought to be considered in intimate connection with the military expenditure, namely, that the receipts flow from the expenditure itself, being, in other words, a refund or payment for supplies actually furnished, and should properly be viewed as a set-off against the expenditure, as being a *bonâ fide* return into the Treasury of money advanced. Thus, when the net military expenditure is to be shown, the amount of recoveries in the year should be deducted from the amount of the gross expenditure, and both Estimates and Accounts should be viewed accordingly. This proposition may be thus illustrated:—The cost of dieting a soldier in hospital is estimated at 180 rupees per annum, and the full amount is entered in the estimate of expenditure; but two annas per diem is recovered from every sick soldier of the rank of private, and three annas for a sergeant, and thus 46 and 67 rupees per annum may be recovered respectively, reducing the net cost to Government for the private whilst in hospital to 134 rupees per annum, and that of the sergeant to 117 rupees. A still better illustration is to be found in the mode of supplying arrack and malt liquor to the army. The stock of arrack and malt liquor laid in annually for the use of the army of all India costs nearly 70 lakhs, including value of liquor, carriage, &c., and a demand for cash to this extent having to be made on the Government Treasury, must, therefore, be included in the Military Estimate of cash requirements; but the liquor is retailed to the soldier at a price on which the Government lose about 25 per cent., so that out of the 70 lakhs Government recover about 50 lakhs.

89. These receipts or cash recoveries are estimated as follows for the year 1861-62:—

	Rs.
Bengal - - - - - - - -	33,00,000
Madras - - - - - - - -	13,78,900
Bombay - - - - - - - -	18,25,500
Total - - -	*Rs.* 65,04,400

giving a proportion of nearly five per cent. on the aggregate estimated expenditure; while the proportion at each Presidency is for Bengal five, Madras four-and-a-half, and Bombay seven-and-a-half per cent. And deducting 65 lakhs on account of the military receipts or cash recoveries of the year, the net expenditure during 1861-62 (regular scale) will be 1,155 lakhs rupees; and the prospective scale of net expenditure in future years (as given in paragraph 84 at 1,150 lakhs) may therefore be set down in round numbers at 1,100 lakhs, taking future recoveries at 50 lakhs instead of 65, as estimated for 1861-62.

90. I would also note that, to arrive at a correct conclusion with reference to the net military expenditure of India, the charges entered in these Estimates for supplies made by the Military to the Civil Departments should likewise be deducted. The cash assignments to be expended by the Military Department in making supplies to Civil Departments and in paying salaries to officers in civil employ, amount to about 10 lakhs, an amount which, while included in the Military Estimate because the Military Department has to make provision for the supply, should properly be deducted from the gross military expenditure. This course the Government of India have in a great measure recognised by Financial Resolution, No. 176, dated 19th August 1861, directing that all supplies obtained by the Civil from the Military Department shall in future be

be paid for; but the details to give effect to this arrangement have not yet been finally settled.

91. I cannot close this report without putting on record my conviction that all the labour, care, and thought bestowed on the introduction of the budget system will be rendered futile, unless an equally radical reform be insisted on and carried out in the Department of Accounts. It has been very properly remarked that the budget is at one end of the system, the accounts at the other, and each is essential to the other for completeness. The fundamental principle of the budget estimate system is the clear and detailed specification of all requirements of the several branches and departments; and unless the accounts be adapted to this system, by ensuring a careful and prompt audit of all charges, Government will not be able fairly to test the operation of the budget, and will seek in vain for the fulfilment of the economical results expected to be attained by its adoption.

92. The prejudices and difficulties which interfered with the introduction of the budget system have already, to a great extent, been overcome; but similar ground has to be gone over in reference to the account system. Old established ideas, and time-honoured modes of procedure, have now to be swept away, and care must be taken not to allow the effort by which the changes are effected to be too soon relaxed, for fear of the reaction that may temporarily be felt; but, at the same time, I may assure Government that once the results of the change of system are fully exhibited, there can be no doubt as to its advantages being recognised and fully appreciated.

93. The many complaints heretofore made against Indian accounts all had their origin in the practice, arising from delay in audit of compiling the accounts from unaudited returns. The results so obtained were necessarily incorrect, and when given as the ascertained results of the year's transactions were liable to be qeustioned on comparison with results subsequently deduced from audited transactions, and in this way confidence in these statements was frequently shaken. But with the prompt audit, which is a leading principle of the new system, these defects will, I trust, be obviated; and I also hope to be able greatly to diminish clerical labour by only requiring one set of accounts to be furnished, accurately prepared from audited data, whereby the liability of error will be greatly lessened, if not entirely removed.

94. I may here mention some changes that have already been introduced into the Military Department of Accounts:—

I. A classified statement of unaudited receipts and disbursements is submitted at the close of each month, in order that the extent to which the cash assignments are operated on may at all times be known.

II. A monthly statement of audited receipts and disbursements is furnished as soon after the monthly audits of each department is effected; and is considered due on the 15th day of the second month following that in which the disbursements were made. In Bengal the disbursements in the Pay Department, made in May, June, and July, for the pay of the troops, have already been audited, compiled, and sent in to the military accountant; and the commissariat disbursements for the same period are also audited.

III. A quarterly statement of audited receipts and disbursements is required to be submitted with a statement of the unadjusted cash payments.

IV. Immediately after the close of the official year an annual statement is to be submitted, showing all the audited receipts and disbursements of the year. This document will, in fact, be an abstract of the accounts of the current year, and when compared with the aggregate of the 12 months' unaudited cash disbursements will indicate the exact amount of the adjustments to be effected in the following year on account of the current year's transactions; and these unaudited disbursements again, when compared with the estimate, will show the amount of the cash assignments remaining unappropriated during the year.

Lastly. Arrangements have been made for an entire separation between current and arrear charges, by means of which the expenditure of each year will

be distinctly ascertained—a result which hitherto could never be attained with precision.

95. Far more extensive reforms are, however, necessary, before a simple and intelligible system of accounting can be substituted for the present system that has become unnecessarily cumbrous, mainly by reason of misapprehension and misuse of technicalities, which, when properly applied, are invaluable. I am now giving close attention to this subject, specially as regards the remodelling of the Military Accountants' Offices at the three Presidencies; and think I may assure Government that some progress has already been made, and that there is every prospect of much more being shortly accomplished.

96. I cannot conclude this report without representing to Government the obligations which, as head of the Military Finance Department, I feel to Mr. A. P. Simkins, one of the recently appointed assistant secretaries, who had for nearly a year previous worked in my office, and acted as my personal assistant. Mr Simkins' useful labours have once before been brought to the notice of Government in connection with the Budget Estimate Report* of the Military Finance Commission; and I have much pleasure in again bearing my testimony to his untiring zeal and accurate knowledge of the whole system of military accounting, to which I am indebted for great assistance in all that I have been able to effect in this department.

* No. 7 of 15th June 1860.

I have, &c.

From the Chief of the Military Finance Department, to the Secretary to the Government of India, Financial Department,—(No. 683A., dated 22nd August 1861).

Sir,

STORES received from England being an important item of military expenditure, I beg to solicit the attention of Government to the following circumstances in connection therewith:—

2. The Government of India have repeatedly since the beginning of 1859, when the war expenditure was ordered to cease, urged on the authorities at home to limit the dispatch of stores to the precise quantity and description applied for, with the view of preventing all unnecessary outlay, until the finances have somewhat recovered; and more recently in Despatch No. 16, dated Fort William, 5th February 1861, to the Secretary of State (printed in Parliamentary Papers No. 233 of 9th May 1861), Government stated (paragraph 71), that to bring down "the military expenditure very nearly to the established cost of the year before the mutiny, within a few months of the present time, will indeed be an arduous task," and pointed out (paragraph 72), the absolute necessity that rigid economy should be observed in respect to stores," and "that no stores should on any account be purchased or shipped for India or England, unless upon a distinct requisition, based on the fullest consideration here, both that the stores are really required and that they cannot be obtained at a lower price in India."

3. These earnest requests have not however received due attention, and it appears to me essential now to bring under the consideration of Government the large supplies of stores of late despatched from England, amounting, according to valuation statements I have received from the Accountant General, to no less than *Rs.* 36,71,966. 3. 6, on invoices as per margin, dated India Office, London, on or after 1st January 1860. All these stores must therefore have been shipped after 1st January 1860; the earliest invoice (being military stores sent overland) is dated 1st January 1860: and the latest received invoice is dated 24th May 1861, the stores last invoiced being on board the Accrington, not yet arrived. For these stores freight, as per margin,* is payable in India. I enter in the margin† a detailed statement of the departments for which these stores are intended, in order that the Government at Home may refer to the copies of the invoices to verify the figures now given.

4. I will not conceal from Government that I little anticipated such extensive supplies being sent out, fully expecting that the measures adopted last year, and the communications made to England would have stopped the despatch of supplies from England: and I beg to draw attention to the representation of the Government of Bombay, No. 62 of 4th July 1861, to the Secretary of State, in reference to the despatch of 1,500 smooth-bore carbines, although the requisition for them was cancelled last year: *vide* Financial Resolution, No. 678, of 6th August 1861.

5. The Secretary of State, at the close of paragraph 25 of Despatch No. 53, dated 8th April 1861, in reply to the Despatch of the Government of India of February 1861, already quoted, pointed out, that "effective measures for reducing the demand for stores can only be taken in India, by economy of expenditure, by obtaining in India all stores which can be procured there on equally reasonable terms as in this country, and as regards such supplies as are required from England, by taking care that no larger quantities are indented for than are absolutely necessary;" adding that "there can be no doubt that by attention to the foregoing considerations a great saving may be effected under this head."

6. The soundness of these remarks is indisputable; but I venture to submit that all economical measures adopted in India are insufficient, unless the Home Government fully co-operate by limiting the despatch of stores strictly to the actual demands made by the Government of India. That this course has not been followed, even up to the latest date, is evident from the fact of the latest invoice above quoted being dated the 24th May, although the Government of India earnestly requested, in Financial Despatch No. 37, dated 13th March 1861 (paragraph 15), referring to the probable supply of stores to the value of 944,470 *l.* in 1861-62, "that no stores whatever be purchased or shipped in England without proper indents from India." The Secretary of State had previously in paragraph

	Rs.	*a.*	*p.*

Grand Total *Rs.*	36,71,966	3	6

paragraph 25 of his Despatch of 8th April, already quoted, stated in reference to the remarks of the Government of India, in paragraph 72 of Despatch No. 16, that "no stores are supplied from this country, except on indents received from India, and then only on a careful comparison of the quantity applied for with that reported to be in store, and the average consumption of former years," and yet the indents that have come before me do not contain demands equal to anything like the amount proposed, or even actually shipped. Neither does it appear that there is any exact record kept at home of stores demanded and supplied for India; for the Secretary of State says in paragraph 8 of his Despatch of 8th April 1861, that the case of the stores of which an excess of 13 lakhs in value were reported to have arrived in Madras cannot be ascertained in London.

7. My object in now referring to the past is to show the necessity of taking measures to prevent similar errors in future; and I would suggest the following for the consideration of Government:—My colleague of the Audit Board (the Honourable E. Drummond) agrees with me that it is essential, in order to enable the Chief of the Military Finance Department to exercise proper control over stores, that he should be put in immediate possession of the invoices, as received, of all stores, military, medical, clothing, marine, &c., sent from England; and in order that I may accurately ascertain what stores have lately been received, I would request that all invoices of military, medical, clothing, ordnance, and marine stores received within the last two years by the Governments of India, Madras, and Bombay, be sent to me, with abstracts thereof, showing on what indents the stores so invoiced were sent out, and distinguishing departments.

8. I now recommend the following measures for the future:—

That the Account Department of each Presidency should be directed promptly to forward, as received, both to the Comptrollers and Chief of the Military Finance Department, copies of all invoices and advices of stores intended to be, or actually despatched from home; and that the invoices should show the dates of indents on which the stores are sent out.

That the Governments of Madras and Bombay be forthwith requested to send in to me valuation statements of all stores still due, or expected from England, showing for what departments and on what indents due.

That a list of all indents as yet uncomplied with, showing for what departments and the dates on which sent home, as also a list of all departmental indents cancelled, or in part cancelled, be also sent in, showing dates of indents and when cancelled, and what measures have been taken to cancel them. The estimated value of the stores still due on each indent should also be stated.

That the amount value of stores not now required be ascertained, and the Secretary of State promptly apprised thereof, in order, if possible, to prevent their purchase and despatch; and as there is at present no pressing necessity for many stores being sent to India, a request might be sent home from the Government of India to detain all stores purchased or contracted for, even if ready for shipment, until calls be made for them from India.

That the heads of departments in each Presidency be required to specify the names and quantities of any stores urgently required, stating the reason why urgently needed, and giving a valuation thereof; and on this statement the Governments of Madras and Bombay will decide on calling for the supplies from England, reporting the same to the Government of India, and communicating the orders to the Military Finance Department.

9. I now venture to draw the particular attention of Government to the great delay that constantly occurs in England in complying with demands made from India for stores, a delay which long experience convinces me is the cause of great waste of money; first, because requisitions are necessarily framed, so as to provide for the contingencies of delay, or only part compliance; and secondly, because stores demanded for some particular purpose frequently do not arrive until after it has been found necessary to make some other arrangement, perhaps purchasing the required article in the spot at considerable cost.

10. I submit that if heads of departments in India are to reduce their demands for stores to the lowest standard compatible with efficiency, that efficiency can only be ensured by prompt and exact compliance on the part of the home Government with all demands thus made. Unless this be ensured, officers risk not only their own credit but the interest of the State, by reducing their demands to the extent which I believe to be practicable, and which is now enjoined on them; and I would therefore entreat Government to press the point of this delay on the notice of the home authorities.

11. The importance of showing in all invoices of stores the date of the indent calling for the supply, and by what department the stores were demanded, with a view to prevent confusion in respect to stores when received in India, should also be brought to the special notice of the Secretary of State; and this record will likewise enable the Government to ascertain that no great delay has taken place in England in meeting the demand. The Secretary of State, in a Despatch to the Government of Madras, No. 26, dated 29th June 1861, has promised to send priced invoices for stationery supplies as for all other stores; and I beg to urge that this arrangement be attended to, and the invoices promptly sent out. The Secretary of State for India has also, in a Despatch to the Government of Madras, No. 111, dated 7th June 1861, called for an estimate of the probable quantities of

stores which will be required for service in that Presidency during the year 1862–63 to be transmitted, so as to reach the War Department by the 30th November next. This arrangement will bind the Government of India to take the stores thus estimated for, and as the War Department will enforce this responsibility, I advise the Government of India to require a statement of the probable balance of stores remaining at the end of the current year to be also sent up by the Governments of Madras and Bombay. Moreover, each head of a department should be invariably required to make an estimate, even an approximate one, of the values of all stores demanded from home, and this valuation being submitted to the Military Finance Department.

I have, &c.

(signed) *G. Balfour*, Colonel,
Chief of the Military Finance Department.

From the Chief of the Military Finance Department to the Secretary to the Government of India, Military Department (No. 801A., dated Calcutta, 16th September 1861).

Nos. 127, 263, 268, and 283; the three first dated 24th June, and the last 16th July 1861.

SIR,—I have the honour to acknowledge the receipt of your dockets, Nos. 668, 740, 787, and 1209 of 16th, 17th, 19th, and 29th August 1861, accompanying copies of Despatches from the Secretary of State, as per margin.

* 6 Sergeants.
12 Corporals.
10 Bombardiers.
350 Gunners.
350 Drivers.
728

2. Despatch No. 263 intimates the intended embarkation of 728 * men and non-commissioned officers of artillery from England, in order to complete the batteries and garrison companies of the Bengal brigades of artillery. Despatch No. 283 authorises the men of the brigades of Royal Artillery, at present serving in India, to volunteer for the troops, batteries, and companies of the new brigades of artillery formed in Bengal, Madras, and Bombay; and Despatch No. 368 directs (paragraph 5), that no more batteries of the 11th, 13th, and 14th brigades of Royal Artillery be sent home, until the requisite force of artillery for the permanent garrison of India shall have been decided upon.

No. 650A., of 16th August 1861, forwarded to Military Department, No. 651A., of 16th August 1861.

3. The proceedings of the Madras Government referred to in the postscript of my letter to the Financial Secretary, as per margin, show similarly that recruits are being sent out to complete the artillery brigades; and the instructions in Despatch from the Secretary of State, No. 127 of 24th June 1861, give the details for Madras at three sergeants, eight corporals, 10 bombardiers, 150 gunners, 150 drivers; total 321. I have no doubt that the Bombay artillery has also been re-inforced, but I have not received from you a copy of the Despatch addressed to the Government of that Presidency, as in the case of Madras.

† Copy forwarded, and memorandum No. 651A., dated 16th August 1861.

4. I have already in my letter † to the Financial Secretary, No. 650A., dated 16th August 1861, fully set forth the importance of enforcing further economy in the military expenditure of India; and I beg to bring to the notice of Government that there now appears to me to be a favourable opening for carrying out further economical measures in the artillery branch, thereby complying with the wishes of the Secretary of State, who, in the printed Financial Despatches laid before Parliament, strongly advises further reductions being made in the forces maintained in India. The Secretary of State, in his place ‡ in Parliament, also distinctly stated that the reductions in the military expenditure had not been carried so far as he could have wished; and, judging from the remarks of other Members, the strength of the European forces in India appears to have been considered by the Secretary of State as large.

‡ *Vide* "Times" Report of 26th July 1861.

5. I submit to Government that the most expensive portion of batteries and companies of artillery, namely, the cadres of officers, are already in existence. In the Indian artillery alone there are cadres of officers for 112 companies and batteries, being more than the full number of batteries and companies required for the permanent garrison of India, and in addition there are 19 companies and batteries of Royal Artillery, exclusive of the remaining two troops of Royal Horse Artillery ordered home, making a total of 131 batteries and companies, or 25 cadres in excess of the garrison, as fixed by the Despatch No. 18 of 18th May 1861. I therefore venture to recommend that a reduction of the number of cadres of batteries and companies at present serving in India be now effected by sending home a great portion of the Royal Artillery, and allowing the men to volunteer. By this arrangement only the expense of cadres of officers will be thrown on the British Government.

6. It has been decided that the establishment of the 14 brigades of artillery of Bengal, Madras, and Bombay, be only completed to 106 batteries and companies, instead of 112; but as five out of the six batteries wanting are in the seven brigades fixed for the Presidencies of Madras and Bombay, whilst only one battery is wanting in the seven brigades of Bengal, I would suggest further that the total number of batteries of artillery to be kept for the present wanting to complete be raised to 10 out of 112; thus making the number of batteries wanting in the seven brigades of Bengal the same as in the two other Presidencies (five), instead of, as at present, only one battery. This will for the present leave 102 batteries as the establishment of the 14 brigades, instead of 112, and, as a temporary

temporary measure, I would advise that these deficiencies be supplied by one brigade of Royal Artillery of eight batteries being kept in India, thereby raising the batteries and cadres to 110 in number, instead of 102; thus allowing of the cadres of 11 supernumerary batteries of Royal Artillery at present serving in India (besides the eight batteries) being permitted to return to England after allowing the men to volunteer to stay in India. The British Army Estimates show that England raised one brigade of Royal Artillery (of eight batteries) during the Indian Mutiny; and although the retention of this brigade in India will burthen the Indian finances, still it may be considered as only giving a fair relief to the British finances, supposing the financial necessities of England to equal those of India.

7. In my letter to the Financial Secretary above referred to, I stated that the head-quarters of the 13th brigade Royal Artillery had proceeded home, but I have since learned by the Bombay Army List that the head-quarters of this brigade, although long since ordered home, are still borne on the rolls of the Bombay Army; whereby the finances of India are chargeable with three Colonel Commandants and six Colonels, besides other expenses appertaining to the brigade. The head-quarters of the two other brigades (11th and 14th) also add to the expenses of India in as great a proportion, so that the total charge for the head-quarters and cadres of the three Royal Artillery Brigades, exclusive of batteries, cannot be less then seven lakhs a year. Now as all the head-quarters could be spared from India, I submit that this is an unnecessary burthen on the Indian finances, which should be removed as soon as possible, and the arrangement now proposed would allow of the head-quarters of the 11th and 13th brigades of Royal Artillery being sent home, thus considerably diminishing the cost of the artillery in India, and giving some relief to the finances.

8. The permission conveyed in Despatch No. 283, for men of the troops and batteries of Royal Artillery ordered home to volunteer for batteries in India, may also be so carried out as to obviate unnecessary charges both to England and India. I may point out that the large contribution to be paid by India under the agreement between the Secretaries of State for India and for War, as set forth in Despatch No. 90 of 31st May 1861, can only have been fixed with reference to India being relieved as much as possible from the payment of passage money, by being enabled to keep up the Indian strength by means of men in India volunteering to stay in the country; and on carefully perusing Despatch No. 283, I do not understand that the condition on which this volunteering may be authorized precludes the offer by Government of the usual bounty to men who are willing to remain: an arrangement which is invariably acted on in respect of infantry and cavalry soldiers when called on to remain in India, as explained in paragraph 29 of my Report, No. 281 of 20th April 1861. Further, in reference to the expense of sending soldiers home, it would be true economy, both for the Government of India and England, to grant a money allowance for remaining in India, in preference to paying the sum of 30 *l.* per head for the passage home of each soldier. The British Government has to repay to India the sums marginally stated for each man re-landed in England. Now this amount would be saved to the British Government by not sending home the artillerymen of Royal Artillery batteries; and India on her part would save the passage money of 30 *l.*, minus the small sum given to the soldier to induce him to remain.

Vide printed letter, No. 281 of 20th April 1861.

	Levy Money. £.	*s.*	*d.*
Infantry	18	1	–
Cavalry	31	13	11
Horse Artillery	61	2	6
Foot Artillery	37	4	–

9. This measure would also probably be the means of a further saving to the British Government, for if many men were thus induced to volunteer, recruiting for the artillery in India might cease for at least twelve months, so that the recruiting staff for the artillery depôt in England might be broken up, and a considerable diminution effected in the large expenditure calculated to be incurred at home on account of recruits for the Indian artillery, and payable out of the contribution paid by India to England under the agreement set forth in Despatch No. 90 of 31st May 1861. This contribution I believe fully provides for artillery recruits being kept in depôt for one year, instead of one-third or one-half of that period, which, I understand, is the time that infantry soldiers are to be kept at drill at the expense of the British Government before being sent to India. The money saving that would result to the finances of England by a year's cessation of recruiting, and supplying trained recruits for the artillery in India, would be far greater than the expense to the home finances consequent on sending home the head-quarters of brigades, and surplus cadres of batteries of Royal Artillery now serving in India. This recommendation is therefore strongly urged, and on the special ground that late measures have relieved the British finances from many heavy charges to which they are legitimately liable. The European force now in India is at its present effective strength already in excess of that (subsequently modified) fixed by the Despatch of the Government of India to the Secretary of State, No. 18 of 18th May 1861, for the garrison of India; and as on the arrival of the recruits, now on the passage out, the numbers will be considerably in excess of that strength, I therefore submit that Indian finances are entitled to consideration with special reference to the fact, that the British Government have sent men to the extent of 90 privates per regiment out to India, instead of retaining them in depôt, and paying for them whilst there kept.

10. I would also earnestly solicit the attention of Government to the importance of endeavouring to diminish, as far as possible, the movements of troops to and from England, in order to keep down the cost of transport. The discussions on the item of outlay for transport have been very numerous, and several authorities have remaked on the expensive mode

mode of providing the European garrison for the occupation of India, and have raised grave doubts as to the propriety of causing the Indian revenues to bear the cost of moving troops to and from India. The contribution agreed on as payable by India, under the terms of the Despatch No. 90 of 31st May 1861, especially excludes the cost of passage of troops to and from India as payable by England out of the contribution, and as the agreement is only to be in force for one year, and then to be revised, it becomes essential to point out that the British Government have the power of increasing Indian expenditure uncontrolled by the Government of India. The course lately followed at home of emptying the English depôts of recruits by despatching them to India is a good illustration of that power. The home charges payable by the British Government out of the money contribution paid by India to England are thereby lessened, and not only are the charges in India thus increased, but further, by augmenting the number of men in India, the amount paid to England by India is largely swollen. The terms on which the contribution is settled are doubly disadvantageous to India by the extra charges for passage and the amount of contribution for which India is liable, and it is therefore necessary to endeavour to prevent all movements which will unduly add to the Indian charges, and cause objections to be urged against the new system,

11. I would therefore venture to urge that the proposition of offering a small bounty to men, artillery, infantry, and cavalry, volunteering to prolong their service in India, may receive favourable consideration; but this may be considered temporary, pending such other arrangements as time and experience may show to be well calculated to ensure the success of the new system. Under any circumstances, however, I have no doubt that if the data were accessible on which the calculations for fixing the contribution of nearly one million sterling is to be paid by India, it could be shown that these fully provided for the charge for passage money being diminished by men being induced to remain in India; and to withhold this ordinary and unimportant allowance from artillerymen is to increase the charges on Indian finances, and is, as I think, at variance with the agreement between the two Governments.

12. I have also to beg the attention of Government to the instructions in the 3d and 4th paragraphs of Despatch No. 127 of 24th June 1861, forwarded with docket No. 1209 of 29th August 1861. Timely provision for the right carrying out of the orders may prevent inconvenience and expense, and I suggest that the arrangements to give effect thereto be early made.

13. Since writing the above, I have received by this mail Parliamentary Papers, No. 397, dated 2d July 1861, showing that a portion of the Royal Artillery is expected in England, thereby causing an addition to the English Army Estimate. This document shows that the 6th and 7th batteries of the 13th brigade and the head-quarters of that brigade, now on the Bombay establishment, are expected home, and as the 2d and 8th batteries of the same brigade, on the Madras establishment, have been recommended by the Government to be withdrawn (*vide* paragraph 5 of letter No. 650A., dated 16th August 1861, to Financial Secretary), I submit to Government that these two batteries of the 13th brigade might also be despatched to England, making, with the two from Bombay, in all four batteries sent home.

14. There will then remain only one battery of the 13th brigade on the Indian establishment at Bombay; and as that one battery has hitherto been kept at Aden, but is now ordered to be relieved by a Bombay artillery battery, I suggest that, by its despatch to England, the whole of the 13th brigade will then have left India.

15. I observe that a large strength of artillery is expected to be added to the army in England by these movements; but, as I have already pointed out, a small sum of about one or two pounds sterling will induce many of the artillerymen to remain in India; and as the Government of India will save largely by the measure of only sending home five cadres of probably 150 men of all ranks, instead of 1,000 of all ranks, if the batteries went home complete, and as England will also be relieved from the charge which they expect to arise from the men returning to Europe, I suggest that this obvious measure of economy be adopted. I have also received a notification from the quarter-master general of the army, No. 1599C., dated 2d September 1861, that the E. and F. troops of Royal Horse Artillery are ordered home from the Bengal Presidency. I do not advise men being called on to volunteer for horse artillery service, as the Government of England have to repay to India a much larger sum for each horse artilleryman landed in England than for foot artillerymen, and there is on the establishment of Bengal a very large proportion of horse artillery; but still, if one or two pounds will induce horse artillerymen to remain in India, I think the opening should be given the men to stay.

I have, &c.

Endorsement to Military Department, No. 10361, dated 23d August 1861.

Despatch from the Right Honourable the Secretary of State for India, No. 122, dated 2d August 1861, paragraph 15.

Letter to the Military Finance Department, No. 11563, dated 24th September 1861.

Letter from the Military Finance Department, No. 912*a*, dated 27th September 1861.

Letter from the Military Finance Department, No. 974*a*, dated 8th October 1861, and its enclosures.

RESOLUTION.—His Excellency the Governor General in Council observes that the reports on the Military Estimates and the results exhibited therein reflect great credit on the Military Finance Department.

The special attention of the Right Honourable the Secretary of State for India will be invited to paragraphs 16 to 24 of the Military Finance Department's Report of the 8th instant, No. 974*a*, as showing the necessity for the greatest care being taken that the opinion of the Government of India should be obtained on every proposition to send out recruits or stores to India before any expense is incurred or contract entered into in England.

With reference to the correspondence noted in the margin of paragraph 24 of the above-mentioned Report, his Excellency in Council observes that the letter from the Military Finance Department, No. 650*a*, dated the 16th August 1861 (not No. 650, dated 18th August 1861), was forwarded to the Military Department on the 23d idem, with a remark that the circumstances therein detailed seemed to call for immediate action in the reduction of military expenditure, and with the recommendation that early consideration be given to the suggestions put forth by Colonel Balfour. The other letter, No. 801*a*, dated 16th September 1861, a copy of which accompanies the report under consideration, being addressed to the Military Department, calls for no particular remarks in this department at present.

The results detailed in paragraphs 34 to 45 of the report of the 8th instant are most satisfactory. It is obvious, his Excellency in Council remarks, that economy has been very successfully enforced in the Commissariat Department. Colonel Balfour does not, in the present report, specify any officer of that department by name, except Colonel Thomson, the Commissary General of Bengal; but it is known to the Governor General in Council that Major Reddie, Officiating Commissary General, and Major Hobday, Examiner of Accounts, have done excellent service in enforcing regularity in the accounts, and in working up heavy arrears, and that it is very mainly by their aid that transactions of a magnitude exceeding anything hitherto known in India have been successfully closed. Therefore Colonel Balfour is desired to express to these officers the satisfaction and commendation of the Govenor General in Council

The special attention of the Bombay Government will be requested to paragraphs 47 to 75 of the report, with the remark that such orders should be issued by that Government as may appear to it to be necessary, with a view to carry out the reforms recommended by Colonel Balfour, and to enforce greater economy and a closer agreement between the estimates and the actual results in future.

The Governor General in Council has not failed to observe numerous instances, some of them noticed in the present report, but which have not always been

been separately reported, either by the Government of Bombay or the Military Finance Department, in which the Government of Bombay has exerted itself with the best effect in promoting economy in the Military Department; and the Governor General in Council desires to express his acknowledgments to his Excellency the Governor of Bombay in Council and to his Excellency the Commander in Chief of Bombay for the very substantial aid thus rendered. But it appears from the facts stated, that there is still room for much systematic enforcement of economy and closer departmental control of expenditure in Bombay; and in the completion of what has been commenced, the Governor General in Council relies on a continuance of the aid which the Bombay Government has so effectually afforded.

With reference to paragraphs 75 to 80 of the report, the Governor General in Council tenders his cordial acknowledgments to the Government of Madras for the care, accuracy, and punctuality with which in every branch the estimates have been framed. In this respect, as well as in practical economy, the Madras estimate still shows a result more favourable than any other part of India.

On the subject of paragraphs 92 and 93, the Governor General in Council will be happy to receive any specific propositions Colonel Balfour may have to offer. The results reported in paragraph 94 are on the whole very satisfactory.

With reference to paragraph 96, the Governor General in Council requests that Colonel Balfour will be good enough to convey to Mr. Simkins an expression of the satisfaction with which the Government of India has read this testimony to the valuable assistance he has rendered in the preparation and revision of the estimates now submitted.

To Colonel Balfour himself the thanks of the Governor General in Council are especially due, both for the results reported, which are the fruit of long and laborious exertion in an arduous and important branch of the Public Service, and for the report itself, which gives a very satisfactory review of the probable working of the Military Finance Department for the current year.

Ordered, that a copy of the above resolution be forwarded to the Military Finance Department for information and guidance, and for further report on the subject of paragraphs 92 and 93 of his report.

Also, that copies of the present * papers and of this resolution be forwarded to the Governments of Madras and Bombay, respectively, with a request that every possible aid may be given to ensure the estimates due in January † next being sent in as complete and as punctually as possible, after careful revision, by every officer and department who has any thing to say in regard to the sums to be fixed.

Also, that a copy of this resolution and of the present* papers be forwarded to the Military Department for communication to the Adjutant General of the Army, and for any further orders which may be required in that department.

Also, that a copy of this resolution and of the present* papers be forwarded to the Honourable the Lieutenant Governors of Bengal, North Western Provinces, and the Punjab, for information.

And that a copy of the papers and of this resolution be forwarded to the Right Honourable the Secretary of State for India.

(A true Extract.)

Secretary to the Government of India.

† The local civil auditors (accountants) to close their several budget estimates, so as to reach the local Governments on the 10th January.

The local Governments to examine the budget estimates, and send them in to the Financial Department of the Government of India on the 25th January: *vide* Financial Department Notification, No. 121, dated 15th June 1861.

MINUTE by His Excellency the Right Honourable Earl *Canning*.

I CANNOT lay down the Government of India, especially at a time when its financial prospects are so much more cheering than 12 months ago any one then conversant with them dared to hope for, without recording my strong sense of the value of the services which Colonel Balfour has rendered to the Government as head of the Military Finance Commission and Department. I have already, in referring to the services of his predecessor, Colonel Jamieson, noticed the origin and object of the commission of which these officers were, in turn, the chief members, and I will only add, that it is my conviction that without the energy, knowledge, and ability which Colonel Balfour has brought to the discharge of his functions during the last 12 months, the Government of India would not yet have reached the certainty of a balanced expenditure and income, which is now before it.

Colonel Balfour has deserved eminently well both of the Governor General in Council and of Her Majesty's Government, and I have pleasure in recording, as the head of the Government of India, my high appreciation of the aid and services rendered by him, and my cordial thanks for them.

11 March 1862. (signed) *Canning*.

MINUTE by the Honourable Sir *H. B. E. Frere*.

I ENTIRELY concur in all that is recorded by his Excellency the Governor General relative to the signal service rendered by Colonel Balfour as a member of the Military Finance Commission, and latterly as head of the Military Finance Department; I stated on the occasion referred to in his Excellency's Minute, my estimate of the share which the commission and the department, as now constituted, have had in bringing about our present condition of financial prosperity, and I will only add, that I consider the possibility of preserving the present financial equilibrium, of income and expenditure, depends mainly, I believe it might with truth be said entirely, on the maintenance of the Military Finance Department, or of a department similarly constituted, as a separate department, in free and confidential communication with the Governor General in Council, qualified to submit sound professional opinions on every ordinary branch of military expenditure, free to express those opinions, and bound to do so on all questions which are likely to affect, directly or prospectively, the aggregate of that outlay.

(signed) *H. B. E. Frere*.

11 March 1862.

MINUTE by the Honourable Sir *R. Napier*.

I ENTIRELY concur with Lord Canning's Minute, which appears to me to express distinctly and fully what is due to Colonel Balfour and the Military Finance Commission and Department.

Colonel Balfour possesses a very rare amount of knowledge and experience of departmental administration in all branches of military affairs, and has pressed the adoption of reforms with admirable firmness and consistency.

If Government has not on all occasions thought proper to go to the extent of Colonel Balfour's recommendations, it has fully appreciated the zealous labour and public spirit with which they have been designed.

Without going quite so far as either Sir Bartle Frere's or Mr. Laing's Minutes, (for I consider that the expenditure of each and every department, political, civil, and judicial, as well as military, equally require check and scrutiny), I do not think the time is come for any material alteration in the Military Finance Department, provided a suitable successor to Colonel Balfour can be found.

I must cordially concur with his Excellency the Governor General in proposing to send Lord Canning's Minute to the Secretary of State, and I think Colonel Balfour should not leave India without a public expression of the approbation of the Government.

(signed) *R. Napier*.

9 April 1862.

MINUTE by the Honourable *S. Laing.*

I MUST entirely and cordially concur with every word of Lord Canning's Minute.

Having been in almost daily communication with Colonel Balfour since I took charge of the Department of Finance, I can speak perhaps better than any one as to the great advantages which the State has received from his zealous and indefatigable services.

The actual military expenditure of India for the year ending 30th April 1861 was 15,838,980 *l.*, this year it will not exceed 12,800,000 *l.*, and for 1862–63 it will be little above 12,000,000 *l.*

This result has been attained without impairing substantial military efficiency mainly by a series of economies, each requiring practical military experience and a careful consideration of military circumstances.

Here the aid of the Military Finance Commission and of its head, Colonel Balfour, has been invaluable both in suggesting reforms and in carrying them into practical effect when decided upon, and I entirely agree with Sir Bartle Frere that the maintenance of the Military Finance Department on its present footing, as the responsible instrument of the Governor General in Council for checking military expenditure, is, of all other conditions, the one most essential for the financial future of India.

(signed) *S. Laing.*

7 April 1862.

MINUTE by the Honourable *C. Beadon.*

I SHOULD wish to express, if the opportunity have not passed, my entire concurrence in Lord Canning's Minute, the substance of which, in the form of a letter from the Government, might be communicated to Colonel Balfour before he leaves India.

(signed) *Cecil Beadon.*

7 April 1862.

MINUTE by His Excellency the Governor General.

I AM of opinion that these Minutes on the services rendered by Colonel Balfour, in the justice of which I entirely concur, should be forwarded to the Secretary of State.

(signed) *Elgin & Kincardine.*

10 April 1862.

COPY FINANCIAL LETTER to the Government of India, dated 9 July 1862, (No. 99).

1. I HAVE received and considered in Council your Financial Letter, dated the 19th April last, No. 57, forwarding Minutes recorded by the late Governor General and the several members of the Government of India as to the services rendered by Colonel G. Balfour, as chief of the Military Finance Commission and Department.

2. In my Financial Despatch, dated the 9th ultimo, No. 83, I expressed my gratification at the active energy shown by your Government, by the Governments of Madras and Bombay, by the members of the Finance Department, and by the various other departments of the several Governments, in carrying into effect the very large reductions from which the great improvement in the financial condition of India has resulted.

3. Among the officers of Government who have rendered valuable service in the work of reduction of the public expenditure, Colonel Balfour has been conspicuous, and the testimony borne to his zeal, knowledge, and ability in the papers which you have forwarded, proves that Colonel Balfour is entitled to the warm approbation of Her Majesty's Government.

4. Colonel Balfour being now in this country, I shall cause a copy of this despatch to be forwarded to him.

(signed) *C. Wood.*

COPY of LETTER from Under Secretary of State for India to Colonel *G. Balfour*, C. B.

Sir, India Office, 18 July 1862.

I AM directed by the Secretary of State for India in Council to forward herewith copy of a Financial Despatch, dated the 9th instant, which has been forwarded to the Government of India, expressing the warm approbation of Her Majesty's Government of the valuable services rendered by you, as Chief of the Military Finance Commission and Department.

I have, &c.
(signed) *T. G. Baring.*

COPY FINANCIAL DESPATCH to the Government of India, dated 8 January 1863, (No. 1).

1. I HAVE considered in Council your financial letters, dated the 13th May and 29th August last, Nos. 66 A and 119 A, forwarding resolutions which have been passed by your Government, reorganizing the Financial and Account Departments in India.

2. Her Majesty's Government are fully sensible that the system hitherto in force has failed to insure that accuracy in financial estimates and statements received from India, which is indispensable to avoid confusion and uncertainty in regard to the actual position of the finances.

3. After mature consideration of the arrangements which you have made, Her Majesty's Government do not think it expedient to maintain permanently, as a separate department of the Government, the Military Finance Department. They are fully sensible of the advantage which has been derived from the aid of that department in effecting the reductions of military expenditure which were called for after the mutiny, and in reorganizing the several Military Departments; but when those duties shall have been completed, there appears to be no sufficient ground for its being longer retained.

4. It is indispensable that no office should be continued which is not essential to the public interests; and I have difficulty in believing that it is wise to maintain permanently for any one department of the Government a separate and independent system of financial audit and control; I have, therefore, to request that you will adopt measures with a view to the eventual abolition of the Military Finance Department.

5. The salaries which you have allotted to the several subordinate offices of account and audit appear to be liberal, but may be justified by the nature of the duties. It is important, however, constantly to bear in mind, that although the finances of India are now in a greatly improved state as compared with the few past years, the observance of the strictest economy is still indispensable.

6. The correctness of the changes which you have made can obviously be only fully tested by experience; but on the whole, the measures adopted appear to be judicious, and have the approval of Her Majesty's Government.

(signed) *C. Wood.*

EXTRACT.—Fort William, Military Proceedings for March 1864.

(No. 191 A.)

MINUTE by the Honourable Sir *C. E. Trevelyan*, K. C. B., Financial Member of the Council of the Governor General.

THE Financial Despatch of the Secretary of State, No. 1, dated January 8th, last, contains the following paragraphs:—

1. "After mature consideration of the arrangements which you have made, Her Majesty's Government do not consider it expedient to maintain permanently, as a separate department of the Government, the Military Finance Department. They are fully sensible of the advantage which has been derived

from the aid of that department in effecting the reductions of military expenditure which were called for after the mutiny, and in reorganizing the several Military Departments, but when those duties shall have been completed, there appears to be no sufficient ground for its being longer retained."

"It is indispensable that no office should be continued which is not essential to the public interests, and I have difficulty in believing that it is wise to maintain permanently, for any one department of the Government, a separate and independent system of financial audit and control. I have, therefore, to request that you will adopt measures with a view to the eventual abolition of the Military Finance Department."

2. The true principle of official organization is, that there should be one department for the management of the finances, which should be charged with the duty of providing the ways and means, of regulating their distribution, of revising and compiling the annual Budget Estimates of the Administrative Departments, of determining everything that relates to the appropriation of the annual grants, and of the mode of accounting for them, and of advising the Government in all matters relating to new and unforeseen expenditure; but that the entire executive administration should be conducted by departments which should be responsible, not only for the due performance of their respective services, but also for the detailed control of the expenditure of the public monies entrusted to them. Although the Military Department in this country exceeds all others in magnitude, and in the extent of its expenditure, it forms no exception to this rule. "Military Finance" is a misnomer. The expression involves a confusion of ideas. Finance is a general term applicable to the income and expenditure of the State throughout all its departments. The function of the Military Department is, like that of any other, to provide for the performance of the services expected from it at the smallest possible cost.

3. The responsibility of the department of the military secretary to the Government of India, for the control of expenditure, was, in practice, only imperfectly recognised and acted on. No annual Estimates were prepared in the military secretary's office. Those which were framed by the Accountant General, as military accountant, were of a formal, meagre kind, and had no influence whatever for purposes of control. The Military Auditor General, perhaps, did more to check expenditure than any other officer, but his functions were only those of an audit office. There was hardly even a profession of controlling the military expenditure of the Madras and Bombay Presidencies, which was left to the respective local Governments to be regulated as they might think best.

4. The first step taken to change this state of things was the appointment of the "Military Finance Commission" in June 1859. The occasion of this was the urgent necessity which existed for reducing the excessive military expenditure, which object was gradually accomplished by the great exertions of Colonel Jamieson and Colonel Balfour.

5. Meanwhile the "Commission" ripened into a "Department," which diverged more and more from the military secretary's office, until it culminated in a "Board of Appropriation Audit," consisting of the Chief of the Military Finance Department, and the Accountant General to the Government of India.

6. The duties of the Military Finance Department are clearly described in the Resolution dated the 6th of July 1860. A subordinate provincial organization was established, which has fully stood the test of experience. The military Auditor General in each Presidency was converted into a "Controller," under whom were appointed a military accountant, examiners of the accounts of the several military branches, as well as officers for classifying and compiling the accounts. To superintend this system, and to perform "the duty of examining into all sources of military expenditure, and controlling all permanent and contingent military expenses, whether relating to pay, monies, or material, throughout the Presidencies of Bengal, Madras, and Bombay, and all territories under the Government of India," was the comprehensive function of the Military Finance Department.

7. These

7. These duties have been faithfully and efficiently performed by the Military Finance Department up to the present moment, greatly to the public advantage. The action of the department upon the Budget Estimate for 1863-64 is a recent striking instance. The Budget Estimates, as originally sent in, were 13,184,565*l.*, which was reduced to 13,022,119*l.* by the controllers, and this was again brought down by the Military Finance Department to 12,629,665 *l.*, at which it was accepted by the Government. In dealing with a vast public establishment like the Indian Army, commanded by professional officers, and animated by a strong corporate spirit, it is an inexpressible comfort to have the assistance of a public office like the Military Finance Department, which is possessed of full information, and can be confidently relied on for giving an intelligent independent opinion upon the merits of every case as it arises. Seeing the strong tendency of our military expenditure to increase notwithstanding this advantage, I should look with alarm upon the consequences of our being deprived of it.

8. If, therefore, some change is requisite, it is not because the Military Finance Department has failed in its object, or has begun to show any signs of decrepitude. That department has completely answered its object, and is as fresh and vigorous as ever. The objection to the present arrangement is merely this—that the control of the military expenditure cannot with advantage be permanently separated from the administration of the department. Where the power is, there also ought the responsibility to be fixed. Our public affairs should not be conducted upon a principle of distrust. If our military administrators feel that they are expected to conduct the service at the smallest possible expense to the public, they will accept the duty, and fulfil it, as they do any other.

9. What is wanted, therefore, is to preserve the substance of the Military Finance Department, although the form may be changed. The establishment should be dissolved as a separate department, and should be reincorporated as part of the military secretary's office. That office would then be placed on the same footing as the English War Office. It would have an administrative side, and would also have a side for estimates, accounts, and the control of expenditure. There should be a deputy secretary over each, and both should act under the directions of the military secretary, who would have the sole authority and responsibility of the office. The subordinate establishments of controllers, accountants, examiners, and compilers, in every part of India, would remain as they are, and would stand in precisely the same relation to the military secretary's office as they have done to the Military Financial Department. The relations between the Financial and Military Departments would be improved. They would transact business together as the Treasury and War Office do at home. The annual estimates, after they have been prepared by the controllers, and revised in the Account Department of the military secretary's office, will be finally settled by the military secretary, in concert with the Financial Department. All proposals for increased expenditure will be considered in that department, which will have the same power of regulating every thing that relates to the mode of holding, paying, and accounting for the public money as in every other branch of the public service.

10. But the controllers, military accountants, examiners, compilers, and paymasters, would all be officers of the Military Department, to which alone they would be responsible. The appointment of persons for these offices, and especially for the highly responsible and important post of controller, is a point in which the public interest is deeply concerned. The recruiting of the department by a careful selection of the younger officers who are candidates for it, is scarcely of less consequence. It has been arranged, that in addition to the ordinary establishment, there are to be six probationers taken in turn from the armies of the three Presidencies, and upon the manner in which they are chosen a great deal will depend.

11. There is another point to which the attention of the military secretary, and of those acting under him, should be specially directed. The public interest suffers great injury from the system of procrastination which prevails throughout the Empire in the transmission of the Estimates and Accounts to the Financial Department, which is thereby compelled to work against time, and to hurry

over work which ought to be done with the greatest deliberation. The Military Estimates especially are always in arrear. It is indispensable that they should be rendered in good time. The necessary statements should be furnished to the financial secretariat, at the appointed dates, previously to the compilation of the Budget, revised and regular Estimates; and that this may be done, every possible reduction of expenditure should be considered early in the year, and not be postponed, according to the usual practice, until the periodical pressure arises in reference to the Budget Estimate. Similar punctuality should be observed in reference to the accounts of actual expenditure which are required to be rendered.

12. It has been already stated that the Chief of the Military Finance Department forms, in conjunction with the Accountant General, the Board of "Appropriation Audit." The appropriation audit of the accounts of the army, navy, and some other departments which is conducted at home by the Board of Audit, is a real audit, because the inspectors of the Commissioners of Audit attend daily at the several departments, where they follow the course of each item of expenditure through the books of account, examine the vouchers, and ask on the spot for any explanations that are required; but in India the vouchers remain at Madras or Bombay, or wherever else the local audit is conducted, and what is furnished to the so-called Board of Appropriation Audit, is a bare figured statement of results. What takes place therefore is not an audit, but a mere statistical process of compilation and comparison, the sole result of which is to see from the figures under what heads of the Budget Estimates there is a surplus or deficiency. There is no check in this, for the figures are accepted on the authority of the local audit offices; and they are unsupported by the vouchers. The actual expenditure compared with the budget heads, principal and subordinate, is equally seen from the accounts furnished to the Financial Department; and it is the business of that department to take cognizance of every excess, and to deal practically with it, allowing or disallowing what has been done, and making any comments which the case may require.

13. The peculiar state of things which gave occasion to the appropriation audit at home, does not exist in this country. In England, several of the departments of expenditure audited their own accounts; and as it was considered necessary that there should be an independent check, the novel expedient of the appropriation audit was invented for the purpose of securing it. Here the circumstances are different. The commissariat, ordnance, and pay examiners, acting under the controllers of the three Presidencies, are independent auditors, and to have a second audit over them is mere surplusage and waste of time and money. It will not, therefore, be necessary to supply the place of the Chief of the Military Finance Department on the Board of Appropriation Audit.

14. If these principles are admitted, there will be no practical difficulty in fixing the establishment of the Account Department of the military secretary's office. The existing establishment of the Military Finance Department should be carefully reviewed; and those persons of every grade who, by their faithful, attentive, able discharge of the duties assigned to them, have proved that they would be valuable acquisitions to the permanent service of the State, should be placed on the new establishment on their present rates of pay, and the rest should be discharged. The prospective salaries should be carefully classified, so that there should be an annual increase of salary for length of service within each class, as well as promotion from class to class for those who exhibit superior ability.

15. I should ill discharge my duty if I omitted this suitable opportunity of placing on record my hearty concurrence in the general approbation with which Colonel Balfour's public services are regarded. It has been seen that, besides the eminent service he rendered to Lord Canning's Government by bringing the excessive military expenditure within manageable limits, he organized a system for habitually controlling that expenditure, which we are now endeavouring to preserve in its full integrity, though with some change of form, and to incorporate it permanently among our administrative institutions. According to the most unbiassed view I am able to take, Colonel Balfour's public claims are among the highest that have been established by any administrator of the present generation. The office which was his sole reward is now about to be abolished,

abolished, but the full benefits of the arrangements organized by him will remain.

16. Colonel Broome, also of the Royal Artillery, who has officiated for Colonel Balfour, has likewise done extremely well, having maintained the office, as I have already said, up to the present moment, in full vigour and efficiency. It is so important that this official machinery should be transferred to the military secretary's office without any loss of power, and that all the sound traditions of the Military Finance Department should be preserved, that there would be much public advantage in Colonel Broome's conducting the duties of the office for a few months on its new footing as the Account Department of the military secretary's office, until it has been firmly planted there. Major Malleson, the able and zealous secretary to the Military Finance Department, is unfortunately prevented by illness from entering at once upon the duties of deputy secretary under the new arrangement, to which he will naturally succeed.

17. The 1st of July will perhaps be the most convenient date for the change to take place.

Calcutta, 18 May 1863. (signed) *C. E. Trevelyan.*

(No. 191 B.)

MINUTES by the Honourable Sir *R. Napier*, K.C.B., concurred in by His Excellency the Governor General, and the other Members of the Supreme Council.

SEVERAL plans have been suggested for the duty of controlling the military expenditure, since the abolition of the Military Finance Department has been resolved on.

The first one suggested, was to appoint a military officer, to be under secretary in the Finance Department, for conducting the duties now appertaining to the Military Finance Department.

It is clear that this would have been inexpedient, as the opinions of a comparatively subordinate officer in military questions would have carried all the weight of the Finance Department. This plan therefore subsided at once.

A second proposal is, to strengthen the controller of military accounts, to give him a secretary, and even to put him in a position similar to that of a chief engineer, which is in fact that of a secretary to Government. It would be necessary to place him over the Madras and Bombay controllers, which might be inconvenient, or to sever the connection of those officers with the Supreme Government and its system of accounts; in the latter case they would lose the support they have derived from the Military Finance Department, in maintaining the rules regarding expenditure, when in danger of being overruled by their own Governments.

Sir C. Trevelyan proposes to create a financial branch of the military secretariat, to be placed under a deputy secretary.

It does not appear to me that a deputy secretary would be a convenient head of the Branch Department; he would create embarrassment in regard to the claims to promotion and precedence in the department of the military secretary, especially when the secretary might be away, and the office under charge of the ordinary deputy secretary. Such a position would greatly limit the field of selection.

I most fully endorse the opinion expressed by Sir C. Trevelyan in his Minute of May 1863. "In dealing with a vast public establishment like the Indian army, it is an inexpressible comfort to have the assistance of a public office like the Military Finance Department, which is possessed of full information, and can be confidently relied on for giving an intelligent, independent opinion upon every case as it arises.

"Seeing the strong tendency of our military expenditure to increase notwithstanding this advantage, I should look with alarm upon the consequences of our being deprived of it."

I repeat, that I fully agree with the above opinion, and think that the department in some shape is still required, and that it would be in a position to give

a more cold and unbiassed judgment if unconnected with executive functions, and free from the direct interest which they inspire, than would be the case were it a branch of the secretariat.

In the valuable note of Mr. Drummond it is stated, that the system of military finance, which was nominally in the Military Department, broke down after the mutinies, because the secretary was over-worked; and he recommends a deputy secretary, who should have the responsible working of the department under the military secretary. This office would be in the position of Accountant General within the department.

I am inclined to think that the practical responsibility would never rest with the deputy secretary, but with the secretary, and that the latter would not hold a position to ensure perfect freedom of opinion. It therefore appears to me that the best solution of the question would be to make the officer Military Accountant General at once, having a separate office, but being under the Military Department, and communicating through the secretary.

With the great number of references that had been made to the Military Finance Department, and the questions under consideration, I have never felt that I could dispense with the Military Finance Department during the absence of the Governor General: I believe Sir C. Trevelyan will find it convenient to retain its services until the completion of the Budget. The establishment has been reduced as opportunity offered.

2 February 1864. (signed) *R. Napier.*

I AGREE with Sir R. Napier that "Accountant General" will be a better designation than "Deputy Secretary," because it will describe the official position better, and will give more weight and authority, without interfering with a just subordination to the Military Department. The "Military Accountant General" will be at the head of the military account system of India, and will preside over a separate department of the military secretary's office.

Hereafter a civilian may be appointed, as in England, but in the present state of our arrangements in India the ablest and most experienced military officer available should be selected. This situation is one to which the controllers and other officers of the Military Account Department in the three Presidencies should look as their highest prize. I have not entered upon the question of salary, because previously to considering it I wish to know the opinion of the military secretary. One of the first duties which the Military Accountant General will have to perform will be to propose a revised scale for the subordinate establishment of his department, with annual increase of salary for length of service within each class, and promotion by merit from class to class. The revised establishment of the financial secretary's office furnishes as good a model as I can suggest, and the military secretary proposes, I believe, that it should be adopted *mutatis mutandis* for his own office. The arrangements for the reconstitution of the Military Finance Department may proceed without delay, taking care only to give precedence to any business relating to the Budget. I expect to get quite as much assistance from the office in its new as in its old form.

8 February 1864. (signed) *C. E. Trevelyan.*

I agree to what is here proposed, and think that the sooner the changes are carried out the better.

10 February 1864. *W. Grey.*

(No. 192.)

EXTRACT from the Proceedings of the Government of India, in the Financial Department; (No. 1031, dated Fort William, the 25th February 1864).

READ the following papers:—

Despatch from the Secretary of State, dated the 8th January 1863, stating that after mature consideration of the arrangements which had been made, Her Majesty's Government did not think it expedient to maintain permanently, as a separate department of the Government, the Military Finance Department.

Minute by Sir C. Trevelyan, K.C.B., dated 18th of May 1863.

Minute by Sir R. Napier, K.C.B., dated 2d February 1864.

Further Minute by Sir C. Trevelyan, K.C.B., dated 8th February 1864.

Note by his Excellency the Governor General, concurred in by the Honourable Messrs. Harington, Maine, and Grey, dated 9th February 1864.

RESOLUTION.

Valuable public services connected with the reduction of the military expenditure, and the reorganisation of the military accounts, in conformity with the budget system, have been performed by the Military Finance Commission, subsequently called the Military Finance Department, but the time has arrived when, as directed by the Secretary of State, this office must be placed in proper relation to the Military Department.

This is the head office of the system of army accounts. The estimates for the military expenditure of the whole of India are collected here; and, after having been carefully revised, are submitted to the Financial Department. The ordinary correspondence with the military controllers, paymasters, and other officers connected with the accounts of the army, passes through this office; and the officer in charge of it assists the Government with his opinion upon every question relating to military expenditure which may be referred to him. In the discharge of these duties the head of the office will for the future act in subordination to the Military Department, and will be designated the "Accountant General" to that department. His relation to the Military Department will be similar to that of the Accountant General to the War Office at home; but it will for the present be for the public advantage that the ablest and most experienced military officer available should be selected for the duty, and that the controllers and other officers of military account in the three Presidencies should look to this office as the highest prize of their department.

The Accountant General will not be associated with the Auditor and Accountant General as a member of the "Board of Appropriation Audit;" and although, in common with the other account officers of the Government, he should render all the assistance in his power to the Financial Department, his ordinary official relation will be entirely with the Military Department.

The subordinate establishments of controllers, accountants, examiners and compilers in every part of India, will remain as at present. All appointments and promotions will be made by the Government in the Military Department; and it will be the duty of the Accountant General to advise in all matters relating to the conditions of appointment and promotion, so as to secure the highest practicable standard of qualification. No change should of course be made in the scale of expenditure, nor in any of the rules relating to the accounts, without the previous sanction of the Financial Department.

One of the first duties which the Accountant General will have to perform will be to revise the establishment of his own office; to determine what is the smallest number of persons by whom the work can be properly done; and to select for permanent employment on the new establishment those who have proved themselves the most able and attentive public servants. The new scale of pay should combine annual increase of salary for length of service within each class, with promotion by merit from class to class. The salary of the chief of the Military Finance Department was 3,333 rupees a month in addition to military pay. The Accountant General will receive a consolidated salary of 3,000 rupees a month. It is not intended to appoint any military officer as his assistant.

Sir C. Trevelyan, in his Minute dated the 18th of May 1863, calls attention to the valuable public services which have been rendered by Colonel Jamieson and Colonel Balfour in connection with the office now abolished. This has been already fully acknowledged in the proceedings of this Government, copies of which were forwarded with the Despatch to the Secretary of State, No. 57, dated the 19th April 1862, and the Governor General in Council will take this opportunity of again expressing his hope that these meritorious officers will be duly rewarded.

Major Malleson, the Secretary to the Military Finance Department, is at present on furlough. His claims, which are considerable, will not be overlooked by the Governor General.

Ordered, that a copy of this Resolution be communicated to the Military Department, in order that effect may be given to it from the 1st of April next, and that a report may be made to the Secretary of State.

Also, that a copy be delivered to the Auditor and Accountant General, for his information and guidance.

(A true extract.)

(signed) *E. H. Lushington,*
Secretary to the Government of India.

(No. 193.)

From Colonel *H. W. Norman*, C.B., Secretary to the Government of India, Military Department, to Colonel *A. Broome*, Officiating Chief of the Military Finance Department; (No. 188, dated Fort William, the 5th March 1864).

No. 1031, dated 25th February 1864.

In transmitting the accompanying copy of a resolution in the Financial Department, breaking up the Military Finance Department on its present organization, placing the Pay and Audit Departments in subordination to the Military Department of the Government, and creating an appointment to be designated "Accountant General to the Military Department," I am desired to acquaint you that his Excellency the Governor General in Council has been pleased to nominate you to fill that post.

2. This will be announced in Government General Order in due course, but it is very desirable that you should prepare, with the least possible delay, a scheme for the revision of your own office, and detailed rules for the conduct of business.

3. I am further desired to request that you will state whether you consider any alteration necessary in the Controller's Office, consequent upon the more complete separation that will now take place between that office and the establishment under your own orders.

(No. 194.)

General Order by his Excellency the Governor General of India in Council, in the Military Department; (No. 197, dated Fort William, the 7th March 1864).

Resolution, Financial Department, No. 27, dated 7th April 1860.
Ditto, No. 31, dated 23d April 1860.
Government General Order, Military Department, No. 710, dated 6th July 1860.

In modification of the orders contained in the Resolutions and Government General Order noted in the margin, the Right Honourable the Governor General in Council is pleased to direct the publication, for general information, of the following extract from a Resolution in the Financial Department (No. 1031, of the 25th February 1864):

"Resolution.

"Valuable public services connected with the reduction of the military expenditure, and the reorganization of the military accounts, in conformity with the budget system, have been performed by the Military Finance Commission, subsequently

subsequently called the Military Finance Department; but the time has arrived when, as directed by the Secretary of State, this office must be placed in proper relation to the Military Department.

"This is the head office of the system of army accounts. The estimates for the military expenditure of the whole of India are collected here; and, after having been carefully revised, are submitted to the Financial Department. The ordinary correspondence with the military controllers, paymasters, and other officers connected with the accounts of the army, passes through this office, and the officer in charge of it assists the Government with his opinion upon every question relating to military expenditure which may be referred to him. In the discharge of these duties, the head of the office will for the future act in subordination to the Military Department, and will be designated the "Accountant General" to that department. His relation to the Military Department will be similar to that of the Accountant General to the War Office at home; but it will for the present be for the public advantage that the ablest and most experienced military officer available should be selected for the duty, and that the controllers and other officers of military account in the three Presidencies should look to this office as the highest prize of their department.

"The Accountant General will not be associated with the Auditor and Accountant General as a member of the 'Board of Appropriation Audit;' and although, in common with the other account officers of the Government, he should render all the assistance in his power to the Financial Department, his ordinary official relation will be entirely with the Military Department.

"The subordinate establishments of controllers, accountants, examiners, and compilers in every part of India will remain as at present. All appointments and promotions will be made by the Government in the Military Department; and it will be the duty of the Accountant General to advise in all matters relating to the conditions of appointment and promotion, so as to secure the highest practicable standard of qualification. No change should of course be made in the scale of expenditure, nor in any of the rules relating to the accounts, without the previous sanction of the Financial Department."

With reference to the above Resolution, his Excellency the Governor General in Council is pleased to appoint Colonel A. Broome, of the Royal Artillery, be Accountant General to the Military Department from the 1st April 1864, from which date the arrangements now notified will have effect.

Subsidiary orders with reference to the conduct of buiness will hereafter be issued.

(No. 483.)

From Colonel *A. Broome*, Officiating Chief of the Military Finance Department, to the Secretary to the Government of India, Military Department; (No. 1830 C, dated Calcutta, the 15th March 1864).

With reference to the request contained in your letter, No. 188, of the 5th instant, that I should submit a scheme for the office establishment of the Accountant General in the Military Department, I have the honour to recommend the following scale:—

CLASS.	Number.	Minimum Pay.	Annual Increase.	Maximum Pay.	Number of Years in which the Maximum Pay may be obtained.
		Rs.	*Rs.*	*Rs.*	
Head accountant - - - -	1	450	25	600	6
ASSISTANTS.					
1st Class - - - - -	2	300	25	400	4
2d „ - - - - -	2	200	20	280	4
3d „ - - - - - -	3	120	15	180	4
4th „ - - - - - -	3	70	10	110	4
Copyists - - - - - -	4	30	5	60	6

On the minimum scale the monthly cost of this establishment would be 2,140 rupees, on the maximum scale 3,070 rupees, whilst the average would be 2,605 rupees.

2. It will be observed that in the scale no head assistant or clerk is included, as I do not think that in so small an office, and one chiefly of account, such an appointment is required. But I look upon it as indispensable, that an uncovenanted assistant of ability and experience should at all times be attached to this office.

3. When the Military Finance Department was organized, a covenanted secretary and three uncovenanted assistant secretaries, holding positions corresponding to the 2d class of uncovenanted assistants in the Financial Department, were sanctioned. For a year past only two assistant secretaries (one of them officiating) have been present. For the new duties one efficient assistant will suffice, and I propose so to employ Mr. A. P. Simkins, whose known ability, energy, and long experience render his services peculiarly valuable at a time like the present, when the duties of the office have to be remodelled. His existing designation of senior assistant secretary would be unsuitable to the new duties, and I would suggest that of "Deputy Accountant General" as more appropriate, with reference to his position and qualifications. I beg to recommend that he may be gazetted accordingly, retaining his present scale of salary and periodical increase.

4. For the future, I do not think that promotion to this appointment should be regarded as the right of the office, although in cases of special fitness such promotion may be permissible. As a rule, the appointment might advantageously be looked upon as placing the incumbent in a corresponding position with the 2d class assistants in the Financial Department, and promotion made to it from amongst the trained and qualified members of the 3d class of that department, a thorough acquaintance with the general system of account as adopted in the Financial Department being very essential.

5. Should promotion be made from the office, the position of the officer so promoted might be that of the 3d class civil assistants.

6. On the other hand, in the case of the appointment being held by a second class assistant, long and meritorious service might be deemed a claim for admission to the position and emoluments of a first class assistant, provided his cotemporaries should have attained that grade.

7. The scale of establishment of office servants will somewhat depend upon whether or not the office is located in the same building with the Military Department. When this point is settled I will submit a scale for approval.

8. The office now proposed for the Accountant General to the Military Department being very much less than that of the Military Finance Department, a considerable portion of this latter office will be thrown out of employ. It is possible that some may find occupation with the Controller or in other offices, and a few members might be advantageously employed for a short time in bringing up any arrears of work that it may not be desirable to transfer to the Accountant General's Office; but on these points I will address you in a subsequent communication.

9. As regards the Controller's office, I consider that it is desirable this opportunity should be taken to reorganize it, introducing the system of classes.

10. The new arrangements, although calculated to prevent duplication of work, will make but little change in the extent of the duties of the Controller's office, much of the correspondence heretofore passing through the chief of the Military Finance Department will now go direct to the Military Department; but, although the work may not be increased, I am of opinion that the office requires to be remodelled, as it is not so efficient as is desirable. Moreover, I consider that the Controller requires at least one assistant of a higher stamp than the existing scale enables him to entertain. In these views, I believe that Lieutenant Colonel Atkinson will be found to concur. I have requested him carefully to consider the question of remodelling his office, with due regard to both economy and efficiency, and on receipt of any scheme he may submit, I will forward it for the orders of Government.

11. As

11. As there is some difficulty in laying down an exact scale to meet the probable requirements of a new office, the work of which cannot at present be accurately defined or estimated, I would recommend that the scale now submitted may be sanctioned, subject to revision and report at the expiration of one year's practical working.

COPY MILITARY LETTER from the Government of India; dated 19th March 1864, No. 132.

WITH reference to your financial letter, No. 1, of the 8th January 1863, conveying the views of Her Majesty's Government with respect to the Military Finance Department, and requesting the adoption of measures with a view to its

Proceedings for March 1864, Nos. 191*a* to 194.

its eventual abolition, we have the honour to transmit copies of the papers marginally noted, and of our General Order, giving effect to the measures we have determined to adopt with that view.

2. The Military Finance Department, under its present organization, will cease to exist from the 1st proximo, from which date the Departments of Pay and Audit will be placed in subordination to the Military Department, to which will be attached an officer designated "Accountant General" to that department.

3. As for the present it is for the public advantage that the post should be filled by the ablest and most experienced military officer available, we have appointed Colonel A. Broome, Officiating Chief of the Military Finance Department, to be Accountant General to the Military Department, on a consolidated salary of 3,000 rupees per mensem.

4. The Chief of the Military Finance Department draws *Rs.* 3,335. 5. 4., in addition to the pay of his rank; but we consider 3,000 rupees to be a proper and sufficient salary for the Accountant General, with reference to his position as above the controllers in the three Presidencies.

5. Originally there was a secretary to the department (a military officer) on a staff salary of 1,200 rupees per mensem, with three assistant secretaries, each drawing a consolidated salary of 1,000 rupees per mensem, with an annual increase of 75 rupees per mensem, up to a maximum salary of 1,500 rupees.

In view to the eventual reduction of the department, the appointment of secretary and one of the assistant secretaryships have already been allowed to lapse; a second assistant secretary is being provided for in another department, and a third is transferred, on his present salary, to the Military Department as Assistant Accountant General.

Proceedings for March 1864, Nos. 483 and 484.

6. We annex a statement of the proposed office establishment of the Accountant General, Military Department, and also a statement of the present establishment of the Military Finance Department. It will be seen that a saving is effected, but the proposed scale of establishment is subject to revision after a year's experience of its working.

7. We trust our proceedings will be approved and sanctioned.

GENERAL ORDER by the Right Honourable the Governor General of India; (No. 197, dated 7th March 1864).

Resolution, Financial Department, No. 27, dated 7th April 1860.
Ditto, No. 31, dated 23d April 1860.
Government General Order, Military Department, No. 710, dated 6th July 1860.
Resolution, Financial Department, No. 119, dated 16th November 1860.

IN modification of the orders contained in the Resolutions and Government General Order noted in the margin, the Right Honourable the Governor General in Council is pleased to direct the publication, for general information, of the following extract from a Resolution in the Financial Department, No. 1031, of the 25th February 1864.

"RESOLUTION.

"Valuable public services connected with the reduction of the military expenditure, and the reorganization of the military accounts, in conformity with the budget system, have been performed by the Military Finance Commission, subsequently called the Military Finance Department; but the time has arrived when, as directed by the Secretary of State, this office must be placed in proper relation to the Military Department.

"This is the head office of the system of army accounts. The estimates for the military expenditure of the whole of India are collected here, and after having been carefully revised, are submitted to the Financial Department. The ordinary correspondence with the military controllers, paymasters, and other officers connected with the accounts of the army, passes through this office; and the officer in charge of it assists the Government with his opinion upon every question relating to military expenditure which may be referred to him. In the discharge of these duties the head of the office will for the future act in subordination to the Military Department, and will be designated the "Accountant

countant General" to that department. His relation to the Military Department will be similar to that of the Accountant General to the War Office at home; but it will for the present be for the public advantage that the ablest and most experienced military officer available should be selected for the duty, and that the controllers and other officers of military account in the three Presidencies should look to this office as the highest prize of their department.

"The Accountant General will not be associated with the Auditor and Accountant General as a member of the 'Board of Appropriation Audit;' and although, in common with the other account officers of the Government, he should render all the assistance in his power to the Financial Department, his ordinary official relation will be entirely with the Military Department.

"The subordinate establishments of controllers, accountants, examiners, and compilers, in every part of India, will remain as at present. All appointments and promotions will be made by the Government in the Military Department; and it will be the duty of the Accountant General to advise in all matters relating to the conditions of appointment and promotion, so as to secure the highest practicable standard of qualification. No change should of course be made in the scale of expenditure, nor in any of the rules relating to the accounts, without the previous sanction of the Financial Department."

With reference to the above Resolution, His Excellency the Governor General in Council is pleased to appoint Colonel A. Broome, of the Royal Artillery, to be Accountant General to the Military Department, from the 1st April 1864, from which date the arrangements now notified will have effect.

Subsidiary orders with reference to the conduct of business will hereafter be issued.

Consequent on the changes rendered necessary by the foregoing order, the following general rules are laid down for the guidance of the several officers of military account and audit in the three Presidencies.

2. The special and legitimate functions appertaining to the whole system of military account and audit for India, heretofore exercised by the chief of the Military Finance Department, are transferred to the Military Department of the Government of India; and these duties will in future be performed by the Accountant General, as the head of the account branch of that department.

3. Minor and personal details having special reference to the Bengal military establishment, which heretofore have been reported on by or through the chief of the Military Finance Department, will now be reported on by the controller of that Presidency, in direct communication with the Secretary to the Government of India in the Military Department.

4. The complete subordination of the whole departmental system of military account and audit to the Military Department of the Government of India, and placing the controller of military accounts in Bengal on a footing analogous to that of the controllers at the other Presidencies, are the main features of the new organization. The general principles on which the present system of military account is based, and the main duties of the several officers, are shown in the following rules.

Military Department, 1 April 1864. (signed) *H. W. Norman*, Colonel, Secretary to the Government of India.

Rules and Instructions for the Guidance of all Officers of Military Account and Audit.

Section I.—System of Military Account.

1. The principles upon which the control, audit, and account of the financial transactions of the Military Department are conducted, are, first, a strict preliminary scrutiny and review of the demands entered in the estimates of the several departments, as also, a careful examination into all demands for monies or stores prior to supply; and, secondly, a stringent control over the due application of these moneys and stores to the service for which they may be sanctioned, by means of a prompt concurrent check, and finally by an appropriation audit.

2. It is now fully recognised that mere audit of expenditure, without previous control, cannot give adequate security to Government for the correct appropriation of moneys or stores. Under the present system, therefore, definite limits are previously assigned to the aggregate, as well as to the details of military expenditure, whereby the check over expenditure is facilitated.

3. The efficiency of the service is at all times to be kept prominently in view, whilst the economical application of moneys and stores is also enjoined, the one being quite compatible with the other; and these objects will best be ensured by heads of departments bringing promptly to notice any departure, whether in excess or otherwise, from the estimate, either as regards the expenditure in detail, or in the aggregate of the moneys and stores sanctioned for each head of service, or for the whole department during the year.

4. The operations for reviewing and scrutinizing outlay, examining the demands, and enforcing the observance of the limits of aggregate and detailed expenditure, under its major and minor classifications, are confided —

I. To the disbursing and issuing officers, and the examiners.

II. To the military accountants, who are the dispensers of the funds allotted to the several military departments, for their prospective expenditure, and for accounting for the same.

III. To the controllers of military accounts.

IV. And, lastly, to the account branch of the Military Department of the Government of India, in which the proceedings of the above noted officers of the three Presidencies will be reviewed, as the same are periodically submitted.

5. It is to be observed that the check over detailed payments of money and issues of stores is entrusted primarily to the disbursing and issuing and accounting officers; and, secondarily, to the examiners of the several departments of the army, subject to the close supervision of the controllers of military accounts.

6. The estimate is the basis of the examiners' audit; and it is their duty to disallow any charge not provided for in the estimate, so that no expenditure may be authorised in excess of that allotted to the several services specified in the estimate. The great end is, to combine the stringency of an immediate check with a prompt rendering and satisfactory settlement of all claims and accounts; it being fully recognised that all delays in preferring claims, or in examining and disposing thereof, and paying the amounts passed, are injurious to the interests of Government.

7. The check upon the aggregate expenditure will be maintained by the controllers,— first, by a careful and intelligent scrutiny of the annual military estimates, containing a clear exhibition of all details, in a form approaching closely to the mode in which the expenditure will be incurred; secondly, by watching the application of the sanctioned grants, and observing the measures of the year which affect military expenditure; and, thirdly, by reviewing the actual expenditure at the time it is incurred, and again at the end of the year, in close connection with the sanctioned estimates.

8. Whilst on the one hand a careful scrutiny of the financial results of departmental administration is most essential, great care must be exercised that the limits of this duty are not overpassed, and a strict observance must be maintained of the broad distinction between financial and administrative control. The latter is vested exclusively in the heads of departments, in subordination to the executive control of Government, as exercised through the medium of the Secretary to Government in the Military Department, by whom alone all orders will be issued, or communications made, to the several heads of departments on all points connected with executive administration.

Section II.—Controllers of Military Accounts.

1. With a view to enforce the principles above set forth, the respective controllers of military accounts, acting under the general supervision of the Military Department of the Government of India, Account Branch, are charged wth the following duties:—

I. To examine into all sources of military expenditure, and control all permanent and contingent expenses, whether relating to moneys or materials throughout India, including all territories under the direct control of the Government of India, but without interfering with the functions of the administrative heads of departments.

II. To check and examine the several annual estimates of military expenditure, propose modifications therein, and to submit the same in the manner hereinafter prescribed.

III. To represent to the proper authority, and report to the Governments under which they are immediately serving, every instance in which reduction of expenditure, whether in money or stores, by any means of economy, may be practicable, consistently with efficiency.

IV. To provide for the effectual supervision over all accounts of military expenditure, the verification of all balances of cash and stores, and with the view of restricting the

the amount of cash in hand or of reserve stock, to make such inquiries as may be necessary; also, enforcing the due and timely adjustment of all advances and inefficient balances.

2. In furtherance of the above objects, it has been ruled that all proposals bearing on questions of military expenditure, brought before the Supreme or local Governments, in any other department than the military, and all proposals for expenditure on military public works (other than ordinary repairs), will be referred to the Military Department for opinion, before the final orders of the Government are taken thereon.

3. Also, that all special orders passed by the Governor General in Council in any department other than the military on emergency, will, if involving questions of military expenditure, be forthwith communicated to the Military Department.

4. Should the Governments of the Presidencies of Madras and Bombay sanction any grant for military expenditure, or authorise any expense not provided for by existing rules or regulations, or on which the controllers of military accounts in such Presidencies may report unfavourably, it is provided that those governments shall immediately report the same to the Government of India, Military Department, but the controllers are likewise required to report the circumstance to the Accountant General, Military Department.

5. The controllers will sift all the references made to them by the officers of account and audit, so as to submit to Government only those which they cannot dispose of.

6. They will deal with all other references according to their knowledge of the orders or opinions of Government, or according to the rules and instructions herein prescribed; or, failing such knowledge, according to their judgment.

7. All questions of expenditure or accounting unprovided for in the Budget Estimates, or by the standing rules, will be referred to the Military Department of the Government of India, account branch.

8. All transactions affecting military expenditure are subject to the cognizance of the controllers of military accounts, in the Presidency concerned. It will also be the duty of the controllers to bring to the notice of the Military Department of the Government of India, account branch, every transaction affecting their special duties, and to furnish the office in charge of that branch with the fullest information bearing thereon.

9. The controllers are empowered to call on the several Military Departments for whatever information may be requisite, to enable them to examine into any particular expenditure, and report on the subject to Government.

10. The controllers will, during the year, report to their respective governments on all proposals as they arise for increase of expenditure, whether affecting the administrative business of departments or executive establishments, and will, at the same time, keep the Military Department of the Government of India, account branch, fully and timely informed in respect to the rendering of accounts, the progress of the examination of the military expenditure, and the amount thereof.

11. The controllers will see to the timely sending in of all departmental requisitions for cash or stores, and to the due preparation, by the military accountants, of the annual and monthly estimates of cash requirements; as also to the timely transmission of the monthly estimates of cash requirements, to the civil financial officers of the several governments. The duty of examining the cash estimates, so as to ascertain that they are for sanctioned services, and in the form authorised, is here strongly enjoined on the controllers and military accountants. The controllers will also take care, by reviewing the sums previously disbursed, to guard against the expenditure under any subsidiary head progressing at an unnecessarily high rate, or a rate likely to exhaust the grant for that service before the expiration of the year. They will enforce the regular and prompt transmission of the monthly and other periodical statements of expenditure, and of all letters of credit for grants of money; and will also take care that compiled statements in the established form, of the sums actually drawn and expended, are duly transmitted for the information of the military secretary to the Government of India, account branch.

12. The periodical financial statements required to be submitted to the Military Department of the Government of India, account branch, by the controller of each Presidency, are—

I. Monthly Statement of audited, passed, and classified Expenditure.
II. Monthly Statement of receipts and unaudited Disbursements.
III. Monthly Statement of increase and decrease of Outstanding Balances.
IV. State of Audit of Accounts in the several Examiners' Offices.
V. Quarterly Statement of Receipts and unaudited Disbursements.
VI. Annual Statements of Receipts and unaudited Disbursements.
VII. Annual Statement of Quick and Dead Stock.
VIII. Annual Report on the Appropriation Audit.
IX. Abstract of the Annual General Books.

Particular attention is required to the careful preparation and timely transmission of Statements Nos. I., II., and III., as they will constitute the basis of a general account, to be posted up monthly in the office of the Accountant General, and which will exhibit in a condensed form the progress of expenditure throughout the year, under the different heads of the Annual Budget Estimate. At the close of the year this general account will afford ready means of comparing the actual operations with the Budget Estimate, under its various divisions and subdivisions.

13. The controllers will examine and report upon the monthly returns of the effective strength of Her Majesty's British forces in their respective Presidencies, which will be forwarded to them by the officers commanding regiments. These reports are required to be promptly transmitted to the Home Authorities as the basis of calculation of the capitation charges payable by the Government of India, and they should be submitted, without delay, to their respective Governments in the Military Department. Particular attention is called to the prompt discharge of this duty by the controllers, which is one of great importance.

14. As a general rule, it is advisable that the controllers should be the channel through which all communications from the subordinate officers of audit and account to their respective governments, should pass. The controllers are in a position to prevent improper references being made, and to them all controverted points should be referred; they being best able to place affairs before the Government in a proper light.

15. The controllers will forward to the Military Department of the Government of India, account branch, copies of all rules and instructions which they may issue; but in introducing any changes of system, draft of their instructions for giving effect to such changes must be submitted for approval. Copies of the departmental orders issued by the controller at each Presidency will also be sent to the controllers of the other Presidencies for information.

16. Each controller will examine and control all the offices of examination, account, disbursement, or issue, within his range, so as to ensure the due and regular performance of their duties by the examiners and other officers; inspecting all such offices personally, when practicable, or otherwise causing them to be inspected, and calling for such information regarding the accounts as he may deem necessary.

17. In the Bengal Presidency, the controller will register in his office all admissions to the pension establishment; and regulate the transfer of pensioners from one circle to another.

18. Whenever any of the controllers enjoin the periodical submission of a new return or statement, he will prescribe a form for it.

Section III.—Military Accountant.

1. The military accountants are, as the name implies, the accountants of Government for the military service in their respective Presidencies. They stand in the position of debtors to the Government, and creditors to the receiving officers, of all cash and stores supplied to the various officers and departments of the army. On the military accountants rest the immediate and direct responsibility for the due rendering of all accounts, returns, and statements connected with military expenditure, and for fixing, in communication with the controllers, the dates on which each account is to be rendered. As the military accountant's offices are the centres within which all financial affairs flow, it is essential that these officers should enforce with stringency the exact and regular rendering of every account and report; ever bearing in mind that neglect on the part of any other officer must not be pleaded as an excuse for failure in their own duties. On these responsible officers is imposed the duty of enforcing with regularity and punctuality the prompt transmission of the documents necessary for their office duties: first, by direct appeals to the officers concerned, and, in the event of such being disregarded, by representations to the controllers.

2. The military accountants have immediate charge of the compilation of the annual and monthly departmental estimates of cash requirements, and will alone, under the supervision of the respective controllers, grant letters of credit on Mofussil civil treasuries, or obtain from the accountants general letters of credit from the Presidency bank, and require the regular and exact return of these documents, on the credit being drawn upon and closed, at the end of the month.

3. All invoices of stores from England or the Colonies, and all valuation statements, will be sent to the military accountants. It will then be their duty to furnish extracts from invoices and lists of stores to the departments for which the stores are intended, and by which they will be accounted for; first, giving a general credit for the whole in the military general books, under the head "Account Current with London," or whatever may be the government, colony, or department furnishing the stores. It will then be within the power of the military accountants to compare the totals of the credits made in the several departments with the total debit made in the military general books, when crediting "Account Current with London," or the account of the government or colony concerned.

concerned. The general verification, or comparison, of departmental debits and credits for all moneys or stores received or issued departmentally, is a point of vital consequence, and should be strictly attended to in the Military Accountant's offices. This verification should also be extended to the debits and credits between Presidencies.

4. The military accountants are responsible, therefore, for accounting for all moneys or stores obtained for the military service. It is also the duty of the military accountants to debit against all receiving officers, every item of money, and the value of all stores passing through their hands; only granting an acquittance for the same, and freeing the officers concerned from responsibility, either on repayment of the money or on the admission of the account of the expenditure, whether of money or stores, or on Government authority for writing off the amount or value to profit and loss being obtained.

5. The military accountants will, in the right fulfilment of their heavy responsibilities, inquire, whenever they see fit, into the state of all accounts, and enforce the settlement of balances standing against individuals or departments. They will also see that all recoveries from individuals are promptly effected; that credits for all refunds, stoppages, and other receipts are duly afforded; and that deposits of contractors are properly brought to account.

6. The military accountants will moreover take care that outstandings are not permitted to remain unsettled, that advances are not taken up on emergency without due necessity, and that balances against officers are promptly adjusted.

7. The military accountants alone will grant final certificates of "no demands;" and will be responsible that all demands against officers who become casualties, and those who are about to leave India, are strictly enforced. It will also be the duty of the military accountants to ascertain, and, by prompt and judicious measures, to enforce the settlement of the numerous and varied claims that constantly arise in the Military Department against officers and regiments; and whatever agency may be employed for that purpose—whether military paymasters, commissariat officers, or officers in charge of civil treasuries—the military accountants are still responsible for all claims of this nature being settled correctly and expeditiously, so as to prevent officers and corps leaving India, from being subjected to unnecessary delays and anxieties.

8. If the accounts and audits in any one department, the statements of debits and credits between departments or presidencies, or the compilations of expenditure, should fall in arrears, the military accountants will report the same to the controllers, after having endeavoured, by repeated warnings to the officers concerned, to correct the irregularity; and as the existence of arrears is a grave evil, this duty must be performed without hesitation or delay.

9. The military accountants are further responsible that statements of all demands against the British and Colonial Governments are promptly forwarded, accompanied by the proper vouchers, by the officers entrusted with the duty of accounting.

10. The military accountants are also charged with the duty of forwarding, for transmission to the authorities at home, the remittance rolls of privilege remittances of officers and men, and savings banks accounts, in the forms prescribed.

11. The military accountants will prepare all the periodical accounts, showing (monthly, quarterly, and annually) the receipts and disbursements of the various departments. It will be their duty to journalise the receipts and expenditure from the accounts current of disbursing officers, and to arrange and examine the expenditure in suitable abstracts, classifying it under the various heads of service recorded in the Budget Estimate, by the aid of the compilations that will be supplied to them by the compilers of military expenditure.

12. The military accountant at each Presidency will furnish the following periodical statements and accounts to the civil financial officers:—

I. Monthly statements of receipts and unaudited disbursements.

II. Quarterly - ditto - - - - - ditto.

III. Annual - - ditto - - - - - ditto.

IV. Monthly statement of cash balances in the hands of disbursing officers.

V. Monthly statement of assessment, collection, and refund of income tax by disbursing officers of the military department.

VI. Annual general books, journal, and ledger.

Section IV.—Examiners.

1. All the duties connected with the check of expenditure, in detail, will be performed by the examiners of the pay, commissariat, ordnance, stud, barrack, clothing, and medical departments.

2. Separate office establishments will be allowed to all the examiners.

3. Every examiner will, in communication with the controller, fix the dates on which each account and statement must reach his office, and enforce, with strictness, the exact and regular transmission of all accounts and statements; also carefully and promptly scrutinizing all the accounts rendered by disbursing officer.

4. Each examiner will regulate his audit strictly by the established rules, having no discretionary power to relax them; and will, in communication with the controller, define, in set rules, the various processes to be followed in the course of examination, and the specific duties which each sub-auditor and each accountant will have to perform. In cases of doubt, the examiner will refer to the controller of military accounts; but in all other cases, will act as an independent examiner, exercising duties and responsibilities quite distinct from those of the controller. It is, however, distinctly to be understood, that appeals or references on any question involving the passing of a charge, may be made to the controller, and through him to the Government, if deemed necessary.

5. The examiners are required to retrench any charge not duly authorised, not properly supported by proper vouchers, or which requires further explanation; and are authorised also to guide disbursing officers in doubtful cases, which may be referred for their orders; but all such cases should be reported to the controllers.

6. All examiners are required to forward monthly statements to the controllers, exhibiting the date of the receipt of the several accounts, and the date of the audit thereof; these statements being invariably submitted not later than on the last working day of the week following that in which the accounts ought to have been received.

7. The foregoing rules apply to the examiners in all departments; but those concerned in auditing charges for stores and expenditure, and receipts of stores or supplies, and in checking store accounts, have additional duties imposed on them.

8. Errors in calculation, or in accounting, must be corrected, rates checked by comparing them with price currents, and these latter again checked by comparison with prices in other neighbouring places.

9. The quantity of stores or supplies expended must be checked, both with respect to economy of consumption, and to the limitations imposed on expenditure by the Budget Estimate.

10. All examiners, whether of stores, money, or scales of diet, must consider it an important duty to check effectually, within their proper line of duty, as defined, all inefficient balances, either of money or stores, as well as all excesses in stock reserves, or allotments. These must be promptly reported, accompanied by an explanatory memorandum of the measures adopted to correct defects, to the controller, who will adopt decided measures for enforcing the settlement and right disposal of outstandings in communication with the military accountant.

11. All new contracts in the Commissariat Department must be scrutinized by the examiner of commissariat accounts, and the contract prices subjected to the same tests as those above prescribed, besides being compared with the rates actually paid, previously or contemporaneously, for like supplies. A report on all these points, showing the length of time for which the contract is to run, must be submitted to the controller, on the conclusion of every fresh contract; and a like report will be submitted to him, quarterly, on the economy with which direct purchases are effected by the department, at the several army stations, or in the several ranges.

12. In applying the preceding rules, the examiners of the several departments may call for an explanation of any unusual charge, or of anything questionable that appears on the face of the accounts. If necessary, the examiners will consult the controllers of military accounts, and this should be done in all cases where the inquiries to be made would affect the acts of the departmental executive officers. In such cases the inquiries should proceed through the controllers.

13. As a general rule, examiners are not to correspond direct with the military accountant, except in notifying the sums passed to credit of paymasters. All other communications, intended eventually for the military accountant, will be addressed to the controller. The examiners will also, as far as possible, avoid engaging in controversial discussions, which can always be done by placing the question before the controllers, who from their position are better able to prevent the unpleasant references which so frequently arise out of money questions and audits.

14. The pay examiners, after audit of the disbursement statements, will send all the relative vouchers to the compilers of Military Expenditure with an authenticated audit enfacement on each voucher, of the amount passed on it. They will also transmit to the military accountants, through the compilers, statements of the total sums passed to each paymaster's credit, on the weekly disbursement statements; and will send like intimations to the paymasters, accompanied by statements of sums retrenched, as also of those allowed as shortdrawn, in the weekly statements.

15. The examiners of ordnance and medical accounts have the peculiar duty of re-examining

examining vouchers already examined and passed by the examiner of commissariat accounts In such cases they will proceed as follows:—

I. In examining the bills, indents, &c., for contingent charges and extra establishments, they will see, first, that the vouchers are duly supported by adequate authority; secondly, that they are consistent with existing regulations; and, thirdly, that they are within the departmental estimate.

II. The disbursements of cash authorised by the Inspector General of Ordnance and Director General, Medical Department, will be made through the Pay Department, either on contingent bills, or as advances; no letter of credit on the Civil Treasury being granted to either of these officers.

Section V.—Disbursing Officers.

1. Disbursing officers will submit their cash accounts to the military accountants, and their disbursement statements to the examiners of the departments to which they respectively belong, at such periods during the month as may be prescribed by the controllers.

2. They are also responsible for submitting their monthly estimate for cash requirements, punctually on the prescribed dates, and strictly in the prescribed forms.

3. In the event of services suddenly arising, for which disbursing officers have no funds available from the letters of credit granted to them on their monthly estimates, the civil treasuries will disburse the requisite funds under the orders of the officer commanding the station, who shall first satisfy himself of the propriety of the advance applied for. The disbursement so ordered will be at once reported to the head of the department concerned by the officer authorising the advance, as well as by the officer receiving the monies. Monies so advanced will be passed to the debit of the Military Department by the officer making the advance, as if they had been drawn on letters of credit.

4. Disbursing officers will examine carefully into all claims and all items of expenditure, before paying moneis; remembering that the present system does not in any way affect their ultimate responsibility, in the event of monies proving irrecoverable from parties to whom payment has erroneously been made.

5. Disbursing officers who may be concerned with army supplies, or in paying for extra establishments and contingencies, are further required to check ill-considered demands; but in such case the check should consist in pointing out the error, and throwing the responsibility on the officer who may persist in the order for the supply, after the error or injudiciousness of the demand may have been pointed out to him. The disbursing officer will report these cases to the controller of military accounts, as also to the examiner of his department.

Section VI.—Compilers.

1. All payments charged in the disbursement statements of divisional paymasters and pension paymasters, will be compiled by the compiler of military expenditure at each Presidency. It will be the primary duty of the compilers of military expenditure to require the prompt and regular audit and examination of all accounts, statements, and returns; and these officers will obtain from the pay examiners, under orders from the controller, a statement showing the dates on which these documents are to be sent to them for classification and compilation. The dates on which each disbursing officer's accounts are to be completed, will be determined by the controller; and attention thereto enforced by the compiler of military expenditure, by representation to the controller when necessary. Delay on the part of other officers cannot be admitted as any ground for delay in the performance of the duties of the compilers.

2. The expenditure of money and stores in the Commissariat, Ordnance, Stud, Clothing, Medical, and Barrack Departments will be compiled by the respective examiners of those departments, who in this respect will discharge the duty of compilers, in addition to that of examiners.

3. The several compilations will be made, strictly in forms prescribed and under the sanctioned heads of Service, Chapters, Sections, and Articles of the Estimate, and the compilers will be prepared, by means of subsidiary books, to exhibit clearly the various charges which may be blended under one general head.

4. The several compilers will further keep up such statistics relating to army expenditure, as may be prescribed by the controller.

Section VII.—Annual Budget Estimates and Indents.

1. The following course will be observed in submitting the annual estimates and indents for Europe stores:—

Estimates.

2. The annual budget estimates will be submitted by the respective heads of departments to the controllers of military accounts at the several Presidencies not later than the

1st November of each year in the Bengal Presidency, and the 15th of November in the Presidencies of Madras and Bombay.

3. The Controller of Military Accounts in the Bengal Presidency will examine, consolidate, and submit the detailed departmental estimates of military expenditure to the Military Department of the Government of India, Account Branch, by the 31st January of each year.

4. In the Madras and Bombay Presidencies, the controllers will examine, consolidate, and submit the like estimates to the local governments on the 1st January of each year, for eventual transmission to the Military Department of the Government of India. The controllers will, at the same time, forward copies of the estimates to the Accountant General to the Military Department of the Government of India.

5. In submitting the estimates, the controllers of military accounts will scrutinize both the details and the general results of the military expenditure proposed for the year, passing in review all the fixed establishments in every department, and applying to the charges not fixed, including those for stores, army supplies, and contingencies, every possible test for determining whether the estimate provides for these services being administered with due economy.

6. The estimates of the three Presidencies as consolidated and submitted by respective controllers, will be again consolidated into one Budget Estimate of military expenditure, for all India, by the Accountant General to the Military Department of the Government of India, for eventual transmission to the Financial Department.

7. Besides the Budget Estimate, the following annual estimates will also be required:—

I. Annual Cash Requirement Estimate, so as to reach the Military Department of the Government of India by the 31st January.

II. Annual Regular Estimate, so as to reach the Military Department of the Government of India by the 1st January.

Indents.

8. The annual indents for stores from England will be prepared by the respective heads of departments, and submitted to the controller of military accounts at each Presidency, by whom they will be carefully reviewed and submitted, in Bengal to the Military Department of the Government of India, Account Branch, and in Madras and Bombay to the military secretaries to those Governments, for immediate transmission to the home authorities. Copies of the indents transmitted from Madras and Bombay will be forwarded to the Military Secretary to the Government of India, who will eventually forward them, after examination in the Account Branch, to the Financial Secretary to the Government of India.

Section VIII.—Appeals and Complaints.

1. The following course of procedure should be observed in reference to appeals and complaints:—

2. Any officer or individual who objects to a disallowance made by a disbursing officer, will appeal through him to the examiner; and the disbursing officer is bound to forward the appeal.

3. Appeals from the decisions of examiners will, in like manner, be made through them to the controllers of military accounts; and if the decision be considered by the appellants as not conclusive, the controllers will forward any further representation for the decision of the Government of India or Local Governments, as the case may be.

4. No officer is allowed to make a direct reference to the adjutant general unless the examiner shall have refused to forward his appeal. Under any view, the right of appeal to Government is open to all officers, it being, however, distinctly laid down that all unnecessary appeals or references to Government are to be avoided.

5. If the controller decide in favour of the appellant, without the examiner being convinced of error, the latter will clearly and succinctly re-state the case, and the grounds of dissent, to the controller, who will then refer the question for the decision of Government in the Military Department.

6. All appeals other than those mentioned in paras. 2 and 3 above, whether personal or written, are to be made to the controllers, as also all complaints in respect to delays in auditing or examining accounts, whether of stores or monies. The controllers will investigate them, and see to their settlement. Appeals must invariably pass through the stages above prescribed; if any be omitted, the receiving officer will return the appeal for correction of the irregularity.

REPORT of the COMMISSIONERS of INQUIRY into INDIAN ACCOUNTS on the system of Audit and Account now pursued in the Military Department, with Suggestions in regard to the mode in which the Accounts should, in future, be recorded and audited.

---

1. HAVING concluded our investigation of the various offices composing the Military Account Department, we beg to submit the following Report :—

2. We will, in the first instance, briefly describe the constitution of the department as it now exists.

3. The Army of India is under the control of the Governments of India, Madras, and Bombay, the former having the administration of what is known as the army serving in the Bengal Presidency ; the latter Governments having control over that part of the army serving in the Madras and Bombay Presidencies respectively. How the army in India is controlled.

4. The Military Account Department consists, in each Presidency, of the following officers :— Departments of account.

Controller.
Military Accountant.
Compiler.
Examiner of Pay Accounts.
„ of Commissariat and Stud Accounts.
„ Medical Accounts.
„ Ordnance, Barrack, and Clothing Accounts.

And in Bengal there has been, during the last few years, an officer designated the "Chief of the Military Finance Department," but whose title has recently been altered into that of "Accountant General, Military Department." Accountant General.

5. The designation of Disbursing Officers is the same in each of the three Presidencies, viz. :— Disbursing officers.

Presidency and Circle Paymasters.
Commissariat Officers in charge of Ranges.
Officers in charge of Stud Depôts.
Pension Paymasters.

6. The duties of the officers forming the Military Account Department may be thus briefly and generally described.

Accountant General.

7. This officer is the principal adviser to the Government on all questions relating to military accounts ; he compiles, into a general budget estimate for all India the estimates furnished to him by the Controllers of the three Presidencies ; and it is intended that he shall in like manner compile the accounts of the receipts and expenditure for military services. Duties of Accountant General.

8. The duties of the Accountant General are prescribed by the General Order by the Right Honourable the Governor General, No. 197, dated 7th March 1864, and it is therein further prescribed that his relation to the Military Department will be similar to that of the Accountant General to the War Office at Home.

Controllers.

9. The duties of these officers are also prescribed in the above General Order ; they are as follows :— Duties of controllers.

I. To examine into all sources of military expenditure, and control all permanent and contingent expenses, whether relating to monies or materials, "but without interfering with the functions of the administrative heads of departments."

II. To check and examine the several annual estimates of expenditure, propose modifications therein, and to submit the same to the Accountant General, Military Department, by the 31st January of each year.

III. To represent to the proper authority, and to report to the Governments under which they are immediately serving, every instance in which reduction of expenditure, whether in money or stores, by any means of economy, may be practicable consistently with efficiency.

IV. To provide for the effectual supervision over all accounts of military expenditure, the verification of all balances of cash and stores; and with the view of restricting the amount of cash in hand, or of reserve stock, to make such inquiries as may be necessary; also enforcing the due and timely adjustment of all advances and inefficient balances.

V. To check all requisitions for cash and stores, and to see that the military accountant furnishes, in due course, the monthly and annual estimates of cash requirements.

VI. To examine and report upon the monthly returns of the effective strength of Her Majesty's British forces.

In addition to the above, the controller has to render to the Accountant General, Military Department, the following statements:—

I. Monthly statement of audited, passed, and classified expenditure.
II. Monthly statement of receipts and unaudited disbursements.
III. Monthly statement of increase and decrease of outstanding balances.
IV. State of audit of accounts in the several examiners' offices.
V. Quarterly statement of receipts and unaudited disbursements.
VI. Annual statement of receipts and unaudited disbursements.
VII. Annual statement of quick and dead stock.
VIII. Annual report on the appropriation audit.
IX. Abstract of annual general books.

Offices under the supervision of the Controller.

10. The offices of examination, compilation, and accounts, are under the supervision of the Controller; and the following officers, although each acting as the head of a department, are subordinate to, and are under the immediate directions of, the Controller, viz.:—

Examiner, Pay and Pension Accounts.
" Commissariat and Stud Accounts.
" Medical Accounts.
" Ordnance, Barrack, and Clothing Accounts.
Compiler.
Military Acountant.

Examiner, Pay and Pension Accounts.

Duties of pay examiner.

11. This officer examines all claims or payments on account of full pay, whether for staff, regimental, or departmental services; all bills for contingencies, or for any service not directly sanctioned by regulation, are examined in this office before payment. The examiner, when he has satisfied himself of the correctness of the claims, sends the vouchers to the compiler.

Who also examines pension accounts.

12. The examiner of pay accounts is also responsible for the examination of the accounts relating to pensions; the details of the duty, however, devolve upon the 2d examiner, who shares with the examiner a portion of the general work of the office.

Examiner, Commissariat and Stud Accounts.

Duties of the examiner of commissariat accounts.

13. The executive commissariat officer in charge of each of the 28 ranges forwards, at short intervals, statements, supported by vouchers, of his payments; these are examined in anticipation of the monthly account current: the commissariat officer makes all payments, excepting for the full pay of the permanent etsablishments, on account of Commissariat, Barrack, Ordnance, and Medical Services: the vouchers for the last three services are, after examination by the Commissariat

commissariat examiner, transmitted to the ordnance or medical examiners for re-audit: the commissariat examiner compiles, under the sub-heads of service, that portion of the account that relates to commissariat services proper, and sends a monthly compilation statement to the military accountant.

Stud accounts.

14. There are eight stud establishments: the officer in charge of each furnishes a monthly account current of his receipts and disbursements: this is audited by the commissariat examiner, and a monthly compilation statement of the expenditure, under detailed heads of classification, is prepared for the military accountant.

Examiner, Medical Accounts.

Duties of examiner of medical accounts;

15. The expenditure for medical services and supplies is disbursed by the commissariat officers of the several ranges: the vouchers having been audited by the commissariat examiner, a list thereof is forwarded to the medical examiner, who merely compiles the amount expended, under certain detailed heads of classification, and forwards a monthly statement to the military accountant.

he prepares Budget Estimate;

16. The medical examiner in Bengal prepares the Budget Estimate for medical services; he forwards four copies of this estimate to the principal inspector general of hospitals, and corresponds direct with that officer on this subject.

and furnishes statistical returns.

17. The other duties of the medical examiner are purely statistical, and consist of the preparation of certain returns showing the consumption of stimulants; the average cost of 100 sick in the several circles; the costof the medical charges of each regiment, and returns of this nature.

Examiner of Ordnance, Barrack, and Clothing Accounts.

18. This officer is intrusted with the following duties:—

Duties of the examiner of ordnance, barrack, and clothing accounts.

Examination of cash and store accounts of the Ordnance Department;
Examination of cash and store accounts of the Barrack Department;
Examination of cash and store accounts of the Clothing Department;

and he has, for the last year or two, been specially charged with the audit of the accounts connected with the Government Dockyard at Kidderpore: we have, however, recently suggested in our report on the system of audit and account pursued at Kidderpore Dockyard, dated 2d August 1861, that this latter duty should be transferred to the deputy auditor and accountant general, Bengal.

All purchases are made by commissariat officers.

19. All purchases for Ordnance, Barrack, or for the Clothing Departments are made by the commissariat officers, and vouchers for such expenditure are forwarded by the commissariat examiner to the examiner of ordnance accounts, who re-examines them, even to the arithmetical calculations.

Ordnance examiner pre-audits certain claims.

20. The ordnance examiner also "pre-audits," as it is termed, claims for repair of camp equipage, compensation for clothing, and for other services; the vouchers for these services are "enfaced" by the examiner, and transmitted to one of the commissariat officers for payment.

Officers by whom store accounts are rendered.

21. The principal duties of the ordnance examiner appertain to the audit of the store accounts; these are rendered in great detail by the officers at the head of the several manufacturing establishments; by the officers in charge of arsenals, forts, and magazines; by the officers in charge of regiments of cavalry and infantry and batteries of artillery, and, in fact, by every officer to whom stores are entrusted.

Balance sheets of manufacturing establishments.

22. The ordnance examiner also prepares annual balance sheets, and profit and loss accounts for the several manufacturing establishments, and reports upon the result of their out-turn and working.

Monthly statements of cash expenditure.

23. He also furnishes the military accountant with monthly statements, compiled under detailed heads of service, showing the cash expenditure on account of the Ordnance, Barrack, or Clothing Departments; and finally he also furnishes that officer with an annual account, in journal form, showing the entire transactions of each department, both as relates to store and cash.

Compiler.

Duties of compiler.

24. This officer prepares the Budget Estimate; classifies the expenditure, so far as relates to pay, under the detailed heads of service; keeps the returns in regard to the effective strength of Her Majesty's British regiments; and, in Bengal, keeps the registry of all admissions to the pension list, and regulates the transfer of pensioners from one circle to another.

Military Accountant.

Duties of military accountant.

25. This officer records the receipts and expenditure of the Military Department, and prepares all periodical statements connected therewith; he is responsible for the issue of letters of credit to the several sub-accountants, and for accounting for all monies or stores obtained for the military service.

Stores from England.

26. All invoices of stores from England are sent to the military accountants, who furnish the departments concerned with extracts or copies thereof.

Savings banks and casualty returns.

27. The duty of forwarding to the authorities at home the privilege remittance rolls, savings bank accounts, and the casualty returns, devolves upon these officers.

Is the book-keeper.

28. They are, in fact, the book-keepers for the whole of the military transactions in their respective Presidencies.

Statements to be furnished to civil financial officers.

29. By the General Order of 7th March 1864, it is prescribed that the military accountant at each Presidency will furnish the following periodical statements to the civil financial officers:—

I. Monthly statement of receipts and unaudited disbursements.

II. Quarterly statement of receipts and unaudited disbursements.

III. Annual statement of receipts and unaudited disbursements.

IV. Monthly statement of cash balances in the hands of disbursing officers.

V. Monthly statement of assessment, collection, and refund of income tax by disbursing officers of the Military Department.

VI. Annual general books, journal, and ledger.

We will now proceed to consider the duties performed by disbursing officers.

Presidency and Circle Paymasters.

Bengal is divided into six pay circles.

30. The Bengal Presidency is, for account purposes, divided into six circles, each of which is in the charge of a paymaster; the following stations are included in the several circles:—

Presidency Circle.—Pay Office, Calcutta, consisting of Alipore, *Barrackpore*, Ballygunge, Berhampore, Bhaugulpore, Cachar, Cherra Poonjee, Chinsurah, *Dacca*, *Darjeeling*, Debroogurh, *Dinapore*, Dorundah, Dum-Dum, Fort William, Gowhatty, Hazareebaugh, Julpigoree, Midnapore, Sylhet, and Titalyah.

Allahabad Circle.—Pay Office, Allahabad, consisting of *Allahabad*, *Benares*, Etawah, *Gwalior*, Jaunpore, Jhansie, Jubbulpore, Nowgong, *Saugor*, Segowlie, Sepree, Seronge, Goonah, Raipore, Chanda, Chindwarah, Nagode, Bhopal, Kerwarah, Sardarpore, Augur.

Lucknow Circle.—Pay Office, Lucknow, consisting of *Cawnpore*, Futtehgurh, *Fyzabad*, Gondah, Goruckpore, *Lucknow*, Moradabad, Seetapore, Shahjehanpore, Humarpore, Bandah, Bareilly, Nynee Tal.

Meerut Circle.—Pay Office, Meerut, consisting of *Agra*, *Delhi*, Deyrah, Dugshaie, Juttogh, Loodianah, *Meerut*, Muttra, Roorkee, Subathoo, and *Umballah*.

Lahore Circle.—Pay Office, Meean Meer, consisting of Dhurmsalla, *Ferozepore*, Govindgurh, Hazara, *Jullunder*, Lahore, Madhopore, Meean Meer, *Mooltan*, *Sealkote*, Dehra Ghazee Khan, Dehra Ismael Khan.

Trans-Ravee Circle.—Pay office, Rawul Pindee, consisting of Abbottabad, Bunnoo, Kohat, Murdan, Nowshera, *Peshawur*, and *Rawul Pindee*.

Hyderabad.

In addition to these six circles, there is a paymaster who renders separate accounts for the Hyderabad Contingent.

The

NOTE.—At the stations in italics, which are the head-quarters of commissariat ranges, cash payments are also made by commissariat officers.

How regimental paymasters obtain advances;

31. The paymaster of each circle is furnished, by the regimental paymaster or other disbursing officer, with an estimate of the amount required, during the ensuing month, for the payment of the troops; this estimate is certified by the officer commanding the regiment or battery. The circle paymaster compiles these estimates into a general return, adding thereto the amount he requires for the payment of staff and other allowances, and he specifies the sum that he will require to draw upon each treasury. This document is furnished to the military accountant on the 1st of the month, for the ensuing month's payments, in whose office the returns from the several circle paymasters and other accountants are compiled into a general statement showing the amount to be drawn during the month at each treasury in the several Presidencies; this statement is forwarded to the controller, who transmits it to the Civil Department, from whence the necessary authority is issued to the treasury officers.

and how payments to Native troops, staff, and other officers are made.

32. Payments to native troops and to staff and other officers are made monthly, in arrear; payments to European troops are made by the paymaster, or other disbursing officer, daily, and to facilitate this arrangement, advances on account of the current month's payments are made by the circle paymaster; the amount so advanced is not recorded as a final disbursement, but is held in the "Inefficient Balance" until the following month, or until such time as complete vouchers are rendered in liquidation of the advance.

Weekly statements of disbursements are forwarded by circle paymasters.

33. The circle paymasters forward to the pay examiner a weekly statement of the payments they have made, and they furnish to the military accountant a monthly account current of their receipts and disbursements.

Regimental paymasters in the Presidency circle render direct accounts to the pay examiner.

34. Until very recently, all officers to whom advances were made by the circle paymaster rendered to him the necessary documents in discharge of such payments; within the last few months the experiment has, in the Presidency circle only, been tried, by which regimental paymasters, or other disbursing officers of European troops, render their pay lists and vouchers direct to the pay examiner at Calcutta, the circle paymaster being allowed credit for the sum paid by him on the production of the payee's receipts.

No payments in cash are made by circle paymasters.

35. The circle paymasters make no payments in cash; they grant orders on the several treasuries throughout the country, or when they have a credit at the Bank of Bengal they issue cheques thereon. All family or service remittances are, in the first instance, paid to the circle paymaster, who issues orders of payment on the various treasuries.

The circle paymaster examines the accounts rendered to him.

36. The accounts rendered to the circle paymaster are carefully examined in his office before payment; a personal or ledger account is kept with each officer, commissioned or warrant.

Payments to staff officers and others.

37. Payments to staff and other officers, to European pensioners, and for non-regimental services, are made on bills prepared by the payees; they are presented to, and examined by, the circle paymaster, and, if correct, a statement is made out, giving the particulars of the claims; this document, together with the order of payment, is given to the claimant. The order of payment is, as before stated, either a cheque on the Bank of Bengal or on one of its branches, or an order on one of the local treasuries.

Pay certificate.

38. When an officer is transferred from the payment of one circle paymaster to another, a last pay certificate is granted; this document is the authority to the paymaster into whose payment the officer has passed, to make future issues of pay and allowances. When an officer is about to leave the country he must obtain the last pay certificate from the Presidency paymaster, and this document must be endorsed both by the pay examiner and by the military accountant.

Commissariat Officers in Charge of Ranges.

Duties of commissariat officers as regards cash accounts.

39. These officers, in addition to their executive duties, made payments for the services as per margin*, and render periodical statements of their disbursements

* Pay of subordinate and transport establishments, commissariat department. Supplies of provisions and forage. Supplies of barrack, ordnance, and medical stores, and for the pay of the subordinate establishments, and miscellaneous expenses on account of these departments.

ments to the commissariat examiner; they also furnish that officer and the military accountant with a monthly account current of their receipts and disbursements.

Mode of obtaining advances.

40. The commissariat officers submit, through the deputy commissary general of their circle, monthly demands for the amount of credit required; these demands are forwarded to the military accountant, and the treasuries concerned are duly informed of the amount to be drawn.

Store account.

41. Commissariat officers, in addition to their cash account, forward to the commissariat examiner a monthly store account.

Officers in Charge of Stud Depôts.

Officers in charge of stud depôts.

42. These officers submit demands for their monthly credit to the superintendent of studs, who obtains the necessary authority on the several treasuries from the military accountant.

Accounts furnished by stud officers.

43. The stud officers furnish, both to the examiner of the stud accounts and to the military accountant,—

I. Report of actual cash in hand on the last day of every month;

II. Monthly cash account current;

III. Annual accounts of cultivation;

IV. Annual accounts of the valuation of the cattle in each stud;

And render to the former officer only—

V. Monthly account of stock receipts and issues.

VI. Monthly return of cattle received, sold, transferred, or dead.

Pension Paymasters.

Duties of pension paymasters.

44. These officers render a monthly account of their payments to the pay examiner; they also furnish an annual statement of all pensioners in their payment; pensions to natives are granted at monthly rates, but the payment is made in six-monthly periods.

Letters of credit.

45. The paymasters obtain letters of credit for such amounts as they may require on the treasuries at the several stations where the pensions are paid.

Results of personal investigation.

46. Having thus given a general sketch of the military account system as now carried out in the Bengal Presidency, we will proceed to furnish the results of our personal investigation into the several offices, and of the accounts rendered thereto: this portion of our subject we will arrange as under:

I. Budget Estimate.

II. Examiners' offices, cash and store.

III. Office of account.

Annual Budget Estimates.

Budget Estimate.

Details are furnished by heads of departments.

47. The details upon which these are framed are forwarded by heads of departments, in the month of November, to the controller of military accounts in the several Presidencies.

Controllers submit estimates to the Accountant General.

48. The controllers having carefully examined and revised the details, compile them into a general estimate for each Presidency, and submit the same, on or before the 31st January, to the accountant general, who modifies the amount approved by the controllers for the various services to such an extent as he may consider desirable.

Accountant General is furnished with detailed documents;

49. The accountant general is furnished with a complete copy of all the detail documents upon which the estimates are framed. To the estimate submitted by the controller he adds four columns, viz.:—

1 and 2. Modifications of the Military Finance Department. Additions and Reductions.

3 and 4. Estimate as proposed by the Military Finance Department. Personnel and Matériel.

He

He moreover gives, on marginal notes on the printed estimates, full explanations of the causes that have led him to alter the sums proposed by heads of departments and by the controllers.

he furnishes explanations of alterations.

50. After the estimate has been revised by the Accountant General, it should be submitted to the Financial Department, on or before the 31st January, to enable the Financial Member to include the amount required for military services in his annual budget statement.

Estimate sent to the Financial Department;

51. It would appear, however, that these directions have been disregarded, and the Supreme Government has issued the following resolution, dated Financial Department, 15th April 1864, No. 2018.

that Department complains that its orders are disregarded.

"The grant passed under C. Army, for the service of 1864-65, is 12,65,31,890 rupees, including the value, as per margin, of stores and freight expected from England, as per estimate of the Right Honourable the Secretary of State for India. But as the grant has been based on a rough memorandum furnished by the officiating chief of the Military Finance Department, the Governor General in Council requests that proper estimates for 1864-65 be submitted without further delay; that the grant passed should be considered as conditional, only pending the issue of orders on the estimates when received in this department; and that measures be taken to prevent a repetition of the delay in the submission of the annual Budget Estimate of Military Expenditure, which has occurred every year sinc the introduction of the new system of accounts."

	£.
Stores -	328,744
Freight -	4,445
£.	333,189
or, *Rs.*	33,31,890

52. We were led, by the perusal of this resolution, to a very minute investigation into the course now adopted in the compilation of the Budget Estimates, and we are satisfied that so long as the present system is pursued, delay in furnishing the Financial Department with the information required must ensue.

Present system of compiling estimate must lead to delay.

53. As stated in para. 9, the controllers of the several Presidencies furnish the Accountant General with the estimate of the military expenditure for the ensuing year, on or before the 31st January, the very day fixed by the Financial Department as that upon which it should be informed of the amount required for each of the several services comprised in the Budget Estimates.

Estimates are furnished to Accountant General on 31st January;

54. As the Accountant General does not obtain the estimate for each Presidency until the end of January, he cannot commence his revision until after that date: the minuteness with which he appears to criticise the controllers' work is instanced by the fact that in the Bengal Estimate, as submitted by that officer, every item, with the exception of 16 only, has been altered by the Accountant General, his alterations ranging in sums from one rupee to 4,81,800 rupees.

they are minutely criticised by that officer.

55. In many instances the modifications by the Accountant General are not, we venture to think, justified by a careful investigation into the facts of the case, as gathered from the detailed documents furnished by the controller; and in confirmation of this opinion, we would refer to the following example which we have selected from the Madras Estimates, 1864-65.

Alterations of the estimates by Accountant General open to objection.

56. A reduction was made of 1,14,214 rupees from the Madras Estimate, under the head of "Horses;" the sum demanded by the Commissary General is 5,14,214 rupees; this is reduced by the Accountant General to four lakhs; the only explanation that is afforded being that he considers that sum adequate for feeding 4,850 horses. We have referred to the detail estimates, and find that the number of horses is correct; that the cost of feeding them is based principally on contract rates; and that the aggregate of the estimate amounts, as stated by the Commissary General, to 5,14,214 rupees.

The amount provided at Madras for forage.

57. Many similar cases might be adduced where the alterations made by the Accountant General are open to question; reductions such as that noticed must put the departments concerned to great inconvenience; and, if persisted in, will lead to a loose and careless manner of preparing the estimates. If an executive officer find that the statements he has elaborated with thoughtful care, and upon which he bases his cash demands for the year, be entirely ignored by the Accountant General, Military Department, he will soon cease to take any interest in their preparation, and they will become valueless.

No deductions should be mad. unless head of department is consulted.

We would suggest that, when practicable, no deduction, clerical errors excepted, should be made from an estimate, unless the head of the department concerned has an opportunity of affording an explanation in substantiation of the figures submitted by him; this might be easily arranged, so far as Bengal is concerned, and without causing delay, were the Accountant General, during the preparation of the estimates, to put himself into personal communication with the heads of departments.

Diversity of forms upon which estimates are compiled.

58. We would now offer a few remarks upon the forms in which the detail estimates are submitted by the Controllers of Military Accounts to the Accountant General. We should have imagined, as the estimates all flow to one centre, that uniformity of detail would have resulted; this, however, is not the case, there is scarcely one of the items that is made up on a principle common to the three Presidencies, *e. g.*—

Unnecessary detail for barrack supplies in Bengal and Bombay;

59. In Bengal and Bombay the estimates for barrack supplies are made out in the greatest detail; the number of articles required by each regiment or detachment is separately shown. In Bengal the explanatory vouchers fill two thick octavo volumes, and in Bombay these documents fill three volumes (Imperial). The immense number of items that have to be separately calculated must involve a great deal of unnecessary work—unnecessary, because we find that the only information furnished by the Controller at Madras is a simple statement, from each of 27 stations, of the total quantities of the several articles required; these statements are brought together in a general abstract, and the amount demanded is clearly and distinctly shown, the whole of the information being contained in a few sheets of paper.

and in Madras unnecessary detail of medical charges.

60. It must not, however, be inferred that the Madras Estimates are entirely to be adopted as a model for the other two Presidencies, for we find, with reference to the estimate for medical supplies, that whilst Bengal and Bombay furnish the information required in a condensed and abstract form, Madras fills one very thick volume, with the detail of the articles required and their cost; detailed estimates are furnished by every medical officer in charge of an hospital, who provides with elaborate minuteness for every ingredient which composes the diet of the patients, and for every article of general supply for hospital use; in very many of the estimates we find such items as the following:—

1 Nutmeg grater - - - - - -	2 annas.
1 Needle - - - - - - - -	1 pie.
5 Eggs - - - - - - - -	3 pie each.
5 Corks, &c., &c.	

No practical advantage from this detail.

61. Considering that these estimates are compiled in the month of October, and are based upon the estimated number of sick during the year commencing six months after that date, it appears to us that no practical advantage can be derived from this elaboration; in this view we are borne out by the fact that when these estimates are revised by the Accountant General, he entirely ignores the whole of the detail, and allocates to the Madras Presidency a defined amount based on the average number of sick, and the average cost, as ascertained from the expenditure of previous years, of each diet.

The Accountant General overwhelmed with detail.

62. The great amount of detail that is, under present arrangements, furnished to the Accountant General renders it almost impossible for that officer to exercise any practical check over the estimates as submitted by heads of departments; the alterations that he may make are frequently the cause of embarrassment to the department, and lead to an unnecessary and useless correspondence: the details furnished by the several controllers fill no less than 30 volumes:—

Bengal - - - - - - - - - -	10
Madras - - - - - - - - - -	6
Bombay - - - - - - - - - -	14
	30

63. Without

No normal vouchers for details of estimates.

63. Without burdening this report with further details in regard to the anomalies that exist in the form of the subsidiary vouchers of the estimates of the three Presidencies, we will merely state that although an attempt has been made to introduce a set of vouchers common to the whole of India, each Presidency appears to have its own views as to the mode of making up these vouchers, and of the extent of information that should be afforded to the Accountant General.

Documents compiled by Accountant General for Financial Department.

64. The Accountant General, in addition to the Budget Estimates, compiles, for the information of the Financial Department, the following returns:—

I. Cash requirement Estimate.

II. Regular Estimate.

III. Actual Receipts and Disbursements.

These returns are unnecessary;

65. With reference to Estimates Nos. I. and II., considering, as we do, that one carefully compiled estimate of military services is sufficient for all practical purposes, we have not gone very minutely into the mode of compiling these documents; it is admitted that, so far as No. II. is concerned, it causes a great deal of work in the compiling offices; and the information it contains is no more to be relied upon than that contained in the original estimate.

and they are incomplete.

66. In regard to the "Actual Receipts and Disbursements," it is not the complete and final record of the military receipts and expenditure of the year; and is, in our opinion, quite valueless; we shall, before we close this report, suggest a simple, and, we trust, effective substitute for this unsatisfactory return.

Disbursing, examining, and accounting officers.

67. It is now necessary to draw attention to the course observed by the several disbursing officers in regard to their payments, and the manner in which the accounts rendered by them are audited and compiled in the Military Account Department; we have arranged this part of our subject in the following order:—

I.—Presidency and Circle Paymasters.

II.—Examiner, Pay Accounts.

III.—Compiler.

IV.—Commissariat Officers of Ranges.

V.—Examiner, Commissariat and Stud Accounts.

VI.—Ditto, Medical Accounts.

VII.—Ditto, Ordnance, Barrack, and Clothing Accounts.

VIII.—Military Accountant.

IX.—Controller.

X.—Accountant General.

I.—*Presidency and Circle Paymasters.*

Circle Paymasters.

Inexpediency of holding advances to regimental paymasters in the inefficient balance.

68. In para. 32 we alluded to the existing arrangement of making advances to the paymasters of Her Majesty's British regiments for the payment of the troops, and the holding such advances in the "inefficient balance" until the following month; this system is very faulty, as it not only involves a vast amount of unnecessary work on the Circle Paymasters, but it withdraws, from the actual expenditure of the year, a large sum for the pay of officers and men, for which a grant has been obtained.

Immense detail of the inefficient balance.

69. The unnecessary labour imposed upon the Circle Paymaster is instanced by the fact that he is compelled, when he renders his monthly account current, to send to the Military Accountant a list in which is given the full particulars of every item comprising the balance; the list for the Allahabad Circle for the month of March last comprises 817 separate items, some of which are for extremely small amounts, and have been brought forward, month by month, for very long periods.

70. The

Amount of inefficient balance.

70. The aggregate amount of the inefficient balance was, on the 31st of March last, as follows, viz. :—

	Rs.
Presidency Circle	2,84,849
Allahabad	2,82,936
Lucknow	3,89,401
Meerut	5,63,000
Lahore	2,39,241
Trans-Ravee	2,69,689
Hyderabad Contingent	56,683
TOTAL *Rs.*	20,85,799

71. The amount of the inefficient balance in the Madras Presidency is 8½ lakhs, and in the Bombay Presidency it is 9 lakhs, or, in all, no less than upwards of 38 lakhs.

Under present system, the expenditure for a year is a matter of opinion, and not one of fact.

72. The inefficient balance is an exceedingly embarrassing item in the military accounts, and leads to great difficulties in adjusting them at the end of the year; for whilst the annual account of receipts and disbursements made up by the Military Accountant exhibits the audited expenditure only, the account of military expenditure compiled by the Financial Department, for the information of the Home Government, shows the audited expenditure, plus the amount of inefficient balance at the end of the year, minus the amount of that item at the commencement of the year; the two accounts can never agree, and it is always a matter of opinion, and not one of fact, as to what has been the military expenditure for any one year; moreover, the "inefficient balance" is differently treated in each Presidency.

The period of the budget estimate and the annual account differ.

73. In consequence also of the system now in force in regard to the inefficient balance, the following anomaly exists :—The Budget Estimates provide for the pay of officers and men for a year from 1st May to 30th April; the expenditure as shown in the annual account of receipts and disbursements is, so far as regards the European force, limited to pay, for the officers, to the end of February, and, for the men, to the end of the month of March; in respect, however, to the expenditure on account of the Native Army, the pay, both of officers and men, is included to the 31st March. We shall subsequently suggest an arrangement by which this anomaly and inconvenience may be obviated.

The military accountant, although responsible for the inefficient balances, does not investigate them.

74. We are in possession of a copy of the "Preliminary Rules and Instructions for conducting the duties of the Military Finance Department," dated 18th October 1861; it is therein stated, Act VII., p. 19, "The Military Accountant will also take care that outstandings are not allowed to remain unsettled, and he will carefully scrutinise the state of all inefficient balances." Notwithstanding these very clear and positive directions on this subject, we find that the Paymasters of Circles have rendered their accounts to the Military Accountant, month after month, containing such items as the following :—

ALLAHABAD ACCOUNT, March 1864.—Statement of Inefficient Balance.

Captain Honourable A. Stewart. — Retrenchment No. 474, December 1861, one pie—to be recovered from him. Balance of *Rs.* 399. 11.

Captain J. Banham, D 2, R. H. Brigade.—Retrenchment No. 591, August 1862, six pie—Memorandum given 19th February 1864 for recovery.

Paymaster, 80th Regiment.—Two pie—to be recovered from him.

Retrenchments made for absurdly small amounts.

75. One of the above items has been brought forward on the Retrenchment Statement, month by month, for no less than 28 months, and no steps have been taken in the Military Accountant's office to stop the great inconsistency of perpetuating to the debit of officers' accounts amounts so infinitesimally small as not to be worth the collection, and which should never have appeared to their debits.

76. The

76. The following is the form furnished every month from each of the six pay circles, in which the several items of the outstanding inefficient balances are particularised :— Form in which monthly return of inefficient balance is rendered.

Office.		Name of Disbursing Officer.	To whom Paid.	Particulars of Payment.	Advances.	Retrenchments.	Total Amount Outstanding against each Officer.	Steps taken for Adjustment.
No.	Date of Payment.							

77. It would appear from a return compiled, for our information, in the office of the controller, that the following is the average number of separate payments by each of the circle paymasters during the three months ended 31st March last; from this return and the particulars we have furnished in the Appendix (No. 2) of the estimated charge for the several circle pay offices for 1864-65, we observe that the estimated cost of each *separate* payment is as under :— Return of the number of separate payments by each paymaster, and average cost of each payment.

Circle.	Number of Vouchers.					Cost of Establishment per Annum.	Average Cost for each Separate Payment.
	European Troops.	Native Troops.	Miscellaneous.	Total per Month.	Total per Annum.		
						Rs.	*Rs.*
Presidency - - - - -	177	269	1,000	1,446	17,352	57,320	3·30
Allahabad - - - - -	82	165	327	574	6,888	28,690	4·16
Lucknow - - - - -	24	63	332	419	5,028	28,040	5·59
Meerut - - - - -	82	87	652	821	9,852	27,040	2·74
Lahore - - - - -	82	54	274	410	4,920	24,680	5
Trans-Ravee - - - -	29	94	242	365	4,380	26,480	6

78. The average cost of making each payment, as ascertained from these returns, appearing to be excessive, we considered it our duty to investigate personally the office of one of the circle paymasters; that at Calcutta was the only one that we could, without considerable delay and inconvenience, visit. *Presidency Paymaster.* Investigation into the Calcutta Pay Office.

79. After making a preliminary examination of the books kept and the accounts rendered by the Presidency paymaster, a visit was paid to his office on the 1st June, on which day the amount of business transacted is considerably beyond the average; the limits of the circle of this paymaster are described in paragraph 30; his disbursements include payments to— Extent of his payments.

Staff and Departmental Officers and to Officers of the Account Department;
Paymasters of European Regiments;
Officers Commanding Native Regiments;
Pensions to Europeans;
Miscellaneous Services;

in the latter category the payments made by the paymaster of invalids and the paymaster of the depôt at Chinsurah are included.

80. Following the course, through the Presidency Paymaster's Office, of a bill for pay, say that of the Accountant General, we found that from the time of its delivery to the time the cheque is given to the payee, it undergoes no less than 10 or 11 operations, each by a separate individual. One of these operations consist of making a statement of the bill, showing the amount and the deductions; The course of a claim through the office.

this is given to the claimant, although he has made out the original himself, and is, moreover, of the same amount as that presented on many previous occasions; the time taken up by the examination and manipulation of the claims is very considerable, and further time is consumed by the claimant in obtaining, at the Bank of Bengal, cash for the paymaster's draft.

All payments are made by cheque on Bank of Bengal.

81. At the period when we inspected the Paymaster's Office, every payment was made by cheque on the Bank of Bengal; the controller who accompanied us was so struck with the inconvenience of this arrangement, both to claimants and to the office staff, and seeing also the additional labour it entailed, he at once issued an order to the paymaster to pay in *cash* all claims of five rupees and under: an order of the Financial Department is, however, in existence, limiting payments by cheque to 10 rupees and upwards.

The most trifling claims involve a large amount of work in their payment.

82. As an example of the extraordinary waste of time in dealing with small matters, we will select a claim preferred by the Deputy Judge Advocate General of Calcutta for six annas (9*d.*) for paste supplied either by or for the duftry; it is signed by the officer preferring it, but being for *stationery* expenses, he cannot order the payment, or rather he is prohibited from including the amount in his ordinary contingent bill until it has been "pre-audited" by the controller of the Stationery Department; the claim is therefore sent to that department in the first instance; is duly examined, recorded, and enfaced, in red ink, for the amount allowed, signed by the controller of stationery, and by him returned to the Deputy Judge Advocate General. He is now in possession of a document upon which he can obtain payment from the Presidency paymaster, and, accordingly, he sends the claim to that officer for payment; he is still prohibited from including the amount in his ordinary monthly contingent bill. The claim, when it reaches the office of the Presidency paymaster, is subjected to the examination and manipulation described in the previous paragraph, and eventually the paymaster signs two documents for this small sum of six annas, viz., one a statement of the bill, to be returned to the payee, and the other a *cheque upon the Bank of Bengal*, and the claimant is subjected to a further delay in obtaining cash for this draft.

As also in their record in the paymaster's books.

83. The transaction, so far as the paymaster is concerned, does not end with the record through the books prior to the time the cheque is issued; it has to be further recorded in the books and statements from which the disbursement lists and account current are compiled, and has finally to be entered in both of these documents for the information of the military accountant and the pay examiner.

Artillery stationed at Calcutta paid by paymaster at Allahabad.

84. We observed also that the Presidency paymaster makes remittances to Saugor for the pay of the battery of artillery at that station; the battery of artillery stationed at Calcutta is, however, not paid by this officer, but by the circle paymaster at Allahabad; this unnecessary complication of duties has arisen from an order having been issued that the circle in which the head quarters of the brigade is located should undertake the payment of all the batteries belonging thereto, wherever stationed.

The paymaster of invalids and the paymaster at Chinsurah neither render accounts or disburse cash.

85. We will venture another case in exemplification of the elaboration of work under the present system. There is, as before observed, an officer at Calcutta who is charged with the duty of adjusting the accounts of invalids and time-expired men prior to their embarkation for England; the officer is designated "Paymaster" and Commandant of Invalids; there is another officer, the paymaster of the depôt, stationed at Chinsurah, whose duty it is to pay the recruits from England prior to their being sent to their respective regiments. The payments made by these officers are sometimes very numerous, and yet the following course is pursued in regard to each payment: a bill or claim is made out for the amount to be paid; it is sent to the examiner, Pay Department; it is enfaced and signed by that officer, returned to the paymaster at Fort William, or Chinsurah, as the case may be, and, by them, presented to the *Presidency* paymaster, who, after manipulating the claim through his books, issues a cheque on the Bank of Bengal for the amount, retains the voucher, and returns it, with his accounts, to the pay examiner within seven days of the date of payment. It will be thus seen that, although there are two officers holding the appointment of paymaster, they are not entrusted with a single pice, but are compelled to obtain

obtain the money they require through the agency of another paymaster, who merely grants a draft for the amount: the delay incurred, and the amount of labour involved in working a simple transaction through such complicated machinery can hardly be credited, and, to a great extent, accounts for the excessive cost of the departments connected with the military accounts in this country.

86. The pay circles, as at present constituted, are in fact examining offices, and so minutely are the accounts examined by the paymaster before they are paid, that the Presidency paymaster has a staff of no less than 47 clerks.

The Paymasters' Offices are examining offices also.

87. On an analysis of the Presidency paymaster's account current for the month of March 1864, we find that the total number of vouchers was 1,257, viz.:—

Analysis of the payments, for one month, by the Presidency paymaster.

Pensions of small amount to widows, and for wounds, &c.	285
Bills in payment of small claims for pay and contingencies, 100 rupees and under	276
Establishment, pay, passage allowance, and other bills	696
	1,257

88. The payment and record of these claims occupied 49* officers and clerks 27 days, or at the rate of under one claim per clerk per diem; and when it is considered that many of the bills have already been examined by the pay examiner, and are moreover for very small amounts, it appears to us almost incredible that occupation could be found for so large a staff; but we must say that, on our personal inspection of the office, every clerk appeared to be fully employed, and we were given to understand that the work was with difficulty carried on with the present establishment; this, on a survey of the records, was soon manifest, for we found no less than 28 different ledgers, journals, registers, and other books, many of them, *e. g.*, the personal account with every officer in the Presidency pay circle, being of great bulk.

One payment per clerk per diem.

* Presidency Paymaster - - - 1
Assistant on probation - - - 1
Clerks - - - - - - 47
49

49×27=1,323

89. The preparation of the monthly account current and the supporting documents involve a vast amount of labour; the paymaster is responsible to two officers for the accuracy of his accounts: to the examiner for his disbursements, and to the military accountant for his account current; the documents furnished to the latter officer in explanation of the inefficient balance, and of the cheques drawn on the Bank of Bengal are exceedingly voluminous, and might be dispensed with, the former by having a quarterly instead of a monthly return, and the latter by the utilization of the Bank Pass Book. We should have submitted a scheme for the revision of this department, but we consider that a more sweeping alteration is required, and we shall, in due course, suggest what, in our opinion, should be the course through which payments in the Presidency should flow.

Great detail of account current and monthly statements.

90. We would here observe that the Office of the Presidency Paymaster and that of the Examiner of the Pay Accounts *is in the same* building, nevertheless the paymaster furnishes the same description of returns and accounts to the examiner, and goes through exactly the same process as does the circle paymaster at Meerut or Lahore.

The Offices of the Paymaster and the Examiner are in the same building.

91. We have shown in para. 77 that each payment made by the Presidency paymaster costs *Rs.* 3. 30; we consider this rate excessive and only to be accounted for by the amount of unnecessary work performed; the cost of similar duties performed in the Trans-Ravee Circle is on an average 6 rupees for each payment; this is exclusive of the cost of examination, compiling, or of any portion of the expenses of the Offices of the Military Accountant, of the Controller, or of the Accountant-General.

The cost of making the payments is excessive.

92. The appointments of circle paymasters were originally made in the last century; doubtless at that period, and even down to the time of the opening of the Main Line Railway, the system was a good one, as the time occupied in communicating with the stations in the Upper Provinces rendered it necessary to subject the claims to a preliminary examination before payment; circumstances

The introduction of railways has rendered the appointment of circle paymasters unnecessary.

stances have, within the last few years, materially changed, and the most distant military station is now reached by dâk in a few days.

Inconvenience of circle paymasters paying commissariat pay bills.

93. The pay examiner being the auditor of all claims for full pay, it is considered that those claims can only be paid by one of the circle paymasters, so that the amount may appear in his list of disbursements to be rendered to the former officer; this is a cause of much inconvenience to many officers, and increases work to an unnecessary extent; *e. g.*, the commissariat officers at Saugor or Gwalior, although disbursing officers and rendering monthly accounts to the Military Account Department, Calcutta, are compelled to send the bills for their own pay and that of their permanent establishment to the circle paymaster at Allahabad for pre-audit, a distance, by road, of 282 and 265 miles respectively; the claims can only be paid by the circle paymaster by a draft upon the treasuries at the stations, and at which the commissariat officers themselves have an open credit.

94. We will pass to the officer to whom the accounts of disbursements are rendered, and who is charged with the duty of making a detailed audit thereof; this officer is the

II.—*Examiner, Pay Accounts.*

His office has recently been removed to the same building in which the Presidency paymaster conducts his duties.

Detail of the duties of pay examiner.

95. The following is the course observed in the examination of the accounts:—the weekly lists of sums disbursed by the circle paymasters are forwarded direct to the pay examiner, who sees that the claims and accounts are correctly computed; that the muster of the troops has been duly made; that the names of the men are correctly brought forward from the previous muster rolls; and that all necessary and supporting documents are furnished: he also sees that the expenditure is within the amount provided in the Budget Estimate. Every issue of pay to officers, commissioned or warrant, is entered in the ledger to the personal account of such officer; there are no less than 12 ledgers, each containing 700 names: it will have been observed that the Presidency paymaster also keeps a ledger account with each officer in his payment; other paymasters, doubtless, do so also.

Labour involved in pre-audit of miscellaneous claims.

96. Claims for miscellaneous services are invariably transmitted by the circle paymasters to the pay examiner for pre-audit; they are fully indexed, a *literal copy* is also made of each of them, and the original claim is returned to the circle paymaster to pay the amount; the voucher is re-transmitted to the pay examiner by the circle paymaster generally within a few days of its leaving the Circle Pay Office; there are about 8,000 claims annually in the Bengal Presidency. We would recommend for the future that the original claim should be retained by the examiner, and a letter of advice forwarded to the disbursing officer, directing him to pay the amount allowed.

Retrenchments.

97. The pay examiner communicates either to the circle paymaster, to the regimental paymaster, or other disbursing officer the result of his examination, and furnishes such officers with the particulars of any retrenchments that may have been made.

Vouchers forwarded to compiler.

98. This officer also notifies on each voucher that it has been examined, and so soon as the weekly list of a circle is complete, the vouchers are forwarded to the military compiler, with a letter advising him of the total amount passed; the list, which would be exceedingly useful to the compiler, is retained by the pay examiner.

III.—*Compiler.*

Duties of compiler.

99. On the receipt of the vouchers from the pay examiner, the compiler prepares a list of the vouchers, and agrees the amount with the total sum advised by the pay examiner; he then proceeds to classify the expenditure under the heads of the Budget Estimate; he enters, in a rough memorandum book, called "Primary Compilation for the Week ended ——," the total amount of each voucher, the nature of the charge, and, where necessary, he subdivides the amount under minor heads. There is a separate book for each circle.

100. The

100. The amount classified under service heads, as shown by the Weekly Register, must agree with the total sum advised to the compiler by the pay examiner. The compiler's statement must agree with examiner's return.

101. The total amount recorded in the Weekly Registers, under the several heads of service, are next entered in registers called "Final" Compilation Statements, where the weekly totals are gathered up under monthly results, which results are posted into a third or "General" statement: in this also the amount expended in each circle is separately shown under heads of service; this document is forwarded to the military accountant. "Final" Compilation Statements.

102. As the amount disbursed by the circle paymasters is shown in their monthly accounts current, under "current period," "last year," and "prior years," the compiler makes three sets of the "Final" and "General" statements; the number of statements furnished by the compiler to the military accountant is therefore 868 * per annum. Number of statements prepared by compiler.

Weeks.—Primary	-	52 × 7 (*a*)	= 364
Months.—Final	-	12 × 7 × 3	= 252
General	-	12 × 7 × 3	= 252
			*868

(*a*) Including Hyderabad.

103. The compiler, also, prepares the Budget Estimate for Military Services for Bengal; he is furnished by the heads of departments with such statements as he may require, and after a very careful examination of the details, he brings them into an abstract, and submits it, together with the explanatory and detailed statements, to the controller. Compiler prepares Budget Estimate,

104. The estimate having been approved by the controller, the compiler furnishes to the Accountant General a copy of every statement that has been used in its compilation; this involves much labour at the most busy period of the year; the statements fill two large volumes. The offices of the Compiler, Controller, and Accountant General were, until within the last few weeks, all in the same building. and sends copy of detailed statements to Accountant General.

105. The compiler, in addition to his other duties, keeps a record of the native soldiers who are placed on the pension list; he should record also all casualties by death or otherwise; this, however, has not been done for some time, and the register is both incomplete and in arrear. We are given to understand that there is great irregularity on the part of the pension paymasters in forwarding the casualty lists. As the pay examiner is charged with the audit of the pension accounts, we should have thought that the duty of keeping the records in regard to pensions should have devolved upon him rather than on the controller or the compiler. The compiler keeps register of pensioners.

106. It is important to notice that the duty of the compiler, so far as relates to the classification of the expenditure, is limited solely to the amount disbursed on account of pay; the commissariat, medical, barrack, and ordnance examiners have on their establishments an assistant specially charged with compiling the accounts appertaining to their separate departments. Separate compilers for commissariat and other services.

IV.—*Commissariat Officers of Ranges.*

107. The duties of these officers are briefly described in para. 39; there are 28 disbursing officers who render accounts to the commissariat examiner and to the military accountant; to the former office is transmitted, about every 10 days, a list of vouchers for examination in anticipation of the monthly account current; the latter document is generally received about the middle of the month following that for which the account is rendered; with the cash account is also forwarded a monthly return of stores issued and received. Duties of commissariat officers.

108. The commissariat officer pays for all services appertaining to commissariat, medical, barrack, and ordnance supplies; a great many payments, particularly with reference to the first three services, are on account of regiments, *e. g.*, dry batta to men on holidays or absent with leave, punkah establishment for regimental hospitals, repairs of fire-engines, conservancy establishments, gomastah bills, &c., &c.; these claims are, under the present system, which assumes that only commissariat officers can pay for commissariat supplies, certified by the officer commanding the regiment, forwarded by him to the commissariat officer for examination, who transmits to the certifying officer in regard to payments for regimental services;

an order of payment, not on the paymaster of the regiment, but on the local treasury: the commissariat officer retains the voucher, and forwards it, with his periodical list of disbursements, to the commissariat examiner.

inconvenience of present arrangement; payment should be made by the regimental paymasters.

109. This arrangement entails unnecessary trouble both to the officer commanding the regiment and to the commissariat officer; the former, instead of being able to adjust the transaction through the intervention of the paymaster of the regiment, is compelled personally to negotiate the draft of the commissariat officer, and that officer, instead of limiting his duties to the examination and approval of the claim, has to pay the amount to a regiment very frequently at a considerable distance from his own station, to debit himself with the amount of the draft drawn, to include the sum in his list of disbursements, and to pass the transaction through his cash book; the simple course would be for all claims, appertaining to commissariat services in connection with regiments, to be certified by the officer commanding, to be by him forwarded to the commissariat officer, who should, if the claims be correct, allow the same, and authorise the regimental paymaster to pay the amount, and include it in his monthly pay list. We have compiled a new form of pay list (Appendix, No. 9), in which provision is duly made for this arrangement, an arrangement which will relieve all parties, particularly commissariat officers, of considerable labour.

Specimen forms should be prepared in Calcutta.

110. Specimen forms of claims applicable to the Bengal Presidency should be prepared in the Military Account Department, Calcutta. Under existing arrangements each commissariat officer appears to send up, in support of the charges in his account, such vouchers as he may deem sufficient; these are in manuscript, and cover an unnecessary amount of paper, one-half of the form being generally reserved for the "remarks by the executive commissariat officer," the "remarks" usually consisting of a transcript, on the right-hand side of the page, of the information contained on the left-hand side; the deductions or disallowances, if any, should be made from the amount at foot of the bills, and credit only given for the net amount paid.

The account current should be limited to cash transactions.

111. The cash transactions of commissariat officers should be of the most simple character; they should debit themselves with all cash received by them, whether in the nature of drafts upon the local treasuries, from regiments, or from private individuals for the purchase of stores. We urge this course, as we find that it is the practice to mix up store transactions with the cash records, and to credit in the account current fictitious amounts for the supply of stores to other Presidencies or departments, and to debit, per contra, the same amounts to the general account of the Government of India. The account current should be strictly limited to *cash* transactions; all others should be adjusted by the officer to whom the accounts are forwarded for examination, and all that he requires is the voucher showing the quantity and value of the stores issued, and the name of the party receiving them.

Expenditure is sub-divided, contrary to orders of Government;

112. We notice that, notwithstanding the order of Government to the contrary, the items of expenditure are classed in the account current under the heads of—

Arrear, former years - - { Settlement. Payment.

Current.

this has been done by orders of the Accountant General.

It has been ruled that the amount to be charged as the expenditure of the year shall be the amount that may come in course of payment within the year, the above sub-division is therefore both unnecessary and inconvenient. We would suggest that orders be at once issued to stop this useless classification of charges, as we find that it pervades the books of the department; it is continued, so we are given to understand, by orders of the Accountant General, Military Department.

V.—*Examiner of Commissariat and Stud Accounts.*

Duties of commissariat examiner,

113. In the Bengal Presidency there are 28 officers of the Commissariat Department who are disbursers; each of these officers renders, every 10 days, to the examiner of the commissariat accounts a statement, accompanied by vouchers, of his payments: he also furnishes, at the expiration of each month, an account current of all receipts and payments; a copy of this account is also forwarded to the military accountant.

114. The

who forwards the vouchers for medical and other services to the departments concerned.

114. The examiner of commissariat accounts selects from the vouchers forwarded by the commissariat officers those appertaining to the Medical, Ordnance, Barrack, or Clothing Departments; these he forwards, with a statement showing the aggregate amount for each service, to the examiners of the accounts of the several departments. The commissariat examiner then credits, in his books or statements, the disbursing officer with the amount of the vouchers forwarded by him to the examiners of the other departments. The aggregate amount is included under a general head of "Charges on account of other Military Departments;" any retrenchments that are made in connection with these vouchers are communicated to the commissariat examiner, who embodies the observations of the other examiners with his own, and transmits them to the commissariat officer.

Monthly compilation statement is prepared;

115. After the vouchers for commissariat services have been duly examined, they are classified under heads of service, and a monthly statement, showing the sum expended under each budget head and sub-head, is compiled. This statement is divided into three sections, and shows the amount applicable to each station on account of "commissariat services," "settlement of arrears 1861–62 and former years," and "payment of arrears 1861–62 and former years." A copy of this return, which is exceedingly elaborate, is forwarded to the military accountant.

as also an annual statement.

116. In addition, an annual account is made up, compiled from the monthly returns, and a copy furnished to the military accountant.

Controversy with military accountant.

117. A question has been referred to us on the subject of relieving the examiner of commissariat accounts of work stated to be properly belonging to the Military Accountant's Office; a further question is raised as to the necessity of the accounts current of executive commissariat officers being submitted to the commissariat examiner, and whether that officer could not obtain details required by him in some other manner than through the medium of the account current.

Reference to printed reports.

118. On the subject raised in this reference, we have before us the printed Report of the Military Accountant to the Controller of Military Accounts, No. 75, dated 30th May 1864, and the Appendices thereto, containing the remarks of the commissariat examiner on the report in question, and the military accountant's replies.

Which department shall examine commissariat receipts;

119. The original question was simply this: shall the debtor side of the commissariat officer's monthly account current, at least so far as the amount received by him for income tax, fines, sale of stores, &c., be examined by the military accountant, or by the commissariat examiner?

the military accountant contends that it is his duty.

120. The military accountant urges that the examination of the debtor side of the account current should rest with him, and that he also should alone criticise the "inefficient" balance statement; on the other hand, the examiner of commissariat accounts contends that many of the items of receipt, particularly in regard to the sale of rum, malt liquor, and other stores, are so blended with the *store* accounts of those articles, that the examination can only be conducted by him, unless he furnishes the military accountant with copies or certificates from his store accounts, an arrangement which would lead to no practical results, and only cause unnecessary expense; this the military accountant admits; for, while urging for the transfer of this work from the commissariat examiner, he states that it will not be practicable for him to undertake the duty in question without the aid of "at least" two assistants, possessing a good knowledge of accounts "and of the commissariat system," on salaries say of 150 rupees and 100 rupees per mensem; this evidently means that the clerks who have hitherto performed the work in the Commissariat Examiner's Office should be transferred, at increased rates of pay, to that of the military accountant. We see no object in this, and we quite concur in the view expressed by the commissariat examiner, that the duty of checking the debit side of the account current (excepting that portion relating to the advances from the local treasuries) should be entrusted entirely to that officer.

The military accountant should not undertake the duties of examiner.

121. The military accountant is, to use his own terms, "the book-keeper of the Government," and as such, his duties should, in our opinion, be limited to recording the results of the accounts of disbursing officers, after those results

have been ascertained by the examiners. We shall, in due course, treat upon the duties of the military accountant; very detailed information relating to this controversy will be found in the 46 closely printed pages (foolscap) of the report above alluded to.

Further questions raised by military accountant.

122. The military accountant has, however, in this report raised three important questions bearing on the duties of the commissariat examiner, which we will here allude to:—

1st. Whether the commissariat examiner should keep a money value account of all commissariat stock?

2d. Whether the total amount should be passed through the books kept by the military accountant? and,

3d. He deprecates the system of "intermingling cash and store transactions" in the cash accounts current of the executive commissariat officers.

Commissariat store accounts show quantities only:

123. Hitherto the commissariat store accounts have been limited to showing the receipt and issues in quantities only; the principal articles kept in store are malt liquor, wine, spirits, and tea; other articles are also retained, but in very limited quantities. The system pursued in regard to the supply of rations to the troops prevents the necessity of keeping up any stock, tea and coffee excepted, of the ingredients forming the daily ration.

the Military Finance Department wanted cash statements also;

124. The Military Finance Department, in letter No. 7441, of the 21st March 1862, to the Commissariat Examiner, stated that "what is wanted is simply this:—The Commissariat Department spends a sum of money for the purchase of stock, and when the vouchers for the purchase are submitted, the Commissariat Department is allowed to take credit for the cash disbursed. But as the cash is only expended as *cash*, its equivalent existing in the shape of stock, the debit removed by the production of the vouchers should be replaced by a debit against the department for the value of the stock purchased, and which debit should be relieved on the production of monthly statements of the value of stock expended under the several major and minor heads."

but limited its request to annual cash statement.

125. The Military Finance Department, on the representation of the commissariat examiner, seeing the impracticability of the scheme laid down, has been satisfied with a statement at the end of each year, showing the value of all stock balances. The military accountant could not, it is assumed, have been aware of this return, for he states, in para. 28 of his report above alluded to, that "in the commissariat there is no annual stock account prepared." What the military accountant now wants is, that this statement of stock balances should be discontinued, and in lieu thereof, "the commissariat examiner should prepare an annual stock account for adjustment in the military books, which should exhibit the whole of the stock transactions of the Commissariat Department, whether connected with the purchase or issue of stores for Army purposes, with the receipt of stores from, and the issue of stores to, other departments, or with the purchase or issue of stores to other Governments." This, in our opinion, is quite unnecessary; there is no practical utility in imposing this extra labour on the commissariat examiner or on the executive officers of the Commissariat Department, for undoubtedly, were this system introduced, it would, as observed by the military accountant himself, "be no light work to perform." The cash expenditure for commissariat services is very carefully examined before credit is given to the disbursing officer, and no claim for the purchase of stores is finally passed unless the examining officer satisfies himself that the stores are actually brought into the stock account of the officer concerned; this is all that is done in England in the examination of the accounts for commissariat services, and more is not required.

The military accountant now urges the necessity of a money value account:

which is unnecessary.

Complication in the books has been caused by commingling cash and store transactions.

126. The second recommendation of the military accountant is, "that the money value of the store transactions should be recorded and adjusted in hi books;" he deprecates the prevailing system, so far as commissariat accounts are concerned, "of the intermingling of cash and store transactions;" in this, as before observed, we quite concur, but we are firmly of opinion that much complication and embarrassment of accounts has been involved by the commingling, in the general books of the Military Department, the cash and store transactions

transactions of the several separate establishments; and we shall, in this report, suggest the discontinuance of a practice fraught with so many objections from every point of view.

Store transactions should be excluded from accounts current.

127. The third point, viz., "the introduction in the accounts current of executive officers of the commissariat establishment of fictitious entries on the debit and credit sides of the account representing the money value of stores furnished to other Governments," is one to which we have already alluded to in para. 111. We entirely concur with the views expressed by the military accountant; the transaction should be entirely adjusted on the store accounts, and should not in any way be included in the cash accounts of the commissariat officers.

The vouchers to to the cash account might be much simplified.

128. The vouchers in support of the several charges included in the cash account should not be needlessly elaborated. We have had before us the accounts rendered by the commissariat officer in charge of the Presidency range, and those relating to the Umballa range; in both of these accounts we find many forms that might be much simplified, and by which much saving of time might be effected in their compilation and examination; we would instance the form of ration certificate, in which much detail is given that cannot be of the least use to the commissariat officer, and which involves additional work in the examiner's office; it appears to us that all that is required is a certificate, based upon the regimental records, of the number of men that have been rationed during the month: we submit such a form as would, in our opinion, suffice. Appendix No. 6.

Examiners should submit revised forms when necessary;

129. The examiners of accounts should be responsible for the curtailment of all unnecessary work in the disbursers' offices; the examiners have before them in full detail the vouchers and documents upon which payments are made; should these vouchers be unnecessarily diffuse, the attention of the disburser should be directed to the fact, and a revised form should be submitted by the examiners for the consideration of the attorney general. We venture this suggestion as we are satisfied that if the accounts be rendered, supported by vouchers based upon a clear and business-like arrangement, much time will be saved to all parties concerned. We observe in one of the store accounts that has come under our observation, that the transactions of one month are represented, it would appear from the account, by 99 issue vouchers, but on an investigation of the account in question we found that no less than 67 of these separate vouchers were for issues amounting in the aggregate to 33 gallons 35 drams of porter; each of the 67 vouchers was in manuscript, and each of them was signed by a staff-surgeon major; the examiner has not not made any observation on this useless expenditure of time and stationery; the commissariat officer is therefore continuing, and will continue, the objectionable practice until his attention be drawn to the circumstance.

and the number of vouchers should be reduced.

Many of the vouchers are transmitted to other departments.

130. The accounts rendered by the range officers are by no means voluminous or complicated; it is true that the amount they disburse is considerable, and the vouchers furnished by them numerous: this, however, is no criterion of the amount of work involved, as in many instances single payments are supported by numerous sub-vouchers; and in each month's accounts there are ration statements, requisitions for transport, railway warrants, &c., each of which is considered as a separate voucher. The amount of work falling within the sphere of the commissariat examiner is moreover by no means so extensive as would at first sight appear, for out of 9,501 vouchers for the month of March, no less than 4,960 are passed on to the Medical, Ordnance, or Barrack Departments: the commissariat examiner certainly examines these vouchers before passing them to the other departments, but they form no element in his detailed compilation statement.

Stud accounts.

131. The examination and compilation of the stud accounts are entrusted to the commissariat examiner; he receives monthly accounts from each of eight officers in charge of depôts; the examination of these accounts should not occupy much time, and their compilation is of the most simple character.

Number of clerks employed.

132. It would appear, therefore, that the accounts of 36 officers are examined in this department: it will be found on reference to Appendix No. 2, that this duty occupies no less than two officers and 81 clerks, a great proportion of whom

are engaged upon the compilation of statements, the preparation of returns of averages, and other duties of an extraneous nature not directly concerned with the examination of the accounts.

VI.— *The Examiner of Medical Accounts.*

Duties of examiner of medical accounts.

133. The officer in charge of this department is a surgeon major; the office is in the same building as that of the commissariat examiner; indeed, the transactions of these two departments are so intimately connected with each other that it would be very inconvenient were the offices separated.

The examiner has no control over the supplies.

134. The medical examiner exercises no control over the amount expended on account of medical supplies; the contracts are made by commissariat officers, and all articles required in the various hospitals are supplied through their intervention: the medical examiner accepts, therefore, the result of the examination made by the commissariat examiner, and merely compiles the vouchers, under certain sub-heads, of the grant for medical services, and prepares and renders to the military accountant the following separate returns every month:—

Audited charges	Current.
Settlement arrears	1862–63.
Ditto - ditto	Prior years.
Payments	1862–63.
Ditto	Prior years.

Number of clerks.

135. The office of the medical examiner consists of 15 clerks: these he divides into the following separate sections:—

Medical supplies and charges;
Statistical, as regards expenditure;
Audit.

Office is divided into small sections.

136. The result of this minute subdivision of so small an office is a great and unnecessary increase of work, as the clerks in one section do not avail themselves of the information collated in either of the other sections.

Statistical returns.

137. Many of the returns prepared in the "statistical" section are based upon returns specially furnished by deputy inspector generals of ranges; *e. g.*, there is a monthly statement of the average consumption of stimulants: this statement is printed, and it shows the rate of consumption per cent. of spirits, wines, malt liquors, effervescing liquids, and lime-juice, doubtless a very useful and necessary return, but one certainly not required for account purposes: this return is prepared by the medical examiner from separate and special statements furnished to him monthly by the deputy inspectors general of circles; the very same information is given in the diet rolls furnished to the medical examiner; these, however, are not available for the "statistical" section of that officer's department, as these documents are furnished to, and required by, the "audit" section, notwithstanding that the clerks of the three sections are all working in the same room.

Register of stock articles issued is unnecessary.

138. There is also a register of stock articles issued in each circle: the issues are arranged under 15 heads, 10 of which are spirits and stimulants, already recorded in the fullest detail in the monthly average statement. The medical examiner states that he makes no use of the register, but merely keeps it for the information of the commissary general; that officer cannot, however, make much practical use of it, as the register is not posted beyond June 1863.

Annual return not required.

139. Again, an annual return is also prepared of the gross cost per 100 patients; one copy of this return is transmitted to the principal inspector general, and one to the controller: the controller admits that the copy furnished to him is not required, and that transmitted to the inspector general cannot be of much service, as the last rendered is for the year 1861-62.

Other useless returns.

140. In our investigation we discovered many other useless returns and statements which had been introduced by the medical examiner without the knowledge of the controller; that officer has ordered their discontinuance; they were quite useless, and, generally speaking, in arrear.

141. It

141. It may be here stated that the examiner himself admits that his professional knowledge does not in any way facilitate the control over the expenditure. A medical officer is not required to examine medical accounts.

VII.—*Examiner of Ordnance, Barrack, and Clothing Accounts.*

142. The officer intrusted with the examination of these accounts is one of many years' service: he is a lieutenant of the veteran corps; he audits not only the claims upon which cash payments are made, but examines also the store accounts rendered by these departments. As the duties of this officer are multifarious, and, as the course of action is, to a certain extent, different in each department, it may be as well if we pass our observations on each separately. Examiner of Ordnance accounts.

Ordnance Department.

143. All cash payments for supplies furnished locally are made by the commissariat officers, and the amount disbursed is included in their accounts rendered to the commissariat examiner: this officer examines the vouchers appertaining to this service, both as to their arithmetical calculations and the correctness of rates; he then abstracts from the monthly accounts all vouchers relating to the Ordnance Department, prepares a list thereof, and forwards it to the office of ordnance examiner: here the vouchers undergo another examination, *ab initio*, even to the computations; the quantities of the various articles paid for are then traced into the day-books of the various officers. Detail of Duties.

144. The ordnance examiner has no check over the rates charged; and he admits, on the audit of the commissariat examiner, all claims for transport, boat-hire, and services of a like description. Has no check over the rates.

145. The vouchers for all cash payments are, after their re-examination, compiled into a statement for the information of the military accountant: the statement is furnished to that officer monthly, and the ordnance examiner records the amount expended under the various sub-heads of the grant for ordnance services in his books: the statements show the amount applicable for prior years under the same subdivisions as the expenditure for commissariat service. Monthly compilation statement.

146. Many of the claims for ordnance service are, before payment, sent to the examiner for "pre-audit": the claims which are admissible are "enfaced" in the usual manner, and the examiner signs the documents as the authority to the circle paymasters to pay the amount: these claims consist in a great measure of bills for local purchases required for the arsenals, magazines, &c., and for the repair of arms, accoutrements, and harness, browning arms, transport charges, compensations for losses, &c.: none of these claims, although in many instances appertaining to regimental services, are ordered to be paid through the regimental paymasters. Certain claims are pre-audited.

147. The ordnance examiner receives from each officer in charge of military store establishments a monthly account of their receipts and issues; there are— Number of store establishments.

3 Arsenals,	14 Forts,
5 Magazines,	6 Manufacturing Establishments.
6 Depôts,	

The general principle of these accounts is, that a certified copy of the day-book should be rendered from each officer in charge of stores: this book should contain a complete record of all the receipts and issues which take place daily in the several establishments; the copies of the day-books are supported by the original vouchers, whether for receipts or issues, and are forwarded monthly. Copies of day-books.

148. The entries in the day-books show quantities only: the ordnance examiner inserts the rate and value of stores issued and received; issues and receipts between magazines excepted, the money value of all stores issued is placed to the debit of the party receiving them; a ledger account is opened with every officer commanding a regiment of cavalry or infantry, or a battery of artillery. Ledger accounts with regimental officers.

149. After the termination of each year, the officers in charge of the stores in the arsenals, magazines, forts, and manufacturing establishments furnish to the ordnance Copy of store ledger.

ordance examiner a copy of their store ledger: this is at many stations, particularly at the arsenals of Fort William and Ferozepore, a document of most capacious extent, occupying at the latter station alone no less than ten bulky sections of imperial size paper: every item in the ledger is examined with the entries in the day-book, and the total quantity of each description of article in store at the end of the year is abstracted into a general return, the rate is inserted, and the value ascertained.

General indent.—Repairs of stores.

150. Officers in charge of arsenals, &c., also furnish, at the end of each month, a general indent of articles issued for, and labour expended in, making and repairing stores. This return is of a very voluminous nature; it shows the value of every item of material that has been used in each repair, however trifling, and the wages of every man employed thereon. So minutely is the return compiled that the total cost of the repair of one article, amounting to 7 annas only, involved no less than 11 separate calculations; the total value of one of the ingredients used in this repair was one-sixteenth of a pie.

General indent for materials and labour is not required.

151. The total quantity of articles consumed during the month is worked up into a general statement, and credit is taken on the ledger accordingly; in like manner a general statement of wages is prepared, showing the class of work upon which the workpeople have been employed; these returns are not examined with the detailed statements of work executed, so that for all practical purposes these documents are not required by the ordnance examiner.

A new system will be proposed.

152. In making our recommendations in regard to the examination of the store accounts, we will suggest a course by which this great and unnecessary detail may be avoided.

Half-yearly returns from regiments.

153. In regard to the store transactions with regiments and batteries, the officers commanding furnish half-yearly returns of all articles in charge; the returns for the half-year ending 30th April are brought together in abstracts, in the same manner as is done with the stores in charge of ordnance officers, and the total value is arrived at.

Stores in charge of civil officers.

154. Civil officers, to the number of about 250, who are in possession of ordnance stores also render accounts to the ordnance examiner; each of these officers furnishes a half-yearly account of the stores in his charge; these statements show:—

Description of Store.	Stock, 1st May or 1st November.	Receipts.	Issues returned into Store or Sold.	Expenditure.	Balance.

They are valued every half-year.

155. To each statement, as rendered by the civil officer, the ordnance examiner adds the rate and value; this valuation is made not only at the end of the year, but intermediately: a ledger account, showing the money value of all stores, is kept with each officer, who is debited with the value of the issues to him, and credited with his returns or expenditure; the balance on the ledger account should agree with the balance shown by the half-yearly statement rendered by the officer in charge of the stores; these statements are then brought together in a general abstract in the same manner as are those for the other classes of store account.

Cash recoveries for stores sold.
*Public works.
Mint.
Telegraph.
Roorkee workshops.
Stationery.

156. It will be unnecessary to describe in detail the other operations in regard to adjustment of stores to other Governments* which, being departments of expenditure, do not render store accounts to the ordnance examiner; there is, however, a very large class of business conducted under what is called cash recoveries, that is, for stores issued to officers for private use, or to replace those for which a fixed contract allowance is granted.

157. Before

157. Before alluding to the general summary of the ordnance transactions, we will offer a few observations on the account of the manufacturing establishments under this department: these consist of— Manufacturing establishments.

1. Gun Foundry at Cossipore.
2. Gunpowder Agency at Ishapore.
3. Timber Agency at Calcutta.
4. Manufacturing Depôt at Dum-Dum.
5. Mathematical Instrument Department.
6. Gun Carriage Agency at Futtehghur.

158. The principle upon which these accounts are prepared and examined will be found fully described in a letter addressed to the controller, military accounts, by the ordnance examiner, dated 25th January 1864, No. 6,218 (Appendix, No. 3). Principle upon which these accounts are kept.

In regard to the accounts of the Gun foundry at Cossipore, we have already submitted to Government a separate Report, dated 17th August 1864. Gun foundry Cossipore.

159. The officers in charge of the manufacturing departments prefer claims, for the fixed establishments, on the paymaster of the circle in which the department is situated; they, however, render to the ordnance examiner a monthly account of the receipts and disbursements on account of the extra establishment and contingencies. In regard to the gun carriage agency at Futtehghur, although the officer in charge of that establishment is a direct accountant, he has received a very large amount from the circle paymaster on account of timber purchases, the whole of which amount is held in inefficient balance of the latter officer. Payments for fixed establishments. Gu carriage agency Futtehghur.

160. The ordnance examiner compiles, solely for the purposes of the military accountant, a very elaborate set of books, in which is included the entire transactions of the Ordnance Department for the year; the military accountant examines that portion of the returns showing the quantity of stores received from England, and then incorporates the results in the general books for military services. Annual books prepared by ordnance examiner

161. These very voluminous accounts for the year 1862–63 were completed on the 23d August last, just four months after the termination of the year; the military accountant has only just recorded the accounts rendered to him for the year 1861–62. Completed for 1862–63.

162. The balance sheet is worked out by the examiner of ordnance accounts to the fractional parts of a pie, and it has the appearance of being a very satisfactory document. We were astonished to find that transactions so numerous as those that flow through the Ordnance Department, and, in many cases, so involved, could, in so short a period, be balanced with such nicety; this led us to a rather minute investigation into the accounts, and we were not long in discovering that, as such, they are perfectly valueless, and are really not what they profess to be. We found, on analysing the item of 1,20,02,826 rupees on the credit side of the balance sheet of the year 1862–63, that it is not, as it should be, the value of the "stock remaining with the army," but only the *estimated* value thereof, arrived at by taking the *actual* value of the stores in charge of three or four regiments of cavalry, or infantry, and three or four batteries of artillery, ascertaining the average per regiment or battery, and multiplying the result by the number of regiments and batteries in the whole Presidency. This item at once destroys the integrity of the account, and it can only be balanced by introducing a compensating item, per contra, equivalent to the difference between the value of stores in charge of officers commanding regiments, &c., as per estimated statement, and the value, had the actual receipts and issues during the year been acted upon. The results shown by the books is the estimated expenditure only.

163. There is another item which produces much complication in these accounts, and which almost takes them out of the control of the ordnance examiner, viz., the introduction, by order of the military accountant, of large sums in adjustment of the accounts of former years, and transactions relating to other Presidencies, of which the ordnance examiner has no knowledge. To show the extent of these transactions, it may be stated that the following amounts, which are merely the *balance* of the items introduced by direction Adjustment items are introduced by order of the military accountant.

of the military accountant, appear in the ordnance books for the years 1862-63 and 1861-62:—

		Rs.	a.	p.
1862-63:—	"Difference between the Dr. and Cr. side of adjustment and of former years -	1,85,760	5	7
1861-62:—	"Ditto - - ditto - - ditto - - -	3,96,409	14	-¼"

Barrack Accounts.

Barrack masters are not cash accountants.

164. The payments for barrack supplies and services are made by the commissariat officer in charge of ranges. Barrack masters are not cash accountants. The vouchers for cash purchases are examined with the day books of stores received, and the claim is not allowed until the stores are brought on the charge of the barrack master.

The examiner has no control over articles of consumption.

165. The ordnance examiner has only control over those articles of store, such as furniture; the items of consumption, such as charcoal, oil, &c., are not passed through the store accounts; a contractor makes the necessary supply to the several regiments; the claims are paid, after due examination, by the commissariat officer, are included in his lists of disbursements, and are forwarded to the ordnance examiner by the examiner of commissariat accounts. The former officer compiles the expenditure under 10 sub-heads of account, and furnishes a monthly statement thereof to the military accountant.

Not necessary to insert issues of consumable articles in day book.

166. The barrack masters' day books show not only the quantities of new furniture, &c., issued, but also the issues of consumable articles. This is quite unnecessary, as the articles are not to the debit of the barrack master, and the ordnance examiner has no control over them.

Copies of cash vouchers are not required.

167. The commissariat officers furnish barrack masters with advances of cash, to be repaid within the month, for payments on account of transport, coolie hire, &c. At the end of the month the barrack master prepares a voucher showing the amount he has disbursed; this voucher finds its way, through the commissariat examiner, to the ordnance examiner, who is, moreover, furnished with a duplicate of these vouchers by the barrack masters in their monthly accounts; these are not required and should be discontinued.

The transactions are abstracted by the examiner.

168. The day books furnished by the barrack masters are posted by the ordnance examiner into an abstract, showing the receipts and issues month by month during the year; the balance is then struck, and the quantity of each description of article is compared with the quantity shown on a general annual return furnished by each barrack master. These returns, if correct, are further abstracted into a general statement; and the total number of each article having been arrived at, the average price is included in the return, and the computations made at this rate. An annual account is prepared for the information of the military accountant; this account also includes the payments made by the Commissariat and Pay Departments during the year.

Accounts have to be rendered through the Quartermaster General's Department.

169. The accounts rendered by the barrack masters to the ordnance examiner have to be transmitted through the quartermaster general to that officer. This arrangement causes considerable delay in the examination of the accounts; *e. g.*, the accounts of the barrack master at Fort William for the month of April were completed and signed by the 2d May; they did not, however, reach the ordnance examiner until the 27th of that month, as they were not considered complete until the signature of the quartermaster general, or of one of the officers of his department, was attached to one or other of the documents. To obtain this, these purely formal accounts were transmitted to Simla, and in their transit from the Fort of Calcutta to Bankshall-street had to travel upwards of 2,000 miles.

Cash received for barrack damages, &c., should be adjusted in the accounts of the regimental paymasters.

170. A large sum is realised during the year by barrack masters for the repairs and damages to furniture, &c. The amount is paid by the paymaster or quartermaster of the regiment to the paymaster of the circle, who pays the sum into the local Treasury. Similar transactions are, when Her Majesty's regiments are serving in the United Kingdom and the Colonies, adjusted by the regimental paymaster, who is furnished with the necessary documents by the barrack master, who forwards to the War Office a duplicate or abstract thereof as a check upon the paymaster's accounts. The check adopted in this country does not appear to be

be complete, as there is no evidence that the entire amount paid to the barrack master is given over to the circle paymaster.

Clothing Accounts.

Detail of duties.

171. The duty devolving upon the ordnance examiner in regard to the clothing accounts is as follows:—

I.—Examination of claims for compensation for clothing not issued to regiments.
II.—Examination of claims for making up clothing at the regiments.
III.—Examination of the accounts of the clothing agent, Alipore.

Compensation for clothing.

172. Each British regiment furnishes an annual clothing account, showing the stock in hand and the number of garments, boots, &c. received and issued during the year. The articles to which the men are entitled, and which are not issued to them, are clearly shown on the same return; the total amount due for these articles is recorded against each man's name. When the aggregate sum is ascertained a separate bill is made out by the ordnance examiner in favour of the regiment; is enfaced in the usual manner and transmitted to the officer commanding: the amount is paid by the regimental paymaster and included in the pay list.

Making up clothing.

173. Payment is made for making up clothing according to the approved tariff of rates for each description of garments; the number of garments made up is checked by the number for which materials have been issued from the clothing agency; a bill is prepared by the ordnance examiner in favour of the regiment, and it is paid by the paymaster.

Accounts of the clothing agency, Alipore.

174. The accounts of the clothing agency, Alipore, consists of copies of the day books, which contain the receipts of materials from England, issues to the master tailor for conversion, and of made-up garments and materials to regiments; the issues to regiments pass through the accounts of an officer designated the "packing serjeant."

Manufacturing accounts examined by the "Pimlico Tables."

175. The examination by the ordnance examiner consists in ascertaining from a set of printed returns, known as the "Pimlico Tables," the quantity of materials that should be consumed in the number of garments specified in the several regimental indents; the quantities are checked off in the store ledger, which is made up and forwarded by the agent every three months; the *original* ledger is transmitted to the ordnance examiner.

Report of examiner for 1862-63.

176. The report of the ordnance examiner on the accounts for the year 1862-63 shows the results, so far as they can be ascertained, of the year's working; the statement, as explained by the examiner, is not so complete as he would wish, but as the great object of that officer has been to overtake the arrear in the audit of these accounts, he has not gone so fully into the results of the working of the Clothing Factory at Alipore as he purposes doing in regard to the accounts for the year 1863-64.

Arrear is being brought up.

177. The examination of the clothing accounts is now being pursued with great earnestness and intelligence by the ordnance examiner, who is rapidly bringing up these accounts to the latest period; but as we found that the day books had only been received to the month of April, we considered it advisable to ascertain, by personal inspection, the causes which led to the delay on the part of the clothing agent in rendering the accounts required.

The agent has two offices, and has two sets of books.

178. The agent for clothing acts in two capacities, as agent and as superintendent; he has two offices, one on one side of the main road through Alipore, and the other on the opposite side; the two offices are quite distinct from each other; that which carries out the duties of the agent, in his capacity of superintendent, considering itself the controlling power, looks with distrust upon everything that is done in the way of accounts on the other side of the way, where the working branch of the establishment is conducted; the result of this feeling is, that whilst only one set of accounts for working the entire Clothing Department is required, two sets are now in operation: there are two store ledgers, two cash books, &c., and a great and unnecessary increase to the work.

The offices should be amalgamated.

179. The present arrangements involve a great deal of extra copying of indents and other documents, the whole of which might be obviated were a complete amalgamation made of the two offices.

The storekeeper should keep the store ledger.

180. The storekeeper's ledger should be kept by the storekeeper himself, and the copy that is made in the Superintendent's Office from the storekeeper's day book should be discontinued.

Re-arrangement of ledger is desirable.

181. Materials for clothing are almost entirely received from England; the number of separate receipts are but few during each quarter; it is unnecessary, therefore, to devote the Dr. or left hand side of the ledger solely for receipts; one-third of the page might be so arranged that the receipts might be recorded thereon, and the remaining two-thirds would be sufficient, in most cases, for the issues; this would obviate the necessity of opening the numerous headings on both sides of the ledger.

System of issue now pursued is objectionable.

182. The system now pursued, in regard to the issue of materials to be made up into garments, involves a great deal of unnecessary office work, and it leads also to a waste of material; the practice is for the master tailor to indent on the storekeeper for the articles required for completing each requisition, sometimes for a single garment; this causes a large accumulation of remnants, and gives to all parties concerned additional work; this might be obviated, and the entire economy of the clothing factory altered, were some such arrangement as the following carried out:—

Suggestions for improved working of the establishment.

I.—The operations of the factory should be limited to making garments of the ordinary sizes; all extra sizes, large or small, should be made at the regiment from the materials to be furnished from Alipore.

II.—The indents from the regiments should show how many of each of the several sizes, from No. 1 to No. 6, that would be required, and the size roll should show the measurements of the abnormal sizes only.

III.—The agent should, at the commencement of each month, direct the master tailor to make up, during the month, such number of each size of the several garments as he, the agent, might deem requisite.

IV.—The master tailor would obtain from the storekeeper the necessary quantity of material, either in one issue, or day by day, as required.

V.—In regard to tunics for infantry of the line, they should be made up without cuffs, collars, shoulder straps, and buttons. When the tunics have been duly examined and passed they should be packed in bales of convenient bulk for transit: the number of garments and the size should be distinctly marked thereon.

VI.—Cuffs, collars, and shoulder straps should be made ready for delivery with the tunics.

VII.—The stock of regimental buttons should be handed over to the quartermaster of the regiment, who should include in the annual indent of clothing the necessary quantity required for the year.

VIII.—Trowsers for British troops, and clothing for native troops, should, as far as possible, be made up in sizes.

IX.—By amalgamating the Packing Department with that of the storekeeper a great saving of labour would be effected.

X.—One cash book for the entire department is quite sufficient.

Inefficient balance.

183. The inefficient balance amounted, on 31st May last, to 1,00,712 rupees; every item composing this large balance should be at once carefully investigated and cleared up; there is one item for *three pie* which has been brought forward, month by month, since April 1861; and many items for the pay of establishment beyond the sanctioned amount which have been disallowed still remains unsettled and included in this balance.

A reliable statement as to the cost of manufacture should be obtained.

184. It is very desirable that this department should be conducted with every regard to economy, as, from the results of the working for the year 1862-63, it would appear that the cost of each garment is considerably in excess of the price at

at which they might have been obtained from England: the records of the year may, however, be open to some doubt, so that we hesitate to base any argument upon them. We would, however, urge that the accounts be brought up to the latest date; that the two establishments be amalgamated; that all superfluous work be abolished, and that the mode of working be altered; further, that the particular attention of the examiner of clothing accounts be directed to the accounts of the present financial year, so that on its completion the Government may have a reliable statement of the actual cost of each garment manufactured at the Agency.

Redundant stock should be disposed of.

185. The balance of stock in the clothing factory is of considerable value, and contains many items, so we were informed, of obsolete pattern; these should be at once removed from store, and either sold in this country or returned to England for that purpose.

Inconvenience in regard to clothing accounts of Indian financial year commencing on 1st May.

186. We would here allude to an inconvenience that arises from the financial year in this country being different to that in England; the former commences on the 1st May; the latter on the 1st April: the clothing for British regiments serving in India is due on the latter date, and all compensations for clothing are also due on that date; it is in consequence a matter of considerable doubt as to the amount that will be paid in the nature of compensation during the month of April, and an uncertain element is thus introduced into both estimates and accounts.

VIII.—*Military Accountant.*

Duties of military accountant.

187. Having detailed the duties of the disbursing and examining officers, we now come to the office in which the result of the accounts are recorded; how this is accomplished will be seen from the following remarks:—

Returns prepared by him.

188. A reference to paras. 9 and 29 will show what returns have to be prepared and rendered on account of military receipts and expenditure; the whole of these are prepared by the Military Accountant and transmitted by him to the controller: it may be as well here to recapitulate the various statements and returns that have to be compiled either for the Military Accountant General or for the Financial Department.

I.—Monthly Statement of Receipts and Unaudited Disbursements	For the Accountant General and the Financial Department.
II.—Quarterly - ditto - ditto	ditto.
III.—Annual - ditto - ditto	ditto.
IV.—Monthly Statement of audited, passed, and classified Expenditure	Accountant General.
V.—Monthly Statement of Increase and Decrease of Outstanding Balance	ditto.
VI.—State of audit of Accounts in the several Examiners' Offices	ditto.
VII.—Annual Statement of Cash Balances in the hands of Disbursing Officers	Financial Department.
VIII.—Monthly Statement of Assessment, Collection, and Refund of Income Tax by Disbursing Officers of the Military Department	ditto.
IX.—Annual Statement of Quick and Dead Stock	Accountant General.
X.—Annual Report on Appropriation Audit	ditto.
XI.—Abstract of General Books	ditto.
XII.—Annual General Books, Journal and Ledger	Financial Department.

I.—*Monthly Statement of Receipts and Unaudited Disbursements.*

189. This return is compiled with the view of affording the Financial Department the earliest information in regard to military expenditure. Disbursing officers render, within three days after the termination of each month, an abstract of their receipts and payments; these abstracts are compiled by the military accountant into a general statement, which should be transmitted to the

Accountant General to the Government of India on or before the 20th of the month.

II.—*Quarterly Return of Receipts and Unaudited Disbursements.*

190. This being on a different form to the monthly statement above alluded to, and as it furnishes more detail than is given in that return, a separate compilation is made; those already prepared for the monthly statements are not utilized: the information for this return is obtained from the monthly statements of audited and classified expenditure furnished by the compiler of the Pay Department, and by the examiners of the other departments.

III.—*Annual Return of Receipts and Unaudited Disbursements.*

191. This includes both audited and unaudited expenditure. The compiler of pay accounts and the examiners of the other accounts furnish the military accountant with an annual statement of their disbursements; the items of debt, remittances, and other receipts and charges not appertaining to the Budget grants for military services are obtained from the accounts current of the disbursers.

IV.—*Monthly Statement of Audited, Passed, and Classified Expenditure.*

192. The compiler of pay accounts renders to the military accountant three separate returns, each month, of the expenditure on account of pay; in like manner the examiners of the Commissariat, Stud, Medical, Ordnance, Barrack, and Clothing Departments render three separate returns monthly for the expenditure, audited and passed, in their several sections: the three returns from each department relate to current and arrear expenditure; these statements are compiled in the greatest detail, furnishing particulars of the expenditure on items not particularised in the Budget Estimate, and showing the amount expended at each station; the military accountant, however, does not record these minute particulars, as all that he acts upon is the total amount of expenditure under each major and minor head of the Budget Estimate.

This monthly statement is prepared solely for the Accountant General, Military Department.

V.—*Monthly Statement of Increase and Decrease of Outstanding Balance;*

and

VI.—*State of Audit of Accounts in the several Examiners' Offices.*

193.—These are merely departmental statements.

VII. and VIII.—*Monthly Statement of Cash Balances and of Income Tax Assessed and Refunded.*

194. These statements are made up for the Financial Department.

IX.—*Annual Statement of Quick and Dead Stock.*

195. The last return prepared is for the year 1861-62, and was forwarded to the Accountant General to the Government of India in November 1863.

X.—*Annual Report on Appropriation Audit.*

196. This is a most voluminous statement; it is supposed to represent the actual audited expenditure on account of military services, and should, according to the instructions on this subject, be based entirely on adjusted charges after the closing of the annual books. This return is compiled solely for the use of the Accountant General, but it is of no practical use: in the first place, it is compiled before the annual or general books are commenced, the appropriation account for the year 1862–63 having been rendered to the Accountant General on the 19th July last, the books for 1861-62 having only just been closed, and those for 1862-63 not yet opened; moreover, the expenditure, as shown by the returns, differs very materially from the "actuals" for the same period, as given by the Accountant General in the printed Budget Estimate for the year 1864-65.

XI.—*Abstract*

XI.—*Abstract of General Books.*

197. In the recent orders issued regulating the duties of the several departments of military account, it is laid down that an abstract of the general books should be prepared for the Accountant General. We cannot understand to what use this return can be applied, as before an abstract of the books is prepared the books themselves must be closed; the books for 1861–62 have just been balanced, it is only for those accounts that an abstract can be prepared, and we consider this quite useless.

XII.—*Annual General Books, Journal and Ledger.*

198. These books, when completed, contain the final record of military expenditure for the year, and the state of each account opened with disbursing officers and others; in fact, these are the books proper: their use is much diminished by their being so much in arrear. The books for the year 1861–62 were commenced on the 12th June 1863, and were only completed at the commencement of this month (August 1864). The principle upon which the general military books are based is the adjustment of each personal account annually: for instance, the books for 1862–63 should be opened in the month of April 1863, and the entire transactions of each disbursing officer recorded in the journal, and thence posted to the ledger. No detail is kept of the expenditure, and it is not in any way subdivided either under the major or minor heads of the Budget Estimate: this, it would be imagined, would have so simplified the record, that the adjustment of the books, considering that there are only about 46 disbursing officers, would have been accomplished without any difficulty, and that in a few months after the closing of the year the books would have been balanced and closed also; this is not so: the books, as already stated, are in a very considerable arrear, and the journal is so overloaded with unnecessary detail that it fills no less than 1,429 pages, notwithstanding that the entire sum disbursed as military charges is recorded in one line for each disbursing officer.

199. It thus appears that, although there are two annual accounts of expenditure, an abstract of the general books, and the general books themselves, there are no two that agree with each other, and, as before stated, the amount expended on any one year for military services is a matter of opinion and not one of fact. **The accounts are fallacious.**

200. In the ledger for the year 1860–61, the last closed at the period of our detailed inspection of the office, we noticed two accounts that are deserving of particular attention, viz., "advances repayable" and "deposits." **"Advances repayable" and "deposit" accounts.**

201. The account of "advances repayable" exhibited, on 30th April 1861, a balance in favour of the Government of no less than 8,45,302 rupees, and this fact appears to have had the effect of beguiling the military accountant and his assistants into the belief that as the balance was, as it was termed, on the "right side," no investigation was necessary; had reference been made to the ledger account, it would have been found that this balance in favour of the Government was thus comprised, viz.:—

	Rs.
Total credit balance - - - - - -	19,77,084
Total debit balance - - - - - -	11,31,782
Net credit in favour of Government - - -	8,45,302

202. Of the large sum standing to the credit of Government no less than 16,04,673 rupees arises on the "deposit" account, upon which we shall touch hereafter.

203. It will be seen above that no less than 11,31,782 rupees stands to the debit of "advances repayable;" in other words, upwards of 113,000*l.* has been advanced to, or is owing by, officers and others, and yet the military accountant appeared to be almost entirely ignorant of the fact, and when it was explained to him he stated **Large amount due on account of advances repayable.**

stated that the debts were outstanding before his time. The number of separate accounts, debit and credit, remaining outstanding on the "advances repayable" ledger is no less than about 1,400, most of which might with little trouble have been settled.

Origin of the account.

204. The "advances repayable" account was the pioneer of the "inefficient" balance account; the latter had its origin in the fact that the former became so unmanageable and overgrown that it was necessary to break new ground: the latter, in point of amount, although of only a few years' standing, already far outstrips the former, for whilst the balance due on the "advances repayable" accounts is 11,31,782 rupees, that on the "inefficient" balance already amounts to 20,85,799 rupees in Bengal alone. Although the general books for 1861-62 are balanced, the "advances repayable" account has not been commenced for that year.

Deposit account has not been balanced since 1850-51;

205. The state of the "deposit" account is still more unsatisfactory: no less than 16,04,673 rupees remained due, on 30th April 1861, to sundry officers, who have, for various causes, deposited money with circle or divisional paymasters: this account, like that previously noticed, has, on the plea that the balance is on the "right side," been almost entirely neglected: the deposit ledger has not been balanced since 1850-51, upwards of thirteen years; the consequence is, that there are large sums due to the estates of deceased officers that should have been long since closed, and many other transactions that a small amount of investigation would have cleared off: in several cases money has been deposited to meet retrenchments, which doubtless appear to the debit of the officer in the "advances repayable" ledger.

it should be thoroughly investigated.

206. We would here suggest that both these accounts should be at once fully and thoroughly investigated; and we would again draw attention to the fact, as alluded to in para. 117, that whilst the military accountant has been endeavouring to obtain the control of work not within his proper sphere, the legitimate duties of his office have not received that detailed investigation which their importance demanded.

Two copies of general books.

In regard to the general books, it appears that two copies are made; one for the Military Department, and the other for the Financial Department; the latter is forwarded to England.

Savings bank and other accounts.

207. Before closing our observations on the Military Accountant's Office, we owuld wish to draw attention to the following subjects, viz:—

I.—Regimental Savings Bank Accounts.

II.—Accounts of Remittances and Casualty Returns.

III.—Advances from local Treasuries.

I.—*Regimental Savings Bank Accounts.*

Savings bank accounts how kept.

208. There is a separate section of the Military Accountant's Department for auditing these accounts; the work is, however, only partially done by the officer in charge, whose duty is limited to recording, in an "abstract ledger," the amount deposited and withdrawn by each regiment every month: the details are furnished from two sources, the circle paymaster, who sends a certificate of the aggregate amount of the transactions of each regiment, and from regimental paymasters of cavalry and infantry, and of officers commanding batteries of artillery, showing the amount deposited or withdrawn each month, by each troop, company, or battery.

Special auditors of savings bank accounts.

209. At the end of the year each regiment or battery transmits to the military accountant the savings bank ledger and the necessary vouchers, as prescribed by War Office Regulations; these ledgers contain the account of every depositor, and record all the transactions of the year: three special auditors are appointed to examine these ledgers; the officers appointed do not belong to the Military Accountant's Office; they are, as a rule, selected from one or other of the public offices, and receive, when the accounts of the year are examined, an honorarium of 2,500 rupees. It is an understood rule that the work is, if undertaken by an officer in the service, done after office hours, and it is also ruled that

that each account is separately examined by two of the auditors: we consider that the system is objectionable on two grounds:— The system is objectionable.

I.—That the work does not strictly appertain to the military accountant, it being an integral part of the duty of the pay examiner.

II.—That unnecessary expense is incurred, as the present establishment, if re-organized with the view of examining the details of the account, would be quite sufficient to perform the duty.

II.—*Accounts of Remittances and Casualty Returns.*

210. The military accountant is furnished, by regimental paymasters or by officers commanding batteries of artillery, with rolls and lists monthly; these are supported by a certificate from the several circle paymasters to the effect that the amount has been duly passed to the credit of the public: the military accountant compiles these separate lists into a general return showing the aggregate amount received; this return is forwarded to the Home Government by the second mail in each month. The lists are forwarded with regularity, and this portion of the military accountant's duties seems to be satisfactorily performed. Remittance and casualty returns forwarded to England.

III.—*Advances from Local Treasuries.*

211. The course pursued in regard to supplying the disbursing officers with funds has already been described in para. 31. We would here wish to draw attention to the manner in which a settlement is effected in regard to these advances between the Military and Civil Departments. Adjustment of advances between civil and military departments

212. The adjustment of the advances from civil treasuries for military services is a duty that appertains to the military accountants; they alone have the information upon which the amount drawn by disbursing officers can be checked, and they alone can certify that the sums claimed by civil treasuries on account of military advances have been duly acknowledged by the officers to whom the advances have been made. should be effected by the military accountant.

213. Knowing the importance of a prompt settlement in regard to these transactions, we inquired very minutely into the course pursued in the office of the military accountant. We found it unsatisfactory in the extreme; the adjustment with the Deputy Auditor and Accountant General was considerably in arrear, and no adjustment had been effected in regard to the advances from the Bengal Treasuries since April 1862. It is considerably in arrear in Bengal;

214. It would appear, from papers referred to us, that this important part of the business of military accountant is in an equally unsatisfactory state in the Presidencies of Madras and Bombay: the papers to which we allude contained a report from the Deputy Auditor and Accountant General, Bombay, complaining that he had not received from the military accountant any statement of civil charges incurred in the Military Department, nor the reports of the result of the examination of the statements furnished in regard to military remittances. also in Madras and Bombay.

215. On the papers in question we suggested that the Deputy Auditor and Accountant Generals of the several Presidencies and Provinces should be called upon to report— Information called for from deputy auditor and accountant generals.

I.—The period to which the statement of advances from civil treasuries on account of military charges, has been rendered to the military accountant.

II.—The period to which the accounts between the two departments have been adjusted.

III.—The differences, if any, that exist between the record in the military books and that in the books of the Civil Department.

IV.—What steps have been taken to reconcile the differences.

216. The replies to these inquiries are worth a careful perusal, as they plainly indicate that the system adopted in the Military Department, at least in regard Replies received from these officers.

to this important element, has entirely broken down: the answers may be thus tabulated :—

	I. The period to which the Statement of Advances from Civil Treasuries on account of Military charges has been rendered to the Military Accountant.	II. The period to which the Accounts between the two Departments have been adjusted.	III. The differences, if any, that exist between the record in the Military Books and that in the Books of the Civil Department.	IV. What steps have been taken to reconcile the differences.
Madras	February 1864	Cannot be definitely stated. A statement of difference has been completed to 30 April 1859.	Differences on 30 April 1859 amount to 4,43,580 rupees; some of the items relate to periods so far back as 1801.	The adjustment between the two Departments was temporarily deferred, as the office was "short handed;" since Order, 10 March 1864, active measures have been taken, and the examination of accounts for 1858-59 has been completed.
Bombay	1st December 1863, and those to April 1864 nearly ready (on 18 June 1864.)	Partially adjusted to 1859–60.	The unadjusted differences at the close of 1859–60 amount to 17,16,068 rupees.	References have been made to the collectors and military accountant.
Punjab	March 1864	1858–59 has been adjusted; 1859–60 and 1860–61 will be adjusted in the course of four months from June 1864.	No specific statements of the differences between the two departments are received from the military accountant; all references on this subject are either "pending" or are finally disposed of.	The answer given to question III. is stated to be in answer to question IV. also.
Central Provinces	March 1864	As no objection has been taken by the Military Department to the statements rendered, assumes that the accounts are adjusted to March 1864.	No reference has been made by the Military Department to adjust differences; therefore assumes that there is none.	
Hyderabad	April 1864	To March 1864, excepting May to October 1862 and February 1863; Madras to June 1863; Bombay, June 1862.	A long list of objections is given in the report.	Whenever differences exist, returns are forwarded to the military accountants.

Replies have not been received from the military accountants.

217. The military accountants' replies have either not been received, or, if received, they have not been forwarded to us.

The accountant general has requested the controllers to report.

218. The attention of the Accountant General of the Military Department has been also directed to this important question; his reply, forwarded to the Financial Department through the Military Department, merely states that he has called upon the controllers of the three Presidencies to report, and to suggest a course for the future.

IX.—*Controller.*

The controllers keep no accounts.

219. The duties of the controller have been described in para. 9; this officer keeps no accounts; the accounts and returns for which he is responsible are prepared in the office of the military accountant, from whence they are forwarded to the controller, who passes them to the Accountant General.

All questions on military finance are referred to them.

220. All questions connected with the pay or allowances of the army, claims for pensions, and in fact all matters connected with military finance, are referred to the controller.

X. *Accountant*

X.—*Accountant General.*

221. The only duties that we could discover that are now intrusted to the Accountant General are— Duties performed by the Accountant General.

I.—Consolidation of Budget Estimates.

II.—Abstracting monthly returns of receipts and expenditure.

III.—Passing on papers referred to him by the Military Department, to the other branches, for the information required.

IV.—Deciding doubtful questions referred to him by the controller: these are very few in number.

I.—*Consolidation of Budget Estimates.*

222. The Estimates for Military Services are forwarded to the Accountant General by the controller of each Presidency complete in every respect; how the Accountant General manipulates these statements has already been described in paras. 47 to 57. Budget Estimates.

II.—*Abstracting Monthly Returns of Receipts and Expenditure.*

223. The military accountant of each Presidency forwards, through the controller, to the Accountant General a monthly statement of the receipts and disbursements; the Accountant General merely posts these monthly statements in a register under the Budget heads. Abstract of expenditure.

III.—*Correspondence.*

224. This is exceedingly limited, and consists principally of explanations in regard to the alterations made by the Accountant General in the Budget Estimates, as rendered by the controllers and heads of departments, or in obtaining from other departments information to enable him to answer questions referred to him from the military secretariat. Limited correspondence.

---

225. We have entered thus fully into the detail working of the several establishments forming the Military Account Department, with the view of showing the operose arrangements which at present exist both as regards the compilation of the Estimates and the record of the expenditure. Present system of accounts is operose,

226. It appears to us that both of these important duties are in an exceedingly unsatisfactory state; we find, in regard to the former, that the Financial Department complains, that since the introduction of the present system of account the information required for the annual Budget statement has not been furnished in proper time; and in regard to the latter, we observe that the general books for military services for the year 1861–62 have only just been closed; that in consequence of this arrear the value of these books is considerably diminished, and it has become necessary to anticipate the amount of the audited expenditure, under the several heads of service, by compiling numerous statistical statements, giving very unsatisfactory and incomplete information, and involving an enormous amount of unnecessary labour. both as regards Estimates and record of expenditure. The military books are in arrear.

227. This unsatisfactory state of the military accounts is traceable to two principal causes: Causes that have led to this:

I.—The dispersion, in various parts of Calcutta, of the several departments of military accounts. dispersion of offices;

II.—The custom of looking on each of such departments as a distinct office, and not in the true light of being each an elemental part of one great whole, a general office of account, whereof the Accountant General is the single head. separation of departments.

Locality of military account offices.

228. First.—The following is the list of the Military Account Departments in Calcutta, and the parts of the city where the offices are situated :—

Presidency Paymaster - - - -	3, Bankshall-street.
Examiner, Pay - - - - - -	3, Coilah Ghaut-street.
Compiler, Pay - - - - - -	3, Park-street.
Commissariat Examiner - - - -	Middleton-row.
Medical Examiner - - - - -	Middleton-row.
Ordnance Examiner - - - - -	Bankshall-street.
Military Accountant - - - - -	4, Coilah Ghaut-street.
Controller - - - - -	3, Park-street.
Accountant General - - - -	13, Chowringhee-road.

Inconvenient, and expensive,

229. Considering that the pay examiner, whose office is in Bankshall-street, has to send all the vouchers, pay-lists, and other documents connected with pay, to the compiler in Park-street, and that that officer has to furnish the military accountant, whose office is in Coilah Ghaut-street, with the results of these returns, it is no wonder that the cost of the establishments is excessive, and the correspondence involved by the separation of offices, so intimately connected with each other, is increased to a very great extent.

and leads to an increase of work.

230. Again, how necessary it is that the Accountant General should have immediately at his command the state of the expenditure of any item of a grant, or that he should be aware of the state of the account of any of the disbursing officers; and yet information of this description can only be obtained from the records of the Military Accountant, whose office is nearly two miles distant from that of the controller and from that of the Accountant General; the consequence is, that the military accountant, and also the other officers whose offices are at the other end of the city, have to furnish periodical returns and statements containing information, which, if the books were readily accessible, could be obtained at a moment's notice, and the returns would then become unnecessary.

A suite of offices for the Military Account Department should be erected.

231. We are aware that there would be very great difficulties in obtaining an office sufficiently commodious to accommodate all the establishments of the Military Account Department, but we think that the necessity is so great that some effort should be made with the view of bringing cognate offices into closer proximity with each other; we feel satisfied that were a suite of offices erected for the Accountant General's Department, under which we include all the separate establishments before alluded to, the saving that would be effected would far more than compensate for the outlay. In proof of this assertion, we may state that the office of the Accountant General of the War Office was, within the last few years, conducted in two separate establishments, only a few hundred yards distant from each other, but the inconvenience was so great that, at considerable expense, the accommodation at one of the offices was extended, and the two offices have been consolidated, so that now the entire business of the Account Department is conducted under the same roof. The anticipations in regard to the advantages of this arrangement have been more than realised; not only has a large saving been effected, but business has been much facilitated, and the accounts more speedily audited and recorded than when the examining branch was separated from the book-keeping section.

Advantages that have accrued in England by consolidating the offices.

The amount paid for rent in Calcutta is considerable:

site for new offices suggested.

232. We may observe that the amount paid for the rent of the military offices amounts to a very considerable sum; we would also draw attention to the fact that the present office of the military accountant is Government property; that the site is admirably adapted, both from its extent and central position, as that upon which a central office for the Military Departments might be erected.

The establishments should be consolidated.

233. Second.—The arrangements above alluded to, although of considerable importance, bear no comparison to the advantage of consolidating, under one responsible head, the separate and distinct establishments which collectively form the present Military Account Department.

The controller has only nominal control over some of the departments;

234. The present position of some of these establishments is very undefined, for although nominally under the jurisdiction of the controller, he in reality exercises but little, if any, direction over the functions of the medical examiner, the commissariat examiner, or he Presidency paymaster; and what is to us still

still more remarkable, the Accountant General does not in any way attempt to direct the course of action that should be followed in either the one or the other of these establishments; if he require information on any point, he addresses a formal letter to the controller, who, if he can furnish the information, makes a formal reply; it not unfrequently happens that the controller himself must obtain the information required by the Accountant General from one or other of the separate establishments; a remarkable instance of the delay that takes place in consequence of the present arrangement of the account offices came to our notice when we were pursuing our investigation of the accounts in the charge of the ordnance examiner. The Accountant General, on the 18th May, writes to the controller for certain information on some question respecting the valuation of stores received from England. On the 28th May the controller sends the Accountant General's letter to the military accountant for "early" report. That officer retains the letter until the 18th June, and then merely sends it with a covering letter to the examiner of ordnance accounts for "immediate" report and return. The ordnance examiner furnished the information required in a few minutes, but it would find its way back to the Accountant General through the military accountant and the controller. This is a fair specimen of the manner in which, in consequence of the separation of the offices, business is carried on, and will continue so long as the present arrangement exists. The delay would be obviated if all the separate departments of account were immediately under the directions of the Accountant General. A further inconvenience arises; viz., that the same returns are frequently called for, so we are informed, by the controller, by the military accountant, and even by the inspector general of ordnance.

delay arising from present system of separate offices;

The same returns are called for by separate officers.

235. We will refer once more to the General Order of the Right Honourable the Governor General (No. 197, 7th March 1864): it is there stated, with reference to the newly-formed office of Accountant General, that "this is the head office of the system of army accounts," and that, as before observed, the relation of this officer to the Military Department will be similar to that of the Accountant General to the War Office at home. We consider that the intentions of the Government when this appointment was made was to impose upon the Accountant General in India analogous duties and responsibilities to those intrusted to the Accountant General of the War Office: let us therefore consider what those duties are. With the view of there being no misunderstanding on this point, we have furnished in the Appendix (No. I.) a copy of the instructions issued to that officer; these instructions were compiled after a most minute and searching inquiry had been made into the Account Department of the War Office by two Committees, each composed of the most experienced officers of the Treasury.

Reference to the duties of the Accountant General, War Office.

Detail of duties is given in the Appendix.

236. It will be seen, on reference to these instructions, that the Accountant General of the War Office at home is responsible for the due performance of the following duties:

What they consist of.

I.—Compilation of Estimates.
II.—Control of Expenditure.
III.—Examination of Cash Accounts.
IV.—Record of Expenditure.
V.—Rendering an Annual Account of Receipts and Expenditure for Military Services.
VI.—Store Accounts.

237. The establishment placed at his disposal for carrying out these duties consist of—

Establishment for conducting them.

2	Assistant Accountant Generals,
195	Permanent, and
40	Temporary Clerks.
237	

238. The department is divided into sections, according to the nature of the business, one group of sections being under the immediate direction of one of the assistant accountant generals, and the other group of sections in the charge of the other. Although these several sections are each responsible for the particular

The department is divided into two sections, each under an assistant accountant general.

ticular class of business allotted to them, the senior clerks in charge cannot take the initiative in any matters of importance without the approval of the Accountant General or of the assistant accountant general in charge of the section; neither can the senior clerks sign any letters appertaining to the business under their immediate control: these are signed by the Accountant General himself, or by the one or the other of the two assistant accountant generals.

The duties of the Accountant General, War Office, at home, more onerous than those of the Accountant General in India.

239. In drawing a comparison between the duties to be performed by the Accountant General in this country and the Accountant General of the War Office, it must be remembered that the latter has not only the accounts from the regimental paymasters in every part of the world, but he has also the accounts appertaining to militia, yeomanry, volunteers, enrolled pensioners, and others; and he has very onerous duties connected with Her Majesty's British forces serving in India, such, for example, as the distribution of remittances and effects. He has also a large portion of his department engaged in the examination of the claims and accounts connected with the construction, repair, and maintenance of fortifications, barracks, and military buildings, a duty which in this country is entirely performed by the Public Works Department.

The English arrangement of the office should be followed.

240. It appears to us, therefore, that as the different offices of control, audit, and book-keeping can in England be directed by one officer, there is no reason why the same course should not be carried out in this country. It would be necessary, in the first place, to take from the officers now in independent charge of their several departments the power of independent action, and bring them together into one general establishment.

The duties of controller in India are analogous to those of Accountant General in England.

241. The question now arises, what is the establishment that is required for carrying on the important duties of the Military Account Department? To enable the Government to form an opinion on this subject, we would direct particular attention to para. 9, in which we have given in detail a description of the duties that now devolve upon the controller; by comparing those duties with those described in Appendix, No. 1, as devolving upon the Accountant General of the War Office, it will be seen that the functions of these two officers are almost identical; a reference to para. 221, in which we have described the responsibilities imposed upon the Accountant General in India, will show that they are entirely confined to passing his opinion on such abstract questions as may be referred to him by the Military Department, the information respecting the questions relating to the accounts or expenditure being obtained through the controller, and the consolidation of the Budget Estimates and monthly returns of expenditure rendered by the controllers of Bengal, Madras, and Bombay into general abstracts.

The controller in Bengal should be the accountant general.

242. So far therefore as the estimates and accounts are concerned, there does not appear to be any necessity that they should be subjected to any supervision beyond that of the controller, on whom, at the present time, the real responsibility rests; the duties now performed by Colonel Broome do not justify the appellation of Accountant General being given to that officer; the controller is, from the nature of his work, the actual accountant general; and the first point to be decided is, whether the various and important duties of the present controller should be transferred to the Accountant General, or whether the comparatively unimportant functions of the latter should be allocated to the controller, who would in that case be designated Accountant General; so far as our experience goes, we have come to the conclusion to recommend the latter course; the one or the other of these officers is not only redundant, but embarrassing, and we do not doubt that so long as the functions of these two officers remain unchanged, so long will the accounts of the Military Account Department be in arrear and confusion.

The present accountant general or the controller is unnecessary.

The establishment for the Bengal office.

243. The establishment, so far as Bengal is concerned, might for the present consist of—

Accountant General.
1 Deputy Accountant General.
1 Assistant Accountant General.
1 Principal book-keeper.
1 Examiner, pay and pensions.
1 Ditto - commissariat accounts.
1 Ditto - of store accounts.

244. It

244. It would be quite unnecessary to continue the appointments of controller, military accountant, examiner of medical accounts, or compiler; but there should be appointed an assistant book-keeper, and the assistants to the examiners should be retained; these officers would, in the absence of their principals, act as their *locum tenens*; such number of clerks should be appointed as on the working of the system of accounts that we shall propose might be found necessary.

Certain offices might be abolished; but the principal officers should have assistants.

245. When it shall have been ascertained what number of clerks are required for the performance of the duties that will devolve upon the Accountant General's Department, those now distributed throughout the several separate offices should be amalgamated into a general list; they should be divided into separate classes, promotion being made as vacancies occur throughout the department, and not in regard to the particular section of the office in which the casualty may have happened. It should also be understood that, although a certain number of clerks are appropriated to a particular section, they must be available for general service within the department, and they will be liable to be transferred from one section of the office to another, according as the exigencies of the service may require.

The clerks should be classified in a general list.

246. Having stated what, in our opinion, should be the establishment of the Military Account Department, we will now consider the manner in which the duties and responsibilities that should be imposed upon the Accountant General can be best carried out; we will arrange our observations under this head in the order observed at para. 236, with reference to the duties performed by the Accountant General of the War Office at home.

Duties that should devolve upon the Accountant General.

I. *Compilation of Estimates.*

247. We consider that judiciously arranged and carefully prepared estimates are the key to the success of any system of public accounts. The defects in the estimates are a continual source of difficulty to the proper record of the accounts, to the control of the expenditure or of the audit of the disbursements; on the other hand, the estimates being well arranged, and the items grouped together under major and minor heads of service, the accounts rendered by disbursers would be made conformably thereto, and the books of record arranged in like manner; the books of account being all brought together under the immediate control of a responsible book-keeper, and not scattered over branches of a department without connection or uniformity; the estimates, disbursements, audit, record, and final annual account, would form one consistent and unbroken chain.

Importance of carefully prepared estimates; and of the books being in charge of a responsible book-keeper.

248. The Budget Estimates are merely statements showing, at a certain given period of the year, the approximate amounts that will be required for carrying on the service of the ensuing year. Upon the aggregate amount of these estimates for the several services, the financial member of council arranges for the ways and means of the year; the expenditure of the year should therefore be checked against the Budget grants, and not with the "Revised" or "Regular" Estimates, which are prepared towards the end of the financial year, and are based upon at least six months of actual expenditure, and for the remaining portion of the year on the estimated charges. We see no practical utility in these statements, they keep all the departments of account in a continual state of distraction, for scarcely is one estimate finished than another has to be commenced; and at the very busiest period of the year, when the Budget Estimate for the ensuing year is being compiled, the "Regular" Estimate for the current year is under preparation. We would therefore suggest that the Estimates for Military Services be limited to those compiled for the Financial Member's Budget Statement.

The "Regular" and "Revised" Estimates should be discontinued.

249. The estimates should, in the Bengal Presidency, be compiled by the Accountant General, and the necessary documents and returns should be furnished to him by the heads of the several departments; in Madras and Bombay the estimates should be prepared, on forms furnished from Calcutta, by the controllers, who are the representatives of the Accountant General in those Presidencies.

The Budget Estimates should be compiled by the Accountant General in Bengal, and by the controllers in Madras and Bombay.

The Accountant General should compile a general estimate.

250. The estimates from Madras and Bombay would be forwarded to the Accountant General not later than the 31st January, and he would, after subjecting them to a careful revision, compile them into a general Budget Estimate for military services for all India; any alterations in the amount which he may consider it necessary to make, should not be shown on the face of the estimates, but should be explained to Government, together with his observations on the estimates generally, in a separate report.

A revised form of estimate is submitted for adoption.

251. We have prepared a revised form of estimate (Appendix No. 4), and we submit the same for the consideration of the Supreme Government; we may observe that this form has been prepared in conjunction with the present Accountant General and the controller, and that both these officers approve of the general arrangement and classification.

Principle upon which this has been framed.

252. The principle that has guided us in framing this estimate is the bringing together, under separate grants, analogous to the "votes" in the English Estimate, services of a cognate nature. We have made the grants as concise and intelligible as possible, and where we have considered detailed information necessary, we have furnished it in the appendices; these can be amplified to any extent without interferingwith the information contained under each grant, which should be as succinct as possible, for upon the simplicity of the grants depends the facility of recording the expenditure.

Arrangement of estimates.

253. We propose that the estimates for military services in each of the Presidencies should be divided into the following grants:—

Grant 1.—Army and Garrison Staff.

Grant 1.

254. Under this grant would be included the pay and all the expenses of the head-quarter, divisional, brigade, and station staff, depôts, sanataria, and bazar establishments.

Should becompiled by the Accountant General.

255. The whole of this grant should be compiled by the Accountant General; the only items upon which he would have to confer with the heads of the several departments would be those in regard to contingencies or travelling expenses; but even in respect to these, the expenditure during the past or current year is as near an approximation to the amount required as can be given by the officers at the head of the several establishments.

Grant 2.—Administrative Staff.

Grant 2.—The military secretariat is a military charge.

256. We consider that the pay and expenses of the military secretariat is a military charge, and, as such, should be removed from the Civil Estimates.

257. This grant will be entirely made up by the Accountant General. The officers of the Account Department should be separately shown, and the number of each class of clerks should be arranged for the Accountant General's Department, and not under each section thereof.

Grant 3.—Regimental Pay, Allowances, and Charges.

Grant 3. General statement, showing all pay and allowances.

258. We have brought together, as far as it is desirable to bring them into one statement, the entire charges in the nature of pay and personal allowances for the whole army, European and Native, and of the native followers attached thereto: at a glance will be seen the estimated numbers of each arm of the service, the total cost, and the aggregate estimated amount of allowances as compared with the sum granted in the previous year.

The expenditure should be recorded, as at present.

259. It is intended that the expenditure shall, as now, be recorded with the view of showing the total cost under each arm of the service, and not under the separate items composing the pay and allowances; provision will, however, be made in the pay lists for furnishing information on this point, should it at any time be required.

The Accountant General should have early information in regard to the force to be maintained.

260. This grant will be entirely made up by the Accountant General, who should be informed by the military authorities, during the month of November of each year, of the intentions of the Supreme Government in regard to the strength of the force to be maintained during the ensuing year. Should it be

in

in contemplation to augment or decrease the force, or to make any alteration in the establishments of the regiments or corps, the Accountant General should have the earliest information, and it would be his duty to inform the Commissary General and the Principal Inspector General of the Medical Department of the strength of the several arms of the service that it is intended to maintain. Upon the numbers to be borne must depend the amount to be provided for pay, allowances, and other charges.

The cost of the establishment of regiments, &c. is shown in the Appendices.

261. One of the principal features in this grant is the substantiating Appendices; in these will be found the approved establishment of each regiment of cavalry or infantry, European and Native, of the batteries of artillery, or of the various irregular corps; the total cost of the pay, allowances, and charges is succinctly shown, and the aggregate estimated cost of each arm of the service is given, the numbers, per establishment, is distinctly represented, and these numbers are carried to the body of the estimate, and are compared with the numbers approved for the previous year; thus is readily shown the augmentation or diminution both in number or cost of the several regiments or corps of the entire service. These Appendices, we apprehend, will be found exceedingly useful, not only to the officers commanding regiments, but also to the Military Departments, and will save many references to the Accountant General; further advantage is also obtained in thus ascertaining the normal cost of each regiment, battery, &c., as the additions to or reductions from the strength of the establishments can readily be arrived at.

Grant 4.—Commissariat Establishments, Supplies, and Services.

Grant 4. The Commissary General should prepare this estimate.

262. The necessary details in regard to this grant should be prepared by the Commissary General; in the event of the number of the several ranks of commissariat officers being the same as approved for the previous year, it would be unnecessary to furnish any details, the numbers and the aggregate amount of pay to be provided would be sufficient; in the case of any increase to or reduction of the numbers, or amount sanctioned in the previous year, full explanation should be afforded.

Cost of subordinate establishments.

263. The amount to be provided for the subordinate establishments should be shown under ranges, and a comparison should be made with the grant of the previous year, and explanations of any cause of increase should be given.

A form submitted for ascertaining cost of rations.

264. The sum required for the provisions of Europeans should be based upon the actual rates paid to the contractors for the rations to be supplied; the commissariat officer of each range or station should prepare a statement showing the probable strength to be maintained during the ensuing year, and he should carefully calculate the entire cost of one ration per man per annum. We submit, for universal adoption throughout India, a return of this nature, Appendix, No. 5, which will enable the Commissary General to see what is the relative comparative cost per ration at every principal military station in the empire.

The Commissary General should furnish necessary details.

265. In regard to the other items in this grant, the Commissary General should furnish whatever returns or statements the Accountant General may require; but they should, as far as possible, be limited to returns of a general nature, and should not descend into those minute particulars which have hitherto been furnished: the Commissary General would, of course, obtain from the officers under his orders such detail information as he may consider necessary, and that officer would, after revising and correcting these returns compile them into a general statement; it should be, however, distinctly understood that the Accountant General should be allowed access to all returns, books, orders, or other papers to which he may wish to make reference in the progress of his examination of the estimates; it would moreover be very desirable were the Accountant General to communicate personally with the Commissary General on any point requiring explanation.

The Accountant General may inspect books, &c., kept by the Commissary General.

Grant 5.—Stud and Remount Establishments.

Grant 5. The superintendent of studs should furnish a general estimate.

266. We propose that the deputy superintendents in charge of stud depôts should furnish their detailed estimates to the superintendent of studs, who should examine, revise, and correct them; he should also prepare a general

statement of the estimated expenses under each of the items particularised in the grant: it would not be necessary to give greater detail than is shown in the Budget Estimate; the general statement might be supported, if necessary, by the original estimates furnished by the deputy superintendents.

Grant 6.—Clothing Establishments, Supplies, and Services.

Grant 6. Should be prepared by clothing agent.

267. The estimate for this service should be prepared by the agent of clothing; it should be limited to the sum required for expenditure in this country; the return in regard to the quantity and estimated value of materials to be obtained from England will be dealt with by the Accountant General in the usual manner.

Grant 7.—Barrack Establishments, Supplies, and Services.

Grant 7. The quartermaster general should furnish the estimate for this service,

the details being supplied by the barrack master and commissariat officer.

Barrack bedding is included in the grant.

268. The Barrack Department is at present under the immediate directions of the Quartermaster General; upon that officer should, so long as the present arrangements exist, devolve the duty of preparing the estimate for this service. As all purchases for barrack stores and supplies are made by the commissariat officers, the estimates for these must be prepared by the barrack master and commissariat officer jointly, the one furnishing the list of articles required, and the other the estimated cost; these returns, when complete, should be transmitted to the Quartermaster General for examination, revision, and compilation. It will be observed that under this grant we have included the "Purchase of Barrack Bedding;" we are aware that this has always been considered as a commissariat supply, and that the issues are made by officers of that department; with this arrangement we do not wish to interfere; it appears to us that all expenses connected with the *logement* of the troops should be brought together under one grant; the present grant for the Barrack Department already includes the cost of charpoys and all articles of barrack furniture.

Grant 8.—Administration of Martial Law.

Grant 8. Should be prepared by the Accountant General.

269. This grant will be prepared by the Accountant General. We have considered it desirable to group together, under a separate grant, all the expenses connected with this service; hitherto the pay of the Judge Advocate General, the deputies, and other officers have been included under general staff.

Prison fund.

270. We have not made any provision for the subsistence of men in military prisons or cells; the system at present prevailing in the Indian army is to pay over to the "Prison Fund" all mulct pay, whether arising from men being in prison or under stoppage by sentence of court martial; the fixed and approved charges on account of each prisoner is deducted from the fund, and the balance is paid over to the paymaster, who either includes the sum in his pay list to the credit of Government, or hands it over to the circle paymaster, who pays it into the local treasury.

The gross amount of prison expenses should be provided in the Budget Estimate.

271. This is the only instance in which the entire transaction does not appear in the estimates and accounts. We admit that, so far as we can learn, the present system works well; but it may be for consideration whether, at some future period, the gross amount required for prison expenses should not be included under this grant, and the whole amount stopped from the men credited to Government; in the meantime we have introduced on the Budget Estimate a memorandum in explanation of the manner in which funds are obtained to meet the prison expenses.

Grant 9.—Medical Establishments, Services, and Supplies.

Grant 9. How to be prepared.

272. The grant for this service has hitherto, in Bengal, been made up by the examiner of medical accounts, an officer who is nominally under the directions of the controller. In Madras and Bombay the estimate for medical services is prepared and submitted by the principal Inspector General, who, at Madras, furnishes copies of all the details upon which his calculations have been based; this is unnecessary. We would propose that, so far as the supplies are concerned, the Principal Inspector General should obtain from the deputy inspectors general of circles the estimated cost of the diets, &c., in the several hospitals in their

their district; this information should be compiled into a tabular statement in the central medical office, and furnished to the Accountant General, who should, as in the case of the commissariat, have access to any statements or books that may be kept in the office of the Principal Inspector General.

273. If more convenient, there is no objection to the Inspector General of the British Medical Establishment furnishing the estimate for that service direct to the Accountant General.

The inspector general, British Establishment, may send separate estimate.

Grant 10.—Ordnance Establishments, Stores, and Camp Equipage.

274. The inspector general of ordnance is the head of this department; he should be responsible for the compilation of this grant. The estimates of the officers in charge of the manufacturing establishments should be referred to him, and he would make such alterations as he might consider necessary.

Grant 10. The inspector general of ordnance should furnish the estimate for this grant.

275. A list of such stores as it is intended to purchase during the year should be furnished to the Accountant General; it would be sufficient to show the gross number or quantity of each article of store that may be required for each Presidency, and not under stations. The returns now furnished, showing the probable issues from stock, should be discontinued.

A list of stores to be purchased should be furnished.
That for stock issues to be discontinued.

276. As in the case of the Commissariat and Medical Departments, the books and records of the inspector general of ordnance would, so far as they relate to the preparation of the estimates, be open to the inspection of the Accountant General.

Accountant General to have access to books, &c.

Grant 11.—Ecclesiastical.

277. This grant will be prepared by the Accountant General.

Grant 11.

Grant 12.—Educational.

278. The principal of the Lawrence Military Asylum will furnish the Accountant General with an estimate of the expenses of that establishment.
The Accountant General will complete the remaining portion of the grant.

Grant 12.

Grant 13.—Surveys, Topographical and Trigonometrical.

279. The necessary information for this grant will be furnished by the Surveyor General.

Grant 13.

280. We understand that the Government has under consideration the expediency of providing for this service in the Civil Estimates; we are of opinion that this course should be followed, particularly as the pay of the Surveyor General is already provided for as a civil charge.

This service should be provided on Civil Estimates.

Grant 14.—Sea Transport Charges.

281. This grant should be prepared by the Accountant General in communication with the Quartermaster General.

Grant 14.

Grant 15.—Miscellaneous.

282. The Accountant General would prepare this grant; he would obtain such information as he may require from the heads of departments.

Grant 15.

Grant 16.—Volunteer Corps.

283. The amount that will be included in this grant will at present be inconsiderable: it is not improbable that, in a few years, the grant may extend to a large amount: be this as it may, we have considered it desirable to show the expense separately, as it appertains neither to the European or Native army: we have treated it as an auxiliary force, and have therefore placed it after the grants for the regular army.

Grant 16. Expenses of volunteers provided for as auxiliary forces.

284. The Accountant General will compile this grant from the orders that he may from time to time receive from Government.

Grants 17 to 21.—Non-effective Services.

Grants 17 to 21. Should be compiled from the pension registers.

285. These will be compiled by the Accountant General, and, as far as possible, from the pension registers; it will not be necessary to furnish the names of each pensioner: if they be grouped together in classes it will be sufficient; neither will it be necessary to show the amount payable at each station.

Hyderabad Contingent.

Separate statement for Hyderabad contingent.

286. We have prepared a separate statement, showing the gross amounts included under the several grants on account of this service; this will facilitate the adjustment that may hereafter take place in regard to the cost of this contingent.

Receipts and Recoveries.

Gross receipts should be paid into the Treasury.

287. This statement will be prepared by the Accountant General, from information furnished to him by the several departments. We do not advise any deviation from the existing practice of paying all receipts into the general treasury, and of providing for the gross expenditure on account of the various services. Under all the circumstances, we consider that this is the soundest principle, and one less likely to lead to an embarrassment of accounts than if the plan pursued in the War Office Estimates at home in regard to deductions for commissariat supplies and hospital stoppages were followed, which is to deduct the estimated amount of the credits from the vote. The Accountant General expressed himself much in favour of the English system, and suggested, at least in regard to commissariat supplies, that the deduction should be made from the grant of the sum that will be recovered from the troops for malt liquor and spirits issued to them. He stated, that in regard to malt liquor, a contract is made for a certain number of hogsheads to be supplied at each Presidency, and that a fixed quantity is allowed to be issued to the men on payment of about half cost price; provision is made in the estimate for the entire cost, and the amount realised from the troops is repaid to the Treasury. As before observed, we incline to the Indian practice rather than to that observed in the English War Office Estimates; amongst other objections to the English practice there are two, which to our minds are conclusive: it may happen (and it frequently does happen) that the expected receipts are not forthcoming, within the period of the financial year, to meet the expenditure that has been incurred, thus rendering it necessary to obtain a special grant to meet the deficiency; or, it may happen, that credits may be realised beyond the amounts estimated, in which case, the head of the department would have at his control a sum beyond that sanctioned by the Government.

The English system should not be followed.

Deductions for Commissariat supplies should be paid at Treasury.

Objections to War Office system.

The receipts would be adjusted by book entries.

288. It must, however, be understood that we do not consider it necessary that each separate sum received for this, or any other service that has eventually to be credited to the Government, should be paid direct into the local treasuries. The books of the Accountant General will be arranged in a such a manner that a periodical adjustment, a mere paper transaction, say every three months, will be all that is necessary.

The net cost of the military services is shown on the Budget Estimate.

289. In order that it may be seen what is the gross and what is the net estimated cost of the army serving in India, we have, in the first abstract of the Military Budget Estimate of India, shown, Presidency by Presidency, the gross estimated expenditure, comparing that amount with the grants of the previous year; in the second abstract we have shown also under each Presidency the total gross estimate, the approximate amount of receipts and recoveries, and the net estimated expenditure. The detail of the items under which the credits will be realized will be found in the estimate for each Presidency.

The form proposed will obviate delays complained of.

290. If this form of estimate be approved, and prepared in the manner in which we have thus briefly sketched out, we have no hesitation in stating that the delay complained of by the Financial Department will be obviated, and the vast detail now prepared, as stated in paragraph 62, will be quite unnecessary.

The estimate does not cover unauthorised charges.

291. We would here state that, in imposing upon heads of departments more responsibility than they now possess in regard to their Budget Estimates, it must

must be distinctly understood that they should be prohibited from introducing any new appointments, not previously sanctioned, into their annual estimates. Any lists or documents furnished to the controllers should specify the authority under which the several officers and others introduced for the first time are employed. It should also be understood that the general approbation of any estimate is by no means to be taken as giving a sanction to any new appointment, or extra allowances that may be therein introduced, unless the same have previously been approved of by the proper authorities; nor is such general approval to authorise the payment in regard to stores or supplies of the exact prices specified therein, unless a contract or agreement has already been entered into.

Only approved items should be admitted into the Budget.

II. *Control of Expenditure.*

292. The control of military expenditure is vested in the controllers; it would, however, appear from the instructions issued to those officers since the appointment of the accountant general, that it is the intention of the Government to limit their functions; we quote the following passage from the instructions alluded to, dated 1st April 1864:—

The functions of the controller limited by recent orders.

Section II., Para. 8.—"All transactions affecting military expenditure are subject to the cognizance of the controllers of military accounts, in the Presidency concerned. It will also be the duty of the controllers to bring to the notice of the Military Department of the Government of India, account branch, every transaction affecting their special duties, and to furnish the officer in charge of that branch with the fullest information bearing thereon."

293. This simply transfers the responsibilities of the controller to the accountant general, who, in fact, becomes the controller general, and thus the duties of these two offices in Bengal become merged; this we assume was the ultimate intention of Government, guided doubtless by the perusal of the instructions to the accountant general of the War Office at home. That officer is enjoined to "exercise an effective general control over the expenditure for army services, taking care that the duties of the local controllers of expenditure are carefully and properly discharged." By "local controllers" is meant the senior commissariat officer at each station, who, in addition to his ordinary duties, is specially appointed "Controller of Army Expenditure."

The duties of the accountant general and the controller have by these orders been merged.

294. If, as we recommend, the office of controller in the Presidency of Bengal be merged into that of the accountant general, no inconvenience would be experienced. All letters should be addressed to the accountant general, and such as could be acted upon by the deputy or assistant accountant general should be at once referred to them. We shall, before we close this report, suggest a course by which this arrangement might be much facilitated. All questions requiring the directions of the accountant general would be sent to him in original, and he would record his orders on the documents submitted to him.

All letters should be addressed to the accountant general.

295. The question arises as to the extent of the control over the expenditure that should be exercised by the Military Account Department. The existing rules, as prescribed in articles I. to IV., section II. of the instructions, dated 1st April 1864, appear to be sufficiently explicit.

Control by the Military Account Department,

296. The next question is, whether any, and if any what, control should be exercised by the Financial Department over military expenditure. The accountant general should, we would propose, have the power of authorising under existing rules the payment of all military allowances; and he will examine the accounts rendered for the same; there should, however, be a clear understanding that no general or important alterations whereby increased allowances are given, or increased expense incurred, should be made by him unless the sanction of the Financial Department shall have been obtained through the intervention of the secretary to Government, Military Department.

and by the Financial Department.

297. If the military accounts in this country are to be conducted on the English system, it will become necessary, with the view of controlling the powers of the accountant general, that the Financial Department should be

The expenditure at home is controlled by the Treasury,

referred to in such cases as are referred to the Treasury by the military authorities at home; these are principally the following:—

and the sanction of that department obtained on certain occasions:

I.—Any proposition for a rate of pay of a new appointment, or further increase of any existing salary.

II.—Any grant of a special gratuity or donation, or any pension or superannuation.

III.—Any staff or other appointment, after the Estimates of the year are approved, for any increased pay or allowances to officers not previously sanctioned.

IV.—All proposed alterations in existing orders affecting the pay or allowances of officers or men to be submitted for directions.

the same course should be followed in India,

298. We are of opinion that the control of an independent department is necessary; the great object of referring questions relating to the pay of the various departments to one central controlling power is, that something like uniformity in the rates of remuneration is observed. We would instance the remuneration granted by the military authorities to the soldier clerks in the office of the deputy adjutant general of artillery; the pay to these enlisted men ranges from, including extra allowance, 1,800 rupees per annum for the seventh clerk, who is a gunner, to 5,600 rupees per annum to the first clerk, who is a quartermaster sergeant, a rate of pay much in excess of that granted to the commissioned officers of the junior ranks.

as the Military Department may grant salaries in amount beyond those usually approved.

III.—*Examination of Cash Accounts.*

Disbursers have to render their accounts through these paymasters of circles:

299. Before we enter on this subject, we will consider through what agency the expenditure for army services should be recorded; at present the disbursers have to render their accounts to intermediate officers, the circle paymasters; the accounts of these officers only appear on the books; but as these books for the year 1861–62 are only just completed, it is not possible from the official records in the Military Accountant's office, to ascertain what amount is due by any one of these officers, unless a reference is made to the account current of the officer himself; moreover, it may happen that a regimental paymaster or other disbursing officer, may be considerably in debt to the public; the transaction would not, however, appear in the books of the department (even were they posted to date) but would merely be shown in the inefficient balance of the circle paymaster; indeed, it may further happen that some regimental paymaster may have outstanding transactions with one or more of the circle paymasters at the same time.

no account is kept with regimental paymasters:

and it cannot be ascertained what amount is due by them.

Extra correspondence is occasioned by present system:

300. There are six paymasters of circles throughout the Bengal Presidency, so that every paymaster of Her Majesty's British regiments, the officers commanding batteries of artillery, and officers commanding native regiments, are compelled to send their estimates and pay-lists to one or other of these paymasters, frequently many hundred miles away from the station at which the regiment is located; a great deal of time is consumed, and extra correspondence is caused by this arrangement, and so far as we can ascertain there is no compensating advantage obtained for the very heavy cost of the present system. We have already alluded in paragraph 84 to the inconvenience and increased work which the present system of paying the artillery occasions

inconvenience as regards artillery.

Regiments on the British establishment render their accounts direct to the War Office.

301. In regard to British regiments serving in the Colonies, each paymaster of infantry, and officers commanding batteries of artillery, are in direct account with the accountant general of the War Office: it is quite immaterial whether the regiment be stationed at Malta or New Zealand, in the West Indies or in China; the pay-lists are rendered with the greatest regularity without the intervention of any intermediate aid. The system has been in operation for time immemorial, and a reference to any regimental paymaster would prove how little difficulty he experiences in adjusting his accounts, although far removed from the head quarter account office.

The pay-lists of British regiments serving in the Presidency circle are sent

302. The experiment has been partially tried in this Presidency; we say partially, because the regimental paymaster, although his pay-list is examined by the pay examiner direct, has to render his estimates, and obtain his advances of cash from the Presidency paymaster, and to that officer he is a sub-accountant,

ant, there being no separate record of his transactions in the books of the military accountant. The experiment in regard to the direct transmission of the pay-lists has, so we are informed, answered in every respect. direct to pay examiner.

303. We would suggest, therefore, that paymasters of British regiments, officers commanding batteries of artillery, and officers commanding native regiments, be eventually made direct accountants, and that they should transmit their pay-lists, at the end of each month, without the intervention of the circle paymasters, direct to the accountant general. The system should be extended.

304. It will facilitate this arrangement if all regiments serving in India be mustered on the last day of the month, instead of on the first day; this is done in all regiments serving on the British establishment; the muster should be made by the paymaster of the regiment. Regiments should be mustered on the last day of month.

305. The course we would suggest in regard to supplying the regiments or batteries with funds, is as follows:—the paymaster, in the case of British regiments of infantry and cavalry, and the officer commanding, in respect to batteries of artillery and native regiments, should prepare estimates of the probable amount required for the ensuing month's payments; this should be approved by the officers commanding regiments of cavalry and infantry, and by the senior officer at the station in regard to artillery and native regiments: an abstract of the approved estimate should be sent by the "approving" officer to the treasury from which the money is to be issued; the original estimate should be returned to the paymaster or other disbursing officer, and by him at once transmitted to the accountant general, Military Department, Calcutta, for the Bengal Presidency, and to the heads of the Military Account Department of Madras and Bombay. Suggestion as to the mode of making advances to regiments. British regiments.

306. The payment to the disbursing officer of native regiments should be on the last day of the month, and should not exceed the total amount of the estimate; the sum that should be issued would be the exact amount of the pay-list, which document should be at once forwarded to the accountant general; in the event of the treasury being closed, as suggested in our Report on the Civil Accounts, on the last day of the month, the officer commanding should obtain the necessary advance of cash on the day previously. Native regiments.

307. The officer in charge of the treasuries from which these regimental advances are to be made should, at the commencement of each year, be furnished, through the deputy auditor and accountant general of the Presidency or Province, with general instructions or permanent orders as to the gross amount to be issued monthly to each regiment or battery, it being understood that no issue should be made unless on an abstract of the monthly estimate, and that in all cases the cheque or order on the treasury should, in the case of regimental paymasters, be countersigned by the officer commanding the regiment. Treasury officers should be furnished with a general authority in regard to advances for regimental services.

308. We will now consider what duties would devolve upon circle paymasters were our suggestions in regard to the regimental accounts adopted. We have drawn attention to the inconvenience and delay that takes place by the circle paymasters, although far removed from certain stations, having to issue and adjust all claims for pay of commissariat and other staff and departmental offices; we would suggest that, at least so far as the pay of commissariat establishments is concerned, that all payments should be made by the commissariat officers, and included by them in their monthly cash accounts. Limited duties of circle paymasters. Commissariat officers should pay their own establishments.

309. As we propose making a separate suggestion in regard to the payments made by the Presidency paymaster, we will limit our observations to the duties of paymasters of circles. Presidency paymaster.

310. On reference to para. 77, it will be seen, after excluding payments on account of European and native troops, that the following average number of payments for miscellaneous military services are made by each paymaster in each month: Number of separate payments per month in certain circles.

Allahabad	327
Lucknow	332
Meerut	652
Lahore	274
Trans-Ravee	242

these numbers would be reduced by the payments on account of commissariat establishments at the several stations in each circle.

Number after deducting the payments to British regiments.

311. The question arises whether the duty performed by the paymasters in charge of the undermentioned circles justifies the expense incurred, which on reference to Appendix, No. 2, will be found to be as under :—

	Rs.
Lucknow - - - - - - - - - -	28,040
Lahore - - - - - - - - - -	24,680
Trans-Ravee - - - - - - - - -	26,480
Rs.	79,200

Average cost for each payment.

312. For this amount an average, after excluding the payments appertaining to British regiments, of 12,700 payments per annum will be made by the three paymasters, or at the rate of *Rs.* 6. 2. for each payment.

The examination of the vouchers of the circle paymaster is nearly useless.

313. It must be borne in mind that whatever may be the extent of the examination, by the circle paymasters, of the vouchers submitted to them, it is nearly useless, as the work has to be gone over again when the vouchers reach the office of the pay examiner, Calcutta.

Number of commissariat disbursing officers and treasuries in certain of the pay circles.

314. The question naturally suggests itself as to the course that would be adopted in making the payments were circle paymasters discontinued. In answer to this, we would observe that in each of the circles above named there are the following number of commissariat officers who are direct accountants to the accountant general, and there are, moreover, the following number of separate treasuries in each of these circles :—

	Number of Commissariat Disbursing Officers.	Number of Separate Treasuries.
Lucknow - - - -	3	11
Lahore - - - -	4	12
Trans-Ravee - - -	2	12

The payments might be made by the above.

315. By distributing the number of miscellaneous military payments amongst the commissariat officers and civil treasurers, a very few payments would devolve upon each. We would propose that at those stations where there are commissariat disbursing officers that the payments above alluded to be made by them; and at those stations where there is no commissariat officer in charge, the payments should be made direct from the civil treasury; both the commissariat and the treasury officer should be considered as bankers in regard to these transactions; they, whenever practicable, should pay on permanent or standing orders, and it should be distinctly understood that their responsibility would be limited to issuing, upon a requisition or order from whomever the accountant general may authorize for that purpose, the sums necessary for the payment of staff pay and other charges.

Whatever changes are made should be accomplished gradually.

316. The payments in the Allahabad and Meerut circles are more numerous than those before mentioned; we would, however, suggest the same course should eventually be adopted at each circle. Without making any precipitate change throughout the country, we would suggest that as vacancies occur in the several circles, the appointment of paymaster be abolished, and that the clerks, or such of them as might be absolutely required, should, as a temporary arrangement, be transferred to the commissariat or treasury offices. We are aware that it is quite contrary to precedent to keep up offices that are not wanted, for the sake of existing incumbents; but in this case it would be advisable, if any change is to be made, to proceed cautiously, so that the officers concerned and the central Office of Account might be prepared to meet the new system.

Reduction in Madras of the number of pay circles.

We observe that orders have recently been issued to the Madras Government in regard to the reduction from ten to six district paymasters. We have not had an opportunity of witnessing the working of the present system of military accounts, either in Madras or Bombay, but we do not hesitate to recommend for those Presidencies the same system as is proposed for Bengal.

317. In

317. In regard to Presidency paymasters, we would propose that their duties be administered by the accountant general in Bengal, and by the controllers at Madras and Bombay. The duties of the Presidency paymasters should be performed in the head quarter account office.

318. We have already alluded to the fact that, so far as the Presidency paymaster of Calcutta is concerned, the greater part of the work performed by him is done twice over in the same building; we would propose that it should be done once only, and in the following manner:— At Calcutta the work done by the paymaster is done twice over.

319. The accountant general should have an account opened in his name at the Bank of Bengal; this account should be credited by weekly issues from the general revenue account, on requisitions signed by the accountant general, Military Department, and approved by the accountant general to the Government of India. The accountant general should open an account with the Bank of Bengal.

320. All claims now sent to the Presidency paymaster for payment should be sent direct to the accountant general, and there would be no objection to lodge them in his office two days before the end of the month. The claims should be sent to the accountant general direct,

321. Heads of departments should prepare, on printed forms, a claim for every person employed in such department during the month. Separate bills for the superior officers will not be required. on printed forms.

322. The claims will be referred to the pay examiner, who should, after satisfying himself of their correctness, write at the foot of the claims, " Allowed for the sum of rupees," and sign his name or initials. The examiner should also write, in red ink, in the right-hand corner of the claim at the top, the sub-head of the grant to which the amount is chargeable. The enfacement of claims should be discontinued: the claims that have been examined and allowed during the day should, at a certain fixed hour, be submitted to the deputy or to the assistant accountant general; and one or the other of these officers should initial the claim, and see that it is marked to the correct head of service. The claims should then be sent to the book-keeping branch for entry in the registers of claims. There should be two of these; one for claims payable by the bank and orders on the mofussil treasuries jointly, and the other for payments ordered to be made solely from mofussil treasuries (*see* Appendices, Nos. 12 and 13). In regard to Register No. 1, the following course should be observed: the claims having been entered in the register, they should be handed over to another clerk to prepare the list for transmission to the bank, and to write the letter of advice to the claimant. When the bills are entered, the total of the register would be made, and it should agree with the total of the list for the bank. The list should be then closed, and it should be examined, as also should the letters of advice that are attached to each bill, by the principal book-keeper or the assistant book-keeper, who would then take the original claims, the bank list, and the letters of advice, to the deputy or the assistant accountant general who signed the original bills. He should then compare the amounts with the letters of advice, and if it be correct, he should sign them. Detail of the proceedings in regard to the record in the Accountant General's Department.

323. The list for the bank should be signed by the before-mentioned officer and approved by the accountant general. In the absence of the latter officer, it should be signed by the assistant accountant general and approved by the deputy. List of orders on the bank.

324. The letters of advice should, as a rule, be sent to the claimants through the post, or by peons to be specially attached to the office for the purpose. The personal applications of officers in regard to their claims should be discouraged; they should understand that it is their duty to prefer them as promptly as possible, and that due time must elapse for their examination and preparation for payment. Letters of advice.

325. In regard to the claims to be entered in Register No. 2, the same course should be observed up to and including the entry in the register. No list would be required, but a letter of advice should be sent to the officer in charge of the treasury upon which the claim is made payable, and an order of payment should be forwarded to the claimant. Register of claims to be paid by mofussil treasuries.

326. The claims for pensions, alluded to in para. 87, should be paid by the paymaster of invalids, Calcutta, whose present duties, during the greater part of The establishment of Presidency paymasters would be

available for general duties.

of the year, are by no means onerous. Were this proposition carried out, the services of the Presidency paymaster, his assistant, and that of the 47 clerks would, so far as Bengal is concerned, be available for general duties, as three or four intelligent clerks would be all that would be required in regard to the duties connected with the registers of claims and letters of advice.

Number of disbursing officers that will eventually render separate accounts.

327. It appears to us that the accounts that would eventually be rendered on account of military expenditure would be as under :—

Paymasters of British regiments	35
Paymasters of cavalry regiments	7
Officers commanding batteries of artillery	54
Officers commanding native regiments:—	
Infantry	72
Cavalry	33
Commissariat officers	28
Stud officers	8
Pension paymasters	3
Officers in charge of manufacturing establishments, say	5
Paymaster of invalids	1
Paymaster of Chinsurah depôt	1
	247

Regiments of cavalry and infantry and batteries of artillery to render pay-lists direct to accountant general;

328. As before observed, whatever changes are approved should be introduced gradually, and it would perhaps be sufficient, during the present year, to authorise all paymasters of regiments, and officers commanding batteries of artillery, to obtain their advances direct from the treasury, and to render their pay-lists direct to the accountant general in Bengal, and to the controllers at Madras and Bombay.

to be extended to native troops, and eventually circle paymaster may be discontinued.

329. When the new system is in thorough working order, both as regards the Treasury and the Accountant General's office, it may be extended to officers commanding native regiments, and eventually the intervention of circle paymasters may, as proposed, be entirely discontinued.

Payments by treasury officers.

330. The payments to be made by the treasury officers would be included in the monthly claim to be made through the deputy auditor and accountant general of the several Presidencies or Provinces.

New form of pay-list submitted;

331. The pay-lists for regimental services should be examined, so far as the disbursements are concerned, in the same manner as at present. With the view of facilitating the examination, we have prepared a new form of pay-list for infantry (Appendix No. 9), and, if it be approved, it will serve as a model for the artillery and cavalry. We have arranged the account so that the paymaster, entering in their proper place the amount of his disbursements, "compiles" or classifies his own account, and the intervention of a separate "compilation" establishment will be no longer necessary.

how to be examined.

332. The examiner will check all items on the debit side of the account, excepting the drafts drawn on the treasuries; these will be examined by the principal book-keeper; the examiner will therefore, so soon as he has finished his audit, transfer the pay-lists to the book-keeping branch, where the expenditure will be recorded against the grants, the treasury drafts checked, and other necessary action taken.

The examiner should keep no books of record.

333. It should be distinctly ordered that the examiner should not keep any books beyond those that are absolutely necessary to facilitate the examination of the accounts; all books of record will be kept by the principal book-keeper, to whom reference must be made in regard to any information that may be required with respect to the amount of the debit of personal accounts, or the sum that may have been recorded under any item of the several grants.

New form of disbursement list for circle paymasters;

334. So long as circle paymasters are continued, they should send their lists of disbursements, addressed to the accountant general, on the form proposed in Appendix No. 10; these lists, and the vouchers, should be at once handed over to the examiners, who would, after each voucher has been duly examined, enter the sub-head of the Budget grant in the column left for that purpose.

The

The chief examiner of each circle would compile from the weekly lists the monthly totals under Budget heads, and, at the end of the month, the account current should be also examined by him, so far as miscellaneous receipts are concerned. The account current should then be sent to the book-keeper, with the statement of classified expenditure, and he would check the cash obtained from the several treasuries, and pass the miscellaneous receipts, expenditure, and other transactions, through the abstract books of accounts. Account current; how to be dealt with.

335. The examination of the accounts of commissariat officers should be conducted, under the directions of the accountant general, by the examiner of commissariat accounts, who should be responsible for the correctness, not only of the disbursements but for the receipts also. Lists of disbursements should be forwarded on a form similar to that given in Appendix No. 11, and the compilation under the items of the Budget Estimate should be entrusted to the examiner of the account. The commissariat examiner should examine and enter, on the same statement as that upon which the items chargeable to the grant for commissariat are included, all vouchers for expenditure on account of medical, ordnance, barrack, or any other service that may appear, under proper sanction, in the disbursement lists of commissariat officers. In regard to claims for ordnance or other stores purchased for stock, the certificate of the examiner of store accounts must be obtained to each voucher in confirmation of the stores having been duly accounted for by the receiving officer. Commissariat accounts; all vouchers to be compiled into one statement: claims for stores purchased should be referred to the examiner of store accounts.

336. It will be unnecessary for the commissariat examiner to furnish the examiner of store accounts with periodical statements in regard to the expenditure under the sub-heads of the grants for ordnance or barrack services. If information of this description be required for the purpose of enabling the examiner of store accounts to complete his statistical records, in regard to either of these departments, it should be obtained at the end of the year from the book-keeper, if he can furnish it; and if it be absolutely required, it must be obtained direct from the accounts of the disbursing officers. He should be furnished with the amount expended by the book-keeper if necessary.

337. The examiner of commissariat accounts will continue to examine the accounts of the stud officers, which must be complied under the sub-heads of the Budget grant for stud services. Commissariat examiner to examine stud accounts.

338. The examiner of commissariat accounts should not keep any books or statements in regard to the record of the expenditure under heads of service: his functions should be limited to the examination and compilation of the vouchers; the responsibility of recording the results of these transactions will devolve upon the principal book-keeper, from whom alone all information in regard to the amount expended under any grant or item thereof should be ascertained; hence the necessity of a prompt audit and a speedy record of the transactions of disbursing officers. The examination of the commissariat store accounts are, as previously observed, so mixed up with the cash transactions of the disbursing officers, that to separate them would cause additional work; we propose, therefore, not to disturb the present system, and we consider that the examiner of commissariat accounts should be held responsible for the audit of both cash and store accounts of the commissariat officers. The commissariat examiner should examine cash and store accounts; he should not keep any record of the expenditure.

339. The detail examination of store accounts should be conducted as at present; an annual statement of the quantities of the several articles remaining in store at the end of each year should be shown in a general statement, and the total value ascertained; it would be unnecessary to show the value of the stock remaining at each station. Annual statement of stock should be prepared.

340. Pension accounts might be examined as at present; there is, however, no necessity for paymasters of pensioners to send separate returns for each description of pension paid; they should be classed as now, but a general list showing the total payments for each class would be sufficient, and one certificate for the whole payments each month is all that is required. The lists of payments and all returns should be on foolscap paper. Pension accounts.

341. The register of pensioners, now kept by the compiler on behalf of the controller, should in future be intrusted to the examiner of pay and pensions, who should be held responsible for keeping it posted to date, not only as regards the entry of new pensioners, but also with reference to casualties. The register of pensioners should be kept by pay examiner.

Paymasters should be enjoined to render the casualty returns with promptness and regularity.

An important element of military accounts

342. Before we proceed to the explanation we have to submit in regard to the record of the expenditure, and the books that should be kept, we would direct attention to what we consider one of the most important elements in the military accounts.

is the mode of adjusting the cash advances;

343. The funds necessary for carrying on the military service throughout the country are, for the most part, furnished from civil treasuries; the manner in which disbursing officers draw upon these treasuries has already been described in para. 31. There can be no doubt that unless the accounts between the Civil and Military Departments, in regard to these transactions, are promptly and regularly adjusted, inextricable confusion will take place, the whole system of accounts will be compromised, and frauds to a large extent might remain undetected. We have already pointed out in para. 213 how this important duty has been neglected.

this has been neglected;

the arrear should be brought up.

344. We would suggest that no time should be lost in making a complete adjustment between the books of the two departments, and that the earnest attention of the military accountants in the three Presidencies be directed to this important duty.

and a new system inaugurated.

345. From the commencement of the ensuing year we would suggest the following course, by which we feel assured that the difficulties now experienced would be obviated, and an early adjustment would be effected between the two departments.

346. I.—No draft or order should be given for any sum under 100 rupees, if the claim can be paid in cash.

347. II.—No disbursing officer should, unless there be special reasons to the contrary, have the power to draw any cheque, draft, or order, on any treasury out of the Presidency or Province in which he is stationed.

348. III.—In those cases where it is necessary to remit money to stations in other Presidencies or Provinces, the amount should be paid to the local treasury, and an order should be obtained on the treasury at which the remittance is to be made, or the original claim should be sent to one of the military disbursing officers, paid by him, and included in his account under the item of the Budget grant, to which the amount might be chargeable.

349. IV.—Officers wishing to remit any portion of their pay to other stations should be restricted to one order per month, and no remittance order should be issued for less than 50 rupees.

This system would reduce the number of orders.

350. These rules, if sanctioned, would considerably reduce the number of orders now drawn by disbursing officers; eventually we do not see any reason why remitance drafts should not be obtained solely from the treasury officers, and the intervention of the disbursing officer of the Military Department discontinued.

Suggestions for a prompt settlement with the Civil Department.

351. The following arrangements are submitted with the view of obtaining a prompt settlement of the amount drawn by disbursing officers on the civil treasuries:—

352. I.—The deputy auditor and accountant general of each Presidency or Province should, so soon as the monthly accounts of the several treasury officers shall have been received, transmit to the Military Account Department, Bengal, Madras, or Bombay, as the case may be, an abstract list (*see* Appendix, No. 22) of all advances for military services in the previous month; this list should be supported by copies of the original details furnished by the officer in charge of each treasury, and by the original drafts or orders.

353. II.—The disbursing officer should debit himself in his monthly account current, or pay-list, with the amount that he has drawn upon the several civil treasuries, and he should transmit a list of all the drafts or orders drawn by him on the form given in Appendix, No. 20.

354. The

354. The course to be adopted, in order to record these transactions in the books of the Accountant General, may be as follows :— Process of recording these transactions in the military books.

355. I.—The disbursing officer will be debited, in the principal books, with the amount stated by him as having been drawn during the month. The aggregate amount drawn by disbursing officers will be passed to their debit, and to the credit of an account to be opened in the principal ledger, to be entitled "Advances from Civil Treasuries."

356. II.—The monthly lists, forwarded by the Deputy Auditor and Accountant Generals of the several Presidencies or Provinces will be examined by the Accountant General, Military Department, so far as Bengal is concerned, with the original orders, drafts, &c., forwarded in support of the charge. To facilitate this operation, a register, as per form Appendix, No. 21, should be kept, showing the amount that has been drawn from each civil treasury.

357. III.—The differences between the amount drawn by disbursing officers and that paid by the civil treasuries should be explained in detail monthly; a copy of this explanation, which should show all drafts or outstanding orders, should be rendered to the deputy auditor and accountant general of each Presidency or Province (*see* Appendix, No. 23).

358. IV.—In concluding this subject we would suggest that there should be established, under the immediate direction and control of the principal bookkeeper, a section of the accountant general's office specially charged with the duty of regulating and adjusting the entire transactions relating to cash advances from the several treasuries.

359. We may now proceed to consider the next branch of our subject, viz.:

IV.—Record of Expenditure.

360. The books which appear to us to be necessary for the purpose of recording the cash transactions of the Military Department are the following :— Books necessary for recording military receipts and expenditure.

I.—Register of Claims, No. 1.—Orders of payment issued at the Presidency.

II.—Register of Claims, No. 2.—Orders of payment on Mofussil Treasuries.

III.—Abstract Book of Regimental Paymasters' Receipts and Disbursements.

IV.—Abstract Book of Commissariat Officers' Receipts and Disbursements.

V.—Abstract Book of Receipts and Disbursements of Miscellaneous Accountants.

VI.—General Abstract Book.

VII.—Journal.

VIII.—Principal Ledger.—Part I, Part II.

IX.—Receivable Order Book.

X.—Register for the record and adjustment of the Advances from Civil Treasuries.

I.—Register of Claims, No. 1.—Orders of Payment issued at the Presidency.

(Appendix, No. 12.)

361. This book will be required for the registry of orders issued in liquidation of claims passed in the Presidency. The orders will be divided into two classes; first, advances to disbursing officers; second, final payments: the former may be posted in detail to the debit of the parties in whose favour they may be granted, and the latter should be posted in the abstract book to the debit of the services for which issued. The gross amounts will be charged to the personal account of disbursing officers, or to the subhead of one or other of the Budget grants; the net amount will be passed to the credit of accounts to be entitled "Orders Payable" and "Advances from Civil Treasuries," the former being analogous to "Bills Payable" in a merchant's books; the difference between the gross and net amounts is the deductions, as shown in detail in the register "Orders payable" on Bank of Bengal, how to be treated.

register of claims; the total amount of the deductions, under the several heads of account, will be passed to the credit of those accounts at the end of each month.

II.—Register of Claims, No. 2.—Orders on Mofussil Treasuries.

(Appendix, No. 13.)

Orders on mofussil treasuries.

362. In this book would be recorded all claims, after they have been examined, which are made wholly payable by orders signed by the Accountant General on mofussil treasuries. This is also a branch of the business hitherto conducted by the Presidency paymaster: the course to be followed in regard to the final record is similar to that suggested in regard to register, No. 1. The account to be opened in the ledger, instead of being styled "Orders Payable," should be denominated "Advances from Civil Treasuries." It must be distinctly understood that these orders have no connexion with the drafts or orders drawn by disbursing officers on the treasuries in question; the treasury officers need, however, send to the Civil Department but one general list for all drafts or orders discharged during the month; the due appropriation of these orders to the debit of the accounts concerned would be conducted in the office of the Accountant General.

III.—Abstract Book of Regimental Paymasters' Receipts and Disbursements.

(Appendices, Nos. 14 & 15.)

Regimental accounts to be entered in abstract books,

363. This book may be divided into two parts; first, receipts; second, disbursements.

The total amount of receipts should be posted direct in the ledger to the debit of the paymaster, and the aggregate monthly total to the credit of the accounts concerned; the total amount of the disbursements should be credited to the paymaster, the aggregate total under each head of service being posted in the general abstract book to the debit of the several detailed heads.

IV. and V.—Commissariat and Miscellaneous Abstract Books.

364. These should be treated as proposed in regard to No. III., and the forms of Appendices 14 and 15, modified as required, will be applicable thereto.

VI.—General Abstract Book.

(Appendix, No. 16.)

and all expenditure brought together in a general abstract book,

365. In this book accounts may be opened for every class of payments detailed in the Budget Estimates; the first entries should be those from the claim registers, Nos. 1 and 2; a total of these should be made, and then should follow the monthly totals, under each head of service, of the abstract books beforementioned; the aggregate of these amounts may be totalled, and the amount entered in the outer column, and the monthly results should be passed to the journal and ledger; to facilitate this operation, a monthly abstract sheet, (Appendix, No. 17), containing every head of expenditure, should be filled in, and the journal posted therefrom; the ledger being posted direct from the general abstract book; the journal and ledger should then be checked with each other.

and the results posted to the journal and ledger.

VII.—Journal.

(Appendix, No. 18.)

The journal would have separate columns, showing personal and service accounts.

366. As it is proposed to divide the principal ledger into two volumes, it will be convenient to have separate columns in the journal, corresponding with the divisions of the ledger, so as to facilitate the balancing of the books. To simplify the posting, the debit and credit sums should appear on opposite sides of the page; the debit and credit totals should be carried forward throughout the year, so as to check the amount of the postings in the ledger.

Specimen entries are given in the Appendix.

367. As the journal will contain a connected record of the accounts of the Military Department, an outline of the leading periodical entries which it may be requisite to make is given in the Appendix, No. 18. Two objects are in view in

in giving these details: the first is to give a more comprehensive sketch of the construction of the proposed accounts than a description of the books to be kept can convey; the second is that such details shall serve as a practical illustration of the use of the journal.

VIII.—Principal Ledger.

368. To avoid the inconvenience of too bulky a volume, and with due regard to the division of labour, the principal ledger may be divided into two parts; but the folios should be consecutively numbered throughout, to facilitate the references to and from the journal.

Ledger is divided into two parts.

369. Part I.—The first section of the principal ledger will contain the whole of the personal accounts of the Military Department; a separate account will be opened for every person to whom money may be advanced, or by whom any amount is due; accounts will be opened for recording the grants; the advances from, and payments into, civil treasuries on account of military services, money transactions with or on account of other departments of the Government, regimental, circle, and pension paymasters, commissariat officers, and, in fact, for every person who may be a debtor or creditor in account with the Military Department. In the event of the personal accounts being too numerous for entry in the principal ledger, they may be posted into sub or auxiliary ledgers, and the accounts may be arranged in classes, *e. g.*, Deposits, &c.

Part I. Personal accounts.

370. Part II.—The second section will be exclusively confined to the several heads of expenditure under the numerous subdivisions of the military grants. The several heads should be opened according to the classification of the Budget Estimate; we have, however, in Appendix No. 8, drawn up a list of such detailed headings as should, in our opinion, be kept distinct.

Part II. Service or grant accounts.

371. The postings to the ledger would be made in the manner suggested in paragraph 365; some entries, such, for example, as cross-entries in adjustment of accounts or correction of errors, must be posted to the ledger direct from the journal.

Cross entries should be posted direct from the journal.

372. The ledger account should be totalled monthly, and the amount extracted on a trial balance sheet; this will exhibit the true, audited, and final expenditure posted against the Budget grants; all other statements which attempt to show the expenditure must be fallacious, and should at once be discontinued.

Ledger should be totalled monthly,

373. A copy of this monthly statement and such other statements as may be required should be sent to the Financial Department. In regard to Madras and Bombay, the controllers would send a copy of such monthly statement, and of such other returns as may be required, to the Accountant General, Military Department, and all that would then be required, with the view of compiling a general monthly statement of receipts and expenditure for military services for all India, would be to add three columns to the Bengal statement; the receipts and expenditure of each Presidency would then be shown, and the aggregate charge, under each head of service, for the whole empire, would be distinctly represented.

and a monthly statement should be sent to the Financial Department:

the accountant general should complete a general statement for all India.

IX.—Receivable Order Book.

(Appendix, No. 19.)

374. Parties who have to make payments to the credit of the Military Department, at the Presidency, should be furnished, by the Military Account Department, with an order authorising the bank to receive the amount thereof.

These should be recorded in the receivable order book, a form for which is shown in Appendix, No. 19; the amount of these receipts would be passed by the bank to the credit of the general revenue account of the Civil Department, but it would be necessary for the bank to furnish the Military Account Department with a list, weekly, of the sums received. The several amounts would be marked off in the receivable order book as paid, and the necessary journal entry would be founded on the aggregate of the four weekly lists rendered by the bank.

X.—Register for the Record and Adjustment of Advances from Civil Treasuries.

(Appendix, No. 21.)

375. In this book will be recorded the particulars of every draft drawn or order issued by the several disbursing officers upon the civil treasuries; the orders will be carefully compared with the returns furnished by the Deputy Auditor and Accountant General, and the transactions should be adjusted monthly on the adjustment sheet prepared for that purpose.

V.—*Annual Account of Receipt and Expenditure.*

(Appendix, No. 24.)

The principal books should be kept open for five months after the close of the year.

376. It is, we think, desirable that the principal books appertaining to each year's accounts, should be kept open for a period not exceeding five months after the close of the year, *i. e.*, the books for any one year ending 30th April, shall not be finally closed later than the 30th September. It is not intended that any payment, although appertaining to the transactions of a former year, shall be recorded as such, if they be made on or after the 1st May. The period of five months will be limited to recording the receipts and payments prior to the 30th April; this period will be sufficient to allow the accounts of disbursing officers belonging to the old year to be reviewed, examined, and recorded in the books belonging thereto. By the 30th September the books for the previous year should be finally closed, adjustments made, the balance struck, and the result reported to Government; all transactions after that date belonging to the past year must be recorded as receipts or expenditure of the current year.

The date of payment should regulate the year to which the claims should be charged.

377. No item of receipt or payment included in an account current in the new year can be carried to the debit or credit of the prior year's accounts. The date of payment or of the receipt must regulate the account to which the transactions are posted.

Annnal balance sheet.

378. So soon as the accounts are closed, and the balance struck, a general balance sheet should be prepared, showing the net expenditure under each sub-head of the Budget grants.

VI.—*Store Accounts.*

System of store accounts in India

379. The system of store accounts in India is much in advance of that pursued in England; here all stores are reduced to their money value, and the stock on hand, at the end of each year, in the arsenals, magazines, and forts, in the charge of regiments, or of barrack masters, is shown not only in quantities, but in value also. In England and in the Colonies, officers in charge of stores are debited with them in quantities only; recently, officers in charge of the Manufacturing Departments have rendered their store accounts both in quantities and money value, but the system has not been extended to officers who are entrusted with the valuable military stores in the arsenals, magazines, or other military establishments; and at present the value of the military equipments in the British service could not be ascertained without vast labour.

and in England.

The India system too elaborate.

380. The Indian system has perhaps gone a little too far, and has attempted too much. The minuteness with which these accounts are endeavoured to be kept is shown at paragraph 150. This fine working is not only expensive, but it is fallacious; it involves the Store Department in a mass of minute details in compiling the accounts, and imposes an unnecessary amount of work in their audit.

Advantages of recording store accounts with a money value.

381. By affixing a money value to the stores, the results of the year's transactions as regards purchases, receipts from other sources, and issues, can be readily ascertained, and a still greater advantage accrues, as it can be seen at a glance whether the general stock has been increased or diminished during the year: this being so, we think it very desirable that the store accounts should continue to be kept with their money value; we would, however, offer one or two suggestions, by which we are satisfied that the accounts will be much simplified without in any way destroying their efficiency.

The rate is fixed for seven years.

382. It may be here stated that the money value affixed to the various stores is not the current rate at which those stores could be obtained, but a fixed rate, as shown by the approved rate book, and which is revised every seven years.

383. The

383. The store accounts now kept in this country fall within one or the other of the following groups, viz. :— Class of store accounts.

I.—Stores in charge of Officers having the control of Arsenals, Magazines, or Forts.

II.—Stores in charge of Officers commanding Regiments of Cavalry or Infantry, or Batteries of Artillery.

III.—Stores in charge of Barrack Masters.

IV.—Stores in charge of Civil Officers.

V.—Stores in charge of Superintendents of the Manufacturing Establishments.

I.—Stores in charge of Officers having the control of Arsenals, &c.:

384. The military stores in the arsenals and forts may be divided into two classes: first, raw materials for the repair of military equipments; and, second, stores, equipments, and munitions in reserve, or to replace the ordinary consumption. Store accounts kept in arsenals, &c.,

385. In regard to the first, we find, as already alluded to in para. 150, that elaborate and complicated statements are furnished by officers in charge of arsenals, showing the expenditure both as regards materials and labour on every repair, however minute. These returns might be abolished, and it would be quite sufficient if the officer in charge of the arsenals, &c. were to prepare a monthly statement, showing the quantity of each description of store that had been consumed, leaving to that officer the responsibility of their due appropriation. are elaborate. Certain returns might be abolished.

386. The monthly return of stores expended would be posted in the store ledger to the credit of the officer in charge. Monthly return of stores expended to be posted in the ledger.

387. In regard to the detail accounts in the arsenals, there would be no necessity to keep a separate record of the materials consumed or labour expended on the repairs, the estimated or probable cost of each of which is 50 rupees or under. The expenditure on these services might be grouped together under a general head of "petty repairs." The officer in charge of the arsenal would be held responsible that the materials issued for these repairs were not in excess of that absolutely required, and that the workmen employed upon the various jobs were requisite for their due performance. "Petty repairs."

388. With reference to the second point, we have alluded, in para. 149, to the great bulk of the store ledgers at the principal arsenals. We think it desirable that the labour in preparing these books and the returns connected therewith should be reduced; and with this view we would suggest that, as regards the three arsenals, viz., Fort William, Ferozepore, and Allahabad, and some of the principal magazines on or near the line of railway, that the store accounts should be examined locally, by officers delegated for that purpose from the office of the store examiner. We have suggested this course in regard to the store accounts of the Kidderpore dockyard; and we feel satisfied that if the system of local audit be extended, a vast saving of work will result. Local audit.

389. Were this system adopted, it would be no longer necessary for officers in charge of these establishments to send to the examiner of Ordnance accounts copies of their day-books or of the annual ledger; all that would be required would be a monthly list of the vouchers of the receipts into and issues from the arsenal or magazine. Saving of labour were local audit established.

390. We would suggest that the store ledgers of the arsenals and principal magazines be balanced every three months, and that at the termination of the first three-monthly period, the examining officer should at once proceed to the first station on the line of railway, say Allahabad, and examine the accounts of that arsenal; he should take all the vouchers appertaining to the receipts and issues of stores with him, and he should see that the quantities described have been duly posted in the ledger; that the correct balances have been brought forward from the previous ledger, and that the balance of the accounts for the three months examined by him is correctly brought down; and he should be authorised to compare a limited number of the articles actually in store with the book record. Ledger should be balanced every three months. Duties of local examiners.

Probably saving of expense.

391. The accounts of one station having been examined, and the balance brought down, the examining officer should proceed to the next station, and so on. It may become a question whether two officers would not be required for this duty; but of this there is no doubt, that whether one or two be necessary, the expense of their journey will be far more than covered by the saving that will be effected not only in the reduction of clerical labour at the arsenals, magazines, &c., and in the office of the examiner, but also in ensuring an independent control over the actual consumption of stores.

The original ledger should be sent to examiner.

392. After the examination of the last three-monthly period of the year the balance should be at once carried to the ledger for the new year, which should be prepared in anticipation; the local auditor should check the balances brought forward therein, and should at once forward to the examiner the ledger appertaining to the year just closed.

Duty of the examiner, head quarters.

393. The duty of the examiner would be confined to affixing a money value to the vouchers alluded to in para. 389, and passing the amount to the debit or credit of the parties concerned; the value of the receipts and issues should be arranged under classes, so that, at the end of the year, there would be no difficulty in ascertaining the total value of the issues to, or receipts from, batteries of artillery, regiments of cavalry, infantry, &c., &c.: the net amount of these statements added to the value of the stores in possession of these corps at the commencement of the year would give the value of stores in their possession at the end of the year; a re-valuation, founded on actual quantities upon revised rates should be made every seven years.

Stores should be inspected, and value brought on charge at new rates.

394. The same course might be followed in regard to the valuation of stores in arsenals, magazines, &c., and the present period is highly favourable for a general inspection of all stores in charge of these establishments; a new rate book is being prepared by the ordnance examiner, and a new nomenclature is being arranged by the Inspector General of Ordnance; these should both be introduced from the commencement of the ensuing financial year, before which time it would be very desirable to eliminate from the stores all unserviceable, obsolete, or redundant articles, so that the stores in stock at the commencement of the year might represent those actually fit and ready for service; the quantity of each article in store at the several arsenals, magazines, &c., should be brought together in a general statement, and the value at the new rates should be ascertained. This should be the foundation of the accounts, so far as regards their money value, for the ensuing seven years, *i. e.*, until the period arrives for revising the rate book; the value of stores at the end of each year would be ascertained by adding to the value of the stock, at the commencement of the year, the value of all purchases, stores received from England, returned from regiments, civil officers, &c., and deducting the value of sales, condemnations, and issues to regiments, &c. It would be unnecessary to put a money value on the transactions between one arsenal or magazine or fort and another.

Mode of dealing with the accounts at head quarters.

II.—Stores in charge of Batteries of Artillery and Regiments of Cavalry and Infantry.

Regimental stores.

395. Half-yearly returns are now forwarded by each officer in charge of a battery of artillery, or of a regiment of cavalry or infantry, European or native; these returns show the following particulars, viz.:—

Names of Articles.	Equipment.	Balance in Store, 1st May 1864.				During the Half-Year.		Balance in Store, 1st October 1864.			
		Serviceable.	Repairable.	Unserviceable.	Total.	Received.	Issued.	Serviceable.	Repairable.	Unserviceable.	Total.

396. These

396. These statements are supported by the original vouchers, in regard to the receipts and issues, and by fair copies, *in extenso*, of these documents. Originals and copies of vouchers are forwarded.

397. We consider that it would be very desirable to complete the equipment of all batteries and regiments to their normal standard, in which case it would be quite sufficient if the officers commanding furnished an annual instead of a half-yearly statement; the only documents that would be then required in support thereof would be the original vouchers, the fair copies being dispensed with. Annual returns are sufficient.

III.—Stores in charge of Barrack Masters.

398. The course pursued in regard to the accounts of barrack masters has already been described at para. 167; we there suggested that the copies of the cash vouchers should be discontinued; we consider also that the copy of the day-book is unnecessary, and might be dispensed with; the examiner can take the necessary action on the original vouchers; these should be forwarded to him monthly. Barrack store. Copy of day-book is not required.

399. By discontinuing the copy of the day-book, the native clerks that have recently been appointed at the principal barracks stations might be discontinued: the clerical work with regard to the accounts is very trifling, and we are of opinion that it should be performed by the barrack sergeants, by which means they would be acquiring a knowledge of the office routine, and would be qualifying themselves for promotion. Native clerks might be discharged, and the work done by barrack sergeants.

400. The ordnance examiner should abstract and record these accounts in the manner described in para. 168: the statements now furnished by him to the military accountant should be discontinued. Not necessary to send statements to the military accountant.

IV.—Stores in charge of Civil Officers.

401. The accounts rendered by these officers are fully described in para. 154, we would suggest that, as the stores are issued for general use, there is no practical utility in retaining the full and original value on the books; it is sufficient to ascertain that the stores are actually in the charge of the officers to whom they have been delivered; this object would be accomplished, and a considerable saving of labour effected, were the officers in question to forward an annual instead of a half-yearly statement: the aggregate value of the several articles of store issued during the year would be shown by the store examiner; but he would not make any valuation of the stores in charge of the several officers. An annual statement of stores in charge of civil officers is sufficient.

V.—Stores in charge of the Superintendents of the Manufacturing Establishments.

402. All stores issued to these departments must be carefully valued at the approved rates, for upon this depends the cost of the articles manufactured: in like manner the stock at the end of the year should be valued, and the value of any semi-manufactured articles should be carefully ascertained. We have already alluded to these accounts at para. 158 and in our report on the Cossipore gun foundry; we would only further suggest, that the detail examination of these accounts should be conducted by the local auditor already referred to, and that the annual result of the year's working, based upon the result of the local audit, should alone be forwarded to the examiner; the investigation of these accounts form the most important part of the duty of that officer, and although we have had occasion to take exception to the principle upon which the results of the year's working at Cossipore are shown, we should be doing an injustice to Mr. Leonard, the ordnance examiner, and his assistant, Mr. Vaughan, were we not to record our satisfaction of the painstaking manner in which these complicated accounts are examined, analysed, and reported on. We should, therefore, have no hesitation in entrusting to these officers the details necessary to carry out our suggestions in regard to the military store accounts. Store accounts at manufacturing departments to be locally examined. Store accounts are carefully examined by Mr. Leonard, and his principal assistant, Mr. Vaughan, who could carry out reforms suggested.

403. Before concluding this subject, we would suggest that the books, returns, and statements relating to store transactions hitherto furnished to the military All statements hitherto furnished

by the store examiner to military accountant to be discontinued.

military accountant by the ordnance examiner should be entirely discontinued, and that the military books should be limited to recording the cash transactions of the department, all records in regard to store services being kept by the store examiner, from whom information relating to these could at all times be obtained through the accountant general, under whose immediate orders this officer would serve.

General.

General registry for the Accountant General's Department;

404. We have in para. 294 adverted to the advisability of the entire correspondence appertaining to the Military Account Department being addressed to the accountant general; we would urge an arrangement of this kind, and, in doing so, we would instance the fact that the entire correspondence of the separate departments of the War Office at home is addressed to one officer; it is registered, sorted, and distributed to the branches of the office concerned, and unity and promptness of action is ensured. If our proposition in regard to an amalgamated office under the immediate direction and control of the accountant General be approved, we consider that all correspondence connected with his duties should be addressed to him direct; if this were done, he would have an unlimited control over the entire system of account; with the view of facilitating this arrangement, we have given, in the Appendix No. 25, a memorandum drawn up by the gentlemen in charge of the Registry Department of the War Office, so that should it be considered desirable at any time to introduce a general system of registration, full explanations could be readily referred to: we will only observe, that the system has been in operation for several years and answers in every respect.

the system pursued at the War Office.

The arrear in the Military Accountant's office should be brought up.

405. We have adverted to the arrear that now exists in the Military Accountant's office; we suggest, should the recommendations contained in this report be approved—the military accountant being relieved of all current work, and relieved also of the duty of incorporating into the military books all store transactions; that he be allowed a period of 12 months, from the commencement of the ensuing financial year, to get up the arrear; and that, on the 1st May 1866, the balances due on the various personal accounts should be adjusted to 30th April 1865, and then transferred into the books for the year 1865-66.

Savings bank and other duties to be transferred from the military accountant.

406. From 1st May 1865 the military accountant should be relieved from all work connected with regimental savings' banks, remittances, and casualty returns, and from the preparation of all statements and returns hitherto compiled by him.

The store transactions might be omitted from the military books, 1862-63.

407. As the general military books have not been commenced for the year 1862-63, and as it is very desirable that they should be relieved, as much as possible, of all unnecessary detail, we would suggest that the store transactions should be omitted: we have, in the set of books we have proposed, limited them to cash transactions only, and we cannot conceive that any inconvenience will result if the omission of the store items commences with the years 1862-63.

A monthly report should be furnished of progress of adjusting arrear accounts.

408. We would again direct particular attention to the importance of adjusting every separate account now standing unclosed in the "Deposit" and "Advances Repayable" Ledgers: the military accountant should be directed to report the total number of these unsettled accounts, and a monthly return should then be forwarded by that officer to the accountant general, showing the number of these accounts which have been adjusted month by month.

The adjustment between the civil and military books should be made without delay.

409. The adjustment of the advances from civil treasuries on account of military services, is another subject that should demand the immediate and earnest attention of the military accountants of the three Presidencies: no time should be lost in obtaining a complete explanation in regard to every item of difference that may exist between the military and civil books, and the accounts should be adjusted to the latest date.

We have not had an opportunity of seeing the working of military account system of Madras or Bombay:

410. We regret that we have not had an opportunity of personally inspecting the books and accounts kept in the Military Account offices of Madras and Bombay: it would appear that, so far as relates to the adjustment of the advances from civil treasuries, there is every reason to apprehend that the books are

are in an unsatisfactory state ; this, however, cannot be fully ascertained unless they are subjected to a searching investigation by an officer totally unconnected with the department; this, so soon as an opportunity should arise, we would suggest, should be done.

411. We are given to understand that the same system of account is carried on in the Presidencies of Madras and Bombay as that pursued in regard to the Bengal Army, but upon this point we cannot obtain any very positive information : we, however, observe that, so far as the office of the Ordnance Examiner at Madras is concerned, the entire establishment of clerks, in number about 50, are not provided for in the department of account, but form a portion of, and are provided for in, the establishment of the Inspector General of Ordnance and Magazines; this arrangement is objectionable, and should be discontinued ; we would propose that the course suggested in regard to the examiner of store accounts in Calcutta should be followed in Madras and Bombay.

System appears to be different at Madras ;

it should be made uniform in the three Presidencies.

412. The military accounts would be much simplified if the present system of dividing the pay of regimental officers, under the heads of " Pay and Indian Allowances," " Extra Batta," " Tentage," &c., could be obviated; the exceptional rates of pay in the Presidencies also causes considerable embarrassment without any compensating advantage ; it is desirable that the pay regulations should be simplified, and a nominal rate of regimental pay and allowances should, if possible, be established for all India.

Rates of regimental pay should be equalized.

413. We are given to understand that a New Pay Code has been, for the last five years, under compilation; it is very desirable that it should be finished without further delay ; with this view we would suggest that the officer, who has been specially appointed for this duty, be relieved from all extraneous work such as attending Committees of Enquiry, &c. The delay in completing the Code has, we are informed to a great extent, been caused by the limited period that the officer in question has been able to devote to his primary duties.

Pay code should be completed without delay.

414. The labour of recording the accounts would be much diminished if pie were omitted from the books; disbursing officers should be directed to adjust their payments, so that the total amount of each voucher may be limited to rupees and annas, it being understood that in those cases when the voucher amounts to less than six pie they should be omitted, and when the voucher amounts to six pie or upwards, an anna may be charged.

Pie should be omitted from the account.

415. A considerable saving of clerical work would be effected if the Budget Estimate for military services were made up in £. instead of rupees, the pound sterling being in all cases calculated as 10 rupees.

Budget Estimates should be in £.

416. We have limited our observations to the course to be pursued in regard to the accounts of the army serving in Bengal, but in doing so, we would here wish to state that whatever suggestions we have made in regard to these accounts should be extended to Madras and Bombay also; one universal system should be established for the three Presidencies, so that if an officer of one Presidency is required for duty in one of the other Presidencies, he will be able to take up the work at once without incurring any delay in acquiring the technicalities or peculiarities of a system common only to the Presidency to which he is sent.

The suggestions in this report refer to Madras and Bombay, as well as to Bengal.

Conclusion.

417. We will now proceed to summarise the principal recommendations contained in this report; those of minor consideration will be found in the body of the report itself.

Budget Estimate.

1. The form should be entirely revised, and should be limited to showing the probable requirements for the ensuing year, compared with the Budget grant of the current year, and the forms of Estimate and the subsidiary Returns should emanate from the Accountant General's office. The " Revised," " Regular," and " Cash Requirement" Estimates should be discontinued.

2. Heads of Executive Departments should, under the limitations prescribed, be held responsible for the preparation of their estimates.

3. All military charges should be provided in the Military Budget Estimates, including those of the secretariat.

Disbursing Officers.

4. The duties now performed by Presidency Paymasters should be transferred to the office of the Accountant General in Bengal, and to that of the Controllers in Madras and Bombay.

5. Commissariat and other disbursing officers should pay, and include in their accounts, all expenditure appertaining to their respective establishments.

6. Paymasters of regiments and officers commanding batteries of artillery should be direct accountants, and should render their pay lists direct to the central account office in each Presidency.

7. This arrangement should eventually be extended to officers commanding regiments of native troops.

8. As vacancies occur the Paymasters of Circles should be abolished, and their duties distributed in the manner prescribed in the report.

9. New forms of regimental pay lists should be established on the model proposed in Appendix No. 9.

10. The sub-vouchers to accounts should be carefully revised; they should, as a rule, be printed on foolscap paper, and universally adopted throughout India.

11. Disbursing officers should render monthly statements of the drafts or orders drawn by them on the civil treasuries, and the deputy auditor and accountant generals of the several Presidencies or provinces should send corresponding statements to the Accountant General, Military Department in Bengal, and to the Controllers at Madras and Bombay respectively.

Central Account Offices.

12. The separate establishments of military account and audit should be consolidated into a Central Account Office in each of the three Presidencies; that in Bengal would be under the immediate directions of the Accountant General; and those in Madras and Bombay respectively would be under the Controllers, who would, however, be considered as the representatives of the Accountant General in those Presidencies.

13. The appointments of Accountant General and Controller in Bengal should be merged.

14. The Examiner of Commissariat Accounts should finally examine and classify the disbursements appertaining to medical, ordnance, and other services; he should also examine and record the transactions relating to the Commissariat Store Accounts.

15. The Commissariat and other examiners should be restricted from keeping any books or statements in regard to the progress of the expenditure; these should be kept by the—

16. Principal book-keeper, who should be a practical accountant; there should be a principal book-keeper appointed to each of the central offices of account.

17. The appointments of military accountant, examiner of medical accounts, and the compiler should be abolished.

18. The examiner of ordnance, barrack, and clothing accounts should, in future, be styled "Examiner of Store Accounts."

19. The several offices of accounts, now in various parts of Calcutta, should be brought together in a central office.

Cash

Cash Accounts.

20. The foundation of the accounts should be monthly statements of audited receipts and disbursements.

21. These statements or balance sheets should be prepared in each of the three Presidencies; copies of those prepared at Madras and Bombay would be forwarded to the Accountant General, Military Department, who would compile a General Statement for all India.

22. A copy of this General Statement should be furnished to the Financial Department, in lieu of all other returns and statements relating to the receipts and disbursements on account of military services.

23. The military books should record cash transactions only; those appertaining to the receipts and issues of stores should be recorded in a separate set of books to be kept by the Examiner of Store Accounts.

24. The greatest importance should be attached to a prompt and careful adjustment of the advances from civil treasuries on account of military services; a separate section of the book-keeper's branch of the office should be established with the view of making these adjustments.

25. An annual account of the receipts and disbursements for military services for all India will be prepared (Appendix, No. 24); and a copy of this account will be sent to the Financial Department.

Store Accounts.

26. The whole of the store accounts, excepting those of the Commissariat, should be examined, recorded, and adjusted by the "Examiner of Store Accounts;" this officer would, in Bengal, be under the immediate directions of the Accountant General, Military Department, and in Madras and Bombay respectively, he would be under the directions of the controller.

27. A system of local examination of store accounts should be established; many returns and statements now furnished should be discontinued, and the accounts simplified.

28. The rate book should be revised and corrected every seven years, and a valuation of stores in stock should be made at the termination of each seven-yearly period; the valuation should be at the revised rates, and should form the basis, as explained in the report, of the annual money value of stores in stock.

29. The clothing accounts of the agency would be simplified if the garments were made in sizes, and if the other suggestions on this subject were carried out.

General.

30. The proposed system of account, both cash and store, should be introduced from the commencement of the ensuing financial year, which should be altered to accord with the financial year in England, viz., 1st April.

31. The military accountants in each of the Presidencies should be allowed one year from the commencement of the ensuing financial year, to bring up the arrear of their books, and to adjust all outstanding accounts.

32. One system of account, both cash and store, should be adopted in each of the three Presidencies.

---

418. We may observe that several of the recommendations contained in this report had already been under the consideration of the controller, who had abstained from issuing directions thereon pending the result of this inquiry.

Some of the recommendations have been under the consideration of the controller.

The work well done in some of the offices.

419. We may also state that, although we have considered it our duty to advert to the unnecessary elaboration of the work performed in the examination and record of the military accounts, we should be doing injustice to several able and zealous officers were we to omit to state that the organization and arrangements of their offices were very complete; that the audit was close up to date; and that the work is exceedingly well done. This being so, we have every confidence that the recommendations contained in this report, if approved, will be zealously carried out by the experienced officers at the head of the several establishments now forming the Military Account Department.

Detail entered into with the view of introducing the system at Madras and Bombay.

420. In apologising for the prolixity of this report, we would explain that we have gone into so much detail, with the view of facilitating the introduction of the system that we propose, into the military account offices of Madras and Bombay.

421. In conclusion we would wish to thank the many officers with whom we have been associated in this inquiry, for the information they have furnished to us, and for their uniform courtesy on all occasions.

The efficiency of the department has been the primary object sought:

422. The primary object we have had in view in this report, has been to make such proposals as will tend to the efficient working of the Military Account Departments; we have not in any way loosened the checks over dishonesty or negligence, and we have every confidence that, if the recommendations be carried out in their integrity, the military books will afford information with correctness, facility, and promptness. We have no hesitation in urging the adoption of the various alterations proposed, as the efficiency of the department will be increased, and an ultimate saving will accrue in the three Presidencies of at least 6,00,000 rupees, or 60,000 *l.* per annum; in verification of this statement, we would refer to a memorandum (Appendix No. 26), showing the appointments that it is proposed eventually to discontinue, and those that we suggest should be made; after allowing a very full margin for increased pay to the clerks, and for contingencies, the balance in favour of Government amounts to the sum stated.

this can be obtained, and a large annual saving in the cost of establishments.

Calcutta, 30 August 1864. (signed) *M. H. Foster,*
H. W. S. Whiffin.

APPENDIX, No. 1.

(See Paras. 235 and 241 of Report.)

WAR OFFICE MEMORANDUM, dated 24th June 1862.

THE Accountant General is responsible to the Secretary of State for all the business connected with—

1st. Preparing the annual Estimates to be submitted to Parliament for Army and Militia Services.

2d. Examining and allowing claims previous to payment, and auditing the accounts of accountants.

3d. Issuing all warrants for the payment of money required for the above services.

4th. Keeping the accounts relating to the receipts and expenditure for Army and Militia Services.

5th. Preparing, pursuant to Acts IX. & X. Vict., cap. xcii., sec. 2, an account to be laid before Parliament of the above receipts and expenditure.

Preparation of the Estimates.

The annual Estimates to be laid before Parliament will be prepared, under the directions of the Assistant Under Secretary of State, by the Accountant General, who is empowered to call upon heads of branches, departments, or establishments, to furnish such documents and statements as he may require.

He will prepare the Estimate of the sum required for pay, allowances, and other charges according to the number of the effective force to be maintained during the year, calculated at the rates fixed by Royal warrants.

He will see that no new charge is inserted in the Estimates, unless it has been approved by competent authority.

He will see that the Estimates are prepared for presentation to Parliament, in accordance with those which have been transmitted to and approved by the Treasury.

He will see that no alteration in the classification of services in the Army Estimates is made without the sanction of the Treasury.

He will prepare such information as may be required by the Select Committee of the House of Commons for the preparation of the Estimates of the charge of the disembodied militia of Great Britain and Ireland.

Examining and Allowing Claims previous to payment, and Auditing the Accounts of Accountants.

He will exercise an effective general control over the expenditure for army and militia services, taking care that the duties of the local controllers of expenditure are carefully and properly discharged.

He is to take care that there be no delay in the examination of certificates for payments, and that if claims are accompanied by proper vouchers and in all other respects correct, warrants or orders for payments shall be forthwith prepared; but in the event of any error in the accounts, or overcharge, or whenever in his opinion any item ought to be disallowed he is to take such steps, in order to correct the inaccuracies, as he may consider necessary.

He will not sign any orders for payment for stores supplied, or for works or services performed, the amount of which will exceed the sum voted by Parliament for each item, unless sanctioned by the Secretary of State.

He will see that the accounts of his sub-accountants are duly and correctly rendered, and examined without any unnecessary delay; he will allow only such portion of the expenditure as may be found to be in accordance with the warrants, orders, and regulations of the service, and will call for such information with regard to any of the items as he may deem necessary. In case satisfactory explanations be not given, he will require re-payment when due, from his sub-accountant, of any sums which may have been erroneously issued, but will not make demands for refunds from other persons without the authority of the Assistant Under Secretary of State. In case of any new or extraordinary charge, he will submit the same for the directions of the Secretary of State.

He will further examine, check, and allow such store accounts as may be referred to him by the Secretary of State, and at present those rendered by all officers of the Commissariat and Purveyors' Departments, and by governors and warders, or other persons in charge of military prisons and garrison or barrack cells, taking care that all issues are made in accordance with the regulations of the service.

The Superintendent of the several manufacturing departments will render, as soon after the termination of the financial year as possible, balance sheets, and, where practicable, profit and loss accounts, showing the result of the year's working; the Accountant General will be held responsible that such documents are rendered in strict accordance with the forms prescribed, and in conformity with the principles laid down in the War Office circular to the heads of the manufacturing departments, No. dated ; he will see that all sums disbursed and allowed in the quarterly accounts current are duly accounted for in the balance sheets, as well as all stores purchased or received from other sources, and arrange that the accounts, both cash and store, be subjected to such detailed audit as he may deem necessary, either by delegating a gentleman from his department to perform the duty locally, or by having the necessary accounts and vouchers rendered to him direct. In all cases where a deviation from the established principles may be detected involving any difference in result, the matter should be submitted by the Accountant General to the Assistant Under Secretary of State.

Issuing all Warrants, &c.

He is to prepare all warrants, orders or authorities to Her Majesty's Paymaster General for the payment, receipt or transfer of monies on account of army and militia services, excepting those non-effective services stated below.*

Warrants on the Paymaster General will be signed by one of the assistant Accountants General, and countersigned by the Accountant General. In the absence of the latter, they will be signed by one of the assistant Accountant Generals, and countersigned by the other, according to the directions of the Accountant General; and in the event of the absence of two of these officers, they will be signed by one of the other superior officers of the department, whose names are recorded for this purpose in the books of the Paymaster General, and countersigned by the Accountant General, or by the assistant Accountant General who may be present.

The Accountant General is to take care that the sums issued to agents, paymasters, and other imprest accountants, are limited to the actual requirements of the service; and that the balances of public money retained in their hands are restricted to the minimum amount required.

He will demand payment of all sums due to the department for stores supplied, or services performed for other departments, Colonial Governments, corporate bodies, or private individuals, and place such sums, when received, to the credit of the proper accounts. In the event of any undue delay in such payment he will immediately report the same to the Assistant Under Secretary of State.

---

* Rewards for military services: pay of general officers; pay of reduced and retired officers; and half-pay; widows' pensions and compassionate allowances; pensions and allowances to wounded officers; in-pensions (Chelsea Hospital); superannuation allowances, and retired allowances to officers of the disembodied and local militia.

Keeping the Accounts relating to the Receipts and Expenditure for Army and Militia Services.

He is to keep a ledger and such other books as have been ordered, by the system of double entry, in which all sums received and expended for Army and Militia Services are to be carefully entered.

It will be his duty to propose such improvements in the present system of accounts as experience may suggest, and to render it as simple and economical as possible.

He is responsible that the books are properly kept and duly posted to the latest date, and he is to report quarterly to the Assistant Under Secretary of State upon their condition.

He will watch the expenditure upon the different heads of Army and Militia Services, and report at once, should he have reason to anticipate, any excess of expenditure beyond the several votes of Parliament.

Preparing Annual Accounts.

He will prepare, in accordance with the Acts IX. and X. Vict., cap. xcii, sec. 2, an account of the receipt and expenditure for Army and Militia Services, and will forward the same to the Commissioners for Auditing the Public Accounts.

On making up the account of receipt and expenditure, he will obtain from the heads of departments and others such information as may be necessary to explain any excesses beyond the grants of Parliament.

He will submit to the Assistant Under Secretary of State all papers requiring the Secretary of State's directions.

In all details connected with the accounts, such as requiring information or explanation from controllers of army expenditure, military accountants, paymasters, cashiers, and other sub-accountants, contractors, foreign agents and others, and in all matters connected with the mode of issuing or receiving money, he may correspond with the respective parties; but he is not to issue any orders of a general nature, nor to enter into any general correspondence relating to his department, as all letters of that description are to be signed by the Assistant Under Secretary of State. He will submit all appeals from his decisions for the orders of the Assistant Under Secretary of State.

All questions involving financial considerations, or affecting the Estimates, which may arise in any of the other departments of the office, will be referred, before they are passed on for decision, to the Account Department, and there dealt with as to their financial bearings, as the Assistant Under Secretary of State may from time to time direct. The papers thus referred from other departments, will afterwards be returned to those departments to be submitted for final decision. It is to be distinctly understood, that in such cases no orders are to be given inconsistent with the opinion of the Account Department, without the sanction of the Secretary of State or Parliamentary Under Secretary.

The Assistant Under Secretary will sign all letters to the Treasury, except such as relate to superannuation, the establishment of the office, or other matters connected with the branches specially under the charge of the Permanent Under Secretary of State.

He will prepare such accounts and statements connected with the receipt and expenditure on account of Army and Militia Services, as may be required by Parliament.

One assistant accountant general will be charged with the duty of superintending—

1. The preparation of the Parliamentary Estimates.
2. The examination of claims before payment.
3. The issue of orders for the payment of money.
4. The book keeping.
5. The examination of, and correspondence relating to, foreign cash accounts and the store accounts of the commissariat, purveyors, and military prisons.
6. The examination of, and correspondence relating to, the accounts of the Manufacturing Departments, officers of the Store Department, barrack masters, purveyors, military accountants, and other cash accountants at home, and the store accounts of the commissariat and purveyors.
7. The recovery of all sums due by other departments, Colonial Governments, corporate bodies, or private individuals for stores supplied, or services performed.

The other assistant accountant general will be charged with the duty of superintending the examination and audit of, and the correspondence relating to—

1. Staff pay and salaries at home.
2. Regimental accounts.
3. The accounts of the recruiting districts and depôt battalions.
4. The accounts connected with the non-effective services and pensions.
5. The accounts of the Militia, Yeomanry, and Volunteers.
6. Effects of officers and soldiers, remittances, and savings' banks.

G. C. Lewis.

Appendix, No. 2.

Appendix No. 3.

(See Para. 158 of Report.)

From *J. Leonard*, Esq., Examiner of Ordnance Accounts, to the Controller, Military Finance;—(No. 6218, dated 25th January 1864).

In reply to your No. 7079 of 21st January 1864, on Government letter in the Financial Department, No. 6524 of 30th December 1863, and Military Finance Department, No. 3645 of 18th January 1864, calling for a report on the system of accounting observed in the gunpowder manufactory at Ishapore, near Calcutta, I have the honour to intimate that the accounts are very simple, the operations of the manufactory being confined to—

Making powder;
„ Powder barrels;
Refining saltpetre, &c. &c.

The documents comprise a Monthly Store Day Book.
„ Cash Bills.
„ Account Current, and an Annual Store Ledger, with Annual Accounts Current of Stores, of Cash and Manufacture for each of the Departments (Powder and Barrel).

2. The *Store Day Book* contains all transactions of receipt and issue in respect of manufacture and supply.

3. The *Bills for Cash* are of two kinds, one for the permanent establishment, the other for extra artificers and all contingent expenditure.

4. The Cash Account Current sets forth all remittances received from the public treasuries or otherwise, and all expenditure therefrom.

5. The store and contingent cash accounts are audited by the ordnance examiner, and the bills for permanent establishments by the pay examiner, and all expenditure of either kind is pre-audited by the Inspector General of Ordnance on monthly estimates very early after the close of each month; cash expenditure, for whatever purpose expended, is tabulated in the examiner's office against the budget grant under the classified heads of expenditure.

6. Again, remittances and cash expenditure of every description undergo the scrutiny of the Military Accountant and Accountant General of India; thus there are many checks established in respect of book accounts; and that they are efficient I have continual experience from references made on doubtful items, as comparison proceeds between the books of banks, treasuries, Military Accountant, and disbursing officers.

7. Annual store ledger condenses the particulars of the day book in the ordinary Dr. and Cr. form; the arrangement is alphabetical under the following classes:—

Powder Department.

1. Apparatus used in manufacture.
2. „ chemical
3. Furniture.
4. Machinery.
5. Materials for manufacture.
6. Stock of cattle, &c., excluded from the other classes.
7. Tools.
8. Utensils, boiler, &c.

Barrel Department.

1. Barrels.
2. Barrel Components.
3. Tools.

8. *Annual*

8. *Annual Account Current of Stores* brings the store transactions of the year under one view, thus:—

Dr. *Cr.*

	Rs.	a.	p.		Rs.	a.	p.
To stock, 31st May 1859 - -	6,47,707	-	11	By supplies and issues of every description under each head - - - -	7,61,590	14	5
„ Receipts from Commissariat Departments under each head, &c. &c. &c. - -	8,34,174	9	9	„ Stock, 1st June 1860 - -	7,20,290	12	3
Total - - - *Rs.*	14,81,881	10	8	Total - - - *Rs.*	14,81,881	10	8

9. *Annual Account Current of Cash and Stores* exhibits the whole proceedings of the year in cash and stores, thus:—

Dr. *Cr.*

	Rs.		Rs.	a.	p.	
To amount of audited bills for the year - - - - -	3,11,981	By delivery of 11,440 barrels of gunpowder, or 11,44,000 lbs:				
„ Stores issued for manufacture - - - - -	5,11,470	„ Cost of manufacture per 100 lbs. - - - -	20	6	3	
„ Loss, &c. on cattle - -	1,840	„ Military pay officers - -	1	1	9	
„ Wear and tear of machinery and utensils - - -	10,650	„ Machinery and accounts -	-	14	10	
„ Interest at 5 per cent. in value of mills and buildings - - - - -	13,715	„ Interest at 5 per cent. - -	1	3	4	
		11,440 at - -	23	10	2=	2,70,414
		By Stores received from manufacture, &c., conversion and transfer - - - -				5,79,242
Total - - - *Rs.*	8,49,656	Total - - - *Rs.*				8,49,656

N.B.—Every separate entry in these accounts current is supported by detailed valuation statements fully explanatory of the several processes of manufacture.

10. The method of finding the wear and tear of machinery, interest, &c., is not generally used. I will therefore briefly explain it:—

1st. Divide original cost of each article of machinery by the period it is estimated to last, and charge off the quotient annually on the produce.

2d. Interest at the rate of the current Government loan is charged in value of buildings septennially assessed by Public Works Department, and on the cost of machinery not written off under Section 1.

3d. Cost of actual repair to buildings and machinery is charged on produce.

4th. The whole salary of agent and of European subordinates is charged on produce.

11. In addition to the regular accounts as explained, statements are submitted to verify the working of the factory, viz:—

COMPARATIVE STATEMENT of Powder made in Three Years.

Powder made in	1857–58.	1858–59.	1859–60.
Number of barrels of 100 lbs. each	10,857	11,148	11,440
	Rs. a. p.	*Rs. a. p.*	*Rs. a. p,*
1. Extra people on each barrel	1 8 8	1 4 9	1 5 8
2. Materials for manufacture purchased or supplied	1 5 9	1 8 3	1 8 6
3. Wear and tear	– 6 7	– 2 10	– 2 3
4. Contingencies	– 3 4	– – 8	– – 10
5. Materials for stock, &c.	12 11 11	12 6 7	13 10 7
6. Fixed establishment	1 4 11	1 10 3	1 9 4
7. Cattle „	– 3 3	– 5 11	– 6 7
8. „ Casualties	– – –	– 2 10	– 1 4
9. „ Feeding	—	—	—
10. Conversions and condemnations	1 7 5	2 – 1	1 8 3
11. Interest on value of buildings	1 8 3	1 3 8	1 3 4
12. Military pay of agent, &c.	– – –	1 – 4	1 1 9
13. Wear and tear of machinery	– – –	– 14 3	– 14 10
		Decimals	1·2
Value per Barrel	20 14 1	22 11 10	23 10 2

12. This statement is reversed for the two last years, to show the increase and decrease in the above document: excess appears in Nos. 1, 2, 4, 5, 7, 12, & 13, and decrease in Nos. 3, 6, 8, 9, 10 & 11—being thus accounted for: excess or increase in price, addition to fixed establishment, increase in the market value of firewood, saltpetre, charcoal-wood, addition to pay of bullock-men, new hydraulic press, &c.; decrease, by fewer casualties in bullocks, cheaper grain for cattle, fewer condemnations, &c. Similar comparisons are made separately in respect of the more valuable articles of consumption, such as crude saltpetre, gram, firewood, charcoal-wood; and the results in the barrel department are shown precisely in the same manner throughout.

13. When these accounts reach the examiner's office they are examined in detail, and the result of the year's working is reported to the Controller, Military Finance, in the manner following:—

MANUFACTORY ACCOUNT of Gunpowder Agency for Year 1859-60.

Dr.		*Cr.*	
	Rs.		*Rs.*
To Cost of Supervision -	30,730	By making 11,440 barrels of Gunpowder of 100 lbs. each - - - -	2,70,414
„ „ of Material used in Manufacture - -	1,72,301 1,45,565	By value of 13,995 barrels „ „ 622 „	1,45,565
„ Interest, Wear and Tear, &c. - - - -	24,364		
„ Contingent Expenditure	15,260		
„ Labour - - - -	11,067		
„ Military Pay - -	12,702		
TOTAL - - - *Rs.*	4,15,979	TOTAL - - *Rs.*	4,15,979

eak heads and staves for making barrels, and the workmanship for setting them, being supplied by tract. Barrel manufacture requires no particular remark. Copper hoops come from England. The this year is about *Rs.* 9. 15. 3. per barrel.

B.—The cost of maintaining this establishment for this year is 13 per cent. of the out-turn; this age is, more or less, according to the aggregate value of the work turned out during the year.

4. The clerical portion of this establishment is very limited, consisting of—

1 Accountant - - - - - -	at 50	rupees	per month
1 Writer - - - - - -	„ 30	„	„
1 Ditto - - - - - -	„ 20	„	„
1 Ditto - - - - - -	„ 10	„	„
1 Duftry - - - - - -	„ 7	„	„
TOTAL -	117	„	„

three Sircars for the Muster, Godown, and Treasury duties, at a cost of 55 Rupees mensem, and yet there is no delay in rendering these accounts, and they are always correct.

5. I have much experience in store accounts, and consider that those rendered by the ufactory establishments of the Bengal Ordnance are very complete in themselves, that with careful examination and comparison they afford good protection to Government in all the expenditure connected with them in as far as it can be controlled by ments. All the accounts are on the principle herein explained; those of the gun age and foundry are far more voluminous on account of the variety and quality of les manufactured.

Foundry Timber Agency, Gun Carriage Gunpowder.

APPENDIX, No. 4. - - - - - - -

FORM No. 20.

CERTIFICATE OF THE COMMANDING OFFICER AND THE ADJUTANT.

We, the undersigned, having met together on the of 186 and having examined the list of officers in the first page of this pay list do hereby certify and declare, *That* the said list agrees with the muster rolls for the same period, and contains a true and just account of the officers who have been effective for the periods therein set down; *that* all those officers who were not present at muster have the true reasons of absence assigned against their names; and *that* all absences which have occurred during the month and affect the pay and allowances of the officers, have been properly stated.

Having also compared this pay list with the muster rolls, containing the particulars of non-commissioned officers, corporals, drummers, buglers or pipers, privates and boys, we do further declare—

That the names are correctly stated in the said muster rolls:

That no child, or other improper person, is borne thereon:

That all those non-commissioned officers, corporals, drummers, buglers or pipers, privates and boys, who have been effective and entitled to pay, and who at the respective musters were not present, have the true reasons of their absence assigned against their names on the said muster rolls:

That all absences which have occurred between the dates of the respective musters affecting the pay and allowances of the non-commissioned officers, corporals, drummers, buglers or pipers, privates and boys, are properly stated:

That the men whose names are specified on the separate pay lists for subordinate medical establishment, quartermaster's and conservancy establishments, and the educational establishment, on Form No. 3, were effective for the periods for which pay is charged:

That the rates of good conduct pay entered opposite each name in the company's muster rolls are correctly stated:

That the number of women and children borne on the strength of the company is correctly stated on the several muster rolls. and *that* the dates of marriage of those borne for the first time have been correctly extracted from the marriage certificate of the parties:

That the dates of birth of the children are correctly stated; and *that* such of the children as are of proper age attend the regimental school:

That Form No. 6 contains the names of non-commissioned officers and men entitled to the rewards for good shooting stated opposite their names, and *that* they have been duly settled with for the same:

That the officers attached to this regiment (Form No. 7) have been effective for the periods therein set down:

That the particulars shown on Form No. 9 of the deposits received and withdrawals paid from the regimental savings bank, are correctly stated:

That the abstracts of the remittance rolls (Forms No. 10 and No. 11) are correct:

That Form No. 12 contains a true statement, abstracted from the casualty return of the effects and credits of deceased officers, non-commissioned officers and men, and of the effects of deserters:

That the officers' mess was maintained in the regiment during the period for which a charge is made in this pay list (Item No. 3):

That the regimental register has been carefully inspected by us; and that the service of every soldier is accurately recorded therein up to the day of 186 .

Commanding Officer.

Adjutant.

FORM No. 21.

DECLARATION OF THE PAYMASTER.

I do solemnly and sincerely declare, that the foregoing pay list of the regiment of for the 18 , contains charges of pay for only such officers, non-commissioned officers, corporals, drummers, buglers or pipers, and privates, and boys as were effective, and entitled to pay according to the separate muster rolls transmitted with this pay list; and *that* every absence affecting the pay or allowances of such men, which occured between the respective musters, is properly accounted for.

Also, *that* the whole of the sums credited in the General State, Form No. 19, amounting to rupees
have been actually and *bonâ fide* disbursed by me in conformity with the established regulations, and that the total sum received, drawn for, or required to be remitted, for the several services therein shown, including every receipt whatever, for which I am required to debit myself in this pay list, as shown on Form No. 19, is rupees

Also that the total amount of the sums disallowed in the decisions received by me is debited in the general state.

Appendix, No. 25.

(See Paras. 294 and 404 of Report.)

Memorandum by Ralph Thompson, Esq.

On the System of Registry used in the War Office.

1. The system of registry used in the War Office is strictly a subject one; that is to say, the whole of the correspondence is classified under subjects, which are represented by fixed numbers.

2. Such subjects as are common to regiments, or military stations, are again subdivided accordingly, retaining, however, their subject number.

3. As new subjects arise, the next unused numbers are allotted to them.

4. All officers, &c., employed under the War Office are treated (for registry purposes) as subjects, and have numbers given them, under which all papers relating to them are registered.

5. These numbers are not changed annually, but remain in force through a series of years.

6. As each paper is registered, it receives a consecutive sub-number, which indicates the number of letters received on each subject.

Thus, 51 represents "Clothing," and an application for clothing from the 48th Foot would bear the registry number 51

48th Foot,

with a sub-number, varying according to the number of previous letters from the regiment.

In like manner an application from the storekeeper at St. Helena for stores (represented by 57) would be registered 57

St. Helena.

7. There is no double registry of papers, but they are at once classified under their proper subject headings, and if more than one subject is touched upon in a letter, a sufficient extract is made, and registered according to its own subject.

8. For general subjects, a short entry is made of the subject of the paper (see specimen sheets A. and B.); but for such personal cases as are noticed in para. 4, a very trifling marginal note is all that is found to be necessary. (See specimen sheet C.)

Index.

9. There is, practically, only one index to the whole of the War Office correspondence; but, as it would be inconvenient (from its bulk as well as other causes) to have only one volume, it is divided into the following volumes:—

1. A general index, containing a reference to the registry number of all subjects not included in the volumes named below. (See specimen sheet D.)
2. A nominal index for officers, &c., referred to in para. 4. (See specimen sheet E.)
3. A widows' pension index (nominal).
4. A wounds index (nominal).
5. A losses index (nominal).
6. A regimental index, in which all questions relating to particular regiments are indexed. (See specimen sheet F.)
7. An effects index, in which are indexed regimentally the names of all deceased soldiers, each soldier receiving a separate number (on the report of his death), under which the correspondence relating to his effects is registered. (See specimen sheet G.)

10. There is no nominal index kept of writers of letters to the War Office other than those specified. All letters from the public fall under some subject or other, and the writers' names are not indexed in any way whatever.

The course pursued in the War Office, in the registry and the distribution of the day-post, is as follows:—

11. All letters are at once taken to the post room (about 2,000 a day on an average), where there is a staff of three men (one clerk and two messengers), whose sole duty it is to open, stamp the date of receipt, and roughly sort the post, weeding out all returns and other documents which do not require to be registered (of which they have a list), and sending them to the various branches of the office requiring them. The remainder of the post (about 800 to 1,000) is then taken in to the head of the registry, who, with the help of his index, marks in pencil, on each paper, its subject number, and the branch to which it is to be sent. In this duty he is assisted by his second, as to mark about 500 papers is quite as much as one man can do properly.

12. The registering clerks then enter the papers as marked in pencil, and record on the endorsement the sub-number of the last paper on the subject. They are then passed into the press room (a depôt for papers), and the press keeper, guided by the endorsement, annexes the former paper. If other papers are required not bearing the same number, they are annexed, temporarily, by voucher, and separated and put away in their own places on the return of the paper requiring them.

13. The whole post is then sorted out and sent in boxes to the various branches: deliveries are made at eleven, one, and three o'clock.

14. When the papers have been acted on in the branches they are returned to the registry, when a note is made in the registers of such letters as have been written on them, and they are finally sent to the press room (which is part of the registry) for deposit.

15. Papers are put away in the press room in trays, which are ticketed with the registry subject numbers, and all those on any one subject are thus always kept together, and available for ready reference.

It may be as well to mention that no difficulty is ever experienced in tracing former correspondence if the index be properly kept up.

The Gazette of India Extraordinary.

Calcutta, Thursday, 13 October 1864.

The following Resolution of the Government of India and Report of the Commissioners of Inquiry into the Indian system of account and audit are published for general information. Such improvements have been ordered as are immediately practicable, and the further changes recommended will be decided upon after considering any suggestions and explanations that may be offered.

E. H. Lushington,
Financial Secretary to the Government of India.

No. 2695.

Resolution of the Governor General of India in Council in the Financial Department; dated 30th September 1864.

The Governor General in Council has had under his consideration the valuable Report of the Commissioners of Inquiry into Indian accounts on the system of audit and account now pursued in the Military Department.

2. The revised system recommended by the Commissioners is based upon the principle that the separate establishments of military account and audit should be consolidated into a central account office in each of the three Presidencies; in Bengal, under the immediate direction of an accountant general to the Military Department, and in Madras and Bombay under the respective controllers. This proposal is based upon the experience acquired at the War Office and Admiralty, where, by carefully separating cash from stores, and examination from record, and reducing the latter to the utmost possible degree of simplicity by scientific book-keeping, audited accounts of the expenditure in every part of the world for the year ending the 31st March are furnished previously to the meeting of Parliament.

3. This, and other proposals, which are of an organic character, will be hereafter considered, in communication with the Military Department; but meanwhile immediate effect may, with much public advantage, be given to many of the recommendations contained in the report.

4. In paragraph 112, the Commissioners state that, notwithstanding the order of Government to the contrary, the items of expenditure in the Military Department are still classed in the account current under the heads of—

Arrears, former years - - - - {Settlement. Payment.

Current.

The Governor General in Council concurs with the Commissioners that this subdivision is unnecessary and inconvenient, and directs that it be at once discontinued in the several books of account, from the date of receipt of this order.

5. Arrangements should also be made for consolidating the separate establishments and accounts of the offices of agent and superintendent of clothing, the duties of which are now performed by one officer, and for making the other improvements in those offices, suggested in the 178th and following paragraphs of the report, so far as they are immediately practicable.

6. At paragraph 394, the Commissioners suggest that all unserviceable, obsolete, or redundant articles should be eliminated from the stores previously to the ensuing financial year, so that the stores in stock at the commencement of the year may represent those actually fit and ready for service. Arrange-

ments should be at once made to give effect to this recommendation. The stores so excluded should be fully advertised, and should be sold to the highest bidder, with the reservation only of an upset price, founded upon a low calculation of the sum which may be expected to be realised at the nearest favourable market, after deducting all the expenses of conveying them thither.

7. In paragraphs 58 to 63, 262 to 265, and 272 to 276, the Commissioners notice the unnecessary detail in which the Departmental Estimates are furnished to the Controllers of Military Accounts in the three Presidencies, and to the Accountant General, Military Department, and justly attribute it to the want of that frequent personal communication between heads of departments, regarding doubtful items in the estimates, whereby access would be gained to the books and records, and prolix returns and numerous vouchers in support of the Departmental Estimates would become superfluous. This excessive detail should be at once discontinued, and the heads of departments should have the advantage of this improved arrangement in preparing their estimates for 1865–6.

8. With the same object, it is desirable that the introduction of the revised forms of estimate be immediately ordered, should it appear, on consideration in the Military Department, that no information requisite for an intelligent practical review of military expenditure in that department will be thereby sacrificed. It is observed that the forms provide for a comparison of the Budget Estimate with the previous year's Budget, instead of the regular estimate, the improved system proposed by the Commissioners rendering the regular estimate unnecessary. But orders on this recommendation can only be passed on the Commissioners' Report on the Financial Accounts. Meanwhile, the figures of the regular, rather than of the last Budget Estimate, should be inserted in the column of the Commissioners' forms which has been provided for a comparison of the year 1864–65 with 1865–66.

9. In like manner, in the absence of the ample means of comparing the Budget Estimate with the latest actual expenditure, provided by the system recommended by the Commissioners, the estimate for 1865-66 should contain a column showing the actual expenditure of 1863–64.

10. It must also be observed that, whereas the detailed calculations of the cost of regiments are to be made at the full 12 months' charge for the full sanctioned establishment, with a deduction (in the column provided for that purpose in the form at pages 20, 21 in the Appendix) of the portion which is invariably not incurred at all, or not incurred in India, for the pay of officers in civil employ, in Europe, &c., no similar column is provided for making a deduction on account of deficiencies in the strength of regiments, and the allowances forfeited by native soldiers on leave.

11. It is right to mention, in reference to the 51st paragraph of the report, that the Accountant General to the Military Department has satisfactorily explained the delay in submitting the Military Estimate for 1864–65.

12. The earnest attention of the military accountants in the three Presidencies should be directed to completing, at the earliest possible period, the adjustment of the books between the Civil and Military Departments, as recommended in paragraphs 343 and 344.

13. In the 259th paragraph of their report, the Commissioners observe that, under the system which they recommend, "the expenditure shall, as now, be recorded with the view of showing the total cost under each arm of the service, and not under the separate items composing the pay and allowances; provision will however be made in the pay-lists for furnishing information on this point, should it at any time be required."

14. The recording in the Presidency offices of the pay of a large army under the separate items composing the pay and allowances of each regiment, and not merely under the arm of the service to which the regiment belongs, must be so tedious and elaborate as to cause arrears and unnecessary expense, and any such minute recording that may be now in progress should be stopped at once.

15. The

15. The state of the deposit accounts, of the account of advances repayable, and of the inefficient balances of disbursing officers, as reported in paragraphs 203 to 206, calls for early attention, with a view to their effectual investigation and settlement.

16. In paragraphs 111 and 122 to 128, as well as in other parts of the report, the Commissioners discuss the expediency of separating cash from store accounts. With their conclusions on this point the Governor General in Council agrees, and early attention should be directed to the best means of giving practical effect to the views of the Commission. The separation of the cash from the store accounts is indispensable to the proper reform and efficient management of the cash accounts of the Empire.

17. There are many other instances adverted to in the report, in which, without waiting for the adoption of further changes, time and labour may be saved, and the public business may be expedited by omitting unnecessary forms or processes, and adopting more compendious methods, such as—

Reducing the inefficient balances of paymasters by writing-off small sums which are not worth collecting, paragraphs 74–5.

The omission of pies from the accounts, according to the process described in paragraph 414.

The limitation of payments by cheque, at the Presidency Pay Office, to sums of 10 rupees and upwards, paragraph 81.

The placing the paymasters of invalids at Fort William, and of recruits at Chinsurah, in direct relation with the military accountant, paragraph 85.

The substitution of a quarterly for a monthly return, explanatory of the inefficient balances of paymasters of circles, paragraph 85.

The discontinuance of the Presidency paymaster's list of cheques drawn on the Bank of Bengal, by utilizing the Bank pass-book, paragraph 89.

The substitution, by the pay examiner, of a letter of advice to the disbursing officer, for the circuitous process described in paragraph 96.

The discontinuance of the register of articles of consumption in hospitals, paragraph 138.

The discontinuance of the annual returns of the gross cost per 100 patients, furnished to the Principal Inspector General of the Medical Department and Controller of Military Accounts, paragraph 139.

The discontinuance of the second examination, by the Ordnance Examiner, of the cash charges for commissariat purchases for the Ordnance Department, paragraph 143.

The immediate adoption, as regards the arsenal of Fort William, of the plan for examining store ledgers recommended by the Commissioners, paragraphs 149 and 390.

The grouping together of the details of petty repairs under 50 rupees, paragraphs 150–387.

The discontinuance of the intermediate valuation of the store accounts rendered by civil officers, paragraphs 154–5.

The discontinuance of the account between the gun carriage agent at Futtehgurh and the circle paymaster, paragraph 159.

The omission of consumable articles from the barrack-master's day-book, paragraph 166.

The discontinuance of the duplicate cash vouchers by paymasters in their monthly accounts, paragraph 167.

The discontinuance of the countersignature of the Quartermaster General to the barrack-master's accounts, paragraph 169.

The discontinuance of the inadmissible substitute for an annual appropriation audit, described in paragraph 196.

The discontinuance of the abstract of the general books, described in paragraph 197.

The discontinuance of the copies of vouchers of the half-yearly returns of stores with regiments and batteries, furnished in addition to the original vouchers, paragraph 396.

The substitution of annual for half-yearly returns of stores with regiments and batteries, in the manner recommended in paragraph 397.

The discontinuance, in the mode recommended in paragraphs 398–9, of the

copy of the day book furnished by barrack-masters to the examiner of barrack accounts.

18. The labour liberated by these and the other changes previously adverted to should be employed, as far as necessary, in the examination of the inefficient balances and of the deposit and advance accounts, and in completing the accounts in arrear; but when it is not wanted for any really useful purpose, reductions should be made.

19. The several officers concerned should be desired to report, at the end of a month, the steps taken by them under these instructions.

ORDERED, that a copy of this Resolution, and of the Report of the Commissioners, be forwarded to the Military Department, with a request that the several arrangements which have been determined upon may be carried into immediate effect, and that careful consideration may be given to the further changes recommended by the Commissioners.

Also, that copies be sent from the Military Department to the Governments of Madras and Bombay, with a request that they will adopt the changes which have been determined upon, and will favour the Governor General in Council with their opinion on the further changes recommended by the Commissioners.

Also, that a copy be sent to the Accountant General to the Government of India for his information and guidance.

Also, that a copy of this Resolution, and of the Report of the Commissioners, be published in the Government Gazette, for general information, with the remark that such improvements have been ordered as are immediately practicable, and that the further changes recommended will be decided upon, after considering any suggestions and explanations that may be offered.

E. H. Lushington,
Secretary to the Government of India.

From Lieutenant Colonel *G. M. Hill,* Military Accountant, to Lieutenant Colonel *F. D. Atkinson,* Controller of Military Accounts, Calcutta (No. 513, dated Calcutta, the 19th October 1864).

HAVING perused the Report of the Commissioners of Enquiry into Indian Military Accounts, published in the "Gazette of India," Extraordinary, under date the 13th October 1864, I feel that in justice to myself, I ought not to pass over in silence the remarks recorded with reference to my office; and I beg you will do me the favour to submit to Government the following observations thereon:—

2. In paragraphs from 200 to 205 of their Report, the Commissioners comment upon certain ledgers kept up in my office, and remark that in April 1861 the balance due to Government by officers and others was 11,31,782 rupees, and that due by Government 16,04,673 rupees.

3. In connection with this subject, I beg to append a printed memorandum I have prepared, explaining that though the above balances existed on the books of this office, when I assumed charge of it in 1861, they have since then been reduced to 1,18,624 rupees in the former case, and to 5,53,411 rupees in the latter, of which 2,54,000 rupees are deposits on account of the forfeited pay of mutinied regiments, and 1,49,553 rupees the unclaimed deposits which accumulated between the year 1842–43, and that of the mutiny, 1857–58, leaving but 1,50,411 rupees to be accounted for, a great part of which will also be settled in the military books of 1862–63, and 1863–64.

4. These most satisfactory results speak for themselves, and plainly show that "the military accountant and his assistants" were by no means "beguiled into the belief that, as the balance was as it was termed on the right side, no investigation was necessary."

5. With

5. With reference to paragraph 203, I must, however, remark that the Commissioners have evidently misunderstood the meaning I wished to convey as regards the "Advance Repayable Ledger," which was that, as the several sums borne on the ledger belonged to a period unconnected with my incumbency, it was not possible for me at that moment, and without reference to many old accounts to afford the particulars of the several items, the very fact of my having abolished the head of "Advances Repayable" in 1862, when preparing my hand book, on the grounds of its objectionable nature, which was that the items entered under this head were entirely lost sight of by disbursing officers, is a proof that I could not have been ignorant of the ledger and its use, and the further fact that almost the entire amount shown therein in April 1861 has been settled since that date (which is the one mentioned by the Commissioners) is again a proof that necessary and proper measures were adopted by me in the conduct of this branch of my office.

6. In paragraph 206 the Commissioners refer to my report on the check exercised by the military accountant and the commissariat examiner over the accounts current of executive commissariat officers, remarking that "the military accountant has been endeavouring to obtain the control of work not within his proper sphere"—upon this it is simply necessary to observe that I never sought to obtain control over any work foreign to my legitimate duties; the report referred to was not volunteered by me, but was prepared agreeably to the express instructions of Government, conveyed in letter No. 6375, dated 19th December 1863, from the Financial Secretary, who thus wrote to the Chief of the Military Finance Department: "I am directed to express the desire of Government that the subject of the means and the expediency of relieving the examiners of commissariat accounts in the three Presidencies from work, which appertains properly to the Military Accountant's office, may be completed on an early date, so as to admit of orders being passed in sufficient time for the introduction of any revised arrangements by 1st May 1864 at latest, and on an earlier date, if possible."

"If the verification by the commissariat examiner of the credits for proceeds of sale of stock be the only reason for his checking the accounts current of commissariat officers, then his check need not extend to any other items of the account current, and in that view the question is narrowed to a simple one of the medium through which he is to ascertain the credits, whether through a bulky account current as at present, or from a briefer communication of the credits to him by the military accountant, or in some other way." As in duty bound, I submitted the report, therefore Government will see that in recording that I sought to obtain work beyond my proper sphere, the Commissioners are quite in error.

7. The only other points which it seems necessary for me to notice are the state of the inefficient balances of the Pay Department, and the adjustments between the Civil and Military Departments; the former is fully explained in paragraphs 11 and 12 of the subjoined memorandum, and the latter in the statement annexed to it; but as the Commissioners in paragraph 204 of their report state, that the "Advances Repayable" account was the pioneer of the "Inefficient Balance" account, I think it desirable to mention here that such was not the case; both accounts have existed for many years, though the former account, excepting for the settlement of old claims, has now been abandoned, as explained in paragraph 10 of my memorandum.

8. Having thus explained (satisfactorily, I feel assured) the several matters as regards the Military Accountant's office reported on by the Commissioners, I venture to express a hope that Government will exonerate an old servant, who has faithfully discharged his duties during the long period of 38 years, from the charge of laxity brought so publicly against him by the Commissioners in their Report, which cannot be otherwise than prejudicial to him in the opinion of those who peruse that Report, but who do not thoroughly understand that the Commissioners have dealt with what was (when the military accountant's appointment was created) rather than what is now the existing state of things.

9. A full and detailed report of the deposit accounts and advances repayable will be submitted to you hereafter, with reference to paragraph 15 of the Government Resolution, No. 2695 of the 30th September 1864.

(True copy.)
(signed) *A. J. Whittin,*
Asst. Controller of Mily. Accts.

(No. 81.)

ADVANCES REPAYABLE.

IT was the practice in former years to charge off in the cash accounts current, under the head of "Advances Repayable," all sums which the divisional paymasters were called upon to disburse on account of passage money from port to port in India, survey and cadet advances, advances for recruiting purposes or clothing necessaries, and such like; and it was the practice, moreover, to credit in the same accounts, also under the head of "Advances Repayable," all recoveries made by the divisional paymasters on the above account, or on account of chargers selected by officers, clothing supplied to regiments on payment, table money, and such like. The sums received in deposit from military officers and others on account of pay or to meet expected retrenchments, and on other accounts, were also credited under this head.

2. As to the advances for the daily pay of men, for altering or making up of clothing, for the pay and allowances of officers, for contingent charges, and such like, all unadjusted payments under these heads appeared in the first instance in the inefficient balance statements of divisional paymasters, and were not charged off in the cash accounts current as the advances above noted until supported by adequate vouchers; in other words, while the advances referred to in para. 1 passed into the cash accounts current, and were adjusted on the military books without audit, thus clogging the head of "Advances Repayable" with many unnecessary debits, the advances noted in this paragraph were not charged off in the cash accounts current, or adjusted on the military books, until admitted by the Audit Department.

3. By the arrangement which thus prevailed, the outstandings of the Military Department appeared both in the advances repayable ledger and in the inefficient balance statements of divisional paymasters. The system was objectionable for many reasons; it was not uniform, and by admitting into the cash accounts current many advances made by divisional paymasters, their attention was withdrawn from many recoveries which were practicable, and it caused them to overlook the submission in many cases of bills and vouchers which would have assisted in the settlement of the debits under the head of "Advances Repayable." Accordingly, in May 1862, or shortly after the Military Account Department was formed under its present constitution, a plan was devised (*vide* the military accountant's hand book issued with the sanction of the Military Finance Department for the guidance of all military disbursing officers in the preparation of their cash accounts current, and adopted at all the three Presidencies) by which no advances of any kind, whether on account of passage-money, or to survey-officers and cadets, or for recruiting or clothing purposes, and such like, were permitted to be charged in the cash accounts current, the rule being that all such unadjusted payments should appear in the inefficient balance statements of divisional paymasters in common with all the advances made on account of the daily pay of men, or for clothing, or for the pay and allowances of officers, &c., and such like.

4. If any recoveries are now made by divisional paymasters on account of chargers selected by officers, clothing supplied to regiments on payment, table money, and such like, the moneys are at once brought to credit in the cash accounts current under the head "Miscellaneous Military Receipts and Recoveries;" and in respect to the deposits made by military officers and others on various accounts, the sums so paid in are exhibited in the cash accounts current of divisional paymasters under the direct head of "Deposits," subordinate to the general head "Debt," the transactions referring to deposits being regarded as a debt account.

5. Under

5. Under the former system, there was a distinct head on the military books, journals, and ledger, styled "Advances Repayable," which is now only kept up for the adjustment of old items. In the military journals, under the head of "Advances Repayable," the particulars were given of the payments and recoveries made during the year by the several divisional paymasters on account of the advances charged in their cash accounts current, and the moneys brought to credit in the same accounts. In the military ledger, the transactions of the year, as shown in the separate journal of each divisional paymaster's account, were also duly recorded, but the figures represented aggregate sums without details, and the head of "Advances Repayable" opened with the balance of the previous year, and was similarly closed with a balance. In the military journals and ledger there was no record of separate personal accounts, and for the convenience of the Military Account Department in the prosecution of claims against military officers and others, an office book or advances repayable ledger (subsidiary to the military ledger) was kept up, in which was noted in separate accounts the liability of each individual officer, and the sums at his credit connected with the advances and recoveries noted in para. 1.

6. In the military journals, under the head of "Advances Repayable," there was a sub-division under the former system, styled "Deposits of the Pay Department," which gave the particulars of all sums received in deposit during the year by divisional paymasters, and brought to credit as such in their cash accounts current, and which exhibited per contra all refunds of deposit money also during the year charged in the same accounts. In the military ledger, the transactions of the year, as shown in the separate journals of each divisional paymaster's account, were also duly recorded under the head of "Advances Repayable," but the figures were not separated from those which represented the advances and recoveries included in the aggregate sums under this head. In the military journals and ledger, there was no record of separate personal accounts, and as the transactions were also not detailed in the advances repayable ledger, but exhibited in lump sums, it was thought to be desirable that an office book or deposit ledger subsidiary to the advances repayable ledger should be kept up, for noting in separate accounts the moneys received from, or refunded to each individual officer.

7. In the military journals, under the head of "Advance Repayable," there was a second sub-division under the former system, styled Advances to Gentlemen Cadets, which gave the particulars of all advances made during the year to cadets by divisional paymasters, and charged in their cash accounts current, and which exhibited per contra all recoveries on account of such advances also during the year credited in the same accounts. In the military ledger, the transactions of the year, as shown in the separate journals of each divisional paymaster's account, were also duly recorded under the head of "Advances Repayable," but the figures were not separated from those which represented the advances and recoveries on other accounts included in the aggregate sums under this head. In the military journals and ledger, there was no record of personal accounts, and as the transactions were also not detailed in the advances repayable ledger, but exhibited in it in lump sums, for the convenience of the Military Account Department, in the recovery of advances, an office book, or cadet advance ledger was kept up, in which was noted in separate accounts the advances made to, and the repayments on the same account from each individual officer.

8. Now, in respect to the advances, repayable ledger, this has been posted up and balanced for the year 1860–61. The ledger is prepared after the completion of the military books, and cannot be prepared until then. The books for 1861–62 having lately been completed and submitted to the Accountant General to the Government of India in the Civil Department, the advances repayable ledger for that year is now under preparation. In the ledger for the year 1860–61, there is a debit balance against military officers and others, including gentlemen cadets, amounting to *Rs.* 11,31,782. 0. 1¼., and the credits per contra, that is, the moneys received from officers, are noted at *Rs.* 19,77,084. 8. 2¾; but, of this last-mentioned sum, *Rs.* 16,04,673. 9. 0., appertain to the deposit account. The real credit balance therefore under the head of "Advances Repayable," in the year 1860–61, on account of the advances noted in paragraph 1, is not more than *Rs.* 3,72,410. 15. 2¾., of which *Rs.* 1,99,001. 12. 11., refer to charges selected by officers, the horse selection returns, on which the debits per contra would have been raised, not having been received in that year; but many items will

be found to have been adjusted by a debit to the head of "Advances Repayable," and a credit to the head of "Cattle attached to the Army," in the military books of the year 1861–62, when the advances repayable ledger of that year, which is now in hand, has been completed, and in the military books of the year 1862–63 when the advances repayable ledger for that year has also been completed.

9. As to the debit balance of *Rs.* 11,31,782. 0. 1¼., this large sum, though outstanding in the military books of the year 1860–61, at the debit of military officers and others, has, it would appear, from information available in this office, been adjusted to a very considerable amount; and, on the 30th of April 1864, the sums due to Government under the head of "Advance Repayable," may be estimated not to exceed 1,18,624 rupees, as shown in the following memorandum:—

	Rs.	*Rs.*

Advances to officers of the Great Trigonometrical Survey, adjusted up to 30th April 1864 - - - - -	26,387	
		10,13,158
Sums due to Government on the 30th of April 1864, as per advance repayable ledger of the year 1863-64 - - - - - - -		1,18,624

10. In the above memorandum, small items have not been taken into account. It will probably be found, when the advances repayable ledgers for the years 1862–63, and 1863–64, have been posted up and completed, that the debit balance will be reduced by another lakh of rupees at the least, leaving only a few thousand rupees connected with very old advances, which may eventually, with the authority of Government, have to be written off to profit and loss. But the exact sum either of the debit or the credit entries under the head of "Advances Repayable" on the 30th of April 1864, cannot of course be ascertained until the completion of the military books for the year 1863–64, which will doubtless record very few entries under the head of "Advances Repayable," so that the ledger for this head will at once fall into disuse. By the system prescribed in the military accountant's hand book, the head of "Advances Repayable" will not record any new transactions, and the ledger for this head will be discontinued when allthe present entries have been cleared off.

11. The arrangements for discontinuing the head of "Advances Repayable" in the cash accounts current of divisional paymasters have already been productive of good results. All advances made are now brought prominently under the eye of the divisional paymasters, month by month, instead of being charged off in their cash accounts current, and thus lost sight of in their offices, and the consequence has been a much earlier settlement of outstandings. It appears, on referring to the accounts of divisional paymasters, that the items shown in their inefficient balance statements as outstanding on the 30th of April 1862, independently of what appeared charged off up to that date under the head of "Advances Repayable" in their cash accounts current, amounted to *Rs.* 29,14,532. 0. 11. It appears, moreover, that the inefficient balances on the 30th of April 1863, inclusive of all items of advance which were formerly charged off under the head of "Advances Repayable," did not amount to more than *Rs.* 20,29,778. 7. 8., and that there was a further reduction, on the 30th of April 1864, the balance on that date being only *Rs.* 19,05,316. 9. 4½. These figures

figures speak for themselves; they clearly indicate the present system to be superior to the one which existed in former years.

12. The above sum of *Rs.* 19,05,316. 9. 4½. may be a large amount to be outstanding in the inefficient balance statements of divisional paymasters, but an examination of the entries will show that the unadjusted items are chiefly for the pay of the whole of the European artillery, cavalry, and infantry, for one, and, in some cases, for two months, the system being to make advances to regimental paymasters for the issue of daily pay to their men. The settlement, however, is rapid, for the advances of one month generally disappear in the following month, on submission of the necessary pay abstracts; but the inefficient balances of the Pay Department cannot possibly be brought down to a very low figure so long as advances for daily pay must be made.

13. With respect to the deposit ledger, the items exhibited therein must necessarily always show a balance in favour of Government, on account of sums paid in by military officers and others for the adjustment of outstanding acccunts or expected retrenchments. The deposit account on the 30th of April 1861 exhibited a balance in favour of Government of *Rs.* 16,04,673. 9. 0., but this sum has been accumulating for nearly 25 years. The head "Deposits of the Pay Department," was first opened in the year 1839-40, but no very considerable increase was visible in the receipts under this head until the years 1857-58 and 1858-59, when the amount suddenly rose from *Rs.* 1,49,553. 2. 10. to *Rs.* 10,38,085. 15. 10. in the former year, and to *Rs.* 15,10,654. 8. 2. in the year 1858-59.

14. If the items composing the aggregate sum of 16,04,673 rupees consisted, as it might be supposed, of sums due to military officers and others on personal accounts, there might be cause for alarm, but it is apparent, from the records in the Military Accountant's Office, that this large increase has been caused mainly by the mutiny of the Bengal army in the year 1857-58, when the following very considerable sums appeared credited in the deposit accounts of the several divisional paymasters, and in the military chest with the Delhi field force; but these items have all been duly adjusted, and may be deducted from the credits in the deposit account, so that the balance of deposit money in the hands of Government belonging to military officers and others on the 30th of April 1864 may be considered as reduced to 3,00,823 rupees, if the forfeited pay of the mutinied regiments and the old balances be also taken into the account of deposit monies repaid or otherwise adjusted.

	Rs.	*Rs.*
Sums due to military officers and others on the 30th of April 1861, as per deposit ledger of the year 1860-61 - -	- -	16,04,673
Sums deposited in the military chest with the Delhi field force by the prize agents, adjusted during the year 1862-63 - - - - - - - - - -	6,42,578	
Sums qeposited in the military chest with the Delhi field force by civil officers, adjusted during the year 1862-63 -	2,02,465	
Amount of certain audited bills held under the head of "Deposits by the Lucknow Paymaster," connected with advances made to Major Hutchinson, of the Engineers, from the Lucknow civil treasury during the siege of Lucknow, adjusted during the year 1862-63 - - - - -	55,254	
		9,00,297
Sums due to military officers and others on the 30th of April 1864, as per deposit ledger of the year 1863-64, consisting of the under-mentioned items:		
1. Pay of mutinied regiments held in deposit by the Jullunder paymaster, to be adjusted, with the sanction of Government, to profit and loss - -	2,54,000	
2. Old balance previous to the mutiny, accumulating since the year 1842-43 - - - - -	1,49,553	
3. Miscellaneous, being deposits on account of pay, and for expected retrenchments, &c., of which it has been ascertained, since the printing of this, that upwards of one-half has been settled - - -	3,00,823	
		7,04,376
	Rs.	16,04,673

15. As to the pay of the mutinied regiments and the old balances, these amounts must all be written off to profit and loss; and it may be satisfactory to report that the above-mentioned sum of 3,00,823 rupees is made up, to a very large amount, of items which have been adjusted in the years 1862-63 and 1863-64; but the exact sum cannot of course be ascertained until the completion of the military books and deposit ledgers of those years. It appears, from the deposit ledger of the year 1860-61, that 1,37,773 rupees were received in that year on account of pay of officers and men, and that 45,082 rupees were also paid in to meet expected retrenchments. Both items would certainly fall to be adjusted, if not in the following year, 1861-62, certainly before the close of the year 1862-63, so that the balance of deposits on various accounts is barely 1,17,768 rupees, a great portion of which, it is also reasonable to hope, will appear as adjusted on the 30th of April 1864.

16. As to the estate assets of deceased officers and men, all sums appertaining thereto are, for the British army, remitted by rolls to England by regimental paymasters and officers commanding batteries of artillery. The estate assets of the Indian army are included in the monthly statement which the Presidency paymaster prepares of moneys belonging to deceased officers and men transferred to his custody from time to time through the Secretary to the Government of India in the Military Department, to whom a copy of the statement is regularly furnished by the Presidency paymaster for transmission to England, in view to the payment of the moneys to the legal representatives of the estates. As a rule, the estate assets of deceased officers do not come into the deposits accounts of divisional paymasters.

17. The deposit ledgers have been duly written up to the close of the year 1863-64, from the credits which have appeared in the cash accounts current of the several divisional paymasters, but the deposit ledgers, since the year 1850-51 have not been balanced, for what reason it is quite impossible, after the lapse of so many years, to say. Enquiry has been made, but no information on this point has been elicited. The deposit ledgers for the years 1851-52, 1852-53, and 1853-54, have been missing for several years past, and were never made over to the present office of the Military Accountant for Bengal, only organized in February 1861, by the transfer to it of the military accounts of the Government of India, from the supervision of the Accountant General to the Government of India in the Civil Department.

18. The loss of the deposit ledgers, as above, may account for the non-balancing of the ledgers for the subsequent years, but the omission is of little consequence, and does not interfere in any way with the general accounts of the Military Department, or the military books, upon which the sums shown as deposits received, or deposits repaid, are brought to credit or debit, as the case may be, under the head of "Advances Repayable" in the Military Department, through the accounts of the divisional paymasters, and not by means of the deposit ledgers. Moreover, if any refund of a deposit should be called for at any time, a reference would doubtless, in the first instance, be made by the party concerned to the divisional paymaster, into whose office the money had been paid, and as the divisional paymasters all keep up separate ledgers of personal accounts, of sums received in deposit, or repaid to parties in much the same form as the deposit ledgers kept up in the Military Account Department, it would cause no inconvenience to the public service if the military accountant's deposit ledger was dispensed with altogether, when the transactions connected with the deposits received or repaid under the old system, have been disposed of.

19. When the military books for the year 1863-64 have been closed, and the advances repayable ledger for that year duly posted up, the state of the deposit account, which appears so startling at first sight, on reference to the accounts of the year 1860-61, will be better known and understood, and a report can then be made to Government in respect to all unclaimed deposits outstanding for any length of time, in view to the same being at once carried to the credit of Government.

20. As to the cadet advance ledger, the sums due to Government on the 30th of April 1861, under this head, amounted to *Rs.* 15,026. 12. 7., but as this was the

the debit balance of the year 1860-61, and as no advances are now made to gentlemen cadets, it will be found that nearly the full sum has been adjusted in the subsequent years 1861-62, 1862-63, and 1863-64.

Lieutenant Colonel,
27 September 1864. Military Accountant.

(No. 82.)

ADJUSTMENT BETWEEN THE CIVIL AND THE MILITARY DEPARTMENT.

THERE are two classes of transactions embraced in the adjustment between the Civil and the Military Department; there are payments and recoveries made, and there are receipts by the former, on account of the latter, and there are payments and recoveries made, and there are receipts by the latter, on account of the former.

2. The payments and recoveries made, and the receipts in the Civil Departments of the several local governments on account of the military, may either be the sums which are taken up from the civil treasuries by military disbursing officers, in payment of military charges, and the remittances to civil treasuries by military disbursing officers of the sale proceeds of stores, of security deposits, and such like, all which would appear credited to, or charged against, the civil governments, in the accounts of military disbursing officers; or they may be the sums which are paid by civil treasury officers as compensation to owners for lands taken up for military purposes, or for crops destroyed by the movement of troops and such like, all which would appear debited to Military Department in the civil accounts. They may also be the moneys which are sometimes paid direct into the civil treasuries by commanding officers and others on account of sale proceeds of ordnance stores, barrack furniture, and such like, all which would be credited to Military Department direct in the civil accounts.

3. As to the payments and recoveries made, and the receipts in the Military Department, on account of the civil, these are chiefly the supplies of the commissariat for Durbar purposes, the sums disbursed by the pension paymasters on account of the pensions of local and contingent corps, the recoveries made by the divisional paymasters of advances received by military officers and others from the civil treasuries, on brigade or station orders, and the receipts from income tax, commission fees, and such like, all which would be credited to, or charged against the civil governments concerned in the accounts of the Military Department.

4. Now, in respect to the two classes of transactions as above, there are monthly statements rendered by the local civil accountants to the military accountant for all payments or recoveries made, and for the receipts in the Civil Departments on account of the military; and there are monthly statements rendered by the military accountant to the local civil accountants for all payments or recoveries made, and for receipts in the Military Department on account of the civil.

5. In the military books there is a separate head for each local civil government, where the sums shown in the monthly statements, whether rendered to, or rendered by, the military accountant, are at once passed to credit or debit, as the case may be, of the local government concerned, care being taken to see that the payments made in the Civil Departments on account of the military are supported by adequate vouchers, and that only the amounts of such cheques and transfer receipts drawn by military disbursing officers on the civil treasuries as appear discharged in the civil statements are passed to the credit of the local civil governments.

6. Thus, in so far as the Military Department is concerned, no particular action seems to be necessary on account of the payments, if any, which may have been made in any year in the Civil Departments on account of the military, but not admitted (because not known in time), on the military books of the same year; and as to the civil books, it is not known if there are any items in connection with the expenditure in any year of the Military Department on account of the civil, which has not been admitted by the local civil accountants on the civil books of the same year.

7. Of course, the sums credited to or charged against the Military Department in the civil books of any year cannot possibly correspond in amount, and similarly the sums credited to, or charged against the civil governments on the military books will also differ, and there may be balances created in this way in the civil and in the military books. If the full sums of the credits to Military Department on the civil books do not correspond with the debits to the Civil Departments on the military books, or if the full sums of the debits to Military Department in the civil books do not correspond with the credits to the Civil Departments on the military books, it will very likely be found that the vouchers for the sums disbursed in the Civil Departments on account of the military were not received in time for audit and adjustment in the Military Department in the same year in which the debits to Military Department appeared in the civil books, or that the vouchers for the sums disbursed in the Military Department on account of the civil were not audited and adjusted in the Civil Departments in the same year in which the debits to those departments appeared on the military books.

8. At any rate, the system now is to close the head now allotted to each local civil government on the military books by general books, that is, to transfer the balances under such heads on the military books to debit or credit, as the case may be, of the head "General Books," and the Accountant General to the Government of India in the Civil Department, to whom the military books of the year 1861–62 have been forwarded, should be able to say if any and what differences exist between the credits to or debits against the Military Department in the civil books, and the credits to or debits appearing in the military books against the several civil governments.

9. The Accountant General to the Government of India in the Civil Department receives, it is believed, annual balanced accounts current from the local civil accountants, which show, among other items, the credits to, or debits against, the Military Department on the civil books on account of the transactions of the civil treasury officers referred to in paragraph 2. It is believed, too, that in the accounts of the local civil accountants, the Military Department is credited or charged, as the case may be, with the amounts of the transactions of the military disbursing officers referred to in paragraph 3, so that the Accountant General to the Government of India in the Civil Department alone has, under existing arrangements, the means of ascertaining, and, if necessary, reconciling the differences, if any, between the debits and credits in the military and the civil books.

10. So long as the military books are amalgamated with the civil books of the Government of India, and so long as the balances of certain heads of account on the military books are transferred to general books, the arrangement seems specially to point out the Accountant General to the Government of India in the Civil Department as the officer responsible for the settlement (if necessary, with the assistance of the military and local civil accountants) of all differences of the nature referred to in paragraph 7. When the military books of any year are once closed, such differences are really thereafter the differences in the civil books, the balances transferred from the military books of any one year not being incorporated again with the transactions shown in the military books of the subsequent year. The heads appertaining to the several local civil governments on the military books are opened each year without any balances of the previous year.

11. The Accountant General to the Government of India in the Civil Department should be able to report the date to which an adjustment between the military and the civil books in Bengal has been made. The adjusting head on the military books for such items, in short, for all transactions with the local civil governments, is Government of Bengal, or Government of the North West Provinces, &c., as the case may be, the transactions connected with cheques and transfer receipts appearing in separate sections under the heads "Cheques Payable," and "Bills Payable," of the Government of Bengal, or the Government of the North West Provinces, &c., as the case may be.

G. M. Hill, Lieutenant Colonel,
28 September 1864. Military Accountant.

(No. 80.)

From Lieutenant Colonel *F. D. Atkinson*, Controller of Military Accounts, to the Accountant General, Military Department; (No. 4649, dated Calcutta, the 12th November 1864).

IN forwarding to you, for eventual submission to Government, the accompanying copy of a letter from the military accountant, to my address, No. 513 of the 19th ultimo, with the printed enclosures referred to, I have the honour to state that the accounts on which the Commissioners of Indian Accounts have commented in paras. 200 to 205 of their report, dated 30th August, refer to a period before Lieutenant Colonel Hill took charge of the office, the duties of which, since he joined, he has performed in a very zealous and conscientious manner.

2. It is to be regretted that Lieutenant Colonel Hill's explanation regarding the accounts of the advances repayable, deposits, and inefficient balance, could not have been given to Mr. Whiffin, at any of his visits to the military accountant's office, or to the Commissioners at their final visit, when enquiry regarding these statements was being made, and when the replies to the questions connected with them were not very conclusive.

3. That the accounts as prepared are not intelligible is the fault of the system, and not of the head of the office. It is quite clear that under that system sums have been included in the deposit accounts which are mere paper entries. For instance, the pay of the mutinied regiments, the cash for which could never have been disbursed by any treasury or pay office, and which should never have been charged as a payment for the year 1857; for it is only by the full amount of the pay abstracts having been charged, the total amount of which was never disbursed, that the unpaid sum could have been entered as a deposit; and between 1857 and the date of the account there was ample time to adjust the item by applying for permission to write off the amount.

4. The settlement of the advances repayable account is mainly dependent on the admission by the audit, now examiner's office, of the charges against the several advances. The chief item in the account is against Lieutenant Colonel Robbins, amounting to 7,24,201 rupees. I find that Colonel Robbins' bills were passed in full on the 6th October 1860, leaving a balance of 22,696 rupees unadjusted. This latter sum was finally passed by Government on the 6th August 1862. The latter amount only therefore should have appeared in the advances repayable account of 1860–61.

The advance to Messrs. Carew & Co. to re-establish the distillery at Shahjehanpore, amounting to 1,20,000 rupees, was to be recovered by instalments of 10,000 rupees from their bills. The last recovery, I find, was made in July 1863.

The several accounts referred to, prepared from the military books of 1860-61, purported to show the state of things in that year. These were and still are at the present time the last accounts prepared, and the present state of the advances repayable and deposits can only be gleaned by going through the several statements and returns from which the military books of the year subsequent to 1861-62, the military books of which year are now completed, have to be prepared.

(No. 79.)

Extract Fort William Military Proceedings for April 1865.

Memorandum, No. 1650 B.

No. 4649, dated 12th November 1864.

The undersigned begs to submit the accompanying letter, as per margin, from the Controller of Military Accounts, forwarding a communication from Lieutenant Colonel G. M. Hill, the military accountant, containing explanations and observations regarding the opinions expressed, and statements made in the Report of the Commissioners of Inquiry into Indian Accounts, and praying that Government will exonerate him from the charge of laxity so publicly brought against him, which he considers calculated to prove prejudicial to his interests and character as an official of Government.

2. The undersigned has reported on these charges in Memorandum No. 1457 B, of the 20th instant, and will now confine himself to the expression of his opinion that the grave charges embodied in the Commissioners' Report, which imply inefficiency, ignorance, and neglect, are unmerited, and to recording his sense of Lieutenant Colonel Hill's zeal, great assiduity, and earnest attention to his duties, to the efficient performance of which he brings the advantages of practical training and long experience in the Account Department.

3. The military accountant is the only real officer of account, in its strict sense, in the Military Account Department, all others being superintending, auditing, compiling, or disbursing officers. But he has heretofore been in a great measure tied down to a system which existed when the military accounts were prepared in the Civil Account Department; and after their transfer, as they had finally to be incorporated in the civil or general accounts with which they had consequently to correspond, no change in principle was permissible.

4. Lieutenant Colonel Hill received the accounts from the Civil Department in 1861, generally and considerably in arrears, and whilst he had subsequently to struggle against that great drawback, the current work of his office was heavy, and he had to introduce and carry out many changes.

5. The Handbook, or Guide for Military Disbursing Officers, which he prepared in 1862, is in itself a disproof of the charge of laxity.

6. Considering the difficulties Lieutenant Colonel Hill has had to contend with, the undersigned is of opinion that it is creditable to that officer to have conducted the duties of his responsible office as he has done.

7. The Controller observes that "it is to be regretted that Lieutenant Colonel Hill's explanation regarding the accounts of the advances repayable, deposits, and inefficient balance, could not have been given to Mr. Whiffin at any of his visits to the military accountant's office, or to the Commissioners, at their final visit, when enquiry regarding these statements was being made, and when the replies to the question connected with them were not very conclusive."

8. The undersigned cannot concur in this view. He believes that on the only two occasions on which Colonel Hill saw either of the Commissioners, he was not aware of the particular object of their enquiries, or the precise nature of the information required; and it is evident that the Commissioners to some extent misunderstood such explanation as he did offer.

9. The undersigned would especially desire to bring to notice that the officers of the Military Account Department generally were unfortunately and peculiarly placed as regards the Commissioners' Report. They were aware that an enquiry was to take place, although no official intimation on the subject was ever made; but

but of the nature of that enquiry, or the mode in which the report was to be prepared and submitted, they were generally ignorant. Every facility was given to the Commissioners to make enquiries or obtain information, but the undersigned believes that, like himself, the officers of the department generally imagined that the Commissioners were merely desirous and endeavouring to make themselves personally acquainted with the system and the details of business as carried on preparatory to the receipt of regular orders for an enquiry, to an official conference with the principal officers of the department, and to the submission of a report based on information officially obtained, and in communication with the responsible head of the department.

10. The undersigned never imagined that agents would be employed to enquire into and report upon the working and system of the Military Account Department without being placed officially in communication with himself, or without any intimation to the Military Department; and he was greatly surprised when he heard that report had been so prepared and submitted, and more so when he read that report, and found so many inaccuracies of statement and deduction; but he was most deeply pained as well as surprised, when he heard that this report, so damaging to the character of the Military Account Department and its officers, was published in the "Gazette of India," without an opportunity of explanation or refutation being afforded to any of the officers so deeply concerned.

11. As regards Lieutenant Colonel Hill, the result has been that publicity has been given to opinions of dissatisfaction and to much implied censure, which the undersigned has felt it his duty to record that he considers unmerited.

(signed) *A. Broome*, Colonel,
Accountant General, Military Department.

Military Department, Account Branch,
28 January 1865.

(No. 84.)

MINUTE by Sir *C. Trevelyan.*

I MUCH regret that Lieutenant Colonel Hill, whose merits as a public officer are generally acknowledged, has suffered any annoyance, but I cannot admit that the Commissioners of Inquiry deserve the reflections which have been cast upon them.

It was well known that the Commissioners were making inquiries with a view to report upon the public accounts, and that while Mr. Foster was giving his particular attention to the civil accounts, Mr. Whiffin, who had special qualifications for this purpose, had taken up the subject of the military accounts. The mode in which they conducted their investigation was by applying to the heads of the different offices, and they received their information either from them or from subordinate officers to whom they were referred by the heads of offices.

It is evident, from paragraph 203 of the report, and the second paragraph of the letter from the Controller of Military Accounts, dated the 12th of November last, that the points upon which Colonel Hill is alleged to have been misrepresented, formed the subject of personal inquiry from that officer, and that the information received at the time did not remove the objections which were entertained. The Commissioners accordingly reported upon the state of the accounts as they had been presented to them.

Since that, Colonel Hill has furnished further explanations. These may be accepted as satisfactory as regards Colonel Hill, but they do not inculpate the Commissioners, who reported correctly according to the information before them. A great deal of Colonel Hill's statement turns upon the accounts of subsequent years, which had not then been furnished. The latest account which had been completed when the Commissioners made their inquiry having been that for 1860–61.

I have confined myself to these general observations, for Mr. Whiffin alone can speak with a full knowledge of the subject, and it would be unfair to him to judge him in his absence without his having an opportunity of putting the matter

in its true light. It was unfortunate that he had to return to England immediately after the report was made. This was rendered necessary by the urgent call for his services in his own office.

In ordering the publication of the report, the Government by no means accepted all its statements as final. Certain improvements were ordered as being immediately practicable, while on other points suggestions and explanations were called for; this is in accordance with the usual practice on such occasions. If no publication of such reports took place until every person concerned had said all he had to say upon them, tne public business would be indefinitely obstructed.

(signed) *C. E. Trevelyan.*

4 February 1865.

(No. 85.)

MINUTE by Major General Sir *R. Napier*, K. C. B.

A PERUSAL of the 12th section of the Report of the Commissioners on the system of Audit and Account in the Military Department, and of the explanations of Lieutenant Colonel Hill, Military Accountant, Colonel Atkinson, Controller, and Colonel Broome, Accountant General, will, I think, clearly show that the Commissioners, on a hasty and superficial view of the accounts, and from failing to take the obviously necessary steps for communicating with the heads of offices, have fallen into very egregious errors, and have passed a most unjust and improper censure on the military accountant.

So far from deserving the censure passed on him, Lieutenant Colonel Hill joined his office when it was greatly in arrears, and by very assiduous labour has made them disappear, with the exception of a very small balance.

The charge made against Lieutenant Colonel Hill, that he was trying to obtain control over work not belonging to him, whilst he was overlooking his own proper duties, is so clearly refuted by the instructions of Government, which Lieutenant Colonel Hill quotes, and could so easily have been explained, had any explanation been sought, that it is utterly inexcusable.

It might, and no doubt will, be urged that reforms are not made by soft representations, nor errors of long standing corrected except by plain speaking; but admitting this, when the implicit confidence of Government is placed on such a commission as that which has been imported from England for the improvement of the Indian accounts, the members of the Commission are especially bound to use every means in their power to obtain correct information, and to avoid acting on hasty impressions.

Had the Commission conducted the inquiry into the military accounts in the same liberal manner that was observed with the public works accounts, by inviting all the heads of departments to co-operate with them in promoting the necessary reforms, the service required by Government would have been much better performed.

I venture to submit that it is very much to be regretted that, by the publication of the report, the very caustic censure on Lieutenant Colonel Hill has been published throughout the whole of India, and I think the Government is bound to make the reparation due to that officer as public as the censure.

The Government cannot expect to be well served, if its experienced and faithful servants are treated with so little consideration.

(signed) *R Napier.*

(No. 86.)

OFFICE MEMORANDUM from Colonel *H. W. Norman*, C. B., Secretary to the Government of India, Military Department, to the Accountant General, Military Department. (No. 271, dated Fort William, 7 April 1865.)

IN returning the papers received with his Memorandum, No. 1650 B, of the 28th January 1865, regarding the statements made in the Report of the Commissioners of Inquiry into Indian Accounts, with respect to the Military Accountant and his office, the secretary in the Military Department is desired to request

request that Lieutenant Colonel Hill may be informed that the explanation he has afforded in the matter is considered entirely satisfactory, and that in the opinion of the Government of India he has performed the duties of his office in a perfectly efficient manner.

2. At the same time it should be intimated to Lieutenant Colonel Hill that it is not deemed expedient to issue any general order to this effect, Government never having adopted as its own sentiments the opinions of the Commissioners as contained in their report published in the "Gazette of India" of the 13th October 1864.

(No. 271 A.)

Copy of the above forwarded to the Financial Department, for information.

Copy Military Letter from the Government of India, dated 8 April 1865 (No. 176).

The accompanying correspondence relates to the statements made by the Commissioners of Inquiry into Indian Accounts in their report with respect to the military accountant and his office, and to the explanation afforded by Lieutenant Colonel Hill, which is deemed entirely satisfactory.

Proceedings for April 1865, Nos. 79 to 86.

Extract Financial Letter to the Government of India, dated 17 August 1865 (No. 190).

Military Letter, dated 8 April 1865 (No. 176).

11. I am glad to observe that the explanations of the military accountant, Lieutenant Colonel Hill, in regard to the censure passed upon him in the report of the Commissioners of Inquiry into Indian Accounts, were considered by you to be entirely satisfactory.

(signed) *Russell.*

EAST INDIA (MILITARY FINANCE, &c.).

FURTHER RETURN to an Address of the Honourable The House of Commons, dated 3 July 1865;—*for*,

PAPERS RELATING TO MILITARY FINANCE, &c. (EAST INDIA).

PROCEEDINGS of the Government of India in the Financial Department, dated 20th December 1861.

(No. 186.)

From the Military Finance Department to the Secretary to the Government of India, Financial Department (No. 753 A) dated Calcutta, 7th September 1861.

I HAVE the honour to acknowledge the receipt of extract proceedings of the Government of India, in the Financial Department, No. 8106, dated 29th June 1861, with documents connected therewith, as per margin, approving of the recommendation of the Military Finance Department for a local audit of the accounts of the Hydrabad and Nagpore forces.

Resolution, Financial Department, dated 22d April 1861.
Extract Proceedings, Military Department, No. 1, dated 1st June 1861

2. The plan proposed by this department to effect the object in view was to abolish the appointment of Military Secretary to the Resident at Hydrabad, and from the saving thus effected to provide the money necessary for the payment of an officer as controller. A local examiner was also to be provided, thus requiring an additional officer; but the paymasterships at Secunderabad and Nagpore were to be reduced in importance and cost.

3. The Auditor General of India, however, does not fully concur in the proposed plan. That officer, in paragraph 3 of his report on this subject, as per margin, remarks, that it would be contrary to sound principle to permit the duties of check and adjustment to be carried on by a single officer, especially in a distant province like Hydrabad, and that the work would be insufficient to give full employment to two officers. This objection would appear to some extent to be made under a misapprehension of the scope of the recommendation of this department, as the controller of military finance at Hydrabad would not be exclusively the officer to perform the duties of check and adjustment over the accounts, nor was he intended to be the officer merely to transmit the accounts to the offices of accounts at the respective presidencies; but his duties were to consist in inquiring into the sources of expenditure, and in ascertaining that the accounts are rendered to the examiner, and thereby ensuring promptitude and regularity in the audit of the expenditure, and in the punctual transmission of the audited accounts. These accounts, comprising an expenditure to the extent of 100 lacs of rupees per annum for the regular and irregular forces in Hydrabad and Nagpore, would, if subjected to systematic and close inspection, doubtless afford sufficient employment for one examiner and controller; and it was specially with the view of guarding against local influence, that the responsibility was extended to two officers, instead of being confined to one. The extent of duty of the controller would also necessarily be augmented by his having to discharge the duties of a Deputy Auditor General for the accounts of the Civil Department, as stated in the resolution of Government approving of the plan.

No. 454, dated 19th July 1861.

4. I still consider the original arrangements proposed by this department to be well adapted to the circumstances of the case; but as this is such a proposal that, unless the general and full concurrence of all officers concerned can be obtained, it is not desirable to carry it into effect, and looking into the difficulties

and objections raised with respect to the change, I am of opinion that it would probably be better to let all the military accounts of Nagpore and Hydrabad, including those of the regular as well as the irregular forces, be audited by the Madras pay examiners, under the orders of the controller of military finance at Madras, forwarding to Calcutta from Madras the audited accounts connected with the Hydrabad Contingent and irregular forces, for final adjustment in any office which may be decided by the Government of India.

5. In order to simplify the mode of estimating for these forces, as also to bring their expenditure more legitimately within cognizance of the controller of military finance at Madras, I would suggest that the two regiments of the Nagpore force be at once merged in the Madras army, and their cost estimated for and paid out of the funds of the military estimate of that presidency. I have no hesitation in stating that there can be no possible difficulty in determining the position which the commissioner at Nagpore would hold in respect to the employment of the two regiments. This could be settled in an hour's conference between the commissioner and the brigadier.

6. Should this modified proposition meet with the approval of Government, I would recommend that the necessary instructions to this effect be at once issued to all the officers concerned.

(No. 187.)

From the Military Finance Department to the Secretary to the Government of India, Financial Department (No. 797 A); dated Calcutta, 14th September 1861.

I HAVE the honour to acknowledge the receipt of Resolution, No. 10,887, dated 5th September 1861, and to submit to Government that I have, in my letter, No. 753 A, dated 7th September 1861, laid before Government the views I entertain on the subject of auditing the accounts of the Hydrabad Contingent; and I have only to add that there is nothing novel in the proposal now submitted by Mr. Temple and Colonel Davidson, the mode of examining the Hydrabad accounts, as now proposed, being exactly the same in character as that which Colonel Davidson formerly suggested, when he stated that his military secretary was so little employed that he could devote his time to the audit, and therefore proposed to constitute his military secretary the auditor, in order to retain the audit of his own expenditure under his control. The only difference is, that he ceases to urge the employment of the military secretary, but proposes the appointment of a separate officer as examiner, at an expense of 15,000 rupees a year.

2. The various objections urged in this joint report, about confiding the duty to an independent examiner, whether at Bombay or Madras, are the same as Colonel Davidson before urged, and have already been decided by Government as having no real foundation. I submit to Government that, if the examiner understands his duties, and can read an order, he is able to decide whether the expenditure is conformable to the order; and if the Resident has authority from the Government of India to issue orders incurring expenditure, it is the duty of the examiner to respect those orders, and to see that the officer who disburses money or stores acts in accordance with the orders.

3. The report now under reference contains so many mistaken views about auditing expenditure, that it would occupy the time of Government unnecessarily by my reporting on or explaining the misconceptions.

4. I promise Government that if the arrangements suggested in my letter, No. 753 A, dated 7th September 1861, are carried out, there will be no difficulty after the first few months in having all points on which differences may arise rightly settled; but I venture to hope that if Government approve of the views, they will see fit to inform the Resident at Hydrabad that the arrangement is a settled affair, and that every officer of Government must do his best to ensure its efficient working, and with such a distinct intimation of the intentions of Government I see no reason for expecting difficulty.

5. I beg to return the report in original, as received.

(No. 188.)

From the Officiating Auditor General of India to the Secretary to the Government of India, in the Financial Department (No. 801); dated Fort William, 16 September 1861.

I HAVE the honour to acknowledge the receipt of Extract of Proceedings, No. 10,886, dated 5th instant, with annexures, on the subject of the Hydrabad and Nagpore accounts, and to submit the following remarks:

2. The arrangement recommended by Mr. Temple and the resident at Hydrabad, in their memorandum dated the 10th ultimo, appears to be very similar to that proposed by Mr. Drummond in his report of the 20th July last, No. 454, viz., that an examiner should be appointed at Hydrabad, by whom the expenditure, both civil and military, connected with the Hydrabad Assigned Districts should be audited, the audits being revised by the deputy auditor and accountant general at Madras, to whom the accounts should be submitted for adjustment.

3. The accounts of the Hydrabad Assigned Districts resolve themselves into a debt account of the Government of India. They have hitherto, both civil and military, been rendered to the civil branch of the Office of Accounts, and the only point where they touched the Military Department was in the audit of the charges of the contingent by the Military Auditor General in Bengal, which audit was communicated to the Accountant General to the Government of India for the adjustment of the military disbursements. It is desirable, for many reasons, that this mode of adjustment should be continued, and that the whole of the accounts connected with the Hydrabad Assigned Districts should be kept together, and the financial results worked out as formerly in the same office. It is not desirable, in my opinion, that they should be divided between the civil and military accountants at Madras, and no sufficient reason appears to exist to support the suggestion of the Military Finance Department (in paragraph 5 of report, dated 7th instant, No. 753a), that the military accounts should be sent to Calcutta for adjustment, while the civil portion is adjusted at Madras. The military charges of the Hydrabad Assigned Districts, as connected with a debt account of a definite and local character, are dissimilar to any other military charges in India, and may be exceptionally treated in adjustment; while, at the same time, the military audit is essential, and should a special auditor at Hydrabad not be appointed, might be more conveniently carried out by the Military Audit Department at Madras than in Bengal.

4. The disbursements of the subsidiary force, the troops composing which belong to the Madras Army, properly fall within the cognisance of the military audit and account of the Madras Presidency. The Military Finance Department have recommended that the Nagpore regiments should become a part of the Madras Army, and if this is sanctioned the audit and adjustment of the Nagpore military disbursements will come under the same supervision.

5. In addition to the disbursements of the assigned districts, civil and military, it is proposed to submit to the examiner at Hydrabad the audit of the expenditure entered in the political resident's accounts. The subsequent revision of these accounts by the deputy auditor and accountant general at Madras may remove any doubt as to the propriety of this course; but should an objection be raised on principle, there can be no difficulty in continuing the audit of the political residency disbursements by the Civil Paymaster at Madras.

6. The audit of the Nagpore Civil Accounts should continue as at present at Bombay, where the accounts are adjusted; and I would remark that it is extremely undesirable that the audit should, in any case where it can be avoided, be separated from the adjustment, as in the case of the West Berar district, the audit being at Bombay and the adjustment at Madras. My predecessor proposed, as a matter of convenience to the district officers, that this arrangement should continue, but it has been found objectionable and inconvenient in practice, and I would recommend that it should cease on the appointment of a special examiner at Hydrabad if such be sanctioned, and that the whole of the accounts of the assigned districts should be audited by that officer.

(No. 189.)

No. 129.—Accountant General's Office, Fort William, 4 October 1861.

Copy of the following correspondence, forwarded for the information of the Financial Department, with reference to Officiating Auditor General's Report, No. 873, dated 27th ultimo.

From Lieutenant Colonel *C. Davidson*, C.B., Resident at Hydrabad, to the Accountant General to the Government of India (No. 744); dated 16 September 1861.

Military Department. No. 841, dated 19th Sept. 1861.

I beg to forward a copy of a letter received from the Controller of Military Finance at Madras, intimating his having instructed the examiner of accounts to return all the pay accounts unadjusted since May last to Hydrabad.

This measure seems rather premature; but, in the absence of any orders on the subject, I beg to refer to you for some early and definite instructions in what Audit Department the pay abstract, &c., of the Hydrabad Contingent will be made for the future.

The Examiner of Accounts at Calcutta has now so long had the auditing of the pay of the Hydrabad Contingent, that it would be a matter of great convenience to the public service in continuing the audit in that department, the rules by which he is guided are understood by the officers of the Hydrabad Contingent, and the innumerable references to Government avoided, and their py passed without delay.

The recent changes that have been made in the auditing of the Hydrabad Contingent accounts will throw their adjustment greatly in arrears.

From Lieutenant Colonel *J. McGoun*, Military Auditor General and Controller of Military Finance, Madras, to the British Resident, Hydrabad (No. 841); dated 10 September 1861.

I have ascertained that the transmission of the Hydrabad Contingent accounts to the Audit Office in this Presidency originated in a misunderstanding on the part of the military accountant of certain instructions which he received from the Accountant General during my absence in Culcutta, and as these instructions might have led to the conclusion that it was the intention that the audit should eventually take place here, I addressed the authorities on the subject, but not having received any definite reply, and as great inconvenience must accrue to the public service from their remaining any longer unaudited, I have this day directed the examiner to return them to your military secretary.

I believe it is in contemplation to appoint a controller at Hydrabad, but I have received no instructions or orders on the subject, nor have I any official or private knowledge of the matter beyond the allusion to it in one of the letters of the Military Finance Department to the Government of India.

From *R. P. Harrison*, Esq., Officiating Accountant General to the Government of India, to the Resident at Hydrabad (No. 127); dated 4 October 1861.

In reply to your letter, No. 744, dated 16th ultimo, I have the honour to state that the question connected with the audit and adjustment, from May 1861, of the accounts of the Hydrabad Contingent, is now under the consideration of Government, and that until final orders are passed there is apparently no alternative but to return those accounts at Hydrabad.

A copy of your letter, however, and of my reply have been forwarded for the information of the Government and the Chief of the Military Finance Department.

(No. 190.)

From the Military Finance Department, to the Secretary to the Government of India, Financial Department (No. 1140A); dated 30 October 1861.

With reference to the communications from this department, dated respectively 7th and 14th September 1861, Nos. 753*a*, and 797*a*, upon the subject of the transfer of the audit and adjustment of the Hydrabad and Nagpore accounts from Calcutta to Hydrabad, I have the honour to request that I may be informed whether the decision come to by Government on the subject has been communicated to the authorities at Madras and Hydrabad. I am informed in a letter, No. 12, of 27th ultimo, from the Paymaster Hydrabad Contingent, that the Madras authorities, to whom the accounts have been forwarded, are not prepared to receive them.

I shall be glad to receive a copy of the instructions sent to Madras and Hydrabad.

(No. 191.)

From the Military Finance Department, to the Secretary to the Government of India, Financial Department (No. 4009A); dated 27 November 186 .

Having been furnished with a copy of the report of the Officiating Auditor General of India, on the subject of the audit and adjustment of the accounts of the Hydrabad and Nagpore Forces, in reference to the proposition of this department, as contained in my letter to your address, as per margin, I beg to submit a few observations thereon, for the consideration of Government, as delay in arriving at a decision on this important question, which has already been so long under discussion, will be hereafter seriously felt.

No. 801, dated 16th Sept. 1861.

No. 753*a*, dated 7th Sept. 1861.

2. The Military Finance Department have already been informed that, for want of definite instructions, the audit of the accounts of the Hydrabad Forces are greatly in arrear, the examiners of accounts at Madras having hesitated to undertake the audit of the same, without definite instructions being issued by Government to that effect. I have now arranged to form a separate office to carry on the auditing, pending the decision of Government.

3. The Officiating Auditor General of India, in paragraph 2 of his letter above quoted, has stated that the arrangement proposed in the report of the Resident at Hydrabad and Mr. Temple, "appears to me very similar to that proposed by Mr. Drummond, in his report on this subject of the 19th July last, No. 454, viz., that an examiner should be appointed at Hydrabad, by whom the expenditure, both civil and military, should be audited, subject to subsequent adjustment by the Controller and Deputy Auditor General at Madras;" but a careful examination of the reports will, I think, show that the joint proposition of the resident and Mr. Temple, as pointed out in my letter, No. 797*a*, of the 14th September 1861, was similar in one part, but different in another part, from the proposal submitted to Government, in report from this department, No. 184*a*, dated 22d March 1861.

4. I suggested that there should be a local examiner and controller for the audit and final disposal of the Hydrabad and Nagpore Military accounts, but Mr. Drummond objected to this arrangement, as he conceived there would not be sufficient work for two officers; and he expressed some apprehension about confiding the final adjustment of these accounts to one officer, observing, "it would be contrary to sound principle to permit the duties of check and adjustment to be carried on by a single officer, specially in a distant province like Hydrabad." And it was only as an alternative that he proposed a local examiner for the audit of the accounts, which, however, were to be subject to subsequent adjustment by the Controller and Deputy Auditor General at Madras. This view was in reality a condemnation of my proposal, and from personal communication I accepted it in this light, and consequent thereon, my last proposition (in letter, No. 753*a*, dated 7th September 1861,) was to let "all the military accounts of Nagpore and Hydrabad, including those of the regular as well as the irregular

irregular forces, be audited by the Madras pay examiners under the orders of the Controller of Military Finance, Madras, the audited accounts connected with the Hydrabad Contingent and Irregular Forces being forwarded for final adjustment in any office that may be named by the Government of India." Now, with a difference of opinion, such as Mr. Drummond entertained to my proposal, I think it is a safe course for Government to abstain from making the important changes I advocated. It is to be observed that there is no objection whatever on my part to the final adjustment of the accounts of the Hydrabad Contingent and Nagpore Irregular Forces being effected at the Madras Presidency, but the proposal to have one local examiner is entirely abandoned by me, simply because I think that there is much reason in Mr. Drummond's objection, on the score of local influence being brought to bear on the single officer, and the duty of auditing being at all times an invidious duty, a local examiner would be obnoxious to such influence; the presence of a controller would neutralize such influences, but without this officer, I beg to state that I am decidedly opposed to an examiner being left alone at Hydrabad.

5. This proposition may now be considered to be set aside, but the final adjustment of the accounts at Madras may, as the Officiating Auditor General proposes, be considered suitable under all circumstances; and in order to facilitate the final adjustment of the accounts at the place where audited, the expenses of the Hydrabad Contingent may be included as an appendix to the military estimate, the adjustment of the expenditure being made in any way Government may please to direct.

6. The Officiating Auditor General, in his letter above referred to, states that the accounts of the Hydrabad assigned districts being connected with the debt accounts, he conceives they should be rendered in their entirety to the civil branch of the office of accounts, the intervention of the military department being only required for the *mere audit* of the charges of the Contingent. Mr. Harrison then adds, that this mode of adjustment seems very desirable, as the accounts connected with the Hydrabad assigned districts should be kept together, and the financial results worked out, as formerly, in the same office; and with this object, he proposes that should a special auditor at Hydrabad not be appointed, the audit may be carried out by the Military Audit Department at Madras, that audit being revised by the Deputy Auditor and Accountant General at Madras, to whom the accounts should be submitted for adjustment.

7. I beg to submit to Government that the mode of adjusting audited disbursements ought not to cause any difficulty to the civil account branch, and, in whatever way ordered to be consolidated with other accounts, there is nothing to prevent the military charges of the Hydrabad Contingent being entered in the military estimate and military accounts, and, as such, not only the appropriation of the amount assigned, but the exhibition in the accounts of the audited expenditure connected therewith, must still rest with the Military Finance Department; and as Government have been pleased to appoint special officers at each Presidency to control and account for military expenditure, and have drawn a broad line of demarcation between military and civil accounts, consequently there must be a division of the accounts, unless, indeed, Government intend to modify the usual division between civil and military accounting by practically setting aside the division of duty between the Civil and Military Financial Departments, and assign to the Auditor General a control over both military and civil accounts, a course which I would strongly deprecate as a retrograde and highly inexpedient measure.

8. As regards the Nagpore Force, I have already recommended, in order to simplify the mode of estimating, as also to bring their expenditure more legitimately within the cognizance of the Controller of Military Finance at Madras, that the accounts of this force be merged in the Madras Army, and that the audit of the accounts of the Hydrabad Contingent, as well as those of the Nagpore Irregular Force, be effected at Madras.

9. From all I have observed, I advise Government to adhere to the orders issued, to bring together all estimated charges of India connected with the military service into one general estimate, and to require all military charges to be aggregated in a clear form under suitable heads, as soon as possible after being incurred,

incurred, and after audit. When so collected, the disbursements may be exhibited in statements in such variety of forms as will enable the Government to apply the information in the way needed for administering the affairs of the empire; the only condition to be observed or necessary, in order that the Military Finance Department might supply the information, is an intimation as to what is desired, and the intervention of the civil branch for this duty to be properly performed is not in my view needed.

(No. 192.)

From the Military Finance Department, to the Secretary to the Government of India, Financial Department (No. 4482A); dated Calcutta, 10 December 1861.

REFERRING to my letter about the Hydrabad accounts, I have the honour to enclose correspondence in original, as per margin, about the audit of the accounts of the Contingent, and to state that I have authorised an establishment for the audit of the arrears.

No. 4009A. dated 27th Nov. 1861.
From Controller of Military Finance, Calcutta, No. 2891, dated 2d Dec. 1861.
From Officiating 3d Examiner, Pay Department, No. 46, dated 2d Dec. 1861.
From Military Secretary, to the Hydrabad Resident, No. 1316, dated 12th November 1861.
From Paymaster, Hydrabad Contingent, No. 67, dated 21st November 1861.—(To be returned.)

(No. 193.)

From Colonel *J. Hannyngton*, Controller of Military Finance, Fort William, to the Chief of the Military Finance Department (No. 2891); dated 2 December 1861.

THE accounts of the Hydrabad Contingent, from May to 12th August, and for September and October 1861, having been sent to this office, I have the honour to solicit your early sanction to the entertainment of an extra establishment, as proposed by the Officiating 3d Examiner, for their speedy audit.

2. I believe it was intended that the Hydrabad accounts should be audited at Madras, though the expenditure will continue to be charged as appertaining to Bengal. So much time would, however, be wasted in referring back, that I prefer taking up the audit here.

3. It is very desirable that instructions should be issued for the guidance of the Department at Madras, so that the accounts might be taken over from a fixed date, say 1st January 1862, those up to 31st December being disposed of in this office.

(No. 194.)

From the Officiating Third Examiner, Pay Department, Fort William, to the Controller of Military Finance (No. 46); dated 2 December 1861.

WITH reference to the accompanying letter, No. 67, of the 21st ultimo, from Major T. Gillilan, Paymaster, Hydrabad Contingent, and the enclosure therewith received, I have the honour to state, that as the establishment at my disposal is only adequate for the audit of the accounts of the four circles under my control, I shall feel obliged by your sanctioning an additional establishment as under, for bringing up the seven months' arrears, and carrying on the current duties of the Hydrabad Contingent under the supervision of Khetter Chunder Ghose, auditor, Benares Department, viz.:—

	Rs.	*a.*	*p.*	
1 Auditor	150	–	–	
1 Senior Accountant	50	–	–	
1 Junior Accountant	35	–	–	
1 Copyist	25	–	–	
TOTAL *Rs.*	260	–	–	per month.

(No. 195.)

From Major *T. Gillilan*, Paymaster, Hydrabad Contingent, to the Examiner, Pay Department, Fort William (No. 67); dated 21 November 1861.

I HAVE the honour to report for your information, that agreeably to the instructions contained in the accompanying copy of a letter from the Controller of the Military Finance, Madras, No. 1316, dated 12th November 1861, I have this day despatched to your address, in three parcels, the accounts of this office from May to 12th August, and for September and October 1861, together with their vouchers, &c., as mentioned in the subjoined list.

LIST.

For May 1861 - - -	One military disbursement and index with 69 original abstracts. One supplemental military disbursement with two original abstracts. One European pension disbursement with 32 abstracts in duplicate. One native pension disbursement with nine abstracts in duplicate, and one supplemental native pension disbursement with two vouchers in duplicate.
For June 1861 - - -	One military disbursement and index with 62 original vouchers. One supplemental military disbursement with two original vouchers. One European pension disbursement with 12 abstracts in duplicate. One native pension disbursement with eight abstracts in duplicate. One supplemental native pension disbursement with one passed abstract and one account current with two income-tax statements.
For July 1861 - - -	One military disbursement with 69 original vouchers. One index. One supplemental military disbursement with two original vouchers. One native pension disbursement with 11 abstracts in original. One supplemental native pension disbursement with two vouchers in duplicate, and one European pension disbursement with 39 abstracts in duplicate.
From 1st to 12th August -	One military disbursement with 31 original vouchers. One index. One European pension disbursement with six vouchers in duplicate and duplicate abstracts of native pensioners, paid from 13th to 31st August 1861. Vouchers Nos. 1 to 7. One supplemental native pension disbursement with one voucher in duplicate, and one account current with two income-tax statements.
For September 1861 - -	One military disbursement and index with 69 original vouchers. One supplemental military disbursement with three original vouchers. One European pension disbursement with 24 vouchers in duplicate. One native pension disbursement with seven vouchers in duplicate. One supplemental native pension disbursement with one voucher in duplicate, and one account current with two income-tax statements.
For October 1861 - -	One military disbursement and index with vouchers, Nos. 1 to 64, and 66 to 73 in original. One supplemental military disbursement with three original vouchers. One European pension disbursement with 28 vouchers in duplicate. One native pension disbursement with seven original vouchers. One supplemental native pension disbursement with one voucher in duplicate. One account current with two income-tax statements.

Muster rolls of 1st, 2d, 3d, 4th, 5th, and 6th Infantry, 3d and 4th Companies of Artillery, 3d Cavalry, Store Department, Ellichpoor, dated 2d September 1861; 1st Cavalry, 2d Company Artillery, and 5th Infantry, dated 1st August 1861, and Aurungabad Pensioners, dated 1st July 1861.

(No. 196.)

From Lieutenant Colonel *Thomas McGoun*, Controller of Military Finance, Fort St. George, to the Military Secretary to the Resident, Hydrabad (No. 1316); dated 12 November 1861.

With reference to former correspondence on the subject, I have the honour to acquaint you, that having received no instructions regarding the audit of the Hydrabad Contingent accounts, and feeling that serious inconvenience would accrue from their remaining any longer unaudited, I have despatched the whole of them by the last mail steamer to Calcutta, to the address of Colonel Hannyngton, the Controller of Military Finance there.

2. I shall feel obliged by your causing to be forwarded to Calcutta such portions of them as were transmitted from hence before I received Colonel Davidson's request to suspend action in the matter.

3. It was a mistake on the part of the military accountant here directing these accounts to be sent to this Presidency for audit, and I have been prevented from rectifying it at an earlier period, from being in daily expectation that I would receive some instructions on the subject; but none having reached me, I have been constrained to adopt the course above indicated.

No. 939.—Military Secretary's Office, Hydrabad, 18 November 1861.

Memorandum.

Copy of the foregoing forwarded for the information and guidance of the Paymaster, H. S. Force and Contingent.

(No. 197.)

From the Accountant General to the Government of India to *C. H. Lushington*, Esq., Secretary to the Government of India, Financial Department (No. 190); dated Fort William, 13 December 1861.

Having been informed by the Paymaster, Hydrabad Contingent, that he has despatched to this office, at the instance of the Controller of Military Finance at Madras, the accounts of the Contingent from May to October 1861, I have the honour to request, with reference to the officiating auditor general's report regarding those accounts, dated 16th September 1861, that I may be favoured as early as possible with instructions as to the Presidency and department in which they are to be audited and adjusted; I may add, that no arrangements for their disposal have been made in this office, as it was understood that the accounts of the above force, like the civil treasury accounts of Hydrabad, would, from May 1861, have been submitted to the Madras authorities for adjustment.

(No. 198.)

No. 14,426.—Financial Department, Fort William, 20 December 1861.

Resolution.

His Excellency the Governor General in Council doubts whether it is desirable to pass orders on the above-mentioned subject until Mr. Temple's report on the question of how the accounts of the new central provinces are to be adjusted shall have been received. So much difference of opinion exists on the subject, and the addition of the new central provinces is likely to affect the question so

The Hon. E. Drummond, C.S. Colonel Balfour, R. Temple, Esq., C. S.

materially, that his Excellency in Council resolves that, on the return of Mr. Temple to the Presidency, a committee, composed of the gentlemen named in the margin, be appointed to consider and report upon the whole question as it now stands.

In the meantime his Excellency in Council will express no opinion on any of the points raised, except one, viz., that the accounts of the Hydrabad Contingent shall, like all other military expenditure, be under the Military Finance Department. This principle, his Excellency observes, involves considerations of far more importance than any mere question of accounts, as the undivided control and responsibility of the Military Finance Department, "under the orders of the Supreme Government," in all matters of military finance, is the keystone of the system of economy which has saved India from bankruptcy. The principle must therefore be rigidly maintained, and his Excellency in Council desires that this be impressed upon the members of the Committee above mentioned.

With reference to the letter, No. 4482, dated the 10th instant, from the Chief of the Military Finance Department, his Excellency in Council approves of that officer having, under the urgency of the case, sanctioned the entertainment of an extra establishment for the purpose of disposing of certain arrear accounts (from May to October 1861) of the Hydrabad Contingent, sent by the Controller of Military Finance at Madras to the Controller of Military Finance at this Presidency. It will be necessary, however, that the details of this extra establishment should be reported to this office for registry, and information furnished as to the probable period for which its entertainment will be necessary.

Ordered, that a copy of the above Resolution be forwarded, for information and guidance to—

The Honourable E. Drummond, Auditor General of India.
Colonel Balfour, Chief of the Military Finance Department.
R. Temple, Esq., C.S.

REPORT of the Military Finance Department on the MILITARY BUDGET ESTIMATES for all INDIA, for the Year 1862-63, and the Orders of the Government of India passed thereon.

(No. 22.)

From the Chief of the Military Finance Department, to the Secretary to the Government of India, Financial Department (No. 8335); dated 22d April 1862.

No. 7454, dated 15th January 1862. No. 1711, dated 13th March 1862.

WITH reference to your communications as per margin, I have now the honour to submit, for the purpose of being laid before the Government of India, the Military Budget Estimate of all India, for the year 1862-63, showing that the total cash requirements for the military expenditure of the year, after the revision of all charges in India has been made, will be 12,22,79,186 rupees, which amount is calculated to cover all expenses, inclusive of the value of stores from Europe.

2. The Military Budget Estimates for 1862-3 of the three Presidencies, as at first submitted by the respective controllers of military finance, comprised cash requirements to the extent of 12,68,85,885 rupees, exclusive of the value of Europe stores not hitherto paid for in India, as will be seen from the subjoined abstract.

	Bengal.	Madras.	Bombay.	All India.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Title I. - - - - -	5,55,14,180	2,63,89,386	1,96,80,667	10,15,84,233
Title II. - - - - -	1,38,20,205	64,87,561	49,93,886	2,53,01,652
Total -	6,93,34,385	3,28,76,947	2,46,74,553	12,68,85,885

3. The

3. The sanctioned Military Budget Estimate of all India for 1861-62, exclusive of the cost of Europe stores, amounted to 12,19,75,357 rupees, or in round numbers 1,220 lacs rupees, independently of the special grant of 60 lacs, made in that year, to cover gratuities and other expenses to be incurred before the reductions ordered in May 1861 could be carried into effect. The estimate of 1862-63, as submitted by the controllers, is therefore 49,10,528 rupees in excess of that of the previous year, by the amounts for the several Presidencies as given in the margin; thus showing an excess of 5·50 per cent. in Bengal, 3·29 in Madras, and 1·15 in Bombay.

	Rs.
Bengal -	36,13,422
Madras -	10,16,811
Bombay -	2,80,295
Total	*Rs.* 49,10,528

4. Although for the most part the same description of services are provided for in the military estimates of both years, yet there have been many important changes during 1861-62 affecting the organisation and constitution of the Indian army, in addition to other fluctuations, all of which have tended to disturb previous calculations; and I have no doubt that the several controllers were influenced by these circumstances while conducting the preliminary revision of the estimates 1862-63. These changes, moreover, have caused some alteration in the mode of framing the estimates of 1862-63 as compared with that adopted in the preparation of the previous year's estimate.

5. The organic changes to which I refer are, first, the establishment of the Staff Corps; secondly, the reorganisation of the corps of Indian artillery and engineers; and thirdly, the retirement of Indian field officers and captains on extra pension. The other fluctuations which have affected the military expenditure during the year 1861-62, and which have doubtless influenced departmental officers in the framing of the present estimates, will be found fully set forth in my report, No. 7259 A, dated 18th March 1862; and need not therefore be here recapitulated.

6. With respect to the alteration in the mode of preparing the estimates, I would instance, first, the Financial Resolution, No. 10,258, dated 19th August 1861, directing that all supplies obtained by civil from military departments should be paid for in cash, and which consequently has thrown the provision for such supplies on the civil budget, relieving the military budget to that extent. Secondly, the financial resolutions of the Government of India, as per margin, by which it was ruled that the full pay and allowances of staff officers should be charged to the department in which they are employed, as respects all military, administrative, and executive departments; and further, that the full amount of the staff corps pay of officers employed in the Civil Department should be charged against that department, but that the pay proper of engineer officers and others not belonging to the staff corps, even when employed in the Civil and Public Works Department, should be provided for in the military budget.

No. 14,416, dated 19th Dec. 1861.
No. 14,650, dated 28th Dec. 1861.
No. 912, dated 10th Feb. 1862.

7. I may now advert, briefly, to the financial effect of these changes. In the estimates of 1861-62, a cash assignment, to the extent of 7,97,787 rupees, was sanctioned for the provision of supplies by the military to the Civil Departments, including the marine and Indian Navy, as shown in the margin; but in 1862-63 no such charge appears in the estimates.

	Rs.
Bengal -	16,011
Madras -	1,50,651
Bombay -	6,31,125
	Rs. 7,97,787

8. By the operation of the Financial Resolution, No. 14,416, of the 19th December 1861, charges, which in the estimate of last year appeared under one head, will in this year's estimate appear under another. For instance, the military pay of staff officers employed in military departments is now charged against the departments, instead of against "Regimental Pay and Allowances;" but the aggregate amount of the estimate is not affected thereby.

9. By the order of the 10th February 1862, directing the full amount of the pay of Staff Corps officers employed in the Civil Department to be included in the civil budget, the Military Department, which hitherto was charged with the pay proper of these officers, is now relieved of the same, which, according to the latest returns of the officers so employed, amounts to 6,16,484 rupees per annum, in the proportions for the several Presidencies indicated below :—

	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Amount of which the Military Budget of 1862-63 has been relieved on account net pay of officers in Civil employ who have joined the Staff Corps -	2,04,552	3,09,732	1,02,000	6,16,484

10. By the warrant constituting the Staff Corps, officers on joining it are entitled to receive promotion to the grade of lieutenant colonel after 26 years' service, to that of major after 20 years, and to that of captain after 12 years' service. But as the periods of service required to attain the corresponding grades by virtue of seniority in their corps, have hitherto been much longer than those prescribed by the warrant, it follows that many officers who joined the Staff Corps had already served the period qualifying for promotion to a higher grade, and accordingly attained it at once. In order that the extent of this boon may be fully realised, I subjoin a Table extracted from one which Mr. Secretary Melvill laid before the purchase commission in 1856, showing the period served by officers of the East India service in attaining the above grades :—

	Artillery.	Cavalry.	European Infantry.	Native Infantry.
Longest period in attaining rank of Lieutenant Colonel -	35	43	38	41
Shortest " " " " -	29	26	27	25
Average " " " " -	32	30	31	32
Longest period in attaining rank of Major - - -	34	36	34	32
Shortest " " " - - -	26	27	24	13
Average " " " - - -	30	29	30	27
Longest period in attaining rank of Captain - - -	25	26	26	26
Shortest " " " - - -	11	7	9	6
Average " " " - - -	17	15	14	14

11. The more detailed Table laid before the Commission will afford information as to the length of periods of service, in attaining promotion in the several grades of the different branches of the three armies; the above being only an extract therefrom, merely exhibits the average results as respects the entire Indian Army. From this it will be observed, that officers joining the Staff Corps are allowed to attain the rank of lieutenant colonel at the minimum period of service at which that rank had heretofore been attained, and four years below the average period of service; and the ranks of major and captain in the Staff Corps are also now attainable at periods considerably below the averages of former years. The long period that elapsed before promotion was attained under the old system, no doubt affected the efficiency of the Indian Army; but the extra cost to the State, of the periods being thus abridged, is only 12,15,097 rupees, in the following proportions for the three Presidencies :—

	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Difference between the regimental pay and allowances of officers who joined the Staff Corps and the Staff Corps pay of their rank in that corps -	5,91,608	4,07,112	2,16,377	12,15,097

12. It has to be noted, however, that, owing to the retirement of Indian officers on the extra pension, the course of regimental promotion has been so rapid of late, that many officers who obtained promotion by joining the Staff Corps would have obtained similar advancement had they remained attached to the cadres of their regiments, and some few would have attained even greater promotion.

13. In the Madras Presidency there is one major of cavalry belonging to the Staff Corps, who, had he remained with his regiment, would now be a lieutenant colonel. There are also about 25 majors now of the Staff Corps, who, if they had remained with their original corps, would equally have attained that rank; and there are 37 officers promoted to the rank of captain in the Staff Corps, who would have by this time attained that rank in the cadres of their own regiments. The effect of this is, that out of 198 officers promoted on the formation of the Staff Corps, dating from 18th February 1861, a step has in one instance been virtually lost by joining the Staff Corps, and in 62 instances no additional promotion has been obtained thereby.

14. It

14. It would require a tedious calculation to ascertain precisely the number of promotions, and losses of promotion, in the armies of the three Presidencies consequent on officers entering the Staff Corps, and I trust Government will excuse my entering on it; but judging from what has occurred in the Madras Army, with which I am most familiar, the result is, as above stated, that out of an aggregate of 198 promotions, one should be deducted as lost, and 62 as neutralised, the total number being about 30 per cent. on the promotions originally made; and applying this percentage to the amount shown as the extra cost arising out of the formation of the Staff Corps, the financial results may be stated as below:—

	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Extra cost by formation of Staff Corps -	5,91,608	4,07,112	2,16,377	12,15,097
Deduct 30 per cent - - - -	1,77,482	1,22,133	64,913	3,64,528
Net extra expense - - - *Rs.*	4,14,126	2,84,979	1,51,464	8,50,569

15. From this illustration Government will perceive, that with the lapse of every year, officers who obtained promotion on entering the Staff Corps will be advanced in the cadres of their own regiments, and the extra expense will consequently gradually diminish; but inasmuch as the promotion to the higher ranks is more rapid in the Staff Corps than in cadres of regiments, any extra expense incurred is due mainly to the desire of Government to obtain officers of rank younger in age than before, and thus improve the efficiency of the army.

16. By the re-organisation of the Corps of Artillery and Engineers, the Estimate of 1862-63 has to bear an additional charge of 2,44,133 rupees, in proportions as indicated below for the three Presidencies:—

	Artillery.	Engineers.	Total.
	Rs.	*Rs.*	*Rs.*
Bengal - - - - - - -	91,519	23,345	1,14,924
Madras - - - - - - -	48,828	11,336	60,164
Bombay - - - - - - -	44,250	24,795	69,045
Total - - - *Rs.*	1,84,657	59,476	2,44,133

17. By the retirement of the Indian officers of the three Presidencies, who accepted the extra pension while serving in India, the Indian Military Budget has been relieved of a charge amounting to 9,83,395 rupees net, that is irrespective of any calculation for officers absent in Europe who retired, and whose pay is not estimated for in India, and exclusive also of the promotions which followed, in the proportion of one for every two lieutenant colonels retired.

	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Saving by retirement - - - -	6,71,481	7,47,468	2,45,029	16,63,978
Deduct for promotion - - - -	3,03,154	2,76,885	1,01,544	6,81,583
Rs.	3,68,327	4,70,583	1,43,485	9,82,395

18. This large saving, while it reduces the cash disbursements in India, increases the Home charges, as the pensions, both ordinary and extra, have to be paid in England, and if these pensions be made a set-off against the saving in pay and allowances, the one will be found to neutralise the other; but the economy of the measure will become apparent as casualties occur.

 19. Among

19. Among the more prominent causes of the fluctuations in the military charges during the year 1861-62, are the three following:—

Firstly, the return of troops from China, not provided for in the budget for 1861-62, but of which the officers of the Military Finance Department of the three Presidencies had full cognizance, prior to the preparation of the estimates of 1862-63. In consequence of this arrangement, the estimates of 1862-63, as originally submitted by the controllers, included provision additional to that of the preceding year, for the maintenance of two regiments of Native Infantry, one at Madras, and one at Bombay, amounting to three lacs in pay and allowances, or, all expenses included, at 250 rupees per man per annum, to 3,56,000 rupees.

Secondly, the modifications in departmental establishments, from which a net saving has accrued. Among these are the Bengal Ordnance Department, the establishment of which was revised by Government Order, No. 724, dated 19th August 1861, yielding a saving of 1,28,992 rupees; of which amount, however, 71,511 rupees will remain unrealised, or will only be realised in a very small per-centage during 1862-63, owing to the existence of a large number of supernumeraries now in course of absorption, and to the pay proper of officers having been added to the departmental charges. The net saving is, therefore, only 57,481 rupees. The establishments of the Bengal Commissariat Department have also been revised, from which a net saving of 87,592 rupees has accrued. The revision of the establishments of the Bengal Pay Department will be noticed hereafter, in connexion with those of the Military Finance Department.

Thirdly, the fluctuations in the number of officers absent in Europe.—In Bengal, the deduction from the Indian charges is 1,20,990 rupees above that of last year, more officers being absent this year; in Madras, the estimate of 1862-63 bears a charge additional to that of 1861-62, of 66,297 rupees, in consequence of fewer officers being absent in England; but in Bombay the difference is strikingly great, as the estimate of 1862-63 is relieved of a charge of 4,66,853 rupees on this account, in consequence of the number of officers absent in Europe being considerably greater than when the estimates of 1861-62 were prepared.

20. All these changes were known prior to the preparation of the estimates of 1862-63, and as it is apparent from the subjoined summary, that their general effect has been to decrease, rather than increase the estimated expenditure of 1862-63, as compared with 1861-62, the actual causes which have led to the submission of estimates, amounting to half a million sterling in excess of those for the preceding year, must be sought in other circumstances, and not in the changes affecting personal allowances; and these causes, I trust, will be found accurately traced below:—

Summary.	Reductions.	Additions.
	Rs.	*Rs.*
Cash assignments borne by the Civil Budget in 1862-63	7,97,787	—
Pay proper of Staff Corps officers employed in Civil Department	6,16,484	—
Constitution of Staff Corps	-	8,50,569

Troops returned from China	-	3,56,000
Revision of establishments	1,45,073	—
Officers absent in Europe, Bengal	1,20,990	—
" " Madras	-	66,297
" " Bombay	4,66,853	—
Grand Total *Rs.*	31,29,582	15,16,999
Net Decrease *Rs.*	16,12,583	

21. I have next to notice the effect upon the military budget estimate of those alterations in the organisation and strength of the European and native military forces in India, recently decided on by Government, and announced in letters from the Military Department, dated 10th January 1862, to the Madras Government, and No. 356, dated 10th April 1862, to this department, but of which the controllers at the three Presidencies had no official cognizance at the time of framing of estimates. These alterations may be stated in order as follows: the reduction of

of two companies of Madras Sappers, and eight regiments of Madras Native Infantry, and the decision that the European Cavalry in India shall be reduced from eight to six service troops of 70 privates each, or 485 non-commissioned rank and file per regiment, have had the effect of reducing 100 men in each regiment, or 1,100 European cavalry soldiers in all India. I would here beg to mention, however, that the estimate of 1861-62 (*vide* Report, No. 794 A, of the 8th October 1861, para. 16), clearly shows that the establishment of the European cavalry for India was calculated at only nine regiments of 500 sabres each, total 4,500; but the establishment now proposed, while allowing a reduction of two troops per regiment, and decreasing the numerical strength from 585 to 485, in lieu of 500 estimated for in 1861-62, still retains 11 regiments, or two in excess of the number estimated for in the previous year, as also an excess of 835 non-commissioned rank and file.

22. It has also been decided that one regiment European infantry be sent home next cold season, thereby reducing the establishment of corps to 55, or one below the number estimated for in 1861-62 (*vide* para. 15 of Report, No. 794A, dated 8th October 1861); but this number is still one in excess of the complement proposed in para. 119 of my Report, No. 7259A, dated 18th March 1862. One regiment of Bengal Native Irregular Cavalry is to be reduced, and the Bombay Native Cavalry re-organised from 12 into nine regiments, of 420 sowars each. The complement of horses in European cavalry regiments is now fixed at 5 per cent. below the strength, instead of 15 per cent. as before. Provision has also been made in the estimate of 1862-63, for the payment of six officers in each regiment of native cavalry and infantry.

23. The orders of Government, contained in the same letter, respecting the Lahore Light Horse and the East Indian regiment, do not affect the budget estimate of 1862-63, the present effective strength being nearly equal to the now declared established strength; nor can any accurate calculation be made respecting the extent of the proposed reduction in the Native Infantry of the Bombay Army, until the decision of the Government of Bombay is made known.

24. The financial effect of these reductions will, according to the data on which I based my representations in Report, No. 7259A, dated 18th March 1862, be as follows:—

	Rs.	*Rs.*
I.—Reduction of eight regiments Madras Native Infantry, and two companies of Sappers - - - - -	9,73,428	
II.—Reduction of 22 troops, or 1,100 European cavalry soldiers, retaining the officers extra for one troop, or a regiment of six troops, with officers for seven troops, at 75 *l.* per man, all charges included - - -	8,25,000	
III.—Reduction of one European infantry regiment, all charges included - - - - - - - -	7,50,000	
IV.—Reduction of one regiment, Bengal Irregular Cavalry, at 45 *l.* per man - - - - - - - -	2,24,000	
V.—Re-organisation of Bombay cavalry, that is, a reduction from 4,692 of all native ranks to 4,491 of all native ranks, or 201 men at 45 *l.* per man - -	90,450	
		28,62,878

25. This calculation is, however, open to modification, pending the completion of the new organisation on account of the Bombay cavalry, and the following reductions will require to be made:—

Extra Provision for Doing Duty Officers:			
Bengal -	Cavalry - - - - - - - - -	42,240	
	Infantry - - - - - - - - -	67,200	
Madras -	Cavalry - - - - - - - - -	—	
	Infantry - - - - - - - - -	22,400	
Bombay	Cavalry - - - - - - - - -	11,880	
	Infantry - - - - - - - - -	15,000	
			1,58,720
This leaves an apparent net saving of - - - *Rs.*			27,04,158

and deducting this amount from the excess of 49,10,528 rupees in the Controller's

troller's Budget Estimates of 1862-63, over the amount of the sanctioned estimate of 1861-62, there still remains an excess of 22,06,370 rupees to be accounted for.

26. I now proceed to show in some detail, the process of revision that the estimates have undergone, and by which I have been enabled to reduce the aggregate to the sum stated in paragraph 1 of this report, viz., 12,22,79,186 rupees for all India ; and I wish it to be noted that every allusion to the estimate of 1862-63 has reference to that estimate as revised by this department, unless special mention is made of the estimates as originally submitted by the controllers.

Bengal.—The charges personnel (Title I.) entered in the estimate of 1862-63, as submitted by the controller, aggregated 5,55,14,180 rupees; and those in the estimate of 1861-62 amounted to 5,53,32,043 rupees, indicating an excess of only 1,82,137 rupees, or about one-third per cent. I have already remarked, that independently of the reductions in the military strength recently ordered by Government, the general tendency of the changes that occurred during 1861-62 was rather to diminish than augment personal charges.

27. On analysing the estimates I find it necessary to make the following observations regarding the several arms.

28. European Artillery.—The full numerical strength of this arm has been estimated for, but the estimate is not arranged in conformity with the new organisation to be given to this arm of the service, viz., 39 Field Batteries, including 13 Horse Artillery Troops at 140 men, and 16 Reserve Batteries at 75 men, as the orders of Government are still required for the completion of this arrangement. The estimate annexed shows a net increase on account of European Artillery of only 15,922 rupees, but the actual increase, on account of the larger numerical strength, as compared with 1861-62. is about 87,646 rupees. The reason for the full amount of the increase not appearing opposite this head, is, that "Family Allowance" and "Head Money," (amounting respectively to 50,520 rupees and 21,204 rupees,) which were in last year's estimate included under the head "Regimental Pay and Allowances," have in the present year's estimate been exhibited separately; the former under Y "Benevolent Allowances," and the latter under Q "Medical Department." Besides the above, the five heavy batteries ordered in 1861 to be formed have imposed an additional annual expenditure of 84,811 rupees.

29. Native Artillery.—The difference between the estimates of 1861-62 and 1862-63, for this arm, is unimportant; the slight net increase in the latter, 13,048 arising mainly from omissions in the estimate of 1861-62. It will be observed, on reference to the annexed estimate, that the maintenance of the Assam Artillery costs 18,039 rupees per annum ; and I submit, for the consideration of Government, whether this military body need be kept up.

30. European Cavalry.—The net reduction in pay and allowances alone indicated in the present estimate, as compared with the amount entered in the estimate of 1861-62, is 3,94,626 rupees. The reduction of 14 troops (without officers), and of the officers of seven troops, as ordered by Government, will yield a saving of 4,33,459 rupees; and as family allowance and head money, amounting to 77,770 rupees, which were included last year, are excluded this year, the total reduction is 5,11,229 rupees. An addition of 1,16,603 rupees has however to be made on account of an increase in the effective strength of the three newly formed cavalry regiments; leaving the net reduction above stated viz. 3,94,626 rupees.

31. Native Irregular Cavalry.—In framing the estimate 1862-63, the sum of 3,81,756 rupees has been added by the controller of military finance, in order to provide for the increased rates of pay of the native cavalry granted under the order of the 31st May 1861. The decision of the Government of India, under date the 10th April 1862, to reduce one regiment of native cavalry, will allow of a reduction of 2,24,000 rupees (*vide* paragraph 25), and adding to this the amount saved in the estimate of 1862-63 by the retirement of officers (62,358 rupees), there remains a net increase of 95,398 rupees on account of native cavalry, over the expenditure of 1861-62.

32. European

32. European Infantry.—It will be observed, on reference to the estimate, that there is a nominal decrease by transfers of nearly four lacs on account of this arm, which is made up of the following items :—

	Rs.
32 Regiments Her Majesty's British Infantry.	
Family allowance charged separately this year - -	1,32,252
Head money allowance under Medical Department -	97,806
Good-shooting pay - - - - - - -	2,232
Victoria Cross - - - - - - - -	1,872
Good-conduct pay - - - - - - -	50,724
3 Regiments Bengal European Infantry.	
Family allowance charged separately - - - -	18,264
Head money allowance under Medical Department -	6,261
Difference by proper pay of officers employed in Departments and on staff being charged to Departments this year - - - - - - -	90,195
Rs.	3,99,606

33. East Indian Regiment.—There is an increase of 13,866 rupees on account of increased effective strength during the past year, and a decrease of 3,738 rupees, by the transfer of family allowance; leaving a net increase of 10,128 rupees.

34. Native Infantry.—The net decrease in the sum shown as the cost of Native Infantry, as compared with the previous year, amounting to 4,40,073 rupees, is attributable partly to the circumstance that the pay proper of officers employed in the general army, or departmental staff, is now charged under those heads, and partly to the retirement of officers on the extra pension. The full amount of the saving on account of the retirement of officers of the infantry branch of the service is 3,05,967 rupees, but this should properly be apportioned among the European infantry, the unemployed officers who were separately estimated for, and those attached to Native infantry corps in 1861-62.

Engineers.—The increase on account of the pay proper of the officers of engineers is 16,423 rupees, in 1862-63, but the additional liability, on accou n of the re-organisation, is 23,345 rupees. The difference is trifling, and is owing to the ordinary fluctuations in the number of officers absent in Europe, &c.

36. In connection with the corps of engineers I have to note, that there is a sum of 33,909 rupees charged in the military budget, on account of non-commissioned officers and privates doing duty with the Public Works Department. The Audit Board have represented to Government, that the position of these men is analogous to that of officers in the Staff Corps, and that the whole of their pay should be charged against the department in which they are employed. This conclusion is obviously correct, but pending definite orders from Government, I have allowed the amount to stand in the military estimate.

37. Sappers and Miners.—There is decrease of 38,675 rupees, owing to the absorption of a large number of supernumeraries.

38. General Army Staff.—On reference to the estimate it will be observed that there is increase under every minor head of this chapter, amounting in net 1,37,677 rupees. This increase is caused entirely with but one exception, that being the case of the Assistant Adjutant General of Cavalry, whose pay, regimental and staff, is an additional charge under this head, by the operation of the Order of 19th December last, by which it was ruled that the full pay of officers, departmentally employed, should be charged against the respective departments. These additions, with the exception noted above, are in effect mere transfers, and therefore have not increased the total expenditure as compared with last year.

39. On the other hand, the reductions under this head amount to 30,989 rupees, a small saving of 3,989 rupees accruing from the difference between the regimental allowances of the private secretaries to the lieutenant governors of Bengal, the North-Western Provinces and the Punjab, charged to the Civil Department, and the additions of the pay proper as a departmental charge of their aides-de-camp. The other reduction is by the abolition of the office of the Quartermaster General, British forces, viz., 27,000 rupees per annum, and this is a *bonâ fide* decrease of expenditure.

40. Garrison and Cantonment Staff.—There has been an increase of 1,67,684 rupees in consequence of the transfer of the pay proper under this head; and a decrease of 51,836 rupees on account of the modification in the brigade commands. The former is a mere transfer entry, whilst the latter is *bonâ fide* saving.

41. Office Establishments of General Army Staff.—The increase under this head, over the amount estimated for 1861-62, is 50,608 rupees, which is attributable chiefly to the extra batta granted to officers, and the deputation allowance made to the establishments while at Simlah; also to house rent at Simlah, and other such charges consequent on the movements of Army Head Quarters Staff; and a reference to the estimate will show the amount of increase in each branch. The increase in this case is *bonâ fide*, but is reduced to the extent of 7,800 rupees by the abolition of the office establishments of the Quartermaster General and Assistant Adjutant General of Artillery, British forces.

42. I would beg here to refer to para. 140 of my report, No. 7269A, of the 18th March 1862, in which I wrote as follows:—

"The general Army Staff of the Bengal Presidency, instead of being reduced in proportion to the army strength, has, on the contrary, in the instance of the Assistant Adjutant General of Cavalry, been actually increased; and the appointments of officers, in the Quartermaster General's Department, who were officiating, have, by letter of the Secretary to Government, Military Department, No. 630, dated 16th November 1861, been recognised as permanent. The general Army Staff in the Madras and Bombay Presidencies is also susceptible of reduction, but not in the same degree as in Bengal."

43. Military Finance Department and Office Establishments of ditto.—The financial effect of the change made during 1861-62 in the organisation of the Departments of Pay and Audit, will best be represented by the following detail:—

	1861-62.		1862-63.	
	Staff Pay.	Regimental Pay and Allowances.	Staff Pay.	Regimental Pay and Allowances.
	Rs. a. p.	*Rs. a. p.*	*Rs. a. p.*	*Rs. a. p.*

			44,600 – –	1,505 – –

44. The above Table shows a net increase of 44,600 rupees, but a more favourable result might be presented, if the changes affecting the three Presidencies be taken into the calculation.

45. *Barrack Department.*—The amount included under Title I. in the Estimate of 1861-62, on account of the Establishments of the Barrack Department, was 7,61,655 rupees. That which appears in the Estimate of 1862-63 is 13,54,636 rupees, showing an excess of 5,92,981 rupees. There are no details given in the Estimate by which this large increase can be properly accounted for. In the Commissariat Estimate of 1862-63, Contingencies for the Barrack Department under Title II., amounting to 3,31,316 rupees, have been provided for, leaving, according to the Estimate, 10,23,320 rupees for personal charges under Title I.; but, as the whole of the permanent Establishment were provided for in 1861-62 by the grant of 7,61,655 rupees, excepting the extra expense arising subsequently out of the alterations in Army rank of the commissioned, warrant, and non-commissioned officers of the Barrack Department, the present year's Estimate is therefore 2,61,665 rupees above that of last year's. This is a large addition, and appears to arise from an increased estimated expenditure for punkah-pulling and tattie-watering. For want of full details I admit the amount for the present, but shall require a special report from the Examiner of Commissariat Accounts as to the actual expenditure incurred last year for every description of service connected with the Barrack Department. At the same time I beg here to note that the Commissary General seems to disclaim all responsibility for this high estimate, stating that it has been entirely framed by the Quartermaster General of the Army. On receiving the Examiner's Report, the same will be laid before Government; and I trust this department will receive assistance in endeavouring to bring the present apparently excessive expenditure in the Barrack Department under effective control.

46. *Medical Department.*—The Estimate for the pay and allowances of this department for 1862-63, as compared with that for 1861-62, presents great disparities. In the pay of commissioned officers, both on the staff and

attached to regiments, there is a net decrease of 2,63,956 rupees. The gross decrease, however, is 4,42,044 rupees, being 3,21,493 rupees in the General Medical staff, 1,02,962 rupees in the medical staff of British regiments, 10,389 rupees in veterinary surgeons of the British forces, and 7,200 rupees on account of sub-assistant surgeons. The gross increase is 1,78,088 rupees; 16,969 rupees being on account of surgeons and assistant surgeons of the Indian Army in charge of regiments, 1,13,026 rupees on account of surgeons and assistant surgeons in charge of British regiments, and 48,093 rupees on account of veterinary surgeons of the Indian Army.

47. On looking into the details of the Estimate, I observe the following discrepancies in the numerical strength of the medical officers, which may in some degree account for the decrease above indicated:

Rank.	Medical Staff.		Regimental.		Total.
	Indian.	British.	Indian.	British.	
1861-62:					
Surgeons	14	10	53	35	112
Assistant Surgeons	68	30	120	112	330
Veterinary „	- -	- -	11	13	24
			Total - - - *Rs.*		466
1862-63:					
Surgeons	13	9	58	38	118
Assistant Surgeons	59	- -	85	108	252
Veterinary „	- -	- -	20	11	31
			Total - - - *Rs.*		401
			Difference - - - *Rs.*		65

48. I do not rely with much confidence on these figures, or on the reduction having accrued precisely in the way indicated, but the Estimate is lower by 2,46,367 rupees, consequent on the changes, exclusive of transfers. There have been so many changes in this department, that before any satisfactory conclusion can be arrived at, as to the proportion in which Indian and British medical charges have been affected, the subject will require to be specially investigated.

49. The charges on account of pay and allowances of Warrant Medical Officers, viz., 3,81,166 rupees, a large portion of which was last year included in Commissariat Establishments, because they were paid out of funds placed at the disposal of the Commissariat Department, are this year transferred to the Medical Department, and will be paid in the Pay Department. Another item, viz., Capitation Allowance or Head Money, amounting to 1,34,550 rupees, has been excluded from "Regimental Pay and Allowances," and exhibited with the charges of the Medical Department.

50. *Medical Office Establishments.*—There is a slight net increase of 9,229 rupees in these establishments, being principally in those of hospitals and depôts.

51. *Pensions.*—There is a net increase under this head of 1,64,509 rupees, but this was to be anticipated, and in my report, No. 7259*a*, dated 18th March 1862, para. 160, I stated that the additional cost on account of pensions in 1861-62 over that estimated for, would probably be 1,39,900 rupees.

52. *Commissariat Department.*—Under the revision of the office establishments of this department it was estimated that a gross saving of a lac of rupees would be effected. After making the necessary additions to the office establishment of the Commissariat Examiner for the performance of the work of which executive officers were relieved, the amount is not so large; but a net saving of 76,668 rupees may be calculated on.

53. The

53. The amount assigned last year for Commissariat Establishments, while it did not include all establishments of the Commissariat Department, yet comprised, as in the case of medical warrant officers, charges which did not appertain to the Commissariat Department. The separation between charges *personnel* and charges *materiel*, is this year more complete. These changes have rendered a comparison between the cost of the Commissariat Establishments last year and this year somewhat complicated, but the general result may be thus stated.

54. In the Estimate of 1861-62 the sum of 22,97,486 rupees was allowed for Commissariat Establishments, the amount now allowed is 21,60,216 rupees, showing a difference of 1,37,270 rupees; but the pay proper, amounting to 54,816 rupees, of the commissariat officers, which was not included last year, has this year been added to the departmental charges, making the true difference between the cost of the Commissariat Establishment of 1,92,086 rupees. Of this sum 87,592 rupees are *bonâ fide* reductions, and 1,04,494 rupees are charges transferred. The portion due to a revision of the Office Establishments is 76,668 rupees, and the residue 10,924 rupees, to modifications in the Godown Establishments.

55. These appear to be the results, as far as the data in the Estimates admit of their being ascertained; but as the Commissary General has promised further reductions in the Godown Establishments during 1862-63, the whole question will be re-investigated by the Controller.

56. *Ordnance Department.*—The Estimate shows a net decrease of 57,481 rupees, and the decrease would have been larger but that the Ordnance Department, in common with other departments, has this year, for the first time, to bear the pay proper of the commissioned officers employed therein (amounting to 47,790 rupees, as already explained in para. 18).

57. *Stud Department.*—Besides the additional charge against the department on account of the pay proper of the officers employed therein, amounting to 23,876 rupees, there is an increase of 34,000 rupees in the executive establishments. This increase is owing to a branch remount depôt which was sometime ago established at Cawnpoor, but for the abolition of which, by the transfer of the remounts to Kurnaul, orders have already been issued; and the whole amount is therefore disallowed, as not likely to be incurred in 1862-63.

58. *Clothing Department.*—In this department there is a decrease of 22,608 rupees in executive establishments, against an increase of 10,860 rupees (on account of the pay proper of commissioned officers), leaving a net decrease of 11,748 rupees; but the extent of the existing establishment of the clothing department is still under consideration.

59. *Surveyor General's Department.*—The Estimate of this department indicates a net increase of 2,29,421 rupees, against a decrease of 23,146 rupees, being a net increase of 2,06,275 rupees, of which 41,460 rupees, on account of the Topographical Survey, and 39,896 rupees, on account of the Trigonometrical Survey, together 81,356 rupees, are said to be awaiting the orders of Government. I have not altered the amount under this Estimate, as it is intended to reserve the subject for special report hereafter; and I have deemed it expedient to make provision for all contigencies, the more especially on account of the re-organisation of No. 5 of the Topographical Survey sanctioned by Government in August last.

60. *Benevolent Allowances, and Allowances to Clergy.*—There is a great tendency to increase in these allowances. This year's Estimate indicates an increase of 67,254 rupees on account of Orphan Asylums, 48,000 rupees on account of Presbyterian chaplains, and 6,637 rupees on account of Roman Catholic priests, aggregating together 1,01,891 rupees; but, as it is desirable to bring this description of expenditure under strict control, a special examination of the same will be made by the Controller.

61. *Contingencies.*—Owing to a better classification of the charges this year, the contingent or indefinite expenses amount to only 11,85,978 rupees against 24,90,800 rupees of last year; and I hope to see them still further diminished, as departmental officers acquire greater experience in the classification and arrangement of charges, for I earnestly deprecate large sums of money being obtained or accounted for under the head Contingencies, having felt seriously

embarrased, in consequence of this indefiniteness, when reporting as to whether claims could be provided for out of funds assigned for the military expenditure.

Title I.	
Controller's Estimate	5,55,14,180
Revised Estimate	5,36,19,803
Decrease	*Rs.* 18,94,377

62. The total reductions made from Title I. of the Bengal Military Estimate, submitted by the Controller of Military Finance, is 18,94,377 rupees, as shown in the margin.

63. I now proceed to a similar analysis of the entries in the Madras Military Estimate, as submitted by the Controller.

64. MADRAS.—The charges *personnel* (Title I.) entered in the Madras Estimate of 1862 63 are 2,63,89,386 rupees, while those in the sanctioned Estimate of 1861-62 were 2,69,73,048 rupees, indicating an excess in 1862-63 of 5,83,662 rupees, according to the Estimate submitted by the Controller.

65. *European Artillery.*—The amount originally estimated by the Controller of Military Finance for this arm of the service in the Madras Presidency was 4,47,664 rupees less in 1862-63 than in 1861-62. The difference is attributable to the transfer to another head of the amount of family allowance; the reduction of horse batteries from the war to the peace establishment, the return of a troop of royal artillery to Europe, and the reduction of the two companies of Golundauze returned from China, and other minor alterations. The strength of the European artillery at Madras thus estimated for, is below the complement (3,345) fixed for that Presidency, and the Controller has since submitted a supplemental Estimate to cover the prospective increase, on which account 1½ lacs of rupees have been allowed by this Department. The difference, therefore, by transfers, and actual decrease, between the Estimates of 1861-62 and 1862-63, is 2,97,664 rupees.

66. *British Cavalry.*—The decrease in the cost of the British cavalry by the reduction of two troops per regiment, will be 1,23,850 rupees; but the total difference between the Estimates of the two years is 1,99,185 rupees, showing a decrease of 75,335 rupees, independently of that arising from the reduction of the four troops, which is to be attributed to the large number of officers absent in Europe (as shown in the margin), to the family allowance having been transferred to another head, and to other minor changes.

Captains	2
Lieutenants	5
Cornets	4
	11

67. *Native Cavalry.*—The Estimate of 1862-63 exhibits a net increase of 1,03,259 rupees on account of this branch; but as 57,583 rupees have been deducted on account of the retirement of officers on the extra pension, the gross increase is 1,60,842 rupees. The cause of the increase is, that the pay of the European officers of the disbanded regiments was in last year's Estimate provided for under the head "Supernumeraries," but has this year been transferred to "Cavalry," and a corresponding decrease will be found in the present Estimate under the head "Supernumeraries."

68. *European Infantry.*—The Estimate, as submitted by the Controller, only framed for 10 regiments, under the impression, since confirmed by the Order of Government of the 10th April 1862, that 10 would be the complement for the Madras Presidency. The Estimate of 1862-63 is less by 7,44,483 rupees than that of 1861-62, which was framed for 11 regiments, and a large surplus of effective strength.

69. *Native Infantry.*—The amount assigned for Native infantry in last year's Estimate was 85,47,708 rupees; and that entered in this year's Estimate is only 68,01,118 rupees, the difference being 17,46,590 rupees. Of this reduction, 7,92,232 rupees is owing to the abolition of eight regiments of Native infantry, exclusive of European officers; 4,13,000 rupees to the retirement of officers on the extra pension; and the remainder of the reduction, viz., 5,41,358 rupees, is to be accounted for by the transfer of the pay proper of staff officers to their respective departments (casualties not being filled up in regimental cadres), and by the reduction to the established strength of 712, of the regiments serving in Pegu and the Eastern Settlements.

70. *Engineers.*—The increase under this head amounts to 52,298 rupees, and is attributable partly to the expense attending the re-organisation of the corps, to one colonel being in India unemployed, and to other ordinary fluctuations.

71. *Sappers and Miners.*—The estimated amount for this corps in 1861-62 was

was 2,86,660 rupees; that entered in this year's Estimate is 4,05,388 rupees, after deducting 43,140 rupees for the reduction of two companies, leaving the excess at 1,18,728 rupees. The reason of this excess requires to be specially explained by the Madras Controller.

72. *Pegu Sappers and Miners.*—There is a decrease of 64,296 rupees in the expense on account of this body, owing to casualties not being replaced.

73. *European Veterans, Artillery and Infantry.*—There is a total decrease of 93,698 rupees in the pay of these corps, as compared with the expense of 1861-62; and the bulk of this decrease is the result of casualties, the amount transferred on account of family allowance being only 18,306 rupees.

74. *Unposted Officers, or Officers under the New Condition.*—There is an increase under this head of 1,04,134 rupees in 1862-63, the amount entered being 3,53,595 rupees against 2,49,461 rupees, as in 1861-62. This increase is the natural consequence of present arrangements, by which casualties in regimental cadres, while showing a decrease there, appear as an increase under this head, as explained under Native infantry.

75. *Unattached and Local Officers.*—There has been a decrease in the number of these officers in India, owing to the retirement on the extra pension, and it has resulted in a decrease of 51,102 rupees for the year in this charge.

76. *Warrant Officers with Department of Public Works.*—The amount required for the pay of these officers is 39,546 rupees; the amount in 1861-62 was 37,059 rupees, and there has been an increase this year of 2,487 rupees. I beg to refer to my remarks in paragraph 36 above, about relieving the Military Estimate of this charge.

77. *Supernumeraries.*—The Estimate of 1862-63 exhibits a large decrease under this head, viz., 2,03,535 rupees, nearly all the supernumeraries in the Madras Presidency having been absorbed. In explanation of this large decrease the Controller, Military Finance, Madras, states as follows: "The chief cause of the decrease arises from the pay and allowances of the European officers of the disbanded regiments being included in chapter I. section I. under the head 'Native Cavalry,' the sum now estimated is for the pay of the supernumerary native commissioned and non-commissioned officers who have not yet been absorbed, and the same remark is applicable to the supernumeraries in the Horse Artillery, Native Infantry, Golundauze, and Pegu Sapper Battalion, aggregating in all 1,90,883 rupees. I have deemed it necessary to estimate for them (supernumeraries) to this extent, but it is expected that before the middle of the official year they will be got rid of by pension or otherwise."

78. *General Army Staff.*—In the Estimate of the present year, as originally submitted by the Controller, the cost of the Military Finance Department at Madras was included under this head, as also the pay of the remount agent; but after transferring both these items to their proper heads, the residue on account of the general army staff is by the Controller's Estimate 9,01,531 rupees, which, contrasted with the Estimate for last year for similar items of expenditure, viz., 7,87,317 rupees, shows an increase of 1,41,127 rupees, owing to the addition of pay proper. There is, however, a decrease of 26,913 rupees, of which 9,459 rupees arise out of the alteration in the pay of the Commander in Chief, and 17,454 rupees is consequent on the abolition of the office of Deputy Quartermaster General, British Forces.

79. As regards the present position of staff officers, Lieutenant Colonel McGoun, the Controller, Military Finance, Madras, observes: "The present would seem a fitting opportunity for taking the whole question of a revision of staff salaries and appointments into consideration; for nearly all officers holding staff appointments are in the Staff Corps, and have benefited largely by the promotion which they have already obtained, while their future rise in the service is placed beyond chance; many appointments which formerly could only be held by captains or subalterns are now filled by majors and even lieutenant colonels, and the difference in pay, irrespective of salary, has become an extra charge to the Government, and an additional debit to the office or department in which they are serving; this additional cost, it appears to me, ought to be compensated for, either by doubling up or abolishing offices, or by reducing salaries to a minimum, so that the aggregate of pay and salary shall not exceed what

what was originally intended, and be suitable and equivalent to the nature and extent of the duties to be performed, and not be left dependent, as it now is, on the rank which the incumbent for the time being may hold."

80. *Garrison and Cantonment Staff.*—The alterations in the garrison and cantonment staff of the Madras Presidency, comprise the addition of two brigadierships, and the appointment of two brigade majors in lieu. The actual saving by these changes is 19,950 rupees; but in consequence of the incorporation of pay proper, and the alterations in the minor garrison appointments, the Estimate shows a net increase under this head of 17,927 rupees. In reference to the present garrison and cantonment staff of the Madras Presidency, Lieutenant Colonel McGoun suggests, that the two depôts for European troops at Arco, and Poonamallee, which it may have been necessary to keep up when there were two armies, might now be amalgamated, saving thereby 7,520 rupees per annum; also that the Native Infantry Depôt at Palaveram might be reduced, as it was originally intended to provide for the wants of the large Native army, which, until recently, was stationed beyond seas. In these suggestions I fully concur.

81. *Office Establishments of General Army Staff.*—There has been a net decrease of 4,224 rupees under this head. The Controller, Military Finance, suggests that the office establishment of the Commandant of Engineers, costing annually 1,608 rupees, might be abolished, and I concur in this view.

82. *Military Finance Department.*—The charges under this head have already been fully explained to Government, and, in paragraph 43, I have stated their financial effect in the Bengal Presidency, where the alterations have been the most complete. It is known to Government that the general effect of the charges in the other Presidencies has resulted in a decrease on account of the administration of the department of pay and audit, as compared with previous expenditure.

83. *Barrack Department.*—The Estimate under this head amounts to 10,484 rupees, but in the Estimate of 1861-62 the Barrack Department was not properly represented, the staff pay of the Presidency barrack master having been charged under the head "Garrison and Cantonment Staff," and the charge for barrack attendants, amounting annually to 60,430 rupees, having appeared in the Estimate of the Commissariat Department under the minor head "Army Supplies." There is, however, no real increase in the estimated expenditure of 1862-63, over that of 1861-62, on this account.

84. *Medical Department.*—In this department there is a net decrease of 2,28,564 rupees; 85,847 rupees being on account of General Medical Staff; 8,089 rupees in General Medical Staff, British forces; 1,22,423 rupees on account of surgeons in charge of regiments of the Indian Army; 4,374 rupees on account of veternary surgeons, Indian forces, and 28,557 rupees for warrant officers. The decrease seems chiefly attributable to the staff salaries of medical officers in civil employ not being charged in the Military Estimate of 1862-63, while they were charged in that of 1861-62; but there are also more assistant surgeons than usual wanting to complete this year, and likewise more officers in Europe. The whole of the decrease, however, applies to the Indian Army, for, as there is an increase of 11,575 rupees, on account of surgeons with British forces, there is an actual increase of 3,000 rupees in the Medical Department, British forces.

85 *Office Establishments, Medical Department.*—The Estimate shows a decrease of 9,981 rupees in these charges.

86. *Pensions to Officers, Warrant, Non-Commissioned, and Rank and File.*—As compared with the Estimate of 1861-62, there is an increase of 1,004 rupees in the amount of pensions to heirs, and a decrease of 97,784 rupees in the general pensions, giving a net decrease of 96,780 rupees. Taking into account the gratuities required to be given on the disbandment of the eight regiments of Native infantry, I apprehend the whole of this saving will not be realised; but any increase that may arise during the year will be compensated for.

87. *Commissariat Department.*—In consequence of the transfer of the pay proper of commissariat officers, a sum of 83,452 rupees is added to the departmental charges; but there has been a decrease of 14,454 rupees by the absorption

absorption of supernumeraries in some of the warrant and non-commissioned grades. The Controller of Military Finance, Madras, is now engaged in an inquiry, in conjunction with the Commissary General, into the existing Commissariat establishments, in order to ascertain to what extent they may be reduced. The result of this investigation has not yet been communicated to this department, but Colonel McGoun, in his Report to the Madras Government, dated 15th January 1862, on the Military Estimate of that Presidency, expresses himself thus: "I believe that great reductions can be effected in these establishments without affecting in the slightest degree their efficiency"; again, "large deductions have already been made in the army, and others will follow, and with these reductions it is submitted that there must be corresponding ones in all departments, and especially in the establishments under review. I have prepared in a tabulated form the *personnel* of all the establishments in the different ranges, which will greatly facilitate their revision."

88. *Ordnance Department.*—The Estimate for the pay and allowances of establishments of the Ordnance Department, which was 6,97,681 rupees for 1861-62, is 7,53,796 rupees for 1862-63, being a difference of 56,115 rupees. This excess has been produced by several of the commissioned officers of the department having been seconded, their full pay and allowances being consequently debited to the Ordnance Department, which was not the case in the previous year, when only the staff pay and regimental allowances were debited to the department; as also by the difference of pay between the Madras rate and those allowed to the Ordnance Establishments of the Hyderabad Contingent, recently transferred to Madras; but, on the other hand, the Ordnance Department has been relieved of the staff pay of the Ordnance Examiner, which has been transferred to the Military Finance Department. In a recent report from this department, application was made for the services of an assistant to the Inspector General of Ordnance, to which a favourable reply has been received; and provision for such an appointment, with staff pay of 350 rupees per mensem, or 4,200 rupees per annum, is accordingly made in the Estimate.

89. *Remount Department.*—The sum of 4,143 rupees for office establishments has been transferred from Title II. to Title I.

90. *Clothing Department.*—The charges on account of the establishments of the Clothing Department have been allowed to stand as entered in the Estimate, subject to the revision that will be made by the Controller, Military Finance, consequent on the reduction in the strength of the European and Native army of the Madras Pesidency.

91. *Allowances to Clergy.*—The Estimate shows an increase of 2,400 rupees under this item, on account of Roman Catholic priests.

92. *Camp Equipage Department.*—There is a reduction of 8,249 rupees, consequent on a reduction of establishments made during 1861-62.

93. *Contingencies.*—The amount estimated under the head of "Contingencies" this year is 12,09,121 rupees, as compared with 7,99,159 rupees in last year, being an increase of 4,09,962 rupees. The Controller of Military Finance has been led from close observation to increase the margin taken last year for unforeseen charges; and it is a prudent measure, as the passage of the European regiment to be sent home from the Madras Presidency will have to be provided for. The amount of 12,09,121 rupees, allowed under this head in the revised Estimate, is lower by four lacs than that originally estimated for by the Controller, which comprised excessive provision on account of compensation for dearness of provisions, purchase of huts, hutting money, and other charges, all of which were estimated for irrespective of the reductions subsequently ordered. The remarks contained in para. 61 relative to the inexpediency of collecting charges under this indefinite head, will however be commended to the consideration of the Controller of Military Finance, Madras.

The total of the reductions made from Title I. of the Madras Military Estimate, submitted by the Controller of Military Finance, is 17,06,941 rupees, as shown in the margin.

Title I.	*Rs.*
Controller's Estimate -	- 2,63,89,386
Revised Estimate -	- 2,46,82,445
Decrease - -	- *Rs.* 17,06,941

94. BOMBAY.—The charges *personnel*, Title I., entered in the Bombay Military Estimate of 1862-63, are 1,96,80,667 rupees, while those in the sanctioned

 Estimate

Estimate of 1861-62 were 1,91,72,809 rupees, indicating an excess in the present year of 5,07,858 rupees, according to the Estimate submitted by the Controller, which I now proceed to analyse.

95. *Artillery.*—There is not much difference between the Estimates of 1861-62 and 1862-63, the increase in the latter year being only 13,390 rupees. The effective strength of the European artillery in Bombay is 2,234, against an establishment of 2,690, showing a deficiency of 456; but there are 937 native artillery men in addition to 192 attached to the Mountain Train; and as the European artillery is only to be augmented as the Native artillery is absorbed, no great increase of European artillery will probably be made during 1862-63. I have therefore not deemed it advisable to add to the Estimate on this account.

96. *European Cavalry.*—The Revised Estimate of 1862-63 shows a reduction of 2,28,533 rupees under this arm, as compared with 1861-62. Of this sum 1,23,850 rupees is owing to the reduction of four troops, and the residue, 1,04,683 rupees, is attributable to the large number of officers absent in Europe, as shown in the margin. There is a close correspondence between the charge for officers of the British cavalry, in the Estimates of Madras and Bombay, the amount in the former being 5,50,435 rupees, and in the latter 5,08,666 rupees, whilst there are six more officers absent in Europe from the regiments in Bombay, than from those at Madras.

1	Lieut.-Colonel.
2	Majors.
7	Captains.
4	Lieutenants.
3	Coronets.
17	

97. *Native Cavalry.*—In the Estimate for this year, as originally submitted by the Controller, there was an increase of 1,61,729 rupees on account of the Native cavalry, over the amount allotted in the Estimate of 1861-62. But on reference to para. 50 of this department's report, No. 7259*a*, dated 18th March 1862, it will be observed, that the Estimate of 1861-62 only made provision for 10 regiments of Native cavalry, whilst 12 regiments have been maintained, and have accordingly been provided for by the Controller in the Estimate of 1862-63. The decision of Government, under date 10th April 1862, to re-organise the Bombay native cavalry into nine regiments of 420 sowars, admits of a reduction of 90,450 rupees; to which should be added 3,728 rupees on account of the retirement of officers on the extra pension, making in all a reduction of 94,178 rupees, to counterbalance an increase of 1,61,729 rupees, leaving a net increase of 67,551 rupees.

Lieut. Colonels	4
Majors	8
Captains	45
Lieutenants	31
Ensigns	27
TOTAL	115

98. *European Infantry.*—The Estimate of 1862-63 exhibits a decrease of 3,92,355 rupees in the charges of the European infantry at Bombay, as compared with the Estimate of the previous year. The decrease is large, especially as there has been no reduction in the strength of the European infantry; but it can only be accounted for by the unusually large number of officers absent in Europe (as per margin), and by the transfer to other departments of the pay proper of the officers employed on the staff, of whom a fair proportion belongs to the European infantry at Bombay.

99. In paragraph 18 of this report I have adverted to the decrease of 4,66,853 rupees in the Bombay Estimate, on account of the large number of officers absent in Europe, and the details above given tend to substantiate the correctness of that figure.

1	Colonel.
6	Lieut.-Colonels.
2	Majors.
13	Lieutenants.
31	

100. In addition to the officers absent in Europe, there are 31 officers of the European infantry at Bombay, as shown in the margin, in staff employ, whose pay proper is consequently deducted from regimental charges.

101. *Native Infantry.*—The difference between the charge for this arm in the preceding and present year is 5,52,872 rupees, of which 1,39,757 rupees are attributable to the retirement of officers on the extra pension, 2,13,776 rupees to the cost of a regiment still in China, and which are erroneously included in last year's Estimate; the residue, 1,99,339 rupees, being for the most part assignable to the transfer of the pay of officers in staff employ to departmental charges.

102. *Engineer Corps.*—The Controller of Military Finance, in preparing his Estimate, acted under the orders of the 19th December 1861, and charged the full regimental pay and allowances of engineer officers on the staff to the departments in which they are employed; but under the recent decision of Government,

Government, in the Financial Department, No. 1560, dated 7th March 1862, the pay proper of engineer officers is chargeable to the Military Department. By the former calculation there was a reduction of 55,773 rupees in the Estimate of 1862-63, as compared with that of 1861-62; but in compliance with the recent decision, I have altered the estimated amount to that entered in the Estimate of 1861-62 for pay proper, viz., 1,40,217 rupees, thus cancelling the reduction; but this item is subject to the revision of the Controller, Military Finance, Bombay.

103. *Sappers and Miners.*—This year's Estimate is 18,246 rupees above that of last year for sappers and miners, which is attributable to a difference in effective strength.

104. *European Invalid and Veteran Officers.*—There is a decrease of 46,483 rupees in the pay of these officers in the Estimate of 1862-63, caused by casualties.

105. *Warrant and Non-Commissioned Officers doing duty with the Public Works Department.*—The charge under this head in the Estimate of 1862-63, is 19,878 rupees, and if Government agree to the recommendations submitted by the Audit Board, and adverted to in paragraph 36 above, this will cease to be a military charge.

106. *Garrison and Cantonment Staff.*—There is a net increase of 35,737 rupees, which is to be assigned to the incorporation of pay proper with the staff allowances.

107. *Office Establishment, General Army Staff.*—Under this head there is an increase of 9,182 rupees in the Adjutant General's Department; of 1,866 rupees in the Quartermaster General's Department, and of 720 rupees in the office establishment of the Artillery Select Committee, making an actual increase of 11,768 rupees in the office establishments of the general staff, but there is a decrease in the Judge Advocate General's Department of 2,400 rupees, and of 13,476 rupees in the establishment of brigade majors, leaving a net decrease of 4,108 rupees, which is not explained. The increase to be occasioned by the regimental pay of non-commissioned officers and privates attached to these offices, being now charged against the departments; but as this is only an inference of mine, the Controller, Military Finance, will be called upon for a clear explanation of the increase, as well as to account for the decrease.

108. *Military Finance Department.*—The charges under this head need no further explanation than that given above in paragraphs 43 and 82.

109. *Barrack Department.*—There is a net increase in the amount estimated for the Barrack Department in this, over that of the previous year, of 54,288 rupees; but it does not represent any actual increase of expenditure; 1,325 rupees of the amount being on account of the incorporation of the pay proper of warrant and non-commissioned officers, and the residue, viz., 49,963 rupees, being transfers of charges which were last year represented under the head "Contingencies."

110. *Medical Department.*—The net decrease in the charges on account of the Medical Department in 1862-63, as compared with 1861-62, is 25,965 rupees, a comparatively trifling sum when contrasted with the decrease that has taken place in each of the other Presidencies. There has been a decrease of 1,50,990 rupees by the exclusion of officers in civil employ in the general medical staff of the Indian Army; 1,500 rupees in the staff of the British Forces; of 3,559 rupees on account of veterinary surgeons of the Indian Army; of 856 rupees for veterinary surgeons, British forces, and of 1,190 rupees on account of capitation allowance. The increase is 55,123 rupees on account of surgeons in charge of regiments of the Indian Army, and 69,713 rupees on account of surgeons in charge of British regiments; besides 7,294 rupees on account of warrant officers and native doctors.

111. *Pensions to Officers, Non-Commissioned and Warrant Officers, and Rank and File.*—There is an increase under this head of 1,62,519 rupees, and a decrease of 46,608 rupees, leaving a net increase of 1,15,911 rupees. Pensions being a charge over which there is no control, as they are governed entirely by casualties, the increase needs no explanation.

112. *Commissariat Department.*—There has been an addition under this head in 1862-63 of 84,744 rupees on account of the incorporation of pay proper of officers; and there has also been an addition of 60,056 rupees on account of hospital, victualling, and quartermaster's establishments; but neither of these items has involved any actual increase, being mere transfers from one head of the Estimate to another. On the other hand, the decrease in the Bombay Commissariat Establishments in last year has aggregated 1,77,221 rupees, and the Estimate of the present year is reduced by the amount. The reductions have been effected in the warrant grades, executive establishments, office establishments, dooly bearers, and cattle establishments.

113. *Ordnance Department.*—There is an increase of 72,697 rupees exhibited under this head in the Estimate of 1862-63, as compared with that of 1861-62. A portion of this is, of course, owing to the transfer of the pay proper of officers employed in the department; but the major part of the amount would appear to be a *bonâ fide* increase, which requires to be explained, and which will form the subject of a reference to the Controller of Military Finance.

114. *Clothing Department.*—The net increase of 6,747 rupees under this head is wholly assignable to the incorporation of the pay proper of the commissioned and non-commissioned officers, with the departmental charges.

115. *Benevolent Allowances.*—Family allowance, while included with regimental allowances in the Estimates of the Bengal and Madras Presidencies of 1861-62, was exhibited as a separate charge in the Estimate of the Bombay Presidency, and I am, consequently, enabled to state, that there is an increase of 17,593 rupees this year under that head in the Bombay Presidency. It will have been observed from the preceding remarks that the Bombay practice of exhibiting the charge separately has now been made general in all the Presidencies.

116. *Allowance to Clergy.*—The increase under this head is 4,428 rupees on account of Roman Catholic priests.

117. *Camp Equipage Department.*—A decrease of 13,380 rupees has resulted from a revision of the establishments made during 1861-62.

118. *Bazar Department.*—There has been an increase of 8,282 rupees on account of the incorporation of the pay proper of the officers, but whether the cost of the Bazar Department should be a military charge is now under the consideration of the Audit Board.

119. *Contingencies.*—The decrease under the head of Contingencies in the Estimate for 1862-63 is 2,44,337 rupees, as compared with the previous year. The estimate, as originally submitted by the Controller, only indicated a decrease of 45,377 rupees; but on investigating the details, it has been reduced by the amount above indicated. From the uncertainty of these charges there is a tendency to over-estimate them, but the reductions made have been well considered.

Title I.	*Rs.*
Controller's Estimate -	1,96,80,667
Revised - „ -	1,88,06,116
Decrease - -	*Rs.* 8,74,551

The total reductions made from Title I. of the Bombay Military Estimate, as submitted by the Controller of Military Finance, is 8,74,551 rupees, as shown in the margin.

120. The result of all the above modifications is, that Title I. of the Military Budget Estimate of all India for 1862-63, representing the charges personnel, has been reduced from 10,15,84,233 rupees, as set forth in the Estimates submitted by the Controllers of Military Finance at the three Presidencies, to 9,71,08,364 rupees, or by 43,69,536 rupees, and placing the revised Estimate of 1862-63 in juxtaposition with the sanctioned Estimate of 1861-62, the result is as below:—

Year.	Charges Personnel, or	Bengal.	Madras.	Bombay.	Total.
		Rs.	*Rs.*	*Rs.*	*Rs.*
1861-62 - - -	Title I. - - -	5,53,32,043	2,69,73,048	1,91,72,809	10,14,77,900
1862-63 - - -	Title I. - - -	5,36,19,803	2,46,82,445	1,88,06,116	9,71,08,364
	Decrease - - *Rs.*	17,12,240	22,90,603	3,66,693	43,69,536

121. It

121. It will be found that the above amounts give for charges personnel during the present year, about 3·29 per cent. less in Bengal, 8·49 per cent. less in Madras, 1·34 per cent. less in Bombay, than those of 1861-62, while, as regards all India, these charges, as estimated for 1862-63, are 4·30 per cent. lower.

122. The second grand division of the Estimate is Title II., which comprises charges materiel, or all supplies, for the provisioning, clothing, and equipment of the Army. These charges, as represented in the Estimates submitted by the Controllers of Military Finance, amount to 2,53,01,652 rupees in the proportions for the respective Presidencies, entered in the margin. These charges being unfixed in their nature, and liable to great fluctuation according to variations in local circumstances, have required a much closer investigation than the charges under Title I., for pay and allowances, which can only be subject to increase or decrease when there is an alteration in numerical strength or in the rates of pay, and then generally under specific orders of Government. The subjoined review in detail of these charges, according to Presidencies and Departments, will, I hope, be found useful in future towards effecting a close examination of Departmental Estimates.

CHARGES MATERIEL.—TITLE II.

	Rs.
Bengal	1,38,20,205
Madras	64,87,561
Bombay	49,93,886
Total Rs.	2,53,01,652

BENGAL.

COMMISSARIAT DEPARTMENT.

123. *Victualling Europeans.*—The Commissary General assumes that the European strength in the Bengal Presidency, during 1862-63, will be 49,000 men, of whom 45,000 will receive ordinary rations, 4,000 being dieted in hospital, and calculates the commissariat expenditure on these numbers.

124. By the Quartermaster General's return, dated 1st February 1862 (the latest received), the effective strength of the European force in Bengal is given at 43,638, which is nearly the established strength for the number of corps allotted to Bengal by the Despatch of the Government of India, dated 18th May 1861, as modified by the Despatch from the Secretary of State, No. 247, of the 17th June 1861, and on which I submitted in letter, No. 407*a*, dated 11th July 1861, revised Tables for the strength of European forces in India.

125. In this Department Report, No. 7259*a*, dated 18th March 1862, it was recommended to Government to diminish the cavalry by two European cavalry regiments, and to maintain only five regiments on a uniform strength of 500 rank and file each. But by the letter from the Military Department, No. 356, dated 10th April 1862, Government have decided not to reduce the number of European cavalry regiments, but to modify their strength to 485, as per margin, the East India regiment being retained at an establishment of four companies, and the Lahore Light Horse at the strength of a squadron of cavalry, the European infantry regiments being 35 in number, *vide* paragraph 51 of letter, No. 7259*a*, of 18th March 1862. The establishment of the European forces of the Bengal Presidency will therefore be 42,865 Europeans, belonging to the arms as entered in the margin and allowing for supernumeraries, the total on the year may be calculated at 43,783. Then deducting the proportion of sick, about 1 in 12, the number to be provided with ordinary rations will be 40,135, and those with hospital diet 3,648, this strength being about nine-tenths of that assumed by the Commissary General.

			Rs.
Artillery, 39 batteries	at 140	=	5,460
„ 16 reserve	at 75	=	1,200
Infantry, 35 regiments	× 918	=	32,130
Cavalry, 7 „	× 485	=	3,395
East India Regiment	1 × 414	=	416
Lahore Light Horse	1 × 146	=	146
Sappers			120
TOTAL Rs.			42,865

126. The average rate for rations per man is given in the Commissariat Estimate at *Rs.* 8. 9. 8. per mensem, or *Rs.* 103. 4. per annum, including the value of articles to be taken from reserve stock, a rate that has been verified by the statistics of the first six months of the year 1861-62, as collected in the Office of the Examiner, Commissariat Accounts.

 127. Applying

127. Applying this rate to the number of men, viz., 40,135, the calculation is that 41,43,939 rupees will be required for the year's expense of European rations. But the value of articles to be used from the present reserve stock is estimated at 3,92,936 rupees, according to the modified strength; the net cash to be expended on account of rations will therefore be 37,51,003 rupees, instead of 41,87,036 rupees, the figure inserted in the Commissariat Estimate.

128. Besides the rations, there are other items classed under the head "Victualling Europeans," which should be altered in the proportion that the strength is reduced, viz., 90 to 100. The altered results, as compared with those in the Commissariat Estimate, are given below:—

	Commissariat Estimate.	Revised Estimate.	Difference.
	Rs.	*Rs.*	*Rs.*
Cost of rations	41,87,036	37,51,003	4,36,033
Victualling contingencies	42,633	38,370	4,263
Dry batta	12,453	11,208	1,245
Extra batta	46,875	42,187	4,688
Subsistence allowance	6,419	5,777	642
Sea and river provisions	1,200	1,080	120
Expense of soldiers' gardens	15,682	14,114	1,568
TOTAL	43,12,298	38,63,739	4,48,559

129. *Public Cattle Department.*—In the Estimate of 1861-62, 10,70,356 rupees were allowed for the expense to be incurred on account of the feed of public cattle. In the estimate for 1862-63, the amount required for this purpose is stated to be 13,61,257, the difference being 290,901. On comparing the numbers of cattle, the following excess in those kept up, over those allowed in 1861-62, is observed:—

	1861-62.	1862-63.	Difference.	
			Increase	Decrease.
Elephants	700	1,236	536	—
Camels	7,778	6,900	- -	878
Bullocks	3,000	6,341	3,341	—
Mules	475	239	- -	236

The rates adopted by the Commissary General of Bengal for the feed of the above cattle are as follow:—

For each	Elephant	297	Rupees per Annum.
„	Camel	66¾	„ „
„	Mule	117	„ „
„	Bullock	64	„ „

130. It is urged by the Commissariat Department that at whatever number below that now existing the standard number may be fixed, those now with the department must be fed until disposed of, or absorbed by casualties. This is true, but as on comparing the present numbers with those of April last, it is found there has been a decrease during the year of 61 elephants and 4,216 bullocks, a proportionate decrease may be calculated on during 1862-63, which would reduce the number of elephants to 1,170, and entirely absorb the surplus bullocks. The cost of the feed of the numbers so to be reduced may therefore be estimated for, as likely to be incurred during only half the year, that is to say, that the practical effect of the decrease during the year will be equivalent to half a year's cost of the numbers reduced. This will yield a saving of 1,07,566 rupees, to which should be added two other sums, viz., 1st, 15,525 rupees, being the difference between the average rate taken by the Commissary General for Rewaree camels, viz., *Rs.* 66. 12., and that ascertained from the statistics in the

the Commissariat Examiner's Office, *Rs.* 64. 8.; and second 7,887 rupees, accruing in the same way on account of mules, 117 rupees, being the Commissary General's rate, and 84 rupees, that adopted by the Examiner, Commissariat Accounts. The aggregate saving therefore under this head is 1,30,978 rupees, leaving the amount assigned for the expenditure of 1862–63 at 12,30,279 rupees.

131. *Cavalry Supplies.*—The Estimate for the feed of horses amounts to 10,43,475 rupees. The rate is 87 rupees per year per horse; the number of horses, viz., 10,577, assumed to be effective, is beyond the strength fixed by recent orders, even modified as those orders are by altering the number of cavalry horses to be kept below the established strength of men, from 15 to 5 per cent. The number of horses to be maintained in the regular Bengal Army are as nearly as follows:—

	Non-Commissioned Rank and File.	Less 5 per Cent.	
Cavalry Regiment	7×485=3,395	—169	=3,226
Horse Artillery Batteries	13×175=		2,275
Field „ „	26×110=		2,860
Lahore Light Horse			140
Body Guard			129
TOTAL			8,630
Add for the Punjaub and Hyderabad Artillery			570
TOTAL			9,200

132. The number of horses to be estimated for, therefore, is 9,200, which, at 87 rupees per horse, would give 8,00,400 rupees, instead of 10,43,475 rupees, showing a difference of 2,43,075 rupees to be deducted from the Commissary General's Estimate.

133. The revision above made, and the consequent reduction of the Estimate, is fully supported by statistics recorded in the Office of the Examiner, Commissariat Accounts, and from which it appears that there is a falling tendency in the expense incurred on account of the feed of horses, which for the first six months was about 20 per cent., the expenses in May being 1,07,529 rupees, and those in October 88,185 rupees; the number of horses fed in the month of May, according to the number of rations issued, being 12,975 against 11,596 in October; so that, while the number of horses to be fed is decreasing, the rates of feed are falling in a still greater ratio.

134. *Purchase of Reserve Stock.*—The sum of 7,69,898 rupees is entered in the Estimate as required for the purchase of reserve stock. Under an existing contract, the Commissariat Department is bound to receive 15,000 gallons of rum per month, or 180,000 gallons per year, which is below the average consumption; the balance in store, however, being large, this rate of delivery is for this year ample for all requirements. The sum required to pay for the 180,000 gallons of rum at *Rs.* 1. 4. per gallon, amounts to 2,25,000 rupees, and the transit charges are set down at 22,500 rupees; in all 2,47,500 rupees. The charges under this head are—

	Rs.
Rum	2,47,500
Victualling supplies	1,28,549
Contingencies connected with victualling supplies	1,86,286
Dieting supplies	69,089
Contingencies connected with dieting supplies	63,050
Ditto General	57,000
Consignments	18,224
Contingencies connected with consignments	200
TOTAL *Rs.*	7,69,898

The victualling and dieting supplies are to cost together 1,97,638 rupees; and for the contingencies, or the charges of an indefinite nature, 3,06,336 rupees are required under this head. These contingencies are said to comprise packing and the cost of transport, but it is objectionable to represent under the head of contin-

gencies any charge capable of being clearly defined. The Estimate under this head, therefore, is not satisfactory; it might have been early known to the Commissariat Department that a large supply of tea would be required to be obtained and paid for this year, in replenishment of reserve stock, to the extent of full 4½ lacs of rupees, in addition to the requirement of tea. The provision made under the head "Victualling Europeans," as modified by this department for the consumption of reserve stock, viz., 3,92,926 rupees. Hence, were reserve stock to be replenished exactly in the degree to which exhausted, the sum to be allowed for the purpose would be only 3,92,926 rupees; and, presuming that at least 2½ lacs of this sum represents the value of tea, there will then remain 1,42,926 rupees for the renewal of miscellaneous stock articles, to which, adding 4½ lacs, the sum required for maintaining a 15 months' reserve stock of tea, the requirements for the replenishment of reserve stock will be as follows:

	Rs.
Victualling and dieting supplies	1,42,926
Tea	4,50,000
Rum	2,47,500
Contingencies for packing, transit, &c.	1,50,009
TOTAL *Rs.*	9,90,435

135. In reference to the Estimate for the purchase of reserve stock, the Commissary General has openly informed this department that it will be subject to thorough revision at an early date; and I have no doubt this review will prove useful, owing to the care which the Commissary General assures me Captain Ogilvie has taken in drawing out the Estimate.

136. *Purchase of Live Stock.*—Under this head, 48 horses are proposed to be purchased for the Punjab Irregular Force, at a cost of 15,000 rupees, being an average of 312 rupees each, but in all probability these horses can be supplied from the studs, and the attention of the Commissary General and the Superintendent of Studs will be called thereto. Besides the horses, 146 camels, costing 2,000 rupees, are said to be required for the Punjab Government. The Commissariat Department requires 101 mules and yaboos to be employed in the transit of stores in mountainous districts, and for which 6,940 rupees are wanted. None of these requirements seem to be absolutely necessary, and if a sum of 10,000 rupees, instead of 23,940 rupees, were allotted to the Commissariat Department for the purchase of live stock, it would prove ample.

137. *European Hospital Supplies.*—The sum estimated for under this head is 9,36,545, rupees as the cost of keeping 4,000 men in hospital, and would give an average of about 234¾ rupees per man per annum.

This rate includes the following charges:—

	Rs.	*a.*	*p.*
Dieting, per man	136	3	7
Contingencies	14	15	9
Bazar medicines and hospital necessaries	23	15	9
Medical comforts	21	10	6
Hospital clothing and hospital miscellanies	37	8	—
TOTAL *Rs.*	234	5	7

138. In the Estimate of 1861–62, 180 rupees per man per annum were allowed for hospital dieting, including all items except bazar medicines and hospital clothing. The figures in the Estimate of 1861–62 were as follow, calculated for 5,000 sick:—

		Rs.	*a.*	*p.*
Dieting, &c.		9,00,000	—	—
Bazar medicines		92,638	—	—
Hospital clothing		1,74,047	—	—
	5,000)	11,66,685	—	—
	Rs.	233	2	4

139. By figured statements subsequently received from the Medical Examiner, the average actual expense incurred in hospitals from May to October 1861, is at

at the rate of 192 rupees per man for all the above supplies,* exclusive only of clothing, but which being added at the rate taken by the Commissary General, viz., *Rs.* 37. 8. per man per annum, would make the aggregate cost per man per annum *Rs.* 229. 8.; and as the probable number in hospital during 1862-63 will be 3,600 men, the amount required for the cost of supplies to European hospitals will be only 8,26,200 rupees. The amount to be deducted from the Estimate is therefore 1,10,345 rupees; but I may remark that it would have been more satisfactory if the proportion of reserve stock to be used had been shown under this head, as under that of victualling.

* Dieting.
Bazar Medicines.
Hospital Necessaries.
Hospital Contingencies.

140. *Supplies to Medical Department.*—The amount entered in the Estimate under this head is 49,924 rupees, as shown in the margin, but by a communication from the Inspector General, Medical Department, No. 1558, dated 22d March 1862, the allotment for the Cawnpoor Circle has been reduced from 4,000 rupees to 3,000 rupees; the estimated sum will therefore be 48,924 rupees; that entered in the sanctioned Estimate of 1861-62 was 50,000 rupees.

	Rs.
Medical Depôt supplies	48,627
Contingencies	1,297
TOTAL	*Rs.* 49,924

141. *Victualling Native Troops.*—The bulk of the estimated charge under this head, which amounts to 1,49,917 rupees, is on account of compensation for dearness of provisions, viz., 1,47,744 rupees. The provision made in the Estimate of 1861-62 for compensation was 1,16,695 rupees; the excess this year is therefore 31,049 rupees. In consequence of the reduction of the numerical strength of the Native Army, and the more favourable state of the markets, the sum required for compensation for dearness of provisions ought to be less this year. It will be ample provision for 1862-63, if the sum allowed in 1861-62 be granted, viz., 1,16,695 rupees, thus reducing the Commissariat Estimate by 31,049 rupees.

142. *Native Hospital Supplies.*—The only items under this head are bazar medicines and hospital necessaries, which together amount to 10,000 rupees. The charge seems moderate and unobjectionable.

143. *Transport Charges.*—The aggregate amount required for Transport Charges is 1,63,334 rupees, and is sub-divided into two sums, viz., 1,33,817 rupees for the transit of troops, and 34,517 rupees for the transit of medical stores, but to this total must be added 1,20,000 rupees for the carriage to be supplied to the Ordnance Department, thereby making the aggregate of transport Charges, 2,83,334 rupees. This, however, is exclusive of the transit of commissariat supplies, which is provided for as "Contingencies" under the several heads of "Victualling Europeans," "European Hospital Supplies," "Purchase of Reserve Stock," "Malt Liquor, &c." As regards the movement of troops, however, it may be expected that owing to the extensive movements during the last year, the movements of the year 1862-63 will be fewer, but there is no definite information in this department respecting the intended movements in 1862-63. Government have, however, in Financial Resolution, No. 2330, dated 31st March 1862, ordered this to be supplied, and called attention to letter No. 7570*a*, dated 25th March 1862, from this department.

144. *Barrack Department.*—The contingent charges connected with the administration of the Barrack Department and the supply of barrack furniture, are set down at 3,38,214 rupees for the year 1862-63, as shown in the margin. It has already been remarked that "Contingencies" is a very inappropriate head for any charges that can be clearly defined; and this point will be pressed on the attention of the Commissariat Department. The charges thus represented as contingencies, doubtless, are for lighting, and other petty supplies, and according to the estimated amount, these average on the European force nearly 8 rupees per man per annum; but 6 rupees per man would appear to be ample to cover all contingencies; I have, however, left the amount untouched, pending a further investigation into the detail.

	Rs.
Contingencies	3,31,316
Barrack furniture	6,898
TOTAL	*Rs.* 3,38,214

145. It will be perceived on referring to the margin, that the estimated cost of barrack furniture is a mere trifle, viz., 6,898 rupees. This may be owing to two causes; first, that the accurate inventory made during the present year of the stock of barrack furniture has proved it to be in excess of actual requirements; and secondly, that under the arrangement formerly existing, by which the Public Works Department supplied all articles of barrack furniture, the bulk of the charge for such supply has been excluded from the Commissariat Estimate.

Estimate. Under recent orders, however, the Commissariat Department is required to pay for the supply of furniture obtained from the Public Works Department or other sources, and some modification of the Estimate may therefore be necessary.

146. *Malt Liquor.*—The amount estimated under this head is 12,06,567 rupees, as shown in the margin; but under a mistaken idea that stores landed at Kurrachee for the use of the Bengal Presidency, and which are to be paid for in Bombay, should not be included in the Budget Estimate of the Bengal Presidency, the value of the malt liquor required for the European portion of the Bengal Army situated in the Upper Circle has been excluded from the Bengal Commissariat Budget Estimate. This is confounding the Cash Requirement Estimate with the Budget Estimate, documents which are very different from each other, and whose distinctive characters have been frequently explained. The supply of malt liquor required for the Bengal Presidency and expected to be landed at Calcutta and Kurrachee during 1862-63, is,—

	Rs.
14,387 Hhds. at 60 rupees each	8,63,220
Contingencies, including Transit Charges	3,43,347
Rs.	12,06,567

	Hhds.	Contractor's Price.	Total.
		Rs. a. p.	*Rs. a. p.*
Porter	17,517	at 41 3 8	7,22,211 5 –
Ale	24,676	at 46 9 –	11,48,976 4 –
Contingencies, including transit charges	– –	– – –	8,05,693 – –
		Total - *Rs.*	26,76,880 9 –

The Estimate must therefore be increased by 14,70,313 rupees.

147. *Bedding.*—The cost of bedding is estimated at 2,34,493 rupees, which for 42,000 men, including provision for soldiers' wives, would give an average of nearly 6 rupees each. The Estimate may therefore be considerate moderate.

148. *Miscellaneous Charges.*—The Estimate under this head is 79,056 rupees, and the only reason assigned is that the money is required to meet the advances made in one Commissariat range on account of another. But as the executive officer of each range has provided fully for his requirements, the purposes for which these advances are required will be found provided for, or included in the aggregate of the provision made for all the executive ranges, the amount therefore must be excluded from the General Estimate. It has, however, since been ascertained that the Commissariat Department were desirous of making provision under this head for the extra expenses incurred on account of "Command parties," but such extra expense will be comparatively trifling, and will be amply covered by an allowance of 20,000 rupees; at the same time it would be more desirable to estimate for these charges under a distinct head.

149. *Ordnance Department.*—The cost of the supplies to be provided by the Commissariat to the Ordnance Department is estimated at 5,56,495 rupees; that is, 3,80,495 rupees on account of stores, and 1,76,000 rupees on account of carriage. The estimate for stores is moderate, but that for carriage is high, being 56,006 rupees in excess of the amount sanctioned in 1861-62, and which, there is good reason to believe, has not been exceeded. It is considered safe, therefore, to fix the carriage at the amount granted last year, viz., 1,20,000 rupees, thus reducing the estimate by 56,000 rupees. The sum of 1,20,000 rupees has been included under the head transit charges; and probably this sum may be even further reduced, for if the movements of troops this year be few, the reserve and supernumerary transport cattle may be made available for the carriage of departmental stores. The expense of moving ordnance for the practice of artillery may also be diminished by making use of the ordnance available at each station, or by employing the very large number of transport train cattle maintained for siege pieces in moving the guns from one station to another for the annual practice of artillery, or in adapting the scale of practice to the ordnance at the stations.

150. *Port Blair.*—The charges estimated for under this head are as per margin, for establishments and supplies, amounting to 1,21,236 rupees. It is not a military charge, and as such, should not fall against the Military Budget grant, but should be provided for in the Civil Budget, in order that cash payment may be made to the Military Department for the supplies furnished by it in pursuance of the provisions of the Financial Resolution of the 19th August 1861.

	Rs.
Naval Brigade	58,452
Superintendent, Port Blair	60,156
Provision for convicts	2,628
Total	*Rs.* 1,21,236

151. *Marine Department.*—The supplies to be made by the Commissariat on account of the Marine Department, are on data furnished by the marine authorities, estimated at 6,64,176 rupees, but this also is not a charge falling against the Military Budget grant, as it is to be met out of the grant made for the Marine Department, under the Government of India, and will be provided for in that Estimate, the Commissary General obtaining the funds for the supplies on separate letters of crdit.

152. The subjoined summary will show the modifications made in the Estimate of the Commissariat Department as originally submitted.

Summary, Commissariat.	Controller's Estimate.	Additions.	Reductions.	Revised Estimate.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Victualling Europeans	43,12,298	- -	4,48,559	38,63,739

TOTAL *Rs.*	1,20,18,652	18,10,850	19,99,414	1,18,30,088
Net Decrease *Rs.*				1,88,564

ORDNANCE DEPARTMENT.

153. Having, in connection with the Estimate of the Commissariat Department disposed of the amount required for the stores and carriage to be supplied by the Commissariat to the Ordnance Department, it only remains now, in reference to the Estimate of the latter Department, to consider the expenditure to be incurred during 1862-63, on account of services under the direct control of the Inspector General of Ordnance. The cost of these services is thus detailed in the Estimate:—

	Rs.
Repairs of camp equipage	40,000
Repairs of harness and saddlery	22,000
Contingent expenses	27,022
Forest operations	89,875
Supply of timber agency stock	89,340
Freight for stores shipped from port to port	2,000
Value of stores to be obtained from England	96,067
Freight for stores shipped in England payable in India	20,000
TOTAL *Rs.*	3,86,304

154. The amount required for the repair of the harness and saddlery is for the horse equipments in use with the old Royal artillery and cavalry, the

allowance of one rupee per saddle, and *Rs.* 1. 8. per harness for the horse equipments in use with the Indian artillery and cavalry being drawn with their pay and allowances as a regular contract rate. To this Estimate there is nothing to object, as the reserve stock of local supplies is stated to be low. The amount required for Forest operations and Timber Agency Stock, aggregating 1,79,215 rupees, appears large, but of the amount estimated for last year on this account, viz., 2,16,302 rupees, only 1,29,519 rupees were expended up to February last, and therefore, in order not to reduce the reserve stock below a safe standard, last year's economy must be compensated for by a somewhat extra expenditure during 1862-63.

155. The amounts now passed under the several heads, as compared with those sanctioned last year, are as follow:

Services.	Sanctioned in 1861-62.	Estimate of 1862-63.	Increase.	Decrease.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Repairs of camp equipage - -	40,000	40,000	—	—
„ of harness and saddlery -	12,000	22,000	10,000	—
Contingent expenses - - -	23,000	27,022	4,022	—
Forest operations - - - -	- -	89,875	89,875	—
Timber agency stock - - -	73,000	89,340	16,340	—
Freight for stores from port to port -	- -	2,000	2,000	—
Value of stores to be obtained from England - - - - -	- -	96,067	96,067	—
Freight for stores shipped in England payable in India - - - -	25,000	20,000	- -	5,000
Stores supplied to the ordnance manufactories - - - - -	1,56,716	- -	- -	1,56,716
Total - - - *Rs.*	3,29,716	3,86,304	2,18,304	1,61,716

This Estimate, as a whole, is fully warranted by the course of the expenditure during 1861-62, as far as ascertained. The only item that may attract attention, not for its exorbitance, but because of the smallness of the amount, is the value of stores to be received from England, which are estimated at below one lac of rupees, and more especially as the Inspector General has declared that this demand "includes everything required at present, all previous indents being considered cancelled;" but that officer adds, in explanation, "the demand is small in consequence of the large reserve stock, which is caused to a considerable extent by the reduction of the army."

156. I deem it advisable to quote here the further remarks of the Inspector General of Ordnance, in reference to the demand for stores from England: "It was recommended in Ordnance Department's letter to Government, No. 8076, dated 6 February 1861, that English supplies should be sent out so as to arrive at Calcutta and Ferozepoor during the year for which they were estimated. Until this course be pursued, the amount estimated for will form no criterion of the actual expenditure which will be incurred in England during the year on this account." I support this request, and advise that the contracts for stores be reported immediately they are made in England, and that the date by which to be supplied, in what quantities, and at what cost, together with the arrangements for shipping the stores be likewise reported.

Clothing Department.

157. The clothing estimate of the Bengal Presidency, including the value of materials received from England, local supplies, and tailoring charges, amounts to 15,41,162 rupees, exclusive of establishments; but adding these latter, the aggregate cost according to the Estimate is as below:

	Rs.
Cost of English material - - - - - - -	9,92,093
Cost of local supplies, compensation, and tailoring charges - - - - - - - - -	5,49,063
Salaries of commissioned and warrant officers and office establishments - - - - - - - - -	95,443
Total - - - *Rs.*	16,36,599

158. There

158. There are some features in this Estimate which are markedly different from the probable results set forth according to the data given in the Madras Clothing Department Estimate. In the Bengal Estimate the value of the English material to be used up in 1862-63 is 9,92,093 rupees, and the cost of local supplies, compensation, and tailoring charges is 5,49,063 rupees, the latter being about 55 per cent. of the former; whereas in the Madras Presidency the value of the English material to be used in 1862-63, including that for British regiments, is 6,37,955 rupees, and the cost of local supplies, compensation, and tailoring charges is 1,62,429 rupees, or about 25 per cent. on the value of English materials.

159. Then again the fact that the Madras Estimate for 13,605 Europeans and about 45,000 Natives, including the Hyderabad Contingent (these figures being those assumed in the Estimate as submitted), requires materials to the value of 6,37,955 rupees, according to the scale indicated in the Madras Estimate, and that the Bengal Clothing Department professedly for 45,498 Europeans and 69,492 natives (the figures used in the Bengal Estimate) only requires materials to the value of 9,92,092 rupees, is unaccountable. It is to be observed, as regards the Madras Clothing Estimate, that there are discrepancies in the value of clothing which require to be examined. For instance, serge trowsers costing more than woollen trowsers, and the supply of both being estimated for in the same year. As these discrepancies, however, for the most part only affect the value of reserve stock to be used, they will not much interfere with the cash requirement estimate, and will therefore admit of rectification at leisure, and to effect which, the attention of the Controllers of Military Finance at both Presidencies will be directed.

160. The cash requirements for local supplies, tailoring charges, and compensation of the Bengal Clothing Department are above shown to be 5,49,063 rupees, exclusive of the charge for establishments, as estimated for by the department. The amount allowed in the Estimate of 1861-62 for these charges was 5,62,504 rupees, so that this year's Estimate is somewhat below that of last year. The ascertained disbursements of the Clothing Department for the year 1861-62 do not sustain any claim to so large a demand, being on the scale of about 4¼ lacs for the year, and there is no circumstance to warrant a larger expenditure in 1862-63 than has been incurred during 1861-62.

161. Having noticed the great disparity in English material to be used at Madras and Bengal, perhaps it would not, until further explanation be afforded, be advisable to attach too much importance to the comparative cost of clothing European and Native troops in the two Presidencies. According to the data in the Estimates submitted by the two departments, the cost of clothing a European soldier in the Bengal Presidency is *Rs.* 25. 2. against *Rs.* 35. 11. in Madras, and a Native soldier *Rs.* 6. 3. against 7 rupees in Madras, according to the following calculation:

	Europeans.	Natives.	Standard and Colours.
Clothing materials - - - -	7,16,989	2,75,104	4,000
Tailoring charges - - - -	3,59,301	28,100	—
Establishment charges - - -	½ = 66,522	½ = 66,522	—
	11,42,812	3,69,726	4,000
	divided by 45,495 = *Rs.* 25 . 2. per man.	divided by 59,492 = *Rs.* 6. 3. per man.	

162. The data on which the consumption of English material has been estimated must necessarily affect the extent of the demand comprised in the annual indent on the Home Authorities.

Stud Department.

163. The Estimate made for this department in 1861–62 by the officers of the Stud Department, and accepted by this department, was for 14,61,996 rupees, that submitted by the Superintendent of Studs for 1862–63, is for 12,69,338 rupees, being 1,92,658 rupees below the Estimate of 1861–62, but information collected by this department subsequent to the submission of the Budget Estimate of 1861-62, afforded unmistakeable evidence that an excessive Estimate had been originally prepared by the Stud Department.

164. The Estimate submitted for the present year, amounting to 12,69,338 rupees, comprises the following items:—

	Rs.
Keep of cattle	9,01,979
Road expenses of cattle	38,618
Purchase of cattle	2,74,775
Depôt contingencies	53,966
TOTAL *Rs.*	12,69,338

From the more detailed Estimates of the stud officers, the following Table has been compiled, showing the numbers of cattle and the rates of feed.

Description of Cattle.	North Western Provinces.			Central Stud.			Kurnaul Remount Depôt.			Total.
	No.	Rate of Keep per Mensem.	Amount.	No.	Rate of Keep per Mensem.	Amount.	No.	Rate of Keep per Mensem.	Amount.

Cultivation Expenses	–	– – –	1,175 12 8	–	– – –	1,625 – –	–	–	—	—
TOTAL per Annum	–	– – –	14,109 8 –	–	– – –	19,500 – –	–	– – –	– –	33,609 8
								GRAND TOTAL *Rs.*		8,65,679 7

On examining these rates with those recorded by the Examiner of Commissariat Accounts, as admitted during 1861–62, they are rather below than above the average, and the charges therefore seem admissible.

165. The keep of the cattle at the Hissar Farm costs for maintenance 36,300 rupees per year, and is as follows:—

96 Herd bulls 52 Supernumerary bulls 3,335 Cows 425 Castrated produce 1,209 Male ,, 1,338 Female ,, 14 Camels 225 Bullocks	3,025 rupees per mensem,	or	36,300 rupees per annum.

The

The utility of keeping up such a department of supply is now very questionable, when it has been declared by competent authority, namely, Colonel Thomson, C.B., late Commissary General, that carriage cattle to any extent can be procured on a few days' notice, and when all artillery batteries are now horsed and bullock draught disused, except for heavy field ordnance.

166. From the tabular statement above given, it will be observed that at the Kurnaul Remount Depôt, the maintenance of 1,680 remounts costs nearly two lacs of rupees, or 119 rupees per horse. Now it is pretty well understood that a horse in a remount depôt costs considerably less than when effective with cavalry or artillery. From this report it will be seen that the Commissariat Department estimates the annual cost of the feed of horses in use with the army at 87 rupees per horse; taking 72 rupees, therefore, as the cost of the feed of a horse at the remount depôt, a rate warranted by results recorded in the office of the Commissariat Examiner, the 1,680 remounts standing in the Kurnaul Depôt should only cost 1,20,960 rupees per annum; the amount to be deducted from the Estimate of the Kurnaul Remount Depôt is therefore 78,120 rupees.

167. The cattle proposed to be purchased are as follows:—

	Rs.
50 Stallions	75,000
900 Colts and fillies, N. W. Division	93,000
910 „ „ Central „	1,00,600
100 Bullocks, N. W. Division	3,000
53 „ Central „	1,675
10 Express Camels	800
25 Bulls	700
	Rs. 2,74,775

I cannot see the necessity for so extensive a purchase of cattle, and pending further inquiry which the Controller of Military Finance has been directed to make, I would suggest to Government to restrict the purchase of cattle to the following:—

	Rs.
25 Stallions	37,500
900 Colts	93,000
100 Bullocks	3,000
25 Bulls	700
	Rs. 1,34,200

168. The amount therefore to be deducted from the Estimate on account of the purchase of cattle, is 1,40,575 rupees; and adding to this the sum struck out of the Estimate for the Kurnaul Depôt, namely, 78,120 rupees, the total amount to be deducted is 2,18,695 rupees from the aggregate Estimate of the Stud Department, namely, 12,69,338 rupees, leaving the residue, 10,50,643 rupees, as the grant for the year. But I have still strong doubts whether there will be any occasion for appropriating to the full extent the reduced amount above allowed for the purchase of cattle.

169. Further, as an additional stud is proposed to be formed, I would suggest to Government that if the superintendent of studs be able to effect any savings out of the amounts allotted for the purposes above specified, and that if he can further diminish the number of colts to be purchased without interfering with the good faith to be observed towards the breeders, he be permitted to exercise his judgment in appropriating the sum saved to increase the number of stallions. The bullocks required to be purchased for the Stud Department, it appears, might be obtained without additional cost from the Hissar Farm, or from the surplus bullocks now on the hands of the Commissariat Department.

Medical Department.

170. In the Commissariat Departmental Estimate, provision was made for the supply of petty stores to medical depôts to the extent of 48,924 rupees. In addition to such supplies, there are others obtained direct by the medical store-

keeper with the sanction of the Principal Inspector General, Medical Department. These supplies, the medical examiner informs this department, consist of sulphuric and nitric acids, ether, castor oil, &c., for which the medical storekeeper enters into direct contract; and besides these, silver, to the amount of 6,145 rupees, is also obtained from the Mint. The total cost at which the services, under the direct control of the Principal Inspector General, Medical Department, are estimated at, is 31,127 rupees, and the sum appears to be admissible.

171. The additions and reductions made in Title II. in the Bengal Military Estimate of 1862-63, result in a net increase of 11,25,096 rupees as shown in the margin, which is attributable, exclusive of the additions made on account of malt liquor, to those representing the value of Europe stores not hitherto paid for in India. The gross reduction made from the Controller's Estimate is 16,73,423 rupees; and the gross addition thereto 27,98,519 rupees, the latter comprising 4,170,313 rupees for malt liquor, and 13,28,206 rupees for Europe stores; this latter item being an additional and an important entry in the Departmental Budgets, and in excess of the items provided for in last year's Estimates.

	Rs.
Revised Estimate - -	1,49,45,301
Controller's Estimate - -	1,38,20,205
Net increase - - - *Rs.*	11,25,096

MADRAS.

Commissariat Department.

172. *Victualling Europeans.*—By the latest returns of the Madras Army strength received from the Quartermaster General of the Presidency, the effective European force was 15,375. The established strength fixed by the Despatch of the Government of India of the 18th May 1861, and modified, as respects the strength of regiments, by the Despatch of the Secretary of State for India, No. 247, of 17th June 1861, and on which I reported in letter No. 407*a*, of July 1861, is 14,693 non-commissioned rank and file; but as it is decided by letter from the Government of India, No. 356, of 10th April 1862, that instead of 11 regiments of European Infantry, only 10 regiments shall be the complement of that arm for the Madras Presidency, and that the European cavalry shall be reduced to 485 non-commissioned rank and file per corps, the established strength of the European force at the Madras Presidency is 13,575, as per margin. Then taking 1 in 12 as sick, the number of European soldiers to whom ordinary rations will be supplied during 1862-63 will be about 12,457, and the number to be dieted in hospital nearly 1,134. A small addition has been made on account of the European veterans. The numbers are sufficiently accurate for calculating cost.

	Rs.	*Rs.*
5 Batteries of horse artillery - -	at 140	700
3 Field battery - - - - -	at 140	1,820
1 Reserve battery - - - -	at 75	825
12 Regiments of cavalry - - -	at 485	970
10 Regiments of infantry - - -	at 918	9,180
Sappers - - - - - -		80
	Rs.	13,575

173. The Madras Commissariat Department's Estimate for victualling Europeans is 18,86,978 rupees, so that according to the number to be supplied with rations the cost is *Rs.* 151. 5. per man per annum, a rate which appears very high. On looking at the distribution of the Madras European force, and the cost of rations at the several stations, as published in the Fort St. George "Gazette" of September last, it appears that the rate obtaining in the Nizam's territories is the lowest, being *Rs.* 74. 4. per man per annum; whilst at all other stations of the Madras Presidency in the peninsula of India, the average rate is 103¼ rupees per man per annum; and in the Province of Pegu and the Straits Settlements, where the cost of rations is highest, the rate averages 153 rupees per man per annum. Applying these rates to the proportion in which the European force will probably be distributed among the above three sections of the Madras Presidency, the probable expenditure will be as follows:—

		Rs.	*a.*	*p.*	*Rs.*
Nizam's Territories - - - - - -	2,900 ×	74	4	0 =	2,15,325
Other Stations in the peninsula of India -	7,395 ×	103	4	0 =	7,63,534
Pegu Division - - - - - -	2,162 ×	153	0	0 =	3,30,786
Number of men to be rationed - - -	12,457	Total Cost -			13,09,645

The

he Madras Estimate for "Victualling Europeans" may therefore be reduced y 5,77,333 rupees. The above calculation includes tea and coffee to be issued the troops. The value of tea to be purchased for issue, in addition to the uantity in store, is 84,784 rupees, and of coffee, 26,460 rupees, making toge- her 1,11,244 rupees; but there is no provision made for the replenishment of eserve stock. This point requires explanation, and the attention of the Con- oller will be called to it.

174. *Public Cattle Department.*—The expenditure under this head is repre- nted under two sub-divisions in the Estimate, viz.:—

	Rs.
Artillery draught cattle supplies	6,881
Public cattle department	4,81,376
Total	*Rs.* 4,88,257

175. The cattle to be maintained, and the estimated rates of feed, are as elow:—

	Rate per Annum.			
	Rs.	*a.*	*p.*	*Rs.*
Elephants	317 at 388	15	0	=1,23,294
Camels	1,870 at 103	6	7	=1,93,447
Bullocks	2,544 at 67	6	11	=1,71,693
Total				*Rs.* 4,88,434

176. These rates are high compared with returns received from the Madras Commissariat Department in 1859, showing the cost of maintaining army cattle, and the rates then given being those that prevailed in 1858, when active operations were going on, cannot be considered below the ordinary average. These rates are as follow:—

	Rs.	*a.*	*p.*	*Rs.*
For Elephants	377	1	0×	317=1,19,528
„ Camels	87	15	0×1,870	=1,64,445
„ Bullocks	47	4	0×2,544	=1,20,704
Total				*Rs.* 4,04,677

The difference between the above sum and that shown in the Madras Estimate, is 83,580 rupees, but even 4,04,677 rupees is a large expenditure for the mere feed of public cattle establishments, and the number of elephants and bullocks maintained would appear capable of reduction, especially as this expense is exclusive of that attending permanently hired cattle, which will be found under the head "Transport Charges."

177. *Cavalry Supplies.*—The Madras Commissary General appears to have estimated for 5,217 horses at the average rate for feeding of *Rs.* 75. 7. per horse per annum, giving a total expense of 3,93,564 rupees. But the number of horses attached to cavalry and artillery are not quite so many, being as follows:—

		Non-commissioned Rank and File.	Less 5 per Cent.
	2 European cavalry regiments	2×485= 970	—48= 922
	4 Native cavalry regiments	4×387=1,548	—77=1,471
17	5 Troops horse artillery	5×175=	875
17	2 Batteries	2×120=	240
17	10 Ditto	10×110=	1,100
	Total Number of Horses		4,608

And 4,608 × *Rs.* 75. 7.=3,47,616 rupees, being 45,948 rupees below the estimate made at Madras.

178. *Purchase of Reserve Stock.*—The items of expenditure provided for under this head are as follow:—

	Rs.
Arrack supplies	57,499
Grain and provision supplies	5,81,580
Supplies of personal appointments	10,123
Timber supplies	17,006
Total	*Rs.* 6,66,208

179. *Arrack.*—On examining the details, it is observed that after deducting for the number of sick, 12,673 men are assumed as the number for whom arrack is to be supplied in the proportion of two drams per day to 3,278 men, and one dram to 9,395 men. As the strength assumed varies but little from that taken by this Department, which is 12,448, the Madras calculations in this respect need not be disturbed. The annual consumption on the above conditions, after allowing 5 per cent. for wastage, is 1,52,831 gallons; but a reserve of two years' stock, besides the quantity for consumption during the year, is said to be required. The Estimate is, therefore, thus framed:—

	Gallons.
Probable stock to remain on 1st May 1862 - -	4,03,984
Deduct two years' stock - - - - - -	3,05,662
Balance - - - Gallons	98,322
Quantity to be purchased to complete annual consumption	54,509
One year's consumption - - - Total Gallons	1,52,831

180. This quantity of 54,509 gallons with contingencies, such as cost of rivets, iron hoops, firewood, &c., &c., is estimated at 57,499 rupees. The rate at which the liquor is supplied is 132 rupees for 150 gallons, the cheapest spirits obtainable in the three Presidencies being less than 1 rupee per gallon. A reserve stock of 18 months would be ample to meet any requirement, or any emergency; but considering the grave objections urged by medical officers against new spirits, the present requisition to purchase 54,509 gallons is complied with on sanitary grounds. Measures should be adopted to gradually reduce the reserve to 18 months' stock, that is to say, on the 1st May a sufficient quantity of arrack ought to be in hand to be equal to the consumption of 18 months, and that the arrack to be purchased subsequent to, but as soon as possible after, the 1st May should be equal to the expenditure of the year.

Rangoon	1,433
Thyet Myo	1,400
Tongoo	1,250
Singapoor	800
Penang	1,600
Malacca	1,000
Labuan	100
TOTAL	7,583

181. *Grain and Provision Supplies.*—The Estimate under this head is framed to provide sea provisions for 1,000 Europeans and 3,000 natives for 30 days, and for victualling 7,583 natives serving in Pegu and the eastern settlements, as shown in the margin. These victualling supplies are included under the head "Reserve Stock," because they have to be purchased and stored by the commissariat and then issued to the troops. The numbers to be provided for are beyond actual requirements, and the estimate appears high, while the statements purporting to give the details on which the estimate is based contain several errors in calculation and inconsistencies, so much so, that it was only after laborious investigation that any approximately correct idea of the number of men estimated for, and the rates of the different articles, was arrived at. The men to be rationed are represented, sometimes by the number of meals during the day multiplied by the number of days in the year, sometimes by the number of men multiplied by the number of days in the year, sometimes no indication of the number of men is given, and the quantity (rice for instance) to be supplied is given by the number of bags, without any note of the number of pounds in each bag. I shall call the attention of the Controller, Military Finance, Madras, to these defects, in order that the Commissary General may guard against them in future estimates.

Biscuits	30 lbs.
Rice	15 „
Flour	7½ „
Ghee	1¾ „
Sugar	3¼ „
Vinegar	¼ gall.
Lime juice	½ „
Mustard seed	½ lb.
Pepper	¼ „
Firewood	90 „

182. *Sea Provisions for* 1,000 *Europeans for* 30 *days.*—The articles of rations to be supplied to Europeans on board ship, including firewood, are calculated as costing 10,450 rupees, or 10½ rupees per man for the month. Each man's ration is entered in the margin for the purpose of indicating the expensive scale on which these rations are provided. Besides the articles of rations, however, the Madras Commissary General requires 9,370 rupees on account of utensils, &c., to be supplied to the men during their month's voyage. The articles are all enumerated, and I shall specify those which are not of a perishable nature, and which therefore are only required to be issued for use from the Commissariat Reserve Stock and returned again after the voyage. Nothing more than the wear and tear of these articles should be provided for; but so loosely are the Estimates prepared that their entire value is provided for

or as likely to be expended during the year. The articles to which objection is taken on the above grounds are—

	Rs.	a.	p.
1,250 lbs. Sheet lead	253	12	–
20 Sets of copper pots with covers	781	–	–
20 Tin pumps	50	–	–
20 Iron ladles	15	–	–
80 Buckets	240	–	–
40 One-gallon, 8 half-gallon copper pots	140	–	–
40 Copper dram cups	12	8	–
20 Sets scales and weights	190	–	–
10 Steel yards	158	12	–
20 Brass cocks	30	–	–
2 Copper funnels	2	8	–
21 Lanterns with padlocks	70	–	–
20 Tubs of 50 gallons each	200	–	–
10 Necessaries	210	–	–
231 Water casks	3,696	–	–
TOTAL Rs.	6,049	8	–

The value of these articles amounts to 6,050 rupees, and 10 per cent. thereon may be allowed for the wear and tear of the voyage, viz., 605 rupees.

The articles deemed admissible as utensils, &c., are —

	Rs.	a.	p.
10 Fire-places with iron bars	538	–	–
10 Scuttle casks	160	–	–
6 Dry casks	120	–	–
8 Tin funnels	1	4	–
120 lbs. Wax candles	105	–	–
200 gallons, Vinegar, for sprinkling decks	63	10	–
350 Gunny bags	73	8	–
18 Dubbers	36	–	–
65 Boats for shipping provisions	121	14	–
58 „ „ water	203	–	–
Watching peons and coolies' charges for fixing fire-places	47	3	–
TOTAL Rs.	1,469	7	–
Add 10 per cent. on imperishable articles for wear and tear	605	–	–
TOTAL Rs.	2,064	7	–

so that the estimate as regards these items is capable of reduction to the extent of 7,300 rupees.

183. I am able to enter into these details, because the authorities at Madras have furnished full particulars of the data on which the Departmental Estimates have been framed; and I mention this with much satisfaction, for although I have been thus placed in possession of the means of detecting many errors, I have at the same time nearly all I could require for a thorough revision of the Madras Estimates.

184. *Sea Rations for* 3,000 *Natives for* 30 *days.*—With the present reduced establishment of Native troops located in Pegu and the Eastern Settlements, there seems no probability of so large a number as 3,000 Natives being moved by sea in 1862-63. If provision be made for 2,000 Native troops under this head it will be ample for meeting all probable contingencies. According to the estimate, the cost for provision on the authorised scale for 3,000 men is 15,082 rupees, or *Rs.* 5. 0. 4. per man for 30 days; and for 2,000 men it would be 10,055 rupees. A charge to this extent appears admissible, although the rate is high. But by the estimate, utensils, &c., to the value of 22,800 rupees, are stated to be required for the use of the Native soldiers on board ship. To this expenditure the same objection applies as was made in the case of Europeans proceeding by sea, that is, only the wear and tear of imperishable articles

should be charged. The items below specified must, therefore, be eliminated from the estimate :—

	Rs.	a.	p.
3,150 lbs. Sheet lead	761	–	–
3,000 Copper pots, with covers	2,343	12	–
60 Tin pumps	150	–	–
60 Iron ladles	45	–	–
2,500 Gunny bags	525	–	–
120 Buckets	120	–	–
60 Gallon pots, copper	285	–	–
60 Country scales and brass weights	570	–	–
30 Steelyards	476	–	–
60 Curry-stones and rollers	30	–	–
60 Lanterns, glass	210		–
30 Necessaries	630	–	–
120 Buckets, five gallons	600	–	–
692 Water casks	11,072	–	–
TOTAL - - - Rs.	17,818	–	–

185. And as this is calculated for a scale of 3,000 men, and as only 2,000 will be sent by sea, one-third of the value of the articles should be deducted, viz., 5,939 rupees, and 10 per cent. allowed on the remaining two-thirds, that is, on 11,879 rupees, which would amount to 1,188 rupees for the wear and tear of articles of the above description, issued for the use of 2,000 men. In addition, two-thirds of the following charges, estimated for 3,000 Natives on board ship, are admissible :—

	Rs.	a.	p.
30 Fire-places, with iron bars	1,614	–	–
360 lbs. Wax candles	315	–	–
600 gallons Vinegar, for sprinkling	191	–	–
60 Tubs	600	–	–
30 Scuttle casks	480	–	–
112 Dubbers	224	–	–
210 Boats, for provisions	395	–	–
180 Boats, for water	630	–	–
8 Dry casks	74	–	–
Watching peons	73	–	–
Charges for fixing fire-places	141	–	–
Coolies	290	–	–
TOTAL - - - Rs.	5,027	–	–
Deduct one-third	1,676	–	–
Remaining two-thirds =	3,351	–	–
Add 10 per cent. on two-thirds value of imperishable articles	1,188	–	–
TOTAL charge for utensils, &c., for 2,000 Native troops on board ship - - Rs.	4,539	–	–

The Estimate, therefore, is capable of reduction to the extent of 18,200 rupees.

186. The Native troops in the Eastern Settlements, to whom rations are to be supplied, are as per margin, aggregating 4,722 men, instead of 7,538, the number apparently assumed by the Madras Commissariat Department. It is not only as respects the number that the Commissariat Estimate for victualling Native troops in the Eastern Settlements is wrong, for on looking into the details, I observe that the estimates for some of the provinces are duplicated. Thus the Commissariat Officer at Rangoon, after estimating for 1,329 men at that station, estimates also for supplies to be sent to Thyet Myo and Tonghoo, also for board-ship provisions 3,212 men for one month, and further, for a reserve of three months of Ghee, Dholl, &c., while at the same time the Executive Officers at Thyet Myo and Tonghoo have each estimated for the supplies required at their respective stations, and all for a much larger

VICTUALLING NATIVES.	
Pegu Divisions:

		1,86,763
GRAND TOTAL for Pegu and Eastern Settlements - *Rs.*		4,20,782

187. The Madras Commissary General has failed to notice these duplications in the Executive Officers' Estimates for the Eastern Settlements, for he has aggregated them all, and given the above sum of 4,19,782 (*Qy.* 4,20,782) rupees as the total cash requirements under this head of the Commissariat Department in Pegu and the Eastern Settlements.

188. This portion of the estimate consequently requires to be entirely reconstructed, and must be made to provide for about 3,100 men in the Pegu Division and 1,700 men in the Straits Settlements, and also for a reserve of three months' rations for that number of men ; but any error in the details of the calculation will be corrected by the Madras Commissary General.

PEGU DIVISION, 3,100 Men.

Articles of Supply.	Quantity per Diem.	Number of Men.	Quantity per Year.	Rate at which Procurable.	Value.
	lbs oz. drs.		*lbs.*		*Rs.*
Rice - - -	2 0 0	3,100	2,263,000	At *Rs.* 4 per 164 lbs.	55,195

Turmeric - - -	0 0 2		4,848	„ 4· per 133⅓ „	146
Tobacco - - -	0 1 4		48,480	„ 12· per 133⅓ „	4,363
					46,835
				At 220 per cent. *Rs.*	1,03,037
Miscellaneous articles, repairs, &c. - -	-	- -	- -	- - - -	1,700
Three months' reserve stock - - -	- -	- -	- -	- - - -	25,759
				TOTAL - - *Rs.*	1,30,496

The total requirements for the Eastern Settlements are therefore—

	Rs.
Pegu Division - - - - - - - - - -	1,79,070
Straits Settlements - - - - - - - - -	1,30,496
TOTAL - - - - - *Rs.*	3,09,566

189. The difference between this estimate and that of the Commissary General, which amounted to 4,19,782 rupees, is 1,10,216 rupees, and the amount allowed is liberal, being annually (exclusive of the reserve stock), nearly *Rs.* 46. 8. per man in Pegu, and *Rs.* 61. 10. per man in the Straits.

190. Another item connected with the victualling of troops, and for which provision is made under the head reserve stock, is the storing of rice at Cannanore, to guard against scarcity. This is estimated at 1,02,351 rupees. The Controller of Military Finance at Madras objected to this outlay, as not being necessitated by any great emergency; but on the question being submitted to the Madras Government, they ruled that this reserve should be maintained in the provinces of Malabar and Canara. The amount, therefore, stands as an admissible charge in the estimate. The opinion of the Madras Controller was that, by laying up so large a quantity of grain in store, a loss may be expected from wastage, as well as from a portion of the supply becoming damaged, and that this risk might be avoided by giving compensation in lieu of rice, and I beg to support this view, adding that if it be necessary, even a higher rate of compensation should be paid, rather than store large quantities of rice.

191. Under the head of reserve stock is also included timber supplies proposed to be laid in—

		Rs.
Rosewood - - - - -	Cubic feet 2,000	5,000
Charges - - - - - - - - -		2,500
Teak-wood logs, Mysore Western Range	„ 700	5,706
One year's stock of timber at Jaulnah - - -		3,000
Hire for sawing timber - - - - -		800
TOTAL - - - *Rs.*		17,006

Of this sum, 7,500 rupees for rosewood has already been included among the stores to be supplied to the Ordnance Department. What timber is to be laid in at Jaulnah, or why a year's stock is wanted, is not explained; neither is any information given of the purpose to which 700 logs of teak wood, required to be purchased in the Mysore Western range, is to be applied. The Government

Government have decided on not building barracks at Jaulnah, and there are no extensive works connected with the Commissariat Department in Mysore, which would justify a provision of 700 logs of timber.

192. It is considered sufficient to pass a sum of 7,000 rupees for miscellaneous timber supplies, and this, subject to further explanation as to the purposes for which required, before any portion of it can be permitted to be appropriated.

193. The last item, under the head reserve stock, is the provision of personal appointments for troops proceeding by sea. These personal appointments consist of cumblies or country blankets, tin canteens, haversacks, bheesty bags, &c., of which a stock is kept at Madras, in the Mysore Division, and at Cannanore. The aggregate amount required for the provision of these articles is 10,123 rupees, but from the nature of the articles, and their trifling cost, 5,000 rupees would furnish a supply adequate to meet all demands. The estimate has therefore been reduced by 5,123 rupees.

194. The total reductions recommended under the head of "Purchase of Reserve Stock" amount to 1,55,872 rupees, leaving the net sum necessary for this service equal to 5,10,330 rupees.

Heads.	Amount Proposed by Commissary General.	Articles Reduced.	Amounts. Reduced.	Amount Required.
	Rs.		*Rs.*	*Rs.*
Arrack - - -	57,499	- - - - -	- -	57,499
Grains and provision supplies - - -	5,81,580	Utensils to Europeans -	7,300	4,40,837
		Sea provisions to Natives -	5,027	
		Utensils to Natives - -	18,200	
		Stores for victualling - Native troops, Eastern Settlements - - -	1,10,216	
Supplies to personal appointments - -	10,123	Generally - - -	5,123	5,000
Timber supplies -	17,006	Ditto - - - -	10,006	7,000
TOTAL - - -	6,66,208	- - - - -	1,55,872	5,10,336

195. *European Hospital Supplies.*—The amount estimated for under this head is 3,04,632 rupees, and the number of men to be dieted, as set forth in the detailed statements of the Madras Executive Officers, would appear to be 1,096, and this would give an expenditure of 278 rupees per man per annum. But from a statement of the cost of dieting Europeans in hospital at the several stations of the Madras Presidency, published in the "Fort Saint George Gazette," under date 17th December 1861, the average cost per man is *Rs.* 9. 9. 8. per month, or *Rs.* 115. 4. per year, to which adding 58 rupees per man for clothing and medical comforts, it will be *Rs.* 173. 4. per year per man. Now allowing 1 in 12 of the effective strength to be in hospital, the number to be dieted will be 1,134, as stated in paragraph 172; the cost will therefore be as follows:—

	Men.	*Rs.*
Dieting, bazar medicines, hospital necessaries, &c. -	1,132 × *Rs.* 115. 4.	= 1,30,464
Clothing and comforts - - - - - -	1,132 × ,, 58. 0.	= 65,656
TOTAL - - -		1,96,120

so that the Commissariat Estimate is capable of reduction to the extent of 1,08,512 rupees.

196. *Medical Department.*—The sum stated to be required on account of supplies to the Medical Department is 41,318 rupees, a supply disproportionate to the numerical force maintained; as, under this head, in the Bengal Presidency only, 49,000 rupees have been allowed. These supplies consist of bazar medicines,

medicines, medical comforts, packing materials, &c., and all seem to be provided on a scale of liberality for which there is no necessity. Some of the items to be provided at the Presidency are—

	Rs.
Empty bottles and corks	743
Tin canisters and jars	3,180
Deal-wood cases	3,731
Cocoanut oil	4,927
Other oil	1,556
Bazar medicines	7,000
Kegs and medicine boxes	2,580
Medical comforts	3,258
Saucepans	705
Spirits of wine	3,996
Wax	2,100
TOTAL - - - *Rs.*	33,776

197. The above are the principal items. Medical comforts are already provided for under European hospital supplies, and at the rate for miscellaneous medical supplies allowed in Bengal, which is 14,000 rupees per 1,000 men sick; the sum to be allotted to Madras should not be more than 17,000 rupees at the outside; however, 20,000 rupees are allowed subject to the special report of the medical examiner, to whom all the details given in the Executive Officers' Estimates should be submitted.

198. *Victualling Native Troops.*—Under the head "Reserve Stock," 3,09,566 rupees have already been allowed for victualling Native troops, and in the arrangement of the estimate the amount will be transferred from the former to the latter head; the only other item, viz., subsistence to military prisoners, is provided for under reserve stock, and for which 1,779 rupees are allotted in the estimate, and which appears admissible.

199. *Native Hospital Supplies.*—The amount required under this head is 38,857 rupees, to which, if lock hospital supplies, viz., 19,139 rupees, be added, the total will amount to 57,996 rupees. The detailed estimates of executive officers are found to present most remarkable variations. The rates given below are the expenses of maintaining a few of the Native regimental hospitals:—

Perishable Articles for the Year.	Half-yearly Supplies.	Annual Supplies.	Washing.	TOTAL.
Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*
246	64	37	- - -	347
214	44	- - - -	- - -	258
150	48	2	- - -	200
167	50	73	9	299
65	43	79	5	192
140	- - - -	83	9	232
428	148	- - - -	72	648

The last rate is for Native hospitals in the Eastern Settlements, where the charges are generally heavier. Taking the average of the first six rates, the annual cost per Native infantry regiment will be 254 rupees per regiment in India, and the rate at Rangoon, viz., 648 rupees, may be taken as the index of the cost of hospital supplies to a regiment in the Eastern Settlements. The entire cost may then be thus set down:—

			Rs.
In India	38	Regiments, Infantry × 254 =	9,652
„	4	„ Cavalry × 243 =	1,016
In Eastern Settlements	7	„ × 648 =	4,536
Regiments, including Sapper battalion	49	TOTAL - - - *Rs.*	15,204

But

But allowing for miscellaneous Native hospitals and other contingencies, the amount to be assigned to Native hospital may be raised to 18,857 rupees, thus allowing of a reduction of 20,000 rupees.

200. As respects lock hospitals, the rate of charge seems high, being at the rate of 85 rupees per patient per annum in the majority of the hospitals, and *Rs.* 108. 8. per annum per patient in the Mysore Eastern Range. It is observed that articles of an imperishable nature, such as furniture, &c., are included in the detailed lists of articles to be supplied. It is believed that the estimate will bear reduction to the extent of 25 per cent.; 14,355 rupees are therefore allowed, and 4,784 rupees disallowed, subject, however, to the special report of the examiner, Medical Department.

201. *Transport Charges.*—This is a heavy item in the Madras Commissariat Estimate, amounting to 4,43,090 rupees, as shown in margin. This includes the carriage of every description with the exception of that for malt liquor. The amount allowed for 1861-62 was only 1,61,683 rupees; the estimate for 1862-63 is consequently 2,42,335 rupees in excess of that of 1861-62. On examination, it is found that the whole of the amount entered against the Barrack Department is for attendants or establishments; consequently, 60,430 rupees has been transferred from Title II. to Title I., and entered as the cost of the establishment of the Barrack Department; the bulk of the remainder of the charge is for the carriage of camp equipage, as follows:—

	Rs.
Barrack Department - -	60,430
Camp Equipage Department -	2,48,473
Medical Department - -	12,792
Ordnance „ - -	40,076
Freight „ - -	72,247
Miscellaneous Carriage - -	39,072
Rs.	4,43,090

	Permanent Hired Bullocks.	Transit Bullocks and Coolies.	Railway.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*

Northern Division - - -	- -	6,306	- -	6,306
Mysore East Range, No. 597 -	32,238	394	- -	32,632
„ Western Range - -	- -	720	- -	720
Malabar and Canara, No. 228 -	11,244	2,664	- -	13,908
Ceded Districts - - -	- -	9,421	- -	9,421
Secunderabad, No. 597 - -	21,492	7,070	- -	28,562
Kamptee, No. 481 - - -	13,032	5,768	- -	18,800
Jaulnah - - - - -	- -	900	- -	900
Total - - -	78,006	47,156	10,025	1,35,187

From the foregoing it is evident that permanently hired cattle establishments are to some extent kept up. On what data the scale of these establishments is fixed there is at present no means of judging, but the information should be obtained by the Controller of Military Finance, and the whole matter should be thoroughly investigated. I can see no real necessity for such extensive permanent cattle establishments, and taking into account the large reductions made during 1860-61 and 1861-62 in the cattle establishments of the Bengal and Bombay Presidencies, I am of opinion that those establishments are being maintained in the Madras Presidency on a high scale. There is no information before me of the movements of the troops in Madras during 1861-62; but I think the scale of carriage for camp equipage extremely high, and that not more than one lac of rupees should be allowed for the purpose, exclusive of carriage in the Eastern Settlements.

202. In the Eastern Settlements, provision is made for the carriage of camp equipage to the extent of 1,13,283 rupees, thus:

	Rs.
Rangoon, boats 1,740	45,560
Thyet Myo, hired bearers	23,930
Tonghoo „	18,900
Singapoor „	2,921
Penang, miscellaneous	671
Malacca „	417
Labuan „	442
TOTAL Rs.	92,841
Add Contingencies „	20,442
Rs.	1,13,283

203. The remarks above made respecting permanent hired establishments apply in a great degree to the carriage establishments in the Eastern Settlements, and, pending further investigation, it is conceived to be expedient only to allow 95,000 rupees on this account.

The deductions under this head aggregate as under, viz.:—

	Rs.
On account of Barrack Department	60,430
„ „ of camp equipage	35,187
„ „ „ „ Eastern Settlements	18,283
TOTAL Rs.	1,13,900

leaving 3,29,190 rupees available for this service.

204. *Barrack Department.*—The supplies to the Barrack Department are estimated at 1,97,738 rupees, but under this head should be included the value of supplies to be issued to military public offices, viz., 5,523 rupees, making an aggregate of 2,03,261 rupees for supplies to the Barrack Department. These supplies consist of oil and other necessaries for lighting, in addition to gas light; petty articles, such as brooms, baskets, bamboos, tinning barrack utensils; and a supply of lamps and barrack cots to replace articles damaged or rendered unserviceable by wear and tear. The amount stated to be required for the Presidency is 37,967 rupees for the year, but the oil for street lamps in the garrison of Fort St. George is twice estimated for at 3,000 rupees for the year, each time, and consequently 3,000 rupees falls to be deducted from the estimate in correction of this error. The Government waterworks cost, in petty supplies, 900 rupees in the year, and is not properly a military charge. The lighting of the garrison of Fort St. George and of the European barracks, &c., therein, is said to amount to 12,500 rupees; that of St. Thomas's Mount to 7,571 rupees, but that of Poonamallee, a comparatively small station, is estimated at 5,200 rupees, which is unquestionably excessive. The attention of the Controller will be drawn to this.

205. The estimate for oil, fire-wood, &c., at the station of Wellington, amounts to 14,626 rupees, having been calculated for 1,000 Europeans. The European regiment having been removed from Jackatalla, a very small amount for barrack supplies only will be needed; 2,500 rupees are therefore allowed, and 12,126 rupees disallowed.

206. There is a large European force at Bangalore, and the estimate for barrack supplies, amounting to 12,577 rupees, may therefore be deemed admissible.

207. *Hoonsoor.*—Among the barrack supplies estimated for at this station are the following:—

	Rs.
300 Barrack cots, iron	4,662
75 Messing tables	795
TOTAL Rs.	5,457

208. As

208. As the European strength in the Madras Presidency is to be reduced by one regiment, there will be no necessity for providing these articles, the amount is therefore disallowed.

209. Among other articles the quantity of oil required at Malabar and Canara is valued at 8,161 rupees; copper boilers, to the value of 2,000 rupees, are also said to be wanted, and messing furniture to the extent of 800 rupees.

210. Considering that there is smaller European force at Cananore than at Bangalore, the total of the estimate amounting to 14,442 rupees, may be reduced to 12,577 rupees, the amount allowed to Bangalore. The reduction therefore amounts to 1,865 rupees.

211. The estimate for barrack supplies at the station of Secunderabad is heavier than at any other station, being 42,264 rupees, but the force at Secunderabad is larger than at any other station. Besides the oil and other necessaries, which do not seem to be provided for in any very great excess, the following articles of barrack furniture are estimated for:—

		Rs.
1,000	Barrack cots	11,718
50	Messing tables	850
50	„ forms	1,531
100	Soldiers' boxes	1,000
100	Copper boilers	1,868
50	Globe lamps	450
300	Necessary tubs	1,162
1,500	Haversacks	1,500
	For repairs—	
1,446	Barrack cots	6,183
90	Messing tables	289
1,190	„ forms	1,444
428	Soldiers' boxes	753
	TOTAL *Rs.*	28,748

212. The estimate appears very high, and should be thoroughly revised. The barrack furniture in the Madras Presidency must be ample for all purposes, and it is only necessary to adopt measures for its conveyance from stations where it is not required to stations where it is. Pending investigation into the resources of the barrack department in furniture, the amount allowed to Secunderabad for barrack supplies is 22,000 rupees, and consequently 20,264 rupees are disallowed.

213. At the station of Jaulnah also provision is made for barrack cots and messing tables and benches to the amount of 2,410 rupees, but for the reasons above stated, it is disallowed; and as the European regiment is to be removed from Jaulnah, will not exceed the residue of the estimate, viz., 2,134 rupees.

214. There is nothing particular to object to in the estimate of barrack supplies for the Eastern Settlements, except the excessive supplies of oil provided for, which are—

	Measures.	Rupees.
Rangoon	9,737	7,301
Thyet Myo	5,287	3,845
Tonghoo	10,000	11,250

It will be observed that not only is the quantity of oil for Tonghoo greatly beyond actual requirements, but the price exceeds that to be paid at Rangoon and Thyet Myo, allowing Tonghoo the same quantity of oil, and at the same rate as Thyet Myo, a reduction to the extent of 7,405 rupees may be made. The total of the estimate for barrack supplies in the Eastern Settlements is 36,212 rupees, and deducting therefrom 7,405 rupees, the net amount admissible for the Eastern Settlements is 28,807 rupees.

215. The gross amount of the estimate for barrack supplies to public offices in the Madras Presidency is 2,03,261 rupees, and the total of the reductions amounts to 52,257 rupees, leaving the net, or revised estimate at 1,51,004 rupees.

COMMISSARY GENERAL'S ESTIMATE.

		Rs.
For Barrack supplies		1,97,738
„ Supplies to public offices		5,523
		2,03,261
REDUCTIONS:	Rs.	
Presidency	3,000	
Wellington	12,126	
Hoonsoor	5,457	
Malabar and Canara	1,865	52,257
Secunderabad	20,264	
Jaulnah	2,140	
Tonghoo	7,405	
Recommended for sanction Rs.		1,51,004

Porter - 8,593 hhds.
Beer - 7,431 „

216. *Malt Liquor.*—The quantity of malt liquor included in the estimate is 16,024 hhds. of porter and beer, as noted on the margin, which is the quantity now on its way out, according to advices from the Secretary of State for India. The value of this quantity of malt liquor is stated in the estimate to be 7,38,907 rupees, or on an average of 46 rupees per hogshead, and the Commissary General further estimates for 83,307 rupees for the carriage of this malt liquor, making a total estimate for malt liquor and carriage of 8,22,214 rupees.

217. The estimate price is, however, beyond invoice rates, the actual cost amounting only to 6,63,494 rupees, at *Rs.* 41. 6 *a.* 6 *p.* per hhd. of both sorts, admitting therefore of a reduction of 75,413 rupees. But the quantity estimated for is also excessive; for allowing a pint a man per day for the full established strength to be maintained, viz., 13,600 men, the quantity required would be only 11,490 hhds., to which if one-fifth be added for wastage, condemnation, &c., the total quantity required would only be 13,788 hhds, so that Madras will in 1862-63 have 2,236 hhds. of malt liquor above its local requirement. I am borne out in this view by the estimated amount of recoveries by the sale of beer on which I have remarked in para.

218. To the value of the malt liquor, viz., 6,63,494 rupees, should be added the cost of carriage, which amounts to 83,307 rupees, and which the Madras Commissary General has estimated for under the head of miscellaneous carriage. The aggregate charge for the malt liquor and carriage will therefore be 7,46,801 rupees instead of 8,22,214 rupees.

219. *Quarter Master's Establishment.*—Charges of this description, viz., for marching establishments, are provided for in the Madras Commissariat estimate under the head "Carriage," for Camp Equipage Department.

220. *Bedding.*—The amount stated to be required under this head is 97,360 rupees, which for 13,587 men is *Rs.* 7. 3 *a.* per man per annum; but as 6 rupees per man per annum is known to be the average value of the annual supply of bedding to each man, the calculation for bedding should be made thus:—

Men	13,587 × 6 rupees	=	81,522 rupees.
Women	1,630 × 6 „	=	9,780 „
TOTAL Rupees			91,302

221. The estimate is therefore capable of reduction to the extent of 6,058 rupees.

222. *Camp Equipage Department, Supplies to.*—The amount under this head is small, being 4,516 rupees. The supplies consist of tent cloth, tent poles, and other material necessary for the repair of tents. These supplies should properly be estimated for in connection with the Ordnance Department.

223. *Ordnance Department, Supplies to.*—The total value of the supplies to be

be made to the Ordnance Department in 1862–63 is 2,57,568 rupees, which, compared with the requirements of the Bengal Ordnance Department on the commissariat, viz., 3,80,495 rupees, would appear at first sight to be high, considering the smaller army of Madras; but the Madras Gunpowder Manufactory is in full operation, requiring an annual supply of stores to the extent of 80,000 rupees; the Bengal Gunpowder Factory is closed, and is not likely to resume work during any portion of the year 1862–63, as the new machinery will not arrive and be put in working order before the commencement of 1863-64.

224. The principal items which make up the supplies to the Ordnance Department are:—

		Rs.
757	Tons Coal, sea borne, Europe	23,490
1,000	Candies saltpetre	55,000
90,000	lbs. Firewood	4,050
5,17,500	Wood, dholl, and stalk	9,315
3,500	Barrels wooden ammunition	16,558
500	Soldiers' boxes	4,500
1,200	Yards Cloth, waxed	4,472
4,200	Cubic feet Timber planks of sorts	5,013
22,500	Ditto Timber for gun carriage purposes	55,426
	TOTAL *Rs.*	1,77,824

225. The sea borne coal is very highly priced, viz., at *Rs.* 31. 5. 0 per ton, and 25 rupees per ton would be considered a liberal price; this will effect a reduction of 4,778 rupees on the estimated quantity of 757 tons. The saltpetre is required for the gunpowder manufactory, but the firewood is excessive, considering the quantity of coal allowed, and 2,000 rupees may be struck out of the amount. The ammunition barrels will not be necessary, considering the reduction in the Native force of eight regiments, and in the European force of one regiment of infantry and two troops of cavalry; 66,558 rupees will thus be saved. The timber for the gun carriage manufactory, amounting to 55,426 rupees, is both large in quantity and high in price, being on an average of 2½ rupees per cubic foot, but the attention of the Inspector General of Ordnance, who has carefully scrutinized the estimate, will be drawn to this, and probably some valid explanation will be forthcoming. In addition to the above, the value of black leather accoutrements to be obtained from the Hoonsoor manufactory is 25,720 rupees, but consequent on the reduction of the Native force, 25 per cent. may be struck off the amount, viz., 6,430 rupees. The aggregate of the above reductions amounts to 29,766 rupees, leaving the estimate of Commissariat supplies to the Ordnance Department at 2,27,802 rupees, and considering the careful way in which the Madras Ordnance estimates have been prepared, I am sanguine that this amount will suffice.

226. The demands of the Madras Ordnance on the Commissariat Department, as compared with the amount sanctioned for 1861–62, are in excess by 28,983 rupees, but the Inspector General attributes this to the fact that no black leather accoutrements were included in the Estimate for 1861-62, and that there is an upward tendency in the rates of supplies generally. The reductions made by this department have reduced the estimate for 1862-63 below the limits of that of 1861–62, the amount sanctioned in the latter year having been 2,29,589 rupees, and that admitted for 1862-63, 2,27,802 rupees.

227. *Clothing Department.*—The supplies to the Clothing Department are estimated at 80,711 rupees, but sandals and boots from Hoonsoor, valued at 6,163 rupees appear twice estimated for, 6,163 rupees must consequently be deducted. Wicker helmets to the amount of 15,062 rupees are included in the estimate, but re-appear in the cash estimate of the Clothing Department, in which 16,700 rupees is stated to be required in payment of compensation for these articles. In the Bengal Presidency wicker helmets are supplied by regimental arrangement, but not being informed what is the practice in Madras, I have allowed the amount, 15,062 rupees, to stand in the Commissariat estimate, and have given the difference between that and 16,700 rupees, viz., 1,638 rupees, under the head Clothing Department, "so that the articles may either be

be supplied in kind by the Commissariat, or a money allowance given in lieu under the authority of the Clothing Department.

228. The estimate does not indicate the articles of supply appertaining to the different branches of the army, and it is therefore difficult to determine the amount of reduction to be made on account of the reduction of one European and eight regiments of Native infantry and four troops of European cavalry. But taking the estimate as requiring 83,548 rupees for supplies of local produce for the whole army of 52,317 men, as per margin (*a*), which has since been reduced by one-eighth, as shown in the margin (*b*), the reduction in the supplies to be obtained from the Commissariat Department will amount to 10,431 rupees. If to this reduction be added the amount disallowed on account of the double charges for sandals and boots, the aggregate will amount to 16,594 rupees, to be deducted from 89,711 rupees, leaving the estimate for Commissariat supplies to the Clothing Department at 73,117 rupees.

(*a*)

Europeans	14,693
Native Cavalry	1,600
Native Infantry	36,024
TOTAL	52,317

(*b*)

European Cavalry	288
European Infantry	918
Natives	5,696
TOTAL	6,902

229. *Stationery Department.*—The supplies to this department are estimated at 28,631 rupees; but on examining the Estimate of the Stationery Department, it will be observed that only 10,500 rupees are allowed by the Controller for stores and carriage to be supplied by the Commissariat Department. Consequently, the latter sum may be taken as the correct estimate of expenditure, and the Commissary General's estimate will therefore bear a reduction of 18,131 rupees to bring it to the sum actually required for supplies to the Stationery Department.

230. The following statement is an abstract of the Madras Commissariat Estimate, as submitted by the Controller of Military Finance, and revised by this Department :—

COMMISSARIAT.	Controller's Estimate.	Additions.	Reductions.	Revised Estimate.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Victualling Europeans	18,86,978	- -	5,77,333	13,09,645
Public Cattle Department	4,88,257	- -	83,580	4,04,677
Cavalry Supplies	3,93,564	- -	45,948	3,47,616
Purchase of Reserve Stock	6,66,208	- -	1,55,872	5,10,336
European Hospital Supplies	3,04,632	- -	1,08,512	1,96,120
Medical Department	41,318	- -	21,318	20,000
Victualling Native Troops	1,779	- -	- -	1,779
Native Hospital Supplies	38,857	- -	20,000	33,212
Lock Hospital	19,139	- -	4,784	
Transport Charges	4,43,090	- -	1,13,900	3,29,190
Barrack Department	1,97,738	- -	52,257	1,51,004
Public Offices	5,523	- -		
Malt Liquor and Carriage	8,22,214	- -	75,413	7,46,801
Bedding	97,360	- -	6,058	91,302
Camp Equipage Department	4,516	- -	- -	4,516
Ordnance Department	2,57,568	- -	29,766	2,27,802
Clothing	89,711	- -	16,594	73,117
Stationery	28,631	- -	18,131	10,500
Supplies to the Convict Settlement of Prince of Wales Island.	1,31,140	- -	1,31,140	- -
Supplies to other Governments	15,495	- -	- -	15,495
TOTAL *Rs.*	59,33,718	- -	14,60,606	44,73,112

231. The result is a decrease of 14,60,606 rupees. It will be observed that supplies amounting to 1,31,140 rupees on account of the Convict Settlement in Prince of Wales Island, have been deducted, as the charge is entirely a civil one, and comes under the operation of the Financial Resolution of 19th August 1861, requiring the Civil Department to pay for stores obtained from the Military Department. But the amount should be provided for in the Civil Budget, so that the necessary funds may be available for paying the Commissariat Department when the supplies are required. The total of the Commissariat

sariat cash requirements under Title II. is 44,73,112 rupees. A revised Estimate of the Madras Commissariat Department was received by the mail of the 17th instant, but it was too late, as this report was then already in print. It will be noticed hereafter.

Ordnance Department.

232. Under the head Commissariat Department, I have disposed of the supplies of stores to be made by the Madras Commissariat to the Ordnance Department. It only remains now to review that further portion of the expenditure of the Ordnance Department which is under the direct control of the Inspector General of Ordnance, and the value of stores to be received from England. These, as contrasted with the amount sanctioned in 1861-62, are as below:—

Services.	Sanctioned in 1861-62.	Estimate of 1862-63.	Increase.	Decrease.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Provision of harness and saddlery -	1,07,378	1,08,297	919	—
Miscellaneous contingencies - -	40,558	37,070	- -	3,488
Freight from port to port - -	30,348	18,034	- -	2,314
Freight on stores from England payable in India - - - - -		10,000		
Value of stores from England, not provided for in Estimate of 1861-1862 - - - - - - -	- -	1,81,877	1,81,877	—
Total - - - *Rs.*	1,78,284	3,55,278	1,82,796	5,802

On the whole, therefore, the Estimate for services under the direct control of the Inspector General of Ordnance is, for 1862-63, below that of 1861-62, by 1,308 rupees, exclusive of the value of stores to be received from England, and which, as not having heretofore been paid for in India, is a new element in the Estimate. The very clear report from the Inspector General of Ordnance which has accompanied his Estimate, has assured this Department that it is based on an intelligent cognizance of the actual requirements of the Department, and on the ascertained progress of expenditure during 1860-61 and 1861-62, and thus I have been enabled to deal with it in a summary way.

Stationery Department.

233. The cash assignment to be made to the Stationery Department, on account of contingent expenses, is, in 1862-63, 2,518 rupees, as compared with 2,375 rupees in 1861-62. The difference is trifling, and the amount seems admissible.

Remount Department.

234. The amount sanctioned for the feed of Remount Cattle in 1861-62, was 2,80,000 rupees, but then it was known that a very large number of horses were standing in the Remount Depôt at Oossoor, many of which have been sold and otherwise disposed of during the year. From data in this department, it appears that in April 1861, there were 1,477 horses, and by the latest returns there are only 1,179. The Controller of Military Finance, when reporting on the Regular Estimate of 1861-62, stated that 2,40,000 rupees would cover all the expenses of the Remount Depôt during 1861-62, thereby allowing of a saving of 40,000 rupees. The present Estimate for 1,80,000 rupees contains no particulars whatever; the probable number of horses to be fed during the year, the quantity of rations allowed to each horse, the value of the rations to be supplied, or the per-centage of sick horses, are not given, but all these particulars should have been furnished. The special attention of the Controller will be drawn to this omission which precludes all check over demands.

 235. The

235. The amount entered in the Estimate for the cost of feed, exclusive of the wages of permanent and other attendants, horsekeepers, &c., is 1,00,018 rupees, which for the number of horses in the depôt, viz., 5,179, according to the latest received return, (dated 14th December 1861,) would give an average rate of 85¾ rupees per horse. On reference to para. 177, it will be seen that the average rate at Madras for feeding army horses is only *Rs.* 75 7 *a.* per horse, and horses standing in the depôt should cost less, I am confident that 70 rupees per horse would meet all needful requirements, and the amount to be allowed for feed at that rate is 82,530 rupees, leaving 17,488 rupees to be deducted from the estimate. In the estimated sum of 1,80,000 rupees the pay of office establishments, amounting to 4,143 rupees for the year, is included, but that is a charge properly appertaining to Title I. of the Estimate, and has accordingly been transferred. The estimate for material supplies at the Remount Depôt therefore stands at 1,58,369 rupees for the year 1862-63. A further saving may be effected by not purchasing 150 remounts for officers' chargers; but as the Government of Madras have specially ordered this number to be laid in, the amount may be admitted.

236. *Clothing Department.*—The estimates for clothing the European and Native forces of the Indian army, including the Hyderabad contingent, are given in much detail, but no information is afforded with respect to the cost of the clothing of Her Majesty's British regiments, in consequence of no invoices of the material supplied from the Pimlico establishment having been received. The cost of boots to be supplied to British regiments, and of making up the clothing is given, the former at *Rs.* 66,559. 8*a.*, (exclusive of one regiment which takes compensation, and the latter at *Rs.* 9,268. 9.

237. The cost of the clothing to be supplied to the Madras army, exclusive of the British forces, is 5,26,267 rupees, representing all charges, except establishments and contingencies.

238. It is to be regretted that an accurate estimate of the entire cost of the clothing of the whole of the troops in Madras has not been obtained, but I shall endeavour to supply the omission as respects British troops as well as I can from existing data. Assuming that the clothing of the British infantry will not cost more than that of the Indian European infantry, the data before me show the cost of clothing three regiments of European infantry to be 83,363 rupees for the year, and as the number of British infantry regiments in the Madras Presidency to be clothed is seven, the approximate cost will be ascertained by multiplying the above figure by 2⅓, thus—83,363 × 2⅓ = 1,94,514 rupees. Then taking two British cavalry regiments as equivalent in cost of clothing to twice that of the horse brigade, the further sum to be added will be 42,502 rupees; the cost of clothing to the horse brigade being 21,251 rupees. These two sums amount to 2,37,016 rupees, to which, adding the cost of tailoring charges for British troops, viz., 9,268 rupees, the aggregate will be 2,46,284 rupees.

239. The entire cost of the clothing of the Madras army may therefore be thus summed up:—

	Rs.	*Rs.*
English materials, local supplies and compensation on account of Indian troops	5,26,267	
Ditto - ditto British troops	2,46,284	
		7,72,551
Add,—Establishments and contingencies, viz.:—		
	Rs.	
Boat and Cooly hire	960	
Transport charges	7,000	
Supervising, examining and cutting, tailors, &c.	18,622	
Contingencies	1,250	
	27,832	
Salary of superintendent, army clothing	12,000	
Office establishment of ditto	13,080	
Office rent	3,600	
	28,680	
		56,512
TOTAL - *Rs.*		8,29,063

240. This sum may then be subdivided as follows, yielding an average per European soldier of 35 rupees, and per Native of 7 rupees, according to the data

data assumed in the estimate, as respects numerical strength, viz., 13,605 Europeans and 45,000 Natives:—

	Europeans.	Natives.	Hyderabad Contingent.	Non-Effectives, &c.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Clothing materials - -	4,41,823	2,36,256	35,326	28,366
Tailoring charges - -	16,861	12,085	1,015	898
Establishment charges -	½ = 28,256	½ = 28,256	—	—
	4,86,649	2,76,597	36,341	29,264

241. The estimate, as regards Natives, will, however, be subject to modification, consequent on the reduction of eight regiments of Native infantry, the amount to be deducted on account thereof, including tailoring charges, being 32,466 rupees.

242. The average rates above noted appear to be high, but there are two circumstances which may account for such rates; 1st, serge trousers are supplied, which have not been formally sanctioned by the Government of India, though proposed by the Horse Guards. It is doubtful, therefore, whether they should be included in the estimate; 2d, the cost of the serge trousers is estimated as higher than those of cloth, a manifest error, the rectification of which will decrease the rate. This department has suggested to Government that serge and cloth trousers be issued in alternate years, and that compensation for the difference be granted to the soldiers.

243. The foregoing remarks apply to the entire cost of clothing the Madras army of a certain fixed strength, serving to show the cost per European and Native soldier, under this head of charge; but the actual cash requirements of the Clothing Department, exclusive of the value of English material, and the cost of local supplies by the Commissariat, and also exclusive of permanent establishments shown under Title I., are estimated by the Controller at 70,259 rupees, viz.:

	Rs.
For Tailoring charges - - - - - - -	30,859
„ Carriage and boat hire - - - - - -	7,960
„ Supervising, cutting, and examining tailors - -	10,000
„ Contingencies - - - - - - -	1,250
„ Compensation for caps, helmets, light clothing -	20,190
TOTAL - *Rs.*	70,259

but consequent on the abolition of eight regiments of Native infantry, the tailoring charges should be reduced by 1,500 rupees, the amount of the tailoring charges for the 52 regiments of Native infantry being 9,632 rupees. Under the head compensation for caps, helmets, &c., provision is made for 7,300 helmets, or 16,700 rupees, but on reference to para. 227 above, it will be observed that among the Commissariat supplies to be made to the Clothing Department, provision is made for helmets at 15,062 rupees. Now one or other of these supplies must be unnecessary, and I think it the safest course to deduct from the Clothing Department Estimate the amount provided for helmets in the Commissariat Estimate, leaving the clothing agent to obtain a transfer of the amount from the Commissariat Estimate to his own, under the orders of the Controller, if compensation is to be given in lieu of supplies in kind. Then, adding to 15,062 rupees the amount of 1,500 rupees, deducted for tailoring charges of the Native Infantry, the full amount to be deducted from the Clothing Department Estimate of cash requirements, is 16,562 rupees, leaving it at 53,697 rupees.

244. The additions and reductions made in Title II. of the Madras Military

	Rs.
Controller's Estimate - -	64,87,561
Revised Estimate - -	55,95,471
Net Decrease - Rs.	8,92,090

Estimate of 1862-63, result in a net decrease of 8,92,090 rupees, as shown in the margin. The gross reduction made has been 16,26,464 rupees, but as the value of Europe stores, not hitherto provided for in India, has been added, amounting to 7,34,373 rupees, it leaves the net reduction above indicated.

Bombay.

Commissariat Department.

245. The latest return received from the Quarter Master General of the Bombay Army, gives the effective numerical strength of the European troops in that Presidency as 12,494 non-commissioned rank and file. This number is below the established strength of European Troops for the Bombay Presidency by 596 men, according to the despatch of the Government of India, No. 80, dated 18th May 1861, as subsequently modified by the despatch of the Right Honourable Secretary of State for India, No. 247, dated 17th June 1861, on which I reported in letter, No. 407*a*, of 11th July 1861, and letter, No. 356, dated 10th April 1862, from the Government of India. Under this modification, the strength of the European Force for Bombay becomes 12,890 non-commissioned rank and file, as detailed in the following statement :—

	Fixed Complement.	Present Effective Strength
Artillery — 4 Reserve Artillery Batteries - at 140 = 560		
Artillery — 12 Field Batteries - - - at 140 = 1,680	2,650	2,234
Artillery — 6 Reserve Batteries - - at 75 = 450		
Sappers - - - - - - - - - -	50	90
Cavalry, 2 Regiments - - - - at 485 - -	970	1,264
Infantry, 10 „ - - - - - at 918 - -	9,180	9,180
TOTAL - - -	12,890	12,768

It will be seen from the above statement that while the present effective strength of the Artillery and Infantry Branches is below the established strength, the actual number in the Sappers and Cavalry Corps are in excess of the complement fixed in the despatches above quoted, but as the Native Artillery is still very strong, and will take time before being absorbed, the established strength, therefore, to be provided for in 1862-63, may be stated at less than 12,890, as shown in the margin, and as the Commissary General at Bombay has assumed the European Force at that Presidency, during 1862-63, at 12,670 strong, that is, 220 men below the established strength, the difference is not of any importance. Applying the rate of sick, viz., 1 in 12 to the established strength (12,890), there will be 11,816 men requiring ordinary rations, and 1,074 men for whom hospital diet must be provided.

246. *Victualling Europeans.*—The amount estimated for by the Commissary General for victualling European troops is—

	Rs.
Cost of rations - - - - - -	10,66,697
Compensation in lieu of rations - - -	47,790
Sea and river provisions - - - -	367
Subsistence allowance - - - - -	2,628
Expense of soldiers' gardens - - - -	218
Total cash requirements - -	11,17,700
Value of reserve stock - -	1,92,634
Total cost of rationing - Rs.	13,10,334

and dividing this amount by the number (11,816) of men requiring ordinary rations, the rate per man per annum would be *Rs.* 110. 14 *a.* 4 *p.* This is a very high average for Bombay, considering that the average in the Bengal Presidency

Presidency is *Rs.* 103. 4 *a.*, but I have no means of correcting it with any degree of precision, as the Commissary General and Examiner, Commissariat Accounts, have not carried out the instructions of this department to publish statements of the cost of victualling and dieting Europeans; nor have any such statements been furnished to this department. The latest published statement available in this office is that for November 1860, and that is confined to the rates prevailing at Bombay itself.

247. Taking the cash requirements for rations, viz., 11,17,700 rupees, which is the Bombay Commissary General's Estimate for 12,670 men, exclusive of reserve stock, the rate is *Rs.* 88. 3 *a.* 6 *p.* per man, but the proper number of men to be victualled, exclusive of sick, being 11,860, the cash requirements for victualling European troops should be 11,860 × *Rs.* 88. 3 *a.* 6 *p.* = 10,46,274 rupees, according to the data adopted by the Bombay Commissary General. I consider that a cash allowance of 85 rupees per man, which, with the amount of victualling supplies to be taken from reserve stock, will give a cost for victualling of nearly 108 rupees per man, or 9 rupees per mensem, will prove ample; under this correction the cash requirement will amount to (11,860 × 85) 10,08,100 rupees, and the amount to be deducted from the estimated cash requirements under this head will be 1,09,600 rupees. I am, however, persuaded that the amount allowed per man, viz., 108 rupees, is more than the actual expenditure, and the Controller of Military Finance at Bombay will be requested to investigate the actual expenditure as recorded in the office of the Commissariat Examiner, and report the result. It will be observed that the cost of victualling supplies to be used from reserve stock is about 20 rupees per man, or a little less than one-fifth, whereas in the Bengal Presidency the value of reserve stock to be used is about one-tenth of that of articles to be obtained by cash expenditure, and in Madras the only item of supply from reserve stock is tea, which is in the proportion of 1-13th to the total cost of victualling. The inference is, that it is the practice at Bombay to maintain a large reserve stock.

248. *Public Cattle.*—Under this head the estimated expenditure during 1862-63 is 2,62,754, rupees, as detailed below:—

	Rs.
1. Artillery draught cattle supplies	5,072
2. Feed of elephants	41,100
3. Camels	73,726
4. Mules	73,053
5. Bullocks	31,379
6. Cattle contingencies	38,424
TOTAL *Rs.*	2,62,754

249. The actual number of each description of cattle provided for in the estimate has not been stated, nor has any information been given to show how the amounts above set forth have been arrived at. Taking the numbers of each description of cattle as per margin to be those maintained in the Bombay Presidency, as given in the statement forwarded by the Secretary to the Bombay Government, and received with Military Department's docket, No. 1348, dated 27th November 1861, as the numbers for which provision has been made in the budget, the monthly rates of cost for each would be as follows:—

Elephants	*Rs.*	36	8	–	×	12	=	*Rs.* 438 per annum.
Camels	„	7	10	4	×	12	=	„ 92 „
Mules	„	4	6	5	×	12	=	„ 53 „
Bullocks	„	3	6	9	×	12	=	„ 41 „

The above rates appear moderate for Bombay.

Elephants	95
Camels	803
Mules	1,344
Bullocks	758

250. *Purchase of Reserve Stock.*—The Commissary General has estimated the expenditure under this head at 5,16,286 rupees. No details are given, but the appropriation of the cash is stated to be for the following items:—

	Rs.
Purchase of provisions	4,37,106
Bakery contingencies	3,580
Purchase of arrack	60,000
Arrack contingencies	15,600
TOTAL *Rs.*	5,16,286

251. The provision for arrack is almost to the same extent in cash as has been made at Madras; but while the Madras rate is less than one rupee per gallon, the rate at Bombay is *Rs.* 1. 13 *a.* 4 *p.* per gallon, being nearly twice that at Madras, a circumstance to which the attention of the controller has been drawn. The only Native troops for which Bombay has to provide rations are those stationed at Aden, viz., 1,100, the regiment in China being rationed in the island. The number of Europeans stationed at Aden is 618. Allowing for the natives a stock of 18 months, viz., 12 months' consumption and six months' reserve at even the high rate of seven rupees per man per mensem, the amount to be invested in provision supplies will be 1,38,600 rupees. Further, allowing a six months' reserve for European troops stationed at Aden, or 54 rupees per man for the six months, in addition to the victualling supplies for the year, the reserve for supplies for Europeans at Aden would amount to 32,136 rupees, making together 1,70,736 rupees; but two thirds of the former amount properly appertains to the head victualling native troops, and will be found so classified in the estimates appended. The only other items which compose reserve stock are tea, wines, spirits, sago, arrowroot, &c For tea, there has been allowed in the Bengal Presidency 4,50,000 rupees for maintaining a reserve stock of 15 months, but 12 months' reserve will be ample in Bombay, and that at the rate of 5-7ths oz. per man per diem for five days out of seven, calculated for 12,860 men, would require a stock of 89,770 lbs., which, at the rate of one rupee per lb. would cost 89,770 rupees.

252. For the miscellaneous articles of reserve stock 1,42,000 rupees have been granted in Bengal, and one-quarter of that amount would suffice for Bombay, viz., 35,500 rupees.

253. The amount to be assigned for reserve stock, under this revision, is therefore—

	Rs.
Victualling native troops	92,400
Reserve stock for six months	46,200
Reserve stock for European troops	32,136
Value of tea	89,770
Miscellaneous articles of reserve stock	35,500
TOTAL *Rs.*	2,96,006
Add—	
Bakery contingencies	3,580
Purchase of arrack	60,000
Arrack contingencies	15,600
TOTAL *Rs.*	3,75,186

which will admit of a reduction in the estimate for 1862–63 under this head of 1,41,100 rupees.

254. I would, however, state that the above revision is, consequent on the absence of details, conjectural to an extent I do not consider right; but of this I am satisfied that with the high rate at which the cost of victualling is estimated, and with the fact that the consumption of reserve stock is to be only to the extent of 1,92,634 rupees, so large a sum as 4,37,106 rupees for provision supplies cannot be actually required, and I am still further sustained in the conclusion by the estimates of the other Presidencies. The reduction, therefore, which I now propose, viz., 1,41,000 rupees, appears to me to be the minimum of which I conceive the estimate susceptible.

255. *Supplies to Medical Department.*—The expenditure for the purchase of medical stores during 1862–63 is estimated at 17,670 rupees, exclusive of the cost for carriage, attendants, &c., which is about 75 per cent. on the value of stores. The amount allowed in the estimate for 1861-62 was 17,816 rupees, and as the amount is very nearly the same for 1862-63 it may be admitted.

256. *Victualling Native Troops.*—This is one of the fixed budget heads under which commissariat charges should be estimated; but as no provision has been made under this head in the Bombay Estimate for any charges, I have assumed that

that the large sum of 4,37,106 rupees for the purchase of provision supplies, is intended to cover this expenditure, and I have therefore allowed 92,400 rupees for this purpose, as will be seen on reference to para 253.

257. *Native Hospital Supplies.*—The amount stated to be required under this head is 20,459 rupees. On reference to para. 199, it will be observed that 18,857 rupees have been allowed to the Madras Presidency for native regimental hospitals, 4,500 rupees of that sum being for the troops in the Eastern Settlements. In the Bombay Presidency, only 850 rupees are stated to be required for the hospital at Aden, the residue of the amount being for the regiments in India. The average rate per native regimental hospital in Madras is 254 rupees per annum; but allowing 300 rupees to Bombay, the expense will be—

		Rs.
Golundauz, 1 battalion	× 300 rupees =	300
Native Cavalry 9 regiments	× 300 „ =	2,700
Native Infantry, 30	× 300 „ =	9,000
TOTAL	*Rs.*	12,000

The estimate has therefore been reduced by 8,459 rupees.

258. *Transport Charges.*—The amount assigned in the Bombay Commissariat Estimate for transport charges aggregates 7,98,713 rupees, and is apportioned thus:—

	Rs.	*Rs.*
ARMY CARRIAGE.		
Sea Carriage.		
European troops	8,673	
Native „	13,030	
Stores	6	
		21,709
TRANSPORT TRAIN CHARGES.		
Land Carriage.		
European troops	6,900	
Native „	2,419	
Stores	14,058	
		23,377
Railway Carriage.		
European troops	600	
Native „	2,000	
		2,600
		47,686
Barrack department		33,171
Ordnance „		35,521
Medical store „		6,279
Public officers (military)		574
Civil department		33,880
Tour, H. E. C.-in-C.		275
Indian Navy Department		23,930
Engineer „		5,127
Fire engine „		62
General Government of India		16,943
Bengal Presidency		2,040
Madras „		3,574
Transport train		87,641
Cost London		2,010
	Rs.	2,98,713

259. From the above sum the Controller of Military Finance has deducted the following items, viz.:—

	Rs.
Civil department	33,880
Indian Navy „	23,930
Engineer „	5,127
TOTAL *Rs.*	62,937

Subsequent to the submission of the estimates, the Controller intimated that the transport train establishment, costing 25,273 rupees, would cease to exist after 1st May 1862.

260. As the carriage supplied to the Civil Department will be paid for by that department, that supplied to the Engineer Department will also, as a charge appertaining to a Civil Department, be paid for by it. The carriage supplied to the Indian Navy Department will be estimated for in the Indian Navy Estimate, and the amount placed at the disposal of the Commissary General, in payment for the supplies of carriage made by the Commissariat Department to that of the Indian Navy, on separate letters of credit.

261. Under this revision, the Estimate for carriage will stand at 2,10,503 rupees, instead of 2,98,713 rupees, allowing of a reduction of 88,210 rupees.

262. The Controller of Military Finance, under instructions from the Government of Bombay, not only excluded from the cash requirements of the Military Department the amount to be paid for carriage to Civil Departments, but also for carriage to other Governments. But if the carriage to be supplied to other Governments be for army or military purposes connected with the Bombay Army, they must be provided for in the Estimate of the supplying department of the Presidency where the supply is made, however they may afterwards be allocated to the Government or Presidency for whose services they were supplied. Acting on this principle I have retained the following items in the Commissariat Estimate of transports charges :—

	Rs.
General Government of India - - - - -	16,943
Bengal Presidency - - - - - - -	2,040
Madras - - - - - - - - -	5,374
TOTAL - - - *Rs.*	24,357

263. *Cavalry Supplies.*—The estimated expenditure during 1862-63 for cavalry supplies is 4,44,000 rupees. The estimate does not state the number of horses to be fed; but the cavalry and artillery horses at Bombay will be as below, according to the fixed establishment :—

	Non-Commissioned Rank and File.	Less 5 per cent.	
2 European cavalry regiments - - -	at 485 = 970 —	48 =	922
4 Troops horse artillery - - - -	„ 175 =		700
11 Batteries - - - - - -	„ 110 =		1,210
TOTAL - - -			2,832

Dividing the amount estimated by the above number of horses, the average rate of feeding each horse is about 157 rupees per annum. It will be perceived from this report that the rate at Bengal is 87 rupees, and that the rate for the feed of a horse at Madras is only 75-7 rupees. Allowing the higher rate to Bombay, the estimated amount should be 2,46,384 rupees, instead of 4,44,000 rupees, leaving a sum of 1,97,616 rupees to be deducted from the Commissary General's estimate. This is a large deduction, but that it is fully justified will appear on reference to para. 66 of this department's Report, No. 974*a*, dated 8th October 1861. There it was stated that the cavalry supplies for the Bombay army had been estimated at 3,32,329 rupees, but it contained an error of 40,000 rupees, which was acknowledged by the Bombay authorities; and further, no deduction was made for the number of horses to be kept below established strength. This department therefore deducted 70,000 rupees from the above amount, reducing it to 2,62,329 rupees, which is only 15,945 rupees above the amount to which the present estimate under this head has been reduced in the preceding para. The difference between the sum sanctioned in 1861-62 and that allowed for 1862-63 is fully accounted for by the reduction of the European cavalry from eight to six troops per regiment.

264. *Purchase of Live Stock.*—The total expenditure entered under this head is

is 7,075 rupees on account of purchase of elephants, mules, camels, and bullocks, as below :—

	Rs.
Purchase of Elephants - - - - -	500
„ Mules - - - - - -	1,110
„ Riding Camels - - - -	1,080
„ Loading „ - - - -	2,955
„ Bullocks - - - - -	1,430
TOTAL - - - Rs.	7,075

The numbers of the cattle to be purchased are not specified; but as the amount required under this head is small, it is passed, subject to further examination by the Controller. Again I have to remark on the entire absence of all details.

265. *European Hospital Supplies.*—The amount entered in the estimate on this account is 3,63,033 rupees, which, for the estimated number of men sick, viz., 1,074, gives a rate of 338 rupees per man. The average rate of dieting sick in Bengal has been shown to be *Rs.* 229. 8 *a.* per man, and that at Madras only *Rs.* 173. 4 *a.*

266. But allowing Bombay the higher rate, the amount to be assigned for European hospital supplies is 2,46,483 rupees, instead of 3,63,033 rupees; the estimate must therefore be reduced by 1,16,550 rupees. In devising this reduction I am guided by the rates ruling in Bengal and Madras, as periodically published in the Official Gazettes of those Presidencies, and, as the number of sick to be dieted is not stated in the Bombay estimate, I have had recourse to the usual proportion of sick to healthy men on which to base my calculations.

267. *Malt Liquor.*—The amount entered under this head is 5,81,736 rupees, as specified in the margin. The Bombay estimates are all in abstract—a defect which I shall solicit the Controller to remedy in future. Neither the quantity of malt liquor to be purchased, nor the rate, is specified in the estimate. But by the Despatch from the Secretary of State, No. 14, dated 31st January 1862, I learn that the quantity of malt liquor coming out for the Bombay Presidency is—

	Rs.
Purchase of Malt Liquor - -	4,72,125
Contingencies - - -	1,09,611
TOTAL - - Rs.	5,81,736

	Rs.	a.	p.
7,000 hhds. porter, at *Rs.* 40. 9 *a.* per hhd. - -	2,83,937	8	–
5,000 „ ale, „ *Rs.* 46. 3 *a.* „ - -	2,30,937	8	–
TOTAL - - - Rs.	5,14,875	–	–

268. The amount required to pay for malt liquor now on its way out to the Bombay Presidency has therefore been under-estimated by 42,750 rupees, irrespective of the sum required for malt liquor contingencies, which, I presume, include carriage, as I do not perceive any other provision made in the estimate for the expense on account of carriage.

269. The quantity indented for, however, is not larger than actual requirements justify for allowing a pint a day per man for the full established strength, namely, 12,980 men, the quantity needed would be 10,613 hogsheads; to which, adding one-fifth for wastage, the total quantity required would be 12,736 hogsheads, according to the ascertained average consumption. The total amount required for malt liquor during 1862-63 is, therefore, 6,24,486 rupees, viz. :—

	Rs.
Purchase of 12,000 hogsheads malt liquor - - -	5,14,875
Contingencies for malt liquor - - - - -	1,09,611
TOTAL - - - Rs.	6,24,486

being 42,750 rupees above the amount mentioned in the Bombay estimate.

270. *Bedding.*—The amount entered under this head is 79,033 rupees, of which 77,376 rupees have been assigned for supplies of bedding; and the balance, 1,657 rupees, for supplying coffins to the European troops. Seventy-seven thousand three hundred and seventy-six rupees, therefore, for 12,890 men and 1,547 women (calculating 12 women to 100 men), or for a strength of 14,437, would give an average for bedding of *Rs.* 5. 5*a.* 5*p.* each. But as the known rate is six rupees per head, the amount should be 86,622 rupees, causing 9,246 rupees to be added to the amount given in the estimate. The total amount under this head, inclusive of coffins, will therefore be 88,279 rupees.

271. *Sindh Charges and War Charges, Aden.*—Under this head, a sum of 4,33,417 rupees is entered and allotted as per margin. No information whatever is afforded as to what these charges comprise. I infer, however, that they are intended to represent the cost of the commissariat supplies to the troops of the Bombay army located in those provinces. It is a mistake in principle to make any such distinction in an estimate, however the charges may hereafter be allotted or debited in account. The principle to be observed in framing a budget estimate for a Presidency, as declared by the Government of India, is that it should comprise under the settled heads all the charges to be incurred on account of the army of that Presidency, irrespective of the fact that portions of that army are placed at the disposal of other Governments, or are actually serving within the limits of other Presidencies. This resolution of the Government of India has been duly communicated to the Finance Department at Bombay, and I shall not fail to remind the Controller that the distinction here maintained should cease. Moreover, in preparing estimates of money to be expended, it is necessary that specific information should be furnished as to the purposes to which the Government funds are to be applied, instead of being aggregated in the way followed in this instance.

	Rs.
Sindh Charges	2,19,077
War Charges, Aden	2,14,340
Total *Rs.*	4,33,417

272. Having already provided for the full number of European and native troops composing the Bombay army, under the several major heads above reviewed, this separate provision of 4,33,417 rupees for the troops in Sindh and Aden would almost seem to be superfluous. The numerical strength of the troops so located is—

	Europeans.	Natives.	Total.
Sindh	1,687	4,107	5,794
Aden	586	1,100	1,686
Total	2,273	5,207	7,480

and the extent of provision made above for these troops may be here briefly recapitulated—

	Rs.
Victualling 2,273 Europeans at 108 rupees, inclusive of articles supplied from reserve stock per man	2,45,484
Half-year's reserve victualling for 586 men, at 52 rupees	30,472
Victualling 1,100 natives, at 84 rupees per man per annum	92,400
Half-year's reserve for 1,100 natives, at 42 rupees	46,200
Total *Rs.*	4,14,556

273. This sum is very nearly that required for the troops in Sindh and Aden by the Bombay estimate, the difference being 28,861 rupees. There may be some contingencies connected with the location of the troops in these provinces, of which I am not cognizant, and the difference, 28,861 rupees, may be allowed on that account; but the residue must be disallowed, having, as fully shown, been already included in the estimate under victualling Europeans, victualling natives, and reserve stock. But the absence of details precludes that accurate review which I desire to make of all estimates submitted to this department.

274. *Miscellaneous*

274. *Miscellaneous Charges.*—The expenditure under this head is 2,768 rupees for the following items, viz.:—

	Rs.
Supplies of summer heads to regimental orderlies	833
Personal appointments to European troops on foreign service	1,935
TOTAL *Rs.*	2,768

275. The supplies to be made by the commissariat to other militasy departments amount to 9,910 rupees, according to the subjoined details, viz.:—

276. *Ordnance Department.*—7,290 rupees. The Commissariat Department should properly supply the Ordnance Department with all articles of local produce used by the latter, but under an arrangement which I conceive to be objectionable, and which I have represented to Government as such, in my report on the Budget Estimates of 1861-62, No. 974*a*, dated 8th October 1861, but previously in letters, as per margin, the Ordnance Department is its own supplier. On this point, I will not do more than quote the words already used in the report of the 8th October as expressive of my opinion on the subject: "I have strong reasons for pronouncing the system to be as detrimental to efficiency as it is adverse to sound economy; and if it be permitted to continue, the only preventive of the many attendant evils is a close scrutiny of the amount to be allotted for such supplies."

No. 57*a*, dated 7 February 1861.
" 162*a*, " 18 March "

277. *Clothing Department.*—The supplies of stores to this department by the commissariat do not exceed in value 2,620 rupees; this sum is small and may be allowed, but I again repeat that as in the case of the Ordnance Department, it is likewise objectionable to allow the Clothing Department to be its own supplier.

278. The following tabulation will show the amounts originally entered in the Controller's estimate, the additions made, the sums disallowed, and the balance admitted:—

	Controller's Estimate.	Addition.	Reduction.	Revised Estimate.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Victualling Europeans	11,17,700	-	1,09,600	10,08,100
Public cattle department	2,62,754	-	-	2,62,754
Cavalry supplies	4,44,000	-	1,97,616	2,46,384
Purchase of reserve stock	5,16,286	-	1,41,100	3,75,186
Purchase of live stock	7,075	-	-	7,075
European hospital supplies	3,63,033	-	1,16,550	2,46,483
Medical department	17,670	-	-	17,670
Victualling native troops	—	—	—	—
Native hospital supplies	20,459	-	8,459	12,000
Transport charges	2,98,713	-	88,210	2,10,503
Barrack department	—	—	—	—
Malt liquor	5,81,736	42,750	-	6,24,486
Bedding	79,033	9,246	-	88,279
Ordnance department	7,290	-	-	7,290
Miscellaneous charges	2,768	-	-	2,768
Sindh and Aden	4,33,417	-	4,04,556	28,861
Clothing department	2,620	-	-	2,620
TOTAL *Rs.*	41,54,554	51,996	10,66,091	31,40,459

Net Decrease *Rs.* 10,14,095

ORDNANCE DEPARTMENT.

279. The estimate for supplies to the Ordnance Department amounts of 3,58,624 rupees, and comprises the value of stores which in the other Presidencies are supplied by the Commissariat to the Ordnance Department. Observing

the same sub-divisions of the Ordnance Estimate as made for Bengal and Madras, this sum of 3,58,624 rupees, is proposed to be allotted thus:—

	Rs.
I. Supplies of miscellaneous stores of the same description as provided in the other Presidencies by the Commissariat Department - - -	2,81,027
II. Services under the direct control of the Inspector General of Ordnance - - - - - - - - - - - - -	77,597
TOTAL - - - Rs.	3,58,624

280. On referring to the detailed Appendices attached to the estimate of the Inspector General of Ordnance, I observed that an alphabetical list is given, descriptive of the various kind of stores to be purchased with the estimated sum of 2,81,027 rupees; but as the essential information respecting quantities or values is omitted, it is impossible to state with any degree of definiteness whether the demands of the department are excessive or not. There are, however, some facts which help me to an inferential conclusion on this point. They are, that at the Madras Presidency, having an army somewhat larger than that of Bombay, and with all the ordnance manufacturing establishments in full operation, the amount sanctioned for the supply of miscellaneous stores, of the description specified in the list attached to the Bombay Ordnance Estimate, does not exceed 2,27,000 rupees. The established strength of the European forces in Bombay and Madras approximate very closely, and are indicated in the margin, the difference being 685 rupees, or about one-twentieth. In the native army the difference in established strength is greater, being as shown in the margin. I think therefore that, supported by these facts, I am justified in fixing the sum to be expended by the Bombay Ordnance Department at 2,20,000 rupees against 2,27,000 rupees in Madras; and if the allotted sum be exceeded, I can only attribute such a result to the present objectionable practice at Bombay of making the Ordnance Department its own supplier.

	Rs.
Madras - - - -	13,605
Bombay - - -	12,920
Difference - - -	685

Madras - - -	33,576
Bombay - - -	26,351
Difference - - -	7,225

281. As regards the services under the direct control of the Inspector General of Ordnance, the intended appropriation is as below:—

	Rs.
Freight - - - - - - - - - -	2,600
Contingencies - - - - - - - - -	14,997
Saddlery and accoutrements - - - - - - -	60,000
TOTAL - - - Rs.	77,597

The only item that calls for remark is the last, and I cannot conceive under what circumstances so large a sum as 60,000 rupees will be required for accoutrements and saddlery. Buff accoutrements will for the most part be prepared out of Europe hides; pouches and black leather accoutrements are articles of local supply, and a sum of 17,000 rupees was allowed to the Madras Presidency on this account; a similar sum may be granted to Bombay. The only harness and saddlery which the Bombay Ordnance Department is required to look after is that of the artillery and British cavalry. The expenses attending the repair of the former is met by a contract allowance of two rupees per harness and one rupee per saddle per mensem, which is charged in the Pay Abstract. Renewals only take place once in five years, and a cash assignment of 7,000 rupees, it appears to me, would meet all requirements for the renewal of harness and saddlery.

282. The charge for the repair of saddles in use with the British cavalry is in the Bengal Presidency estimated at 26,000 rupees for seven regiments, which for two regiments would be 7,428 rupees. But 10,000 rupees may be allowed to Bombay, especially as the Bombay Ordnance Estimate for Contingencies is very moderate.

283. The

283. The amount allotted for the Bombay Ordnance Department's cash expenditure is as follows:—

	Rs.
Miscellaneous stores	2,20,000
Contingencies	14,997
Accoutrements	17,000
Renewal of harness and saddlery	7,000
Repairs of saddlery with British regiments	10,000
Freight from Europe	2,600
TOTAL *Rs.*	2,71,897
Amount estimated for *Rs.*	3,58,624
Difference disallowed *Rs.*	87,327

CLOTHING DEPARTMENT.

284. The sum required for the cash expenditure of the Bombay Clothing Department is 1,84,812 rupees, and is apportioned as follows:—

	Rs.
Tailoring charges	33,865
Compensation in lieu of clothing	1,03,731
Contingencies	47,216
TOTAL *Rs.*	1,84,812

285. The tailoring charges are somewhat high compared with those at Madras, (viz., 30,859 rupees), considering the large amount to be paid in Bombay for compensation. No alteration is, however, made in the estimated amount. The contingencies, I presume, are intended to cover the cost of articles locally purchased, inasmuch as scarcely any provision is made in the Commissariat Department Estimate for supplies to the Clothing Department. The whole of the amount of this estimate may be admitted.

286. I observe from the detailed estimate of the Clothing Department that the value of Europe stores to be used in the manufacture of the clothing is 2,29,683 rupees; but this, however, does not represent the value of all the English materials required for the preparation of the clothing of the Bombay army, inasmuch as a good proportion of the army are to receive compensation in lieu of clothing. A true estimate of the cost of English material for clothing the different branches of the army has yet to be made, and the attention of the controllers at the three Presidencies will be called thereto; for once a standard estimate for each regiment of each arm of the service is determined on, it will be easy to regulate the annual requirements of stores from England, and also to prevent an unnecessary accumulation of stock in India of articles so perishable as woollen cloths, and which I regret to state has been the case in all the clothing store departments of the three Presidencies.

CONTINGENCIES.

287. The amount under this head in the Bombay estimate is large, being 2,27,090 rupees, there being no corresponding head under Title II. of the Bengal or Madras estimate. The principal items composing the sum are:—

	Rs.
1st.—Repairs and pulling punkahs	12,000
2d.—Watering trees and lighting band stands	12,000
3d.—Office and ground rent	8,000
4th.—Watering tatties	9,000
5th.—Charges on account of waterworks	7,200
6th.—Cleansing barracks, and repairing fixtures and fastenings	69,490
7th.—Conservancy of Cantonments and Sudder Bazars	47,200
8th.—Telegrams	9,000
9th.—Printing forms	25,000
10th.—School books and other regimental supplies	10,000
TOTAL *Rs.*	2,53,890

 288. The

288. The residue of the sum, amounting to 17,200 rupees, is for office contingencies, packing charges, &c. I deem it a defect in the estimate to comprise all the services under the head "Contingencies." Some of these charges could well have been placed under the recognised major heads of the estimate; for instance, the charges connected with conservancy, cleansing of barracks, petty supplies to barracks, and repair of barrack fixtures, should have been shown under the head Barrack Department, to which I have transferred it; the office contingencies and printing forms might have been distributed among the respective departments; and watering tatties should have been among commissariat charges, to which it has accordingly been transferred. I shall request the attention of the Controller of Military Finance to a proper classification in future of these charges. The amount stated to be required for repair of barrack fixtures and fastenings, viz., 69,490 rupees, is very large, considering the small number of European troops in the Bombay Presidency, and I feel no hesitation in striking 30,000 rupees out of this amount. The expenditure on account of the conservancy of Cantonment and Sudder Bazar, viz., 47,200 rupees, does not entirely appertain to the Military Department; but as the question is still under the consideration of the Audit Board, I have not struck out the portion allotted to Bazar Conservancy, but it will depend upon the view taken by the Audit Board, and probably upon the orders of Government, whether the expense is to be treated as a civil or military charge. The Abkaree collections in some of the military bazars being shown as military receipts, I would propose that, throughout India, all military receipts and disbursements of military cantonments be exhibited in separate annual estimates, in which all expenses for police and conservancy purposes, also all bazar collections, fines, proceeds of unclaimed property, Abkaree collections, ground rent, &c., should be shown, and the cost of administering the duties should be detailed; I am satisfied that important results would follow from this arrangement, economy would be ensured, and military cantonments made more healthy for the troops.

289. The additions and reductions made in Title II. of the Bombay military estimate for 1862–63, result in a net decrease of 3,63,836 rupees, as shown in the margin. The gross reduction made from the Bombay estimate is 11,35,525 rupees; but the value of stores from England not hitherto paid for in India, amounting to 7,71,525 rupees, having been added, the net reduction above stated is arrived at. I would observe that this is a new and important feature in the military estimates, of requiring heads of departments to exhibit in their estimates the amount value of stores to be obtained. It will ensure accuracy and regularity in the indents for stores, and eventually economy.

	Rs.
Controller's Estimate -	49,93,886
Revised „ -	46,30,050
Net decrease - *Rs.*	3,63,836

290. In consequence of the modifications above made in the charges entered under Title II. of the estimates of the three Presidencies, comprising both additions and reductions, the amount on account of charges materiel, instead of being 2,53,01,652 rupees, as originally entered in the estimates of the controllers, is 2,51,70,823 rupees in the following proportions for the respective Presidencies, showing a decrease of 1,30,829 rupees, and when placed in juxtaposition with the sanctioned estimate of 1861–62, the result is as below:—

Year.	Charges Materiel, or	Bengal.	Madras.	Bombay.	Total.
		Rs.	*Rs.*	*Rs.*	*Rs.*
1861–62 -	Title II. -	1,03,88,920	48,87,086	52,21,449	2,04,97,455
1862–63 -	Ditto - -	1,49,45,301	55,95,471	46,30,050	2,51,70,822
Difference - - -		+45,56,381	+7,08,385	—5,91,399	+46,73,367

being equivalent to 43·86 per cent. increase in Bengal, 14·50 per cent. increase in Madras, and 11·32 per cent. less in Bombay, while, as regards all India, the charges materiel of 1862-63 are 22·80 per cent. above those of 1861–62.

291. The

291. The comparison between the aggregate estimates of the two years is as below :—

——	Title I.	Title II.	Total.
	Rs.	*Rs.*	*Rs.*
1861–62 - - - -	10,14,77,900	2,04,97,455	12,19,75,357
1862–63 - - - -	9,71,08,364	2,51,70,822	12,22,79,186
Shows the results to be, this year,	—43,69,536	+46,73,367	+3,03,831

or equal to 4·30 per cent. decrease under Title I. and 22·80 per cent. increase under Title II., whilst the difference in the total expenditure of 1862–63 shows an increase 0·24 per cent. I have to remark, however, that the increase under Title II. of 22·80 is owing in a great measure to the insertion in the estimate of "stores to be obtained from England" to the value of 28,00,000 rupees, which upon the estimated expenditure of 2,51,70,825 rupees under Title II. this year, is equal to 11·12 per cent., and about which I offer the following remarks :—

292. *Europe Stores.*—In para. 195 of this department's Report, No. 7259*a*, dated 18th March 1862, it was explained that the estimate of 1861–62 was framed to provide only for those services requiring cash to be disbursed in India through departmental agency, and that no allowance was made therein for the payment of the value of military clothing and medical stores received from England, inasmuch as such value had heretofore been adjusted in account between the Secretary of State for India and the Indian Government. Under recent arrangements, however, the Military Budget Estimate is now required to include provision for the value of stores obtained from England, and accordingly the following sums have been allotted in the estimate of 1862–63, Title II., to under-mentioned departments of the respective Presidencies for stores from England :—

——	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Clothing Department - - -	11,00,000	4,67,497	2,93,803	18,61,300
Ordnance „ - - -	96,067	1,81,877	3,00,000	5,77,944
Commissariat „ - - -	- - -	- - -	54,680	54,680
Medical „ - - -	1,22,139	85,000	1,23,042	3,30,181
	13,28,206	7,34,374	7,71,525	28,24,105

293. I am aware that this in some respects is a larger estimate than the controllers at the three Presidencies are prepared for. With reference to ordnance stores, I have been guided, as respects Bengal and Madras, entirely by the indents of the Inspector General of Ordnance, and in the case of Bombay I have been influenced by the fact that by a mischance the Ordnance indent for 1861–2 had not been sent home, and that the Bombay authorities have been requested to add to the indent of 1862–63, which comprises demands to the extent of 83,000 rupees such portions of the indent of 1861–62 as represents requirements of a nature absolutely necessary to be obtained. Under these circumstances I did not deem three lakhs of rupees to be too high a figure to attach to the value of Ordnance stores for the Bombay Presidency, to be obtained and paid for in 1862–63; but I do not expect that in future years the charge for Ordnance stores will be so low as at present, and I am therefore anxious to see economy enforced in other ways, so as to keep down the military expenditure to 12 crores.

294. As regards the clothing stores, I am aware that my estimate is high, if compared with the actual requirements of the year; but there has been much

confusion in connection with clothing indents, and although since the transmission of the Bengal Clothing Department's recent indents to England, some of the items have been modified, and others have been requested to be cancelled, I am apprehensive it may not be practicable for the Authorities at Home to comply with these instructions. I think, therefore, the estimate I submit will eventually prove nearer to the actual results than any other.

295. The estimate for Europe stores for the Medical Department is likewise high, but it has been prepared from data indicating the actual consumption of reserve stock; I shall, however, cause it to be carefully scrutinized by the examiners of medical accounts, and compared with the indents last sent to England.

296. Since this estimate of the value of stores from England was prepared in this department, I have received a copy of the estimate of receipts and disbursements of the Home Treasury from 1st May 1862 to 30th April 1863, and I have been somewhat surprised to find the estimate of this department approximate so closely to that prepared at home, and that the circumstances that influenced the preparation of both were nearly identical. In the English estimate the expenditure for stores is entered at 280,434 *l.* for the year ending 30th April 1863, and is allotted to the several Presidencies, as shown in the margin; and the following detailed statement affords useful information as to the description of stores to be supplied, and for what departments in the several Presidencies:—

	£.
Bengal -	118,702
Madras -	71,149
Bombay	90,583
Total - £.	280,434

——	Bengal.	Madras.	Bombay.	Total.
	£.	£.	£.	£.
Military stores (including Medical and excluding War Department clothing)	20,402	30,249	33,283	83,934
War Department clothing - - -	97,500	40,500	57,000	195,000
Military books for soldiers' libraries	800	400	300	1,500
Total - - £.	118,702	71,149	90,583	280,544

297. I beg here to quote the following extract from the observations of the Director General of Stores as likely to be useful to the controllers and Heads of Departments in their future indents:—

"It should be stated, with reference to the above estimate, that although carefully prepared, it may very possibly in some particulars differ widely from the actual payment for stores.

"The several services in India indent upon the Home Government for such articles as are required, and the amount of the indents that may be received during the next 12 months cannot be foreseen.

"The course adopted in arriving at the foregoing figures has been to take the accounts disbursed for each service in the past year, and to make in most cases a considerable deduction therefrom, in view of the probable diminution in the demands from India during the ensuing season.

"The sums shown under the different heads of service have been calculated in the following manner:

"The information upon which this Department can form any judgment is very scanty; but in the case of the complaints from India of excessive supplies of stores having been sent out, and of the reduced indents and requisitions to cancel former demands, which have been lately received, together with the military letter from the Government of India, dated the 8th October, 1861, No. 244, that the stores now in the Dockyard which have been made available for the Military Department, will almost entirely supersede the necessity for making any requisition for supplies of Military and Ordnance stores during 1862-63, a general reduction has been made under most Departments for stores for 1862-63."

Military Stores.—"£.120,000 has been provided for clothing for Queen's troops provided by the War Department for the season 1863-64, and which will be paid for at the beginning of 1862-63. And a further sum of 75,000 *l.* has been

been added under this head on account of the clothing for 1864-65, part of which at least may have to be provided and paid for with the season 1862-63, no estimate for cloth having yet been received from India.

"£. 83,934 has been allowed for other military stores under all heads, including medical and clothing for native troops, being a reduction of about 25 per cent. upon the estimated expenditure for the season 1861-62."

298. I may here add that the points to be mainly attended to at home are a prompt acknowledgment of the receipt of the indents from India as received, the arrangements to be made for complying with the demands, the public value, and immediately the contracts are made the same to be reported.

299. In paragraph 89 of this Department's Report, No. 974A, dated 8th October 1861, the receipts or recoveries of the Military Department for the year 1861-62 were estimated at 65,04,400 rupees, as indicated in the margin, but in paragraph 187 of Report, No. 7259A, dated 18th March 1862, it was stated that the receipts or recoveries would probably amount to 79 lakhs of rupees, the higher estimate being warranted by the actual transactions of the year.

	Rs.
Bengal - - -	33,00,000
Madras - - -	13,78,900
Bombay - - -	18,25,500
Total - - - Rs.	65,04,400

300. The receipts and recoveries for 1862-63, as estimated by the Controllers of Military Finance of the three Presidencies, are fully 20 per cent. below those of 1861-62, according to the subjoined detail :—

Receipts.	Bengal.	Madras.	Bombay.	Total.
	Rs.	Rs.	Rs.	Rs.
Sale of arrack - - - - -	10,52,500	- -	2,77,259	13,29,759
„ porter and beer - - -	8,49,977	5,73,000	4,21,672	18,44,649
„ other Commissariat stores -	- -	- -	45,918	45,918
„ live stock - - - -	36,290	- -	1,712	38,002
„ ordnance stores - - -	11,41,708	9,07,972	53,215	21,02,895
„ clothing stores - - -	- -		55,631	55,631
„ medical stores - - -	- -		7,000	
Hospital stoppages - - - -	3,840		40,600	
Bazar collections - - - -	- -	4,59,066	2,83,600	9,57,223
Miscellaneous receipts, pay department - - - - - -	6,817		62,800	
Miscellaneous receipts, Commissariat department - - - - -	68,395		25,115	
Total - - Rs.	31,59,527	19,40,038	12,74,522	63,74,087

But it appears to me very evident that the recoveries have been underrated. The malt liquor recoveries in Bengal are set down at 8,49,977 rupees, but 42,193 hogsheads of ale and porter are provided for as the estimated expenditure of the year. Now, deducting one-fifth for dryage and wastage, (a very high rate of wastage,) the quantity to be sold will be 33,755 hogsheads, which at 40 rupees per hogshead, the amount paid by canteens, should yield 13,50,200 rupees, or in round numbers 13 lakhs. In Madras, the malt liquor recoveries are given at 5,73,000 rupees, which is a fair approximation to what should be expected, for the demand is for 16,024 hogsheads, which, less one-fifth, leaves the value of 12,819 hogsheads, at 40 rupees, to be recovered, or 5,02,760 rupees. In Bombay, according to the estimate, the quantity required is 12,000 hogsheads, which, less one-fifth, gives 9,600 hogsheads, the value of which has to be recovered at 40 rupees per hogshead, or 384,000 rupees, but the estimated recoveries are stated at 4,21,672 rupees. From these comparisons it is clear that the Bengal estimated recoveries for malt liquor are nearly five lacs below what they ought to be.

301. Again, as regards the recoveries on account of hospital stoppages for soldiers in hospital, the Madras estimate gives no specific amount, having included the same under miscellaneous receipts, but with 1,134 daily sick, the recoveries at two annas per man per day will be 51,830 rupees. The Bombay estimate indicates the recoveries for hospital stoppages as 40,600 rupees. Now the provision

made in the Bombay estimate is for 1,074 men in hospital; the stoppages from rank and file being two annas per day would amount to 134 rupees per diem, or 48,910 per annum, but in the Bengal Commissariat Estimate, although the men in hospital are taken at 3,648, from whom at two annas per day 456 rupees should be recovered daily, or 1,66,440 rupees per annum, the estimate only shows 3,840 rupees, instead of 1,66,440 rupees. It is probable that there are similar oversights in the other lines; but from what I have adduced above, it will be seen that I shall be quite justified in fixing the recoveries of the Military Department for 1862-63 at 70 lacs; at the same time it is necessary that the special attention of the controllers should be given to the correct representation of the recoveries. The amounts shown under the various heads are excellent indications as to the right working of the departments, and will afford useful aid in several ways in checking outlay; whilst hitherto the military expenditure has been the main object to be kept in view, it is now necessary that the receipts of the military service should be carefully exhibited, and in minute detail.

302. I have confined this part of the report to a review of that portion of the Military Estimate comprising charges requiring cash disbursements, and have not entered into any investigation of the expenditure of reserve stock in 1862-63, for which estimates have been duly received. As respects this description of expenditure, a brief report on the result of last year's transactions compared with the requirements of 1862-63, will be submitted to Government; but the detailed review will be forwarded to the respective controllers and heads of departments for their information and guidance. I am of opinion that, practically, sufficient importance has not hitherto been attached to the expenditure of the reserved stock, or to the proper custody and accurate accounting for the same, notwithstanding that the matter was so prominently treated in the resolution of the Government of India, No. 710, dated 6th July 1860. There is an intimate connection between cash disbursements and reserve stock, for in proportion as the latter is expended, or believed to be expended because unaccounted for, will be the cash demand for replenishment; and in order to prevent any unnecessary outlay of public money on this account, I submit the following remarks:—

I. It is of great importance not only that the total value of the stock remains of the Commissariat Department should be known, but that the actual quantities and value of the several articles should also be stated. This is a point on which the Committee of Commissariat officers now sitting at this Presidency, for the purpose of assimilating the practice of the Commissariat Department in all India, have under consideration.

II. It is also important that the data on which allotments of reserve stock are framed should be carefully ascertained. For instance, in the case of malt liquor the Government scale is a quart a day; that ascertained by experience to be sufficient is on an average a pint a day, calculated on the established strength of European forces. Guided by the Government scale, 150,000 hogsheads would be the supply required to be laid in for 70,000 troops, costing 70 lacs of rupees per annum, whereas 75,000 hogsheads, costing only 35 lacs per annum, would suffice; and so in like manner with tea, coffee, and other staple articles of supply, not only the scale as fixed by Government should be kept in view, but also the actual consumption.

III. The number of men to be rationed and dieted in hospitals, should be accurately ascertained as one of the guiding rules in framing the estimate. The articles to be supplied to these men should not only be known, but also the average quantities consumed. The wastage and stock is also another point which must regulate reserves, and should be well known, and from what causes arising, whether from bad packing, bad godowns, or excessive quantities. The Commissariat Examiners should have a stock ledger, and be able to account for stock both used and in reserve; and by the ledger the requisitions for replenishment of stock would be checked.

IV. As a part of his administrative duty, the Commissary General is bound to draw up scales of supplies of the various articles to be laid in as stock: the data on which he calculates his requirements should be thoroughly known, and it is of such importance that it ought to be submitted to Government, being drawn up

up in a form which will admit of check and comparison relatively, not only with the numerical strength of the army, but likewise with the strength at the various cantonments, and the object for which the supplies are maintained.

V. This important document should also be reviewed by the Military Finance Department at each Presidency.

VI. The examiner of Commissariat Accounts should, by his monthly tabulations of the expenditure under the several heads, be able to report most accurately not only on the total expenditure, but on the average rates for each description of supply prevailing at the several stations; on the number of men rationed and dieted, and on the number and description of cattle fed, and purchased, on the number of army horses maintained, and the casualties occurring amongst them; and on the value of reserve stock used up.

VII. The Medical examiner should, in like manner, report on the whole of the operations connected with the hospital and medical departments, ascertaining averages, and all other information as respects his departments, similar to that required of the Commissariat examiner.

303. It is by these means alone that correct general averages can be ascertained, and the scales or allotments of reserve stock modified from time to time according to changes in the numerical strength or location of troops. It has been the unceasing endeavour of this department to collect data for forming safe general averages of each description of expenditure; and it will be observed that many of the modifications made in this year's estimate have been based on the averages already collected in this department. These averages are far from as accurate as they can be made; but even in their present state they answer the purpose of a very fair index by which to form an approximate estimate of actual expenditure; and I beg here to quote the remarks of the Controller Military Finance, Bombay, on this point, submitted in letter, No. 4,970, dated 7th February 1862.

"I do myself the honour to submit the accompanying statements, showing the distribution of European and native troops throughout the Bombay Presidency, and their cost calculated by the data given by you in the letter under acknowledgment. The figures which come out in the grand total of the statement for 1862-63, you will observe, approximate most curiously to the total exhibited in the Budget Estimate framed for this Presidency. I should be glad to be informed of the data by which the multiples of 1,000 rupees for Europeans, and 250 rupees for natives, were arrived at, as also the reason for adopting one-fifth as the cost of staff. In the case under reference, as I have remarked, the result is very curious; but had I the data, I should like to examine further into the subject. I trust therefore you will pardon my asking for it."

304. Government may perhaps think that I have entered into too great detail in this report. I beg to explain that I was quite alive to this circumstance; but as the business of minutely examining estimates is yet new, and little understood, I was anxious to afford the several controllers an illustration of the mode of procedure for their future guidance; and this reason will be held to excuse me for submitting so lengthy a report with so many details, but which may in future be rendered unnecessary by the controllers performing this important revision. In some instances my remarks may be called in question, but I have not hesitated to submit the observations which, from the figures before me, appeared to me right, as I regard a correct estimate to be the main foundation of true economy in respect to military expenditure; for, in accordance with the declared rule that the accounts are to follow the form of the estimate, a clear and well arranged estimate must necessarily ensure care in investigating the proposed outlay, and regularity in obtaining vouchers, thus imparting perspicuity to accounts, besides facilitating the duties of audit and compilation.

305. I would further notice that promptness in paying the demands against Government, and in submitting the vouchers for examination by the officers of audit, are of great importance. From the statements of the progress of audit, periodically published in the official gazettes of the three Presidencies, Government will be able to ascertain how far the desideratum of a prompt audit, which was one of the main objects desired to be accomplished under the new financial

arrangements, has been realised. I can only state, with a feeling of satisfaction, that the audit of the military accounts, and the classified compilation of the same, are now more current, that is, more in advance, than from official records I can ascertain them ever to have been at any previous period; and I earnestly hope that this promptness will be carefully enforced, as it is a security for the right settlement of the financial transactions of the department.

306. I have only now to add that it should be clearly understood that the estimate for the cash expenditure on account of the military charges of all India for 1862–63, amounting to 12,22,79,187 rupees, is exclusive of the expense of maintaining the European and native force, which the Government have decided, by their orders of the 10th April 1862, to reduce during 1862–63. I have already shown above that this force costs annually upwards of 18 lacs of rupees, as indicated in the margin; but for every month they are maintained in India during 1862–63, an extra grant of 1,57,454 rupees will have to be made to meet the military expenditure. I may also mention that the gratuities payable on discharge to the native cavalry will require to be provided for by a special grant. In the present estimate there is no provision made for any but the most ordinary movements of troops from one station to another, as the movements are not yet known; neither is any provision to meet war charges or field operations. The estimated outlay of 12,27,79,187 rupees provides for services to be carried on in a state of profound peace, and whilst I am anxious to see economy strictly enforced, I am the more fully persuaded that, in order to guard against the enormous expenditure which sprang up during the great crisis through which India has passed, it is essential that the exact cost of each kind of service should, during a time of peace, be accurately known, so that in the event of war operations, or any other cause requiring additional expenditure, the officers at the head of the several departments may be able, by the training in peace, at once to prepare estimates of the expense likely to be incurred for any emergent or extraordinary service. With this view, I earnestly recommend it as a standing rule to be rigidly enforced, that the head of each department should, in proposing changes creative of expense, either indicate the money cost thereof, or furnish accurate data from which the department may be able to calculate the charge.

	Rs.
22 Troops European cavalry	8,25,000
1 European Infantry Regiment	7,50,000
1 Regiment Bengal Cavalry	2,24,000
Re-organization, Bombay Native Cavalry	90,450
Total - *Rs.*	18,89,450

307. I cannot conclude this Report, under the circumstances of my immediate departure to Europe, without submitting to Government the services which the officers of the Military Finance Department have rendered. The department has laboured under many disadvantages from the various changes which have taken place in the officers, owing mainly to retirements from the service. From several I have received good and useful aid, greatly to the benefit of the Government interests. At an early period of 1861 an unexpected attack of illness deprived me of the valuable services of Colonel Hannyngton for a great part of the year, and his subsequent retirement from the service cannot but be regarded as a great loss to the department. During the last six months, however, I received most intelligent, active, and cordial assistance from this able officer; whatever duty he had to perform was done with a hearty and zealous mind.

308. Lieutenant Colonel Atkinson has now become controller, and is right well co-operating in directing and controlling the important affairs entrusted to him. Lieutenant Colonel M'Goun, the Controller of Military Finance, Madras, has introduced and successfully conducted the new system in that Presidency with unwearied zeal and intelligence, and it is with a conscientious feeling of the high merits of this officer that I bring his name to the favourable notice of Government. Lieutenant-Colonel Barr, the present Controller at Bombay, is likewise worthy of special notice; promptness and zeal have always characterised his efforts; as military accountant he remedied many defects, and cleared off heavy arrears, willingly affording me every desirable support; and in the higher office of controller, to which he has lately been appointed, he has continued to be actuated by the same good spirit, and has given evidence, by his practical application of the instructions of this department, that he has thoroughly mastered the details of his office, and correctly appreciates the principles upon which the business of his department should be conducted.

309. Of

309. Of the officers more immediately associated with me, the Secretary of the Military Finance Department, Captain G. B. Malleson, has evinced such a hearty and active interest in the work of the department, and I am so largely indebted to him for that valuable assistance, which, from his known ability, he is so well able to render, that I am sanguine of the useful future of this officer. Mr. Assistant Secretary G. W. Kellner was during a portion of the year on detached employ in the Clothing Department, where he has rendered useful service, and which has already been brought under the notice of Government; his health has unfortunately failed, but I fully expect that with health restored by a visit to England he will return to his duties with renewed vigour and strength. To Mr. Assistant Secretary R. H. Hollingberry my acknowledgments are also due for the untiring assiduity and great zeal with which he has laboured, and I can only wish that in the new sphere of business to which he is to be removed he may continue to serve as faithfully and earnestly as he has done in the Military Finance Department.

310. I have already in my Report of 8th October 1861 brought under the attention of Government the services of Mr. Assistant Secretary A. P. Simkins, and I have continued to benefit by the assistance which he has cheerfully afforded from early in the morning till late at night. I can assure Government that in him I leave to my successor an assistant who, by his extensive, varied, and sound knowledge of the principles and practical application of the rules connected with the Military Finance Department, will be found valuable and useful in a very high degree.

311. The annexures to this Report are the following:—

I. An abstract statement of the strength of the European and Native forces comprising the army of India.

II. Abstract statement of the distribution of the European and Native forces of the three Presidencies.

III. The Military Estimates of 1862-63 of the three Presidencies, as revised by this Department, showing the cash requirements under the several major and minor heads.

IV. The Estimates for 1862-63 of the three Presidencies as prepared by the Controllers of Military Finance.

APPENDIX.

(No. 23.)

STATEMENT of the established Strength of EUROPEAN and NATIVE TROOPS to be provided for during 1862–63.

	Cavalry.	Artillery.	Infantry.	Sappers.	TOTAL.
EUROPEAN TROOPS:					
Bengal - - -	3,541	6,660	32,538	120	42,859

(No. 25.)

From Lieutenant Colonel *H. W. Norman*, Secretary to the Government of India, Military Department, to the Officiating Chief of the Military Finance Department (No. 13); dated 1st July 1862.

With reference to your letter, No. 219 *b*, dated the 28th ultimo, stating that the reductions mentioned in the Resolution of Government, in the Military Department, under date the 7th April 1862, have been anticipated in the Estimates for 1862-63, and that, for every month that they remain unaffected, the military expenditure will be about one and a-half lac in excess of that provided for in the Budget, I am desired to acquaint you that it is the desire of the Right Honourable the Governor General in Council that the practice of assuming savings recommended as savings effected be discontinued.

It is a practice open to the gravest objection, and one which can only lead to embarrassment and confusion of accounts.

I am desired to point out, that the Resolution of the 7th April clearly indicated the reduction in the Cavalry to be prospective, and subject to the approval and sanction of Her Majesty's Government; and further, that the regiment of Infantry would not, under any circumstances, be despatched till the cold season or nearly the close of the current financial year.

(No. 14.)

Copy of the foregoing forwarded to the Secretary to the Government of India, Financial Department, for information.

(No. 26.)

No. 4648.—Financial Department, Fort William, 9th July 1862.

Resolution.

The Estimates of military charges for 1862-63, submitted with this Report, were accepted generally on the responsibility of the Military Finance Department, and were passed to the amount of 12,20,00,000 rupees, as stated in the Honourable Mr. Laing's Financial Statement of the 16th April last.

A further expenditure of about 19 lacs is dependent upon the reduction determined on by Government on the 10th April last, which, as pointed out in Resolution in the Military Department, No. 13, dated 1st instant, ought not to have been anticipated in the Budget now under consideration, and a large proportion of which will have to be provided for. It is indeed possible that the continued exertions of all officers of the Department, which have been so successful during the past year in contracting military expenditure, may render any addition to the general grant unnecessary, but, under any circumstances, these charges for the present demand direct Budget sanction.

A general detailed distribution of the Budget Grant is given with the Estimates of the Military Finance Department, and involve, it is observed, a considerable reduction of the Estimates submitted by the controllers of military finance in the three Presidencies, but no detailed Departmental Estimates have been submitted, nor is it clear whether they have been prepared in accordance with the revision made by the Military Finance Department.

It is obviously needful, however, as well for the purpose of concurrent audit and proper departmental control, as for that of apprising the heads of Departments of the extent of the responsibilities imposed upon them, that these Departmental Estimates should be supplied at the earliest possible moment to the auditors and all heads of Departments, with such details under each minor grant or head of service as will enable them intelligently and effectually to check the expenditure, and to enforce the reductions made by the Military Finance Department.

Copies of these documents showing the actual cash requirements should be submitted to Government.

The heads of Departments who have to control the expenditure of the grants will adhere strictly to the prescribed Budget rules, and it will be the duty of the military controllers, in conducting the concurrent audit, to see that the several grants are not exceeded, while the spirit of the orders passed by this Government, in Financial Resolution No. 11,332, dated 15th November 1860, will guide the action of the subordinate Governments having jurisdiction in military matters.

A schedule of all sanctioned fixed appointments and establishments in the military and civil branches of the Military Department in the three Presidencies, showing the monthly and annual cost, in substitution of the books or registers formerly submitted by the Military Auditors General, will be prepared under instructions of the Military Finance Department, and submitted without delay for the information of Government.

To the Military Department.
" Military Finance Department.
" Auditor General of India.

(No. 849 B.C.)

MEMORANDUM submitted to the Government of *India* by the Accountant General, Military Department, dated 31st August 1864.

APPROPRIATION AUDIT STATEMENT of the MILITARY EXPENDITURE for the Year 1862-63.

Financial Rssolution No. 11,322 of 15th November 1860. Ditto, ditto, No. 877 of 26th January 1861. Ditto, ditto, No. 119 of 16th November 1860.

THE duty of conducting the Appropriation Audit was confided to the Audit Board, by Government resolutions quoted in the margin, but as the original arrangements respecting the constitution of that Board have been abrogated, the undersigned, considering that the duty has now devolved upon him, begs to submit herewith the Appropriation Audit Statements of the Military Expenditure of the three Presidencies for the official year 1862-63, although not in so complete or satisfactory a form as he could have wished.

2. These are the first statements of the kind submitted, in the Military Department, since the introduction into India of the system of Budget Estimates, but the duty of carefully preparing them, and thus bringing the actual expenditure under the view of Government is, in the opinion of the undersigned, only second in importance to the preparation of the Estimates themselves.

3. The Appropriation Audit is the test of the general correctness and adaptability of the Estimates. It is also a check on the proceedings of all officers, whether their functions be of controlling, administrative, or executive nature, to whom the dispensing of Government moneys has been entrusted.

4. An attempt was made to institute an Appropriation Audit of the expendi- of 1861-62, but the Estimates of that year were for the most part crude, and the grants vague, that being the initial year of the application to India of the Budget Estimate system. The official year 1862-63 was the first in which the Estimates were prepared on any reliable data, and the first in which the accounts were modelled in conformity with the order of the Estimates. And therefore, late as may be the season, it appears important to lay the results of that year's transactions before Government.

5. The Military Budget Estimates for 1862-63 as submitted by the controllers of the three Presidencies amounted to 12,68,85,885 rupees, exclusive of the value of Europe stores. These Estimates were reduced by the late Military Finance Department to 12,22,79,186 rupees, inclusive of Europe stores to the value of 28,24,106 rupees. During the course of the year, however, supplementary grants were obtained for new services, which raised the total of the

the sanctioned sum for the Military Expenditure of all India for that year to 12,41,35,931 rupees, inclusive of the value of Europe stores.

6. The Appropriation Audit Statements prepared by the Military Accountants of the several Presidencies were received through the controllers without any modification or explanation whatever, as to the causes of variation from the sanctioned Estimates, except in the case of Bombay, but as in that case the comparison was made with the regular and not the Budget Estimate, the explanations were inapplicable.

7. These Statements indicated an aggregate expenditure of 13,10,02,324 rupees, inclusive of the value of Europe stores to the amount of 33,90,519 rupees, actually received during the year.

	Rs.
Bengal	7,21,51,400
Madras	3,37,90,856
Bombay	2,50,60,068
Total - Rs.	13,10,02,324

8. The Statements of "Actuals" for 1862-63 which had been previously prepared and submitted by the Military Accountants, indicated the gross Military Expenditure of the year at 12,80,84,382 rupees, or, deducting retrenchments recovered, at 12,67,39,049 rupees, A.

A

	Rs.
Bengal, inclusive of the charges adjusted by other Presidencies	6,90,85,037
Madras ditto, ditto	3,31,96,578
Bombay, ditto, ditto	2,44,57,434
Total - Rs.	12,67,39,049

9. There can never be a perfect agreement between the "Actuals" and the total of the Appropriation Audit Statement, because from the latter, the advances made in April for the pay of British troops to be adjusted in May ought in principle, to be excluded as falling against the Budget grant of the following year. But as the Appropriation Audit Statements should include advances of the preceding April adjusted in May, the first month of the official year in question, the difference should not be very great, provided both statements be prepared on correct principles, and there be no great alteration in the strength of the European force maintained.

10. On examining the Appropriation Audit Statements above referred to, it was discovered—

First.—That all three Military Accountants had fallen into the error of incorporating with the expenditure the entire adjustments made during the year of the amount that stood in inefficient balance at the commencement of the year, although that amount having been disbursed in the previous year had been charged in that year. By this error both the opening and closing inefficient balances were added as charges of the year, whereas the opening inefficient balance (less advances in April for the pay of British troops) should have been deducted, and the closing inefficient balances (less similar advances) should alone have been added.

Second.—The Military Accountants at Madras and Bombay charged against the Budget Grant of 1862-63 the advances for the pay of British troops made in the last month of that year (April 1863) for the first month of 1863-64, viz., May 1863. But as such advances are pretty much the same one year with another, this error was not of much importance. The magnitude of the first error, however, was great, amounting to 52,32,588 rupees.

	Rs.
Bengal	28,99,088
Madras	15,39,601
Bombay	7,93,299
Total - Rs.	52,32,588

11. The whole of the Appropriation Audit Statements had to be recast in this office, and in the course of this process, the details were carefully analysed, compared with the details of the military charges recorded in the annual statement of "Actuals,"—and tested by the *bonâ fide* cash receipts after deducting various descriptions of payments that do not fall against "Charges military."

12. The examination has been thorough so far as the data at command admitted. But this office felt much inconvenience for want of the services of a head accountant, and the Military Accountant when called upon was unable to afford any detailed or satisfactory explanation of many apparent discrepancies discovered in statements purporting to represent identical charges, consequent on his establishment being at present engaged in the preparation of the Annual Statement of Receipts and Disbursements for 1863-64.

13. The result of the investigation cannot, therefore, be deemed satisfactory, and the impression it has left on the undersigned is, that to arrive at a correct knowledge of the Military Expenditure of any one of the Presidencies, the principles (laid down by the Financial Department) on which the Financial

Statements are now prepared by the Military Accountants, require to be revised and modified in many essential points.

14. After such an expression of opinion, Government will not be surprised to learn that, notwithstanding the revision the Appropriation Audit Statements have undergone in this office, they can even now only be submitted as representing approximations to the actual expenditure of each Presidency, in the official year 1862-63.

15. The principle upon which these statements have been re-framed is, that all the charges audited and passed in the course of the year, whether disbursed in cash within the year, or in adjustment of outstanding inefficient balances of former years, are shown in the first column. Then the amount of the opening inefficient balance * (less the advances in the preceding April for pay of British troops) is deducted, and the closing inefficient balance is added (minus advances in April for pay of British troops). This process ought, if the accounts be correct, to give the cash disbursements † for military charges within the year: for it has to be observed, that any portion of the opening balance which may remain unadjusted at the close of the year is incorporated with the closing balance.

† Minus the advances of pay to British troops in April.

16. On this principle the military expenditure for all India would be as follows, exhibiting an excess over the total Budget grants of 16,64,951 rupees:—

	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Expenditure - - -	6,92,51,712	3,20,28,299	2,45,20,871	12,58,00,882
Budget Grants - - -	6,96,56,072	3,08,24,370	2,36,55,489	12,41,35,931
Difference - - - *Rs.*	—4,04,360	+12,03,929	+8,65,382	+16,64,951

	Rs.
Value of Europe stores actually received within the year - - - - - - - - -	33,90,519
Ditto estimated for - - - - - - -	28,24,106
Rs.	5,66,413

17. Of this excess 5,66,413 rupees is due to the value of Europe stores actually received, exceeding the value estimated for by the amount indicated, as shown in the margin; an excess not controllable in India.

18. Exclusive of Europe stores, the excess over the Estimate for local services is only 10,98,538 rupees, or nine-tenths per cent. On inspecting the details, it will be found that the excess has occurred mainly under the heads *Contingencies* (Title I.) and *Material Supplies of the Commissariat Department* (Title II.)

19. As regards the excess under the head *Contingencies*, it probably could not be controlled, the charges being of an authorised character; but as regards the excess in the Commissariat Department, it is probable that if a more rigid observance of the Budget allotment had been enforced by the respective controllers, the excess might at any rate have been reduced in extent.

20. The year in question, however, was, as already stated, the first in which the system of Budget Estimates was practically applied, and the controlling authorities were not quite alive to the true nature of their functions. Care will, however, be taken in future that the Budget Estimate limits, under the several subdivisions, are not exceeded by departments without special explanation, and without the sanction of Government, if there be no funds available from the aggregate grant to meet such excess.

21. The above are the results according to the data presented by the military accountants. The total, 12,58,00,882 rupees, differs from that of the *quasi*

* *Note.*—It would be a preferable plan, as the opening Inefficient Balance has already been charged to the previous year, to adjust it separately without incorporating the adjustments with the charges of the current year. In that case the audited charges of the year plus the Inefficient Balance which originated in the year itself, would be the charges of the year.

quasi "Actuals" of the same year (12,67,39,049 rupees) by 9,38,167 rupees, or in detail for the three Presidencies as below noted :—

	Appropriation Audit.	Actuals of 1862-63.	Difference.
	Rs.	*Rs.*	*Rs.*
Bengal - - - - -	6,92,51,712	6,90,85,037	— 1,66,675
Madras - - - - -	3,20,28,299	3,31,96,578	+ 11,68,279
Bombay - - - - -	2,45,20,871	2,44,57,434	— 63,437
Rs.	12,58,00,882	12,67,39,049	+ 9,38,867

22. As regards the difference in the Bengal Presidency, 75,277 rupees appear due to a discrepancy between the debits under adjusted charges made in the "Actuals" of Madras and Bombay against Bengal, and the credits afforded by Bengal in the Appropriation Audit Statement, as shown in the margin. The residue is probably the difference between the advances for the pay of the British troops made in April 1862 and April 1863, the former being included in the Appropriation Audit Statement and the latter in the "Actuals."

Actuals, 1862-63.

	Rs.
Madras adjusted for Bengal -	1,34,990
Bombay „ „ -	6,14,460
A	7,49,450
Bengal gives credit in Appropriation Audit to Madras -	75,313
Ditto to Bombay - - -	5,98,860
B	6,74,173
Difference between A and B	75,277

23. In Madras, the total of the opening inefficient balance was 15,39,601 rupees, and this is deducted in the Appropriation Audit Statement from the audited and passed charges, but in the "Actuals" only 2,74,188 rupees were deducted as retrenchments recovered, the whole of the residue being treated as charges of the year. This circumstance, with the difference between the debits in the "Actuals" by other Presidencies against Madras on account of adjusted charges, and the credits afforded by Madras (*see* margin), together with the difference between the advances of April 1862 and April 1863 for pay of British troops, fully account for the discrepancy between the total of the "Actuals" and that of the Appropriation Audit.

Actuals for 1862-63.

	Rs.
Bengal adjusted for Madras -	1,53,792
Bombay „ „ -	2,39,857
A	3,93,649
Appropriation Audit Madras gives credit to Bengal - -	1,48,083
Ditto to Bombay - - -	1,85,904
B	3,33,987
Difference between A and B	59,662

24. In Bombay, 14,285 rupees are due to the difference between the debits and credits for adjusted charges, as shown in the margin. The residue, 49,152 rupees, is partly due to the difference between the advances for the pay of British troops in April 1862 and April 1863, and partly to some other cause which cannot be traced in this office.

Actuals of 1862-63.

	Rs.
Bengal adjusted for Bombay -	3,53,655
Madras „ „ -	45,401
A	3,99,056
Appropriation Audit, Bombay gives credit to Bengal - -	3,48,316
Madras - - - - -	36,455
B	3,84,771
Difference between A and B	14,285

25. It may be well to state, as throwing light on the foregoing explanations, that the "Actuals" of the three Presidencies are prepared on different plans. In Bengal the opening inefficient balance is deducted and the closing inefficient balance added. In Madras the opening inefficient balance is incorporated with the charges, less the portion recovered, which is brought to credit as a receipt, and the closing inefficient balance is likewise added. In Bombay the difference between the opening and closing inefficient balance is carried to the head "Debt," but the portion of the opening inefficient balance adjusted during the year is incorporated with the charges of the year in which adjusted, less retrenchments recovered.

26. The total of the Appropriation Audit Statements of the three Presidencies, viz., 12,58,00,882 rupees, represents the whole of the charges of the year after making deductions on account of adjustments which were actually charged in the previous year, as far as that could be done from the data available. But the undersigned is persuaded that it does not represent the real cash expenditure of the year, plus the value of Europe stores received.

27. The ground on which he has come to this conclusion is, that on testing the above given expenditure, with the actual cash receipts after deducting

from the latter payments not debitable to "Charges Military," the balance of cash available proves inadequate to meet those charges to their full extent.

28. The following tabular statement will, aided by the Appendices to this Memo. from A to L, fully demonstrate this :—

	Bengal.	Madras.	Bombay.	Total.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Bona fide cash receipts and value of Europe stores, as per Appendices A to L.	8,01,15,872	3,76,18,051	4,24,37,890	16,01,71,813
Deduct:				
Payments other than military charges.	1,16,82,362	63,14,630	1,81,15,390	3,61,12,382
Cash available to meet military expenditure.	6,84,33,510	3,13,03,421	2,43,22,500	12,40,59,431
Expenditure recorded as per Appropriation Audit.	6,92,51,712	3,20,28,299	2,45,20,871	12,58,00,882
Difference plus cash available *Rs.*	8,18,202	7,24,878	1,98,371	17,41,451

Thus there are three differing amounts by which the Military Expenditure of 1862-63 is represented, viz. :

	Rs.
As per "Actuals" - - - - - -	12,67,39,049
,, Revised Appropriation Audit Statements -	12,58,00,882
,, Cash Receipts - - - - - -	12,40,59,431

29. It is satisfactory to observe that in every instance the amount is below that calculated during 1863-64 and entered in the Financial Statement prepared by Sir Charles Trevelyan, K. C. B., for the year 1864-65, as the actual expenditure of the Army in 1862-63, viz., 12,76,43,250 rupees.

30. Also, that the amount by the "Actuals" exceeds the Budget Grants by only 26,03,118 rupees, whilst by the Revised Appropriation Audit the excess over the Budget Grants is only 16,64,951 rupees; in both cases the excess includes that of Europe stores to the amount of 5,66,413 rupees, and excluding that item, the per-centage of excess over the Estimate is by the Actuals $1\frac{3}{4}$ rupee, and by the Revised Appropriation Audit only $\frac{9}{10}$. Taking either of these two amounts as the maximum expenditure of the year, these results would appear far from unsatisfactory when contrasted with those in England (where the Budget system, a comparative novelty in India, has been long established) as exhibited in the Appropriation Audit of the expenditure of the British Army for the same year, 1862-63, which was laid before Parliament.

31. For the more equitable comparison, the undersigned submits a statement (Appendix M) representing the grants and actual expenditure for the year 1862-63 for the effective and non-effective services of the British army. The statement is extracted from one published by the War Office authorities, excluding Militia, Fortifications, Civil Buildings and Barracks, these not being included in the Indian Military Estimate. The difference between the expenditure and the grants will be seen to be 73,72,330 rupees, or $5\frac{1}{6}$ per cent. on an Estimate of 14,30,97,960 rupees.

32. It is true that the difference as respects the English expenditure is in favour of the Estimate, while here, according to the foregoing calculations, it is against the Estimate. But by the test of the cash receipts, the real expenditure within the year appears not to have been above 12,40,59,431 rupees, inclusive of the value of Europe stores, or 76,500 rupees below the Estimate; but if the excess in Europe stores be excluded, as explained above, then the actual cash disbursement would appear to be 6,42,913 rupees below the Budget Grant for all India.

33. If the Financial Department have any means of verifying the purely cash transactions of the year, the last mentioned amount will admit of a ready test. But irrespective of this, and under any circumstances, the discrepancies which have

have been brought under notice in this Memorandum are so important, as bearing upon the actual military expenditure in India, that the undersigned purposes to institute a thorough investigation into the details of the accounts of 1862-63, in order not only that the real expenditure of that year may be ascertained, but that a more correct system may be introduced for the preparation of the Financial Statements of future years, from which all mere paper entries should be rigidly excluded.

34. Instructions have already been issued to insure this important object to a certain extent. The undersigned, however, would wish it to be borne in mind, that the Military Accountant's Office was only organised in 1861, and that the system on which the "Actuals" have been prepared is one of long standing, having been established when the Military Accountant's Offices were component parts of the Offices of the Accountants General.

Arthur Broome, Colonel,
31 August 1864. Accountant General, Military Department.

HEADS OF SERVICES.	Expenditure, 1862-63.	Estimate, 1862-63.	More than Estimate.	Less than Estimate.	CAUSES OF VARIATION.
	Rs.	*Rs.*	*Rs.*	*Rs.*	
European Artillery - - - - -	40,67,670	45,52,507	- -	4,84,837	In the early part of this year orders were received for the re-organization of the European Artillery in India, and a supplemental grant of 2,80,112 rupees was sanctioned in order to provide for this arm of the service on the new scale of strength, both of officers and men. The drafts did not arrive as early as was expected, and the pay of officers serving with the Native Artillery has been compiled and classed under that head, although estimated for with the European Artillery.
Native „ - - - - -	3,83,344	3,039,19	79,425	- -	The original Budget grant was 4,00,966 rupees, but on the re-organization of the European Artillery, 97,047 rupees were relinquished, that being the estimated financial effect of the reduction of the Hyderabad and Punjab Native Artillery ; the reduction, however, does not appear, as the salaries of European officers, which were estimated for with the European artillery, have been compiled with the branch of the artillery with which they were serving, hence the apparent increase.
European Cavalry - - - - -	24,96,820	28,59,507	- -	3,62,687	The actual disbursements are a close approximation to the original Estimate, but as Government did not consider the proposed reduction of 14 troops of men, with seven troops of officers, final, until the sanction of the Secretary of State for India was obtained, a supplemental grant for 4,33,460 rupees were sought and obtained, but as no drafts arrived during the year to fill up casualties, the major portion of the supplemental grant became a saving.
Native „ - - - - -	79,64,502	74,84,724	4,79,778	- -	The Gwalior Camel Corps (included under Native cavalry) although ordered to be disbanded in November 1861, was not actually broken up until August 1862 ; this involved an extra expenditure of 1,12,000 rupees. Merit pay was increased during the year, and a great many unemployed and unposted officers were ordered during the year to do duty with Native Cavalry Corps. The increase on account of this arrangement is met by a decrease under the heads "unemployed" and "unposted" officers.
European Infantry - - - - -	1,08,77,230	1,10,55,198	- -	1,77,968	The decrease is attributable to casualties during the year and to fluctuation in the number and rank of officers present in India. Also to several officers of British Infantry being on the Staff, their pay appearing under that head.
Native „ - - - - -	80,91,030	79,45,478	1,45,552	- -	New rates of pay were granted to the 1st and 2d Regiments of Assam Infantry, involving extra expenditure to the extent of 20,000 rupees, the residue of the increase is the effect of recruiting during the year, the effective having, at the beginning of the year, been much below the established strength, and the Estimate framed on the average strength.
Engineers - - - - - - -	1,72,088	2,07,316	- -	35,228	Decrease caused by the employment in the Department of Public Works and other Departments of officers who at the commencement of the year were unemployed.
Sappers and Miners - - - - -	2,35,587	2,24,122	11,465	- -	Ordinary fluctuations.
European Invalids - - - - -	2,50,572	2,36,263	14,309	- -	Accessions and ordinary fluctuations.
Officers Staff Corps (unemployed) - -	1,62,443	18,81,829	- -	7,22,009	There was no correct data on which to calculate the financial effect of the retiring bonus offered to Indian officers. This cause, and the orders directing unemployed officers to do duty with cavalry and other corps have resulted in the large saving under this head.
„ of Mutinied Corps - - -	9,97,377				
„ Unposted - - - - -	4,40,525	6,84,932	- -	2,44,407	These filled the place in corps of the relieved officers, and many were temporarily posted to regiments to do duty. Hence the apparent decrease.
„ Unattached - - - - -	97,349	53,376	43,973	- -	Increase caused by additions and returns of officers from Europe.
„ Veteran Establishment - - -	18,537	15,528	3,009	- -	Ordinary fluctuations.
„ Local - - - - - -	5,400	7,418	- -	2,018	
„ Retired - - - - - -	1,67,350	52,110	1,15,240	- -	The effect of the bonus given to officers to retire.
„ Warrant and Non-commissioned Employed in P.W.D.	2,09,762	33,909	1,75,853	- -	There was no correct list of these officers in the beginning of 1862, and not being on the military staff or attached to regiments they were in many instances classed with unemployed officers.

EXPLANATORY STATEMENT of the Sums Expended "More or Less," under each of the Sub-divisions of the Budget Estimate, &c.—*continued.*

HEADS OF SERVICES.	Expenditure, 1862–63.	Estimate, 1862–63.	EXPENDITURE. More than Estimate.	EXPENDITURE. Less than Estimate.	CAUSES OF VARIATION.
	Rs.	*Rs.*	*Rs.*	*Rs.*	
General Army Staff	12,80,722	13,20,377	-	39,655	Ordinary fluctuations in rank of officers.
Staff of Irregular Forces	2,12,485	2,33,279	-	20,794	There were several reductions in the irregular forces during the year.
Garrison and Cantonment Staff	9,19,797	11,00,557	-	1,80,760	Several bazars and depôts were abolished during 1862–63, and there were many changes in the rank of the officers holding these various appointments consequent on the retirement of other officers; most of the new incumbents having joined the Staff Corps were restricted to half-batta pay, in addition to the pay of their appointments, whereas the former incumbents drew full-batta pay.
Office Establishment of General Army Staff	2,36,738	2,11,794	24,944	-	A sum of 8,000 rupees was granted during the year to the Adjutant General's establishment to bring up arrears, and also a personal allowance of 1,200 rupees per annum to the registrar. Further, an increase of 9,066 rupees was granted to the Quarter Master General's establishment; *vide* Financial Resolution, No. 5159, of 31st July 1862.
Military Finance Department	4,10,063	3,80,668	29,395	-	The increase was caused by the pay of six doing duty officers, and that of the Compiler Pay Code, which were appointments made during the year, and therefore not provided for in the Estimate; also the expense attending the promotion of incumbents in the staff corps.
Office Establishment of Finance Department	5,29,244	4,80,049	49,195	-	During the year the Office Establishments of the Controller, Pay Examiner, and Presidency and Divisional Pay Masters were re-organized and augmented.
Barrack Department	7,07,887	13,54,636	-	6,46,749	The whole of this large sum is not a *bonâ fide* saving, for, under the same head, in Title II., there is an increase over the Estimated Assignment of 2,70,574 rupees. The net saving, therefore, is 3,76,175 rupees. At the time of submitting the Estimate of 1862–63, the Chief of the Military Finance Department remarked that it was excessive, but that the Quarter Master General had given no details, whereby to check the amount. He further observed, "the Commissary General seems to disclaim all responsibility for this high estimate, stating that it has been entirely framed by the Quarter Master General of the army." The excess was for the most part in the sums estimated for punkah-pulling and tatty-watering.
Medical Department	32,45,814	33,39,418	-	93,604	Ordinary fluctuations in the number of officers present in India, and owing to casualties not being filled up.
Office Establishment Department	78,077	1,61,368	-	83,291	Under a misapprehension, at the time of preparing the Estimate, the compounding and store establishments of medical depôts were classed under this head. But as such medical establishments, together with the ministerial and menial establishments of hospitals, depôts, &c., are paid by the Commissariat Department, the expenditure for them has been transferred to that head.
Pensions to Officers, Warrant and Non-commissioned Officers, and Rank and File.	17,17,370	20,20,442	-	3,03,072	The Estimate prepared by the Controller was excessive, but the pension accounts were so much in arrears in 1861–62, that there was actually no reliable data with which to test the Estimate. The accounts are now in a much more forward state.
Commissariat Department	21,20,016	21,60,216	-	40,200	Ordinary changes in rank of officers, and fluctuations in the extensive subordinate establishments of the Department.
Ordnance Department	11,33,656	10,43,236	90,420	-	Contingent charges estimated for under Title II. have been included here; *vide* remarks on the same head under Title II.
	2,68,886	2,78,702	-	9,816	Ordinary fluctuations.

Benevolent Allowances	5,52,234	4,46,543	1,05,691	- -
Allowances to Clergy	1,37,535	1,44,288	- -	6,753

GRAND TOTAL, Titles I. & II. - - *Rs.*	6,92,51,712	6,96,56,072	36,81,775	40,86,135

Military Department, Account Branch,
31 August 1864.

During the year a transfer of 50,112 rupees from the Civil to the Military Expenditure was authorized by Government in the Financial Department on account of the Lawrence Asylum. Further, the Controller omitted to estimate for the annual donation to the Military Fund 24,000 rupees; the residue of the increase is in the item of family allowance to wives and children of non-commissioned officers and soldiers, which must always fluctuate.

Ordinary fluctuations.

The excess over the Estimate was caused by the larger expenditure, 1st, for passage money on account of the artillery drafts from England, and the transfer of artillery from Bengal to Madras and Bombay; 2d, for the extra expenditure in the conveyance of the above troops by rail; 3d, in the disbursement for Moonshee allowance, Government having decided that no staff appointment was to be retained unless the incumbent passed in six months; 4th, for bounty money and gratuity which exceeded the Estimate by 1,17,000 rupees. Besides, the charges were of such a miscellaneous nature that the accounts of previous years afforded no adequate data for a correct Estimate.

Vide remarks on the expenditure of this Department under Title I.

Needs no particular explanation, as the difference is very small.

This large excess over the Estimate has occurred under the following items of Commissariat expenditure:

Victualling Europeans	1½ lakhs.
Transport Charges	5½ ,,
Reserve Stock	3½ ,,
	10½ ,,
Deduct saving in feed of horses	2 ,,
TOTAL	8½ ,,

The amount expended during the year for victualling Europeans is given at 49,36,025 rupees, which is high when compared with the amount expended in 1863-64, viz., 37,86,371 rupees. If anything, prices rose during the latter year. This item will be made the subject of inquiry. As regards the increase in transport charges, it has to be observed that, at the time of the preparation of the Estimate, there were no data whatever for calculating the cost of the relief. Respecting reserve stock, the Commissary General did not anticipate any excess when he submitted his regular Estimate in November 1862. The excess has occurred partly in supplies of rum, and partly in other articles. No explanation whatever is given of it, and the matter remains to be investigated.

The excess is entirely in the item of Europe stores. The value of the stores indented for, for the service of 1862-63, was 96,067 rupees, but stores and equipments to the value of 7,47,240 rupees were sent out. Over such transactions the late Military Finance Department had no control.

The operations of the Department in purchases of cattle were more limited during the year than was anticipated before its commencement by the Superintendent of Studs himself.

The value of stores expected to be received from England was estimated at 11,00,000 rupees, but the value of the stores actually received during the year amounted to only 7,68,365 rupees, giving a difference of 3,31,635 rupees; but as heavy arrears of compensation (aggregating during the year 3,04,000 rupees) had to be paid, the major portion of the saving on account of Europe stores was absorbed, leaving only 1,25,743 rupees.

Arthur Broome, Colonel,
Accountant General, Military Department.

ABSTRACT of the Budget Grants for the Military Expenditure of the Madras Presidency, for the Year 1862–63.

EXPLANATORY STATEMENT of the Sums Expended "More or Less," under each of the Sub-divisions of the Budget Estimate of the Madras Presidency for 1862–63.

HEADS OF SERVICE.	Expenditure, 1862–63.	Estimate, 1862–63.	EXPENDITURE. More than Estimate.	EXPENDITURE. Less than Estimate.	CAUSES OF VARIATION.
TITLE I.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
European Artillery Golundauz	20,70,471	21,19,178	- -	48,707	In the Madras Presidency, the expenditure on account of the European and Native Artillery has been compiled together. In the case of the European Artillery, the Estimate was framed for the fixed Establishment, according to the new scale, but the drafts from England required to complete the scale, did not arrive as early as was expected.
European Cavalry	6,13,000	6,74,285	- -	61,285	The Estimate was framed on the assumption that four troops of men with two troops of Officers would be reduced. But Government declined to order the reduction until the approval of the Secretary of State was obtained. A Supplemental Estimate of 1,23,850 rupees was consequently sanctioned, but as no drafts arrived during the year to fill up vacancies, half of the supplemental grant has become a saving.
Governor's Body guard	17,702	15,715	1,987	- -	The net decrease of 45,811 rupees is owing to casualties not being filled up: the strength being in excess of the Establishment.
Native Cavalry	8,38,648	8,86,446	- -	47,798	
European Infantry	33,44,948	33,90,112	- -	45,164	The decrease is the result of casualties and ordinary fluctuations in the rank of Officers present in India.
Native Infantry	64,59,427	68,21,118	- -	3,61,691	The transfer of Officers from Native Infantry to the Staff Corps has caused the bulk of this decrease (*vide* the Head Staff Corps), also casualties among the Officers, which are practically filled up from the list of Unposted Officers (*vide* that head).
Engineers	1,34,427	1,60,411	- -	25,984	Employment in Department Public Works and other Departments of Officers who were unemployed when the Estimate was prepared.
Sappers and Miners	2,67,214	4,05,388	- -	1,38,174	Two Companies were reduced during the year at a saving of 8,400 rupees, and the Controller at Madras over-estimated working pay (by error in calculation) to the extent of 1,29,600 rupees.
Pegu Sapper Battalion	2,37,975	1,37,471	1,00,504	- -	This Corps was ordered to be broken up, but afterwards it was permitted to die out. Hence the increase.
European Veteran Artillery Company	59,287	63,652	- -	4,365	Casualties.
European Infantry Artillery Company	1,89,313	2,01,231	- -	11,918	Casualties.
Unposted Officers	3,99,165	3,53,595	45,570	- -	The increase has been caused by promotions consequent on casualties of Officers posted to Regiments. (*Vide* Native Infantry.)
Unattached and Local Officers	6,354	16,783	- -	10,429	Casualties, and the bestowal of Staff Appointments, which causes the pay to be charged with the Department in which serving.
Retired Local Officers	1,30,439	67,487	62,952	- -	This is the result of the retiring bonus granted by the Secretary of State.
Warrant Officers with P. W. Department	665	39,546	- -	38,881	It was decided during the year that this item should be a charge of the Department Public Works, and not of the Military Department.
Officers with Civil and Educational Department.	5,786	44,218	- -	38,432	Most of these Officers joined the Staff Corps, and therefore their entire pay is debitable to the Department with which serving.
Officers with Irregular Corps	- -	17,900	- -	17,900	All these joined the Staff Corps, and their entire pay is charged to the Corps with which serving. They were for the most part Officers of the Hyderabad Contingent, and before joining the Staff Corps their net pay was debited to the Madras Presi-

General Army Staff - - - - -	8,25,438	9,00,065	- -	74,627	There were many changes in the Army Staff, consequent on the retirement of the Indian Officers; and although in many cases Officers of the same rank succeeded them, yet the new incumbents only drew Staff Corps pay. The Deputy Adjutant General, British Forces, was abolished this year. These circumstances have caused the saving.
Garrison and Cantonment Staff - - -	2,28,104	2,73,539	- -	45,435	The explanation given under the foregoing item applies to this also.
Office Establishment of General Army Staff -	99,415	1,00,300	- -	885	This small sum is the saving of contingencies, &c., connected with the abolition of the office of the Deputy Adjutant General, British Forces.
Military Finance Department - - -	2,68,887	2,74,540	- -	5,653	Saving caused by fluctuation in Army Rank of Incumbents, and the abolition of the post of Second Examiner, Pay Department.
Office Establishment of Department - -	1,91,812	2,10,312	- -	18,500	There were reductions during the year in the Establishments of the Commissariat Examiner and Divisional Paymasters.
Barrack Department - - - - -	49,072	80,484	- -	31,412	The Commissariat Commission which sat during the year to classify Commissariat Charges, decided that all menial Establishments immediately connected with the supply or care of Material, should be estimated for under Title II. This is, therefore, a mere nominal Saving, as the Expenditure will appear under Commissariat Department, Title II.
Medical Department - - - - -	14,33,883	14,92,719	- -	58,836	Fluctuation in the rank and number of Officers present in India, and also owing to casualties not being filled up.
Office Establishment of Department - -	17,459	17,784	- -	325	Ordinary fluctuation.
Pensions - - - - - - - -	29,86,295	28,03,266	183,029	- -	Superannuation pensions, amounting to 45,000 rupees, were inadvertently omitted by the Controller from the Budget Estimate, and, at the time the Estimate was prepared, it was impossible correctly to calculate the amount that would have to be paid to the men of the eight Regiments of Native Infantry ordered to be disbanded. These are the causes of the increase.
Commissariat Department - - - -	6,34,843	10,43,446	- -	4,08,603	This is not a *bonâ fide* saving, but the result of the change in the classification of Expenditure, agreeably to arrangements made by the Commissariat Commission which sat during the year. The whole of the amount assigned was expended, and will be found classed under Title II. (*Vide* remarks above, opposite Barrack Department.)
Ordnance Department - - - - -	7,00,650	7,53,796	- -	53,146	Ordinary fluctuations in the extensive subordinate Establishments of the Department.
Remount Department - - - - -	30,007	32,184	- -	2,177	
Clothing Department - - - - -	39,944	36,790	3,154	- -	Ditto - - - - - - ditto.
Asylums - - - - - - -	6,855	6,384	471	- -	Ditto - - - - - - ditto.
Family Allowance - - - - -	2,10,900	1,79,676	31,224	- -	Ditto - - - - - - ditto.
Presbyterian Chaplains - - - -	480	} 59,092	2,307	- -	This is an item that will always fluctuate.
Roman Catholic Priests - - - -	60,919				Ordinary fluctuations.
Camp Equipage Department - - -	45,821	45,623	198	- -	Ditto - ditto.
Stationery Depôt - - - - - -	} 16,42,406	12,09,121	4,33,285	- -	This is a *bonâ fide* increase over the Estimate; much of it, however, is attributable to extra passage money paid on account of the new drafts of Artillery which came out, and for the Batteries of Royal Artillery which went home from Madras. Also for Her Majesty's 43rd Regiment, which was transferred from the Madras to the Bengal Presidency. Many of the charges under this head are of so miscellaneous a character that their nature and extent cannot be well foreseen.
Contingencies - - - - - - -					
TOTAL, TITLE I. - - - *Rs.*	2,48,20,958	2,51,78,049	11,03,236	15,50,327	
Net Result - - - *Rs.*	- -	- -	- -	3,57,091	

EXPLANATORY STATEMENT of the Sums Expended "More or Less," under each of the Sub-divisions of the Budget Estimate of the Madras Presidency for 1862-63—*continued.*

HEADS OF SERVICE.	Expenditure, 1862-63.	Estimate, 1862-63.	EXPENDITURE. More than Estimate.	EXPENDITURE. Less than Estimate.	CAUSES OF VARIATION.
TITLE II.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
Commissariat Department - - - -	55,34,445	45,17,402	10,17,043	- -	The whole of the amount here represented as Excess is not really so; under Title I. it was shown opposite Barrack and Commissariat Departments, that the savings respectively of 31,412 rupees, and 4,08,603 rupees were not *bonâ fide*, but mere transfers from Commissariat Department, Title II. These two Savings amount to 4,40,015 rupees, and deducting them from the Excess of 10,17,043 rupees here shown, the Net Excess is 5,77,028 rupees. The Excess has occurred under the heads Reserve Stock and Camp Equipage. The Commissariat Department was never accustomed to any restraint in the provision of Reserve Stock, and the Budget Rules being, for the most part novel, were not rigidly enforced by the proper Authorities at the Madras Presidency. Besides, the conditions of contracts, previously entered into for long periods, had to be observed whether the supplies were actually required during the year or not.
Ordnance Department - - - - -	6,05,400	3,55,278	2,50,122	- -	The Excess is entirely attributable to value of supplies of Stores from England exceeding the demands as per annual Indent for the Service of the year. Stores to the value of 181,877 rupees were indented for, but stores to the value of 4,26,585 rupees were sent out.
Clothing Department - - - - -	8,72,030	5,27,754	3,44,276	- -	The Excess is due to the large amount paid to the Army for compensation in lieu of Clothing, viz., 4,00,483 rupees. The whole of the Native Army used to be clothed biennially on the 1st January, but the date was altered to 1st April; compensation was therefore granted to the extent of three-twelfths value of each garment. This arrangement was made with the sanction of Government during the year, and was not provided for in the Budget Estimate.
Remount Department - - - - -	1,79,631	1,58,369	21,262	- -	The amount allotted for the purchase of Horses was exceeded, owing probably to previously existing engagements.
Stationery Department - - - - -	- -	2,518	- -	2,518	This small amount was assigned for probable local purchases, but was not used.
Medical Department - - - - -	15,835	85,000	- -	69,165	Europe Stores to the value of 85,000 rupees were indented for, for the Service of the year, but the value of Stores actually sent out within the year was only 14,948 rupees, which, with freight, gives the amount shown as expended; hence the Saving.

HEADS OF SERVICE.	Expenditure, 1862-63.	Estimate, 1862-63.	EXPENDITURE: More than Estimate.	EXPENDITURE: Less than Estimate.	CAUSES OF VARIATION.
TITLE I.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
European Artillery	12,41,247	13,54,850	-	1,13,603	The Estimate was framed for the full fixed Establishment according to the new scale, but the Drafts from England, required to complete the scale, did not arrive as early as was expected. Hence the Saving.
Native Artillery	2,30,422	2,06,769	23,653	-	The Excess is only apparent, not real. A sum of 3,27,454 rupees was allotted for the Pay of the Supernumeraries of all Native Branches of the Army, but their Pay has been compiled separately with each Branch to which they belong.
European Cavalry	6,37,689	6,32,516	5,173	-	When the Estimates were prepared there were no less than 17 Officers absent in Europe. The Excess must be owing to the return of some of them during the year.
Native Cavalry	22,33,847	23,35,832	-	1,01,985	The Native Cavalry was re-organised during the year, and 1,04,404 rupees were allowed under this head for Gratuities to discharged men The Amount, when disbursed, was classed under Contingencies (*vide* that Head), so this is not a *bonâ fide* Saving.
European Infantry	26,54,833	26,35,265	19,568	-	When the Estimates were prepared there were 115 Officers of this arm of the Service absent in Europe, and others from the local Regiments had withdrawn to the Staff Corps (*vide* that Head). During the year the local European Regiments were re-organised and made British Regiments of the Line.
Native Infantry	39,79,904	40,25,241	-	45,337	When the Estimate was prepared there was but one Regiment in China, but towards the latter part of the year a second Regiment was sent.
Engineers	1,39,967	1,40,217	-	250	Ordinary fluctuations.
Sappers and Miners	1,27,949	1,29,926	-	1,977	
Invalid, Veteran, Unposted, and Unattached Officers.	1,09,229	89,990	19,239	-	Fluctuation in the Number and Rank of Officers present for duty in India.
Retired Officers	31,863	9,516	22,347	-	The result of the bonus granted by the Secretary of State to Indian Officers.
Officers with Civil Department	24,649	-	24,649	-	This Increase is owing to the Net Pay of Officers employed in the Department Public Works being compiled under this Head, although separately estimated for. There is a Decrease in the next Item which modifies this Increase, leaving a difference of only 6,857 rupees, which may be the result of a difference in rank of present Incumbents.

EXPLANATORY STATEMENT of Sums Expended, "more or less," under each Subdivision of the Budget Estimate of the Bombay Presidency for 1862-63—*continued.*

HEADS OF SERVICE.	Expenditure, 1862-63.	Estimate, 1862-63.	EXPENDITURE. More than Estimate.	EXPENDITURE. Less than Estimate.	CAUSES OF VARIATION.
TITLE I.—*continued.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
Ditto of P. W. Department - - - -	2,086	19,878	- -	17,792	
Ditto of Staff Corps - - - - -	1,00,577	9,935	90,642	- -	Accessions during the year from the different arms of the Service.
Supernumeraries - - - - - -	- -	3,27,454	- -	3,27,454	Owing to absorption during the year.
General Army Staff - - - - -	7,11,169	7,20,494	- -	9,325	Ordinary fluctuations in the Rank of Incumbents.
Garrison and Cantonment Staff - - -	4,08,384	4,58,455	- -	50,071	Owing to the Retirement of Indian Officers there were extensive changes in the Personnel of the Garrison and Cantonment Staff; the former Incumbents drew in most cases full Batta, but, when replaced by Staff Corps Officers, only half Batta was drawn.
Office Establishment of General Army Staff -	1,02,391	87,740	14,651	- -	Many of the Office Establishments were re-organised and put on an efficient footing in 1862-63. Hence the Increase.
Military Finance Department - - -	2,46,581	2,23,014	23,567	- -	When the Estimate of 1862-63 was prepared, the Staff Salary of the Military Accountant and the Salary of the Compiler were not fixed. Subsequently the Military Accountant was allowed to draw 1,200 rupees, and the Compiler 500 rupees. This accounts for 20,400 rupees of the difference. The residue may be attributed to ordinary fluctuations.
Office Establishment of ditto - - -	1,86,081	1,68,782	17,299	- -	The whole of these Establishments were re-organised and put on an efficient footing during the year.
Barrack Department - - - - - -	1,15,268	1,18,875	- -	3,607	Ordinary fluctuations in Rank of Incumbents.
Medical Department - - - - - -	11,36,083	11,46,830	- -	10,747	Ordinary fluctuations in Rank of Officers present in India.
Office Establishment of Medical Department	20,794	23,994	- -	3,200	The Hospital, Store, and Compounding Establishments were estimated for under this Head. But, as they were paid by the Commissariat Department, the Expenditure is included under Charges Personnel of that Department.
Pensions to Commissioned, Warrant, and Non-Commissioned Officers, and Rank and	16,89,196	16,65,853	23,343	- -	Ordinary fluctuations; besides, the Data for estimating was imperfect.

Ordnance Department - - - -	6,74,275	7,41,943	- -	67,668	In the Budget Estimate a sum of 1,37,593 rupees was allowed for extra Artificers and Labourers on the requisition of the Inspector General of Ordnance. The result shows that this Demand was beyond actual requirements.
Remount Department - - - - -	2,172	2,172	—	—	
Clothing Department - - - - -	36,733	33,042	3,691	- -	An extra Establishment of 85 rupees per month was sanctioned by the Bombay Government. The residue of the Excess is due to changes in the Rank of Officers.
Camp Equipage Department - - -	45,816	50,894	- -	5,078	Ordinary fluctuations. The amount of Batta drawn would depend upon the nature of the work which devolved on the Establishment during the year.
Bazar Equipage Department - - -	1,05,942	95,493	10,449	- -	The Excess is wholly attributable to change in the Army Rank of Superintendents.
Benevolent Allowances - - - -	1,29,361	1,46,002	- -	16,641	This Item will always fluctuate.
Allowances to Clergy - - - - -	55,968	45,648	10,320	- -	Ditto - - - ditto.
Contingencies - - - - - -	12,29,865	6,57,650	5,72,215	- -	This Excess may be accounted for thus :
TOTAL, TITLE I. - - - *Rs.*	1,92,35,485	1,90,23,005	9,87,215	7,74,735	

	Rs.
Gratuities to Native Cavalry on discharge transferred from the head Native Cavalry - - - - - - -	1,09,556
Excess over Estimate for dearness of Provisions - -	1,06,123
Excess over Estimate in Bounty and Kit Money - -	27,222
Compensation for loss of Assamees Arms, not estimated for	55,450
Excess over Estimate in Passage Money - - -	60,110
Excess over Estimate in good-conduct Pay - - -	25,000
These Items Aggregate - - -	3,83,461

The residue consists of a variety of other Items. It is due to the Military Account Officers at Bombay to state that the late Military Finance Department reduced the Estimate for Contingencies from 8,61,650 rupees to 6,57,650 rupees, or by 2,04,000 rupees.

EXPLANATORY STATEMENT of Sums Expended, "more or less," under each Subdivision of the Budget Estimate of the Bombay Presidency for 1862-63—*continued.*

HEADS OF SERVICE.	Expenditure, 1862-63.	Estimate, 1862-63.	EXPENDITURE. More than Estimate.	EXPENDITURE. Less than Estimate.	CAUSES OF VARIATION.
TITLE II.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
Commissariat Department - -	35,50,445	32,69,005	2,81,440	- -	The Expenditure of this Department has exceeded the Estimate, because Bombay, as regards local Supplies, was in a transition state. The original Estimate submitted by the Controller was for 41,54,554 rupees, and was reduced by the Military Finance Department to 32,69,005 rupees. The reduction was warranted by then existing Rates, and the result shows that the original Estimate was excessive. Besides, Medical Supplies, which were separately estimated for, were made by the Commissariat Department; and on reference to the head Medical Department, it will be observed that there is a Saving of 93,339 rupees, so that the real Excess over the Estimate, as revised by the late Military Finance Department, is only 1,88,101 rupees.
Ordnance Department - - - - - -	7,82,063	5,71,297	2,10,766	- -	The Excess is entirely attributable to the value of Ordnance Stores sent out from England, exceeding that indented for, for the Service of the year. The estimated value of the Indent was 3,00,000 rupees; the actual value of the Stores sent out was 5,78,806 rupees.
Clothing Department - - - - - -	5,09,208	4,81,049	28,159	- -	The Excess is attributable to compensation granted to Native Troops in consequence of the change of date of issue of Clothing. The Clothing was due on 1st January, and the Government resolved to make it issuable in future on 1st April.
Remount Department - - - - - -	1,482	-	1,482	- -	This is the expense of the Kattywar Depôt, and was not provided for in the Estimate of 1862-63.
Medical Department - - - - - -	29,704	1,23,043	- -	93,339	*Vide* Remark on Commissariat Department.
Barrack Department - - - - - -	1,34,638	39,490	95,148	- -	The Expenditure for Conservancy was under-estimated.
Stationery Department - - - - -	1,27,884	1,48,600	- -	20,716	These Supplies will always vary.
Miscellaneous - - - - - - -	1,49,962	- -	1,49,962	- -	These are Account Current Charges, such as refunds of Discharge Purchase Money, refunds of Retrenchments, refunds of Recoveries on account of Stores sold, but returned. These incidental Charges were not estimated for.
TOTAL, TITLE II. - - - *Rs.*	52,85,386	46,32,484	7,66,957	1,14,055	
GRAND TOTAL, TITLES I. & II. - - - *Rs.*	2,45,20,871	2,36,55,489	17,54,172	8,88,790	

REPORT of the Military Finance Department on the Military Budget Estimates of all India, for the Year 1863-64, and the Orders of the Government of India passed thereon.

(No. 2947 B.)

From the Officiating Chief of the Military Finance Department to the Secretary to the Government of India, Military Department.

Sir, Calcutta, 30th April 1863.

With reference to endorsement from the Financial Department, No. 167 A, dated 26th August 1862, instructing this Department to send, in future, the detailed Estimate of Military Expenditure through the Military Department, I have the honour to submit herewith four copies of the Budget Estimates of the Bengal, Madras, and Bombay Presidencies for the year 1863-64, as revised by this Department, exhibiting the probable expenditure of that year for all India at 12,62,96,656 rupees, as shown respectively for each Presidency in the margin, exclusive of Civil charges defrayed by the Military Department, amounting to 1,72,602 rupees.

	Rs.
Bengal -	7,30,17,185
Madras -	2,96,39,330
Bombay	2,36,40,141
Total	12,62,96,656

2. The Budget Estimates, however, as originally submitted to the Controllers of Military Finance by the several Heads of Departments, aggregated 13,18,45,650 rupees, as shown below:—

	Rs.
Bengal - - - - - -	7,48,82,728
Madras - - - - - -	3,22,13,538
Bombay - - - - - -	2,47,49,384
TOTAL - - *Rs.*	13,18,45,650

This sum was reduced by 16,24,454 rupees* as the effect of the revision made by the Controllers, leaving the aggregate of the Estimates forwarded to this Department, with the approval of the Controllers, at 13,02,21,196 rupees. The latter amount has again been reduced by 39,24,540† rupees under the review of this Department, leaving the revised Budget Estimate for all India at 12,62,96,656 rupees, as above stated.

*	*Rs.*
By Bengal Controller - -	4,37,217
„ Madras „ - -	11,87,237
„ Bombay *nothing shown.*	—
Total - - -	16,24,454

†	*Rs.*
Bengal Estimate - - -	14,28,326
Madras „ - - -	13,86,971
Bombay „ - - -	11,09,243
Total - - -	39,24,540

3. But the amount of the Receipts that will arise out of the application of the Estimated Grants, that is from the sale of Malt Liquor, Rum or Arrack, Miscellaneous Military Stores and Hospital Stoppages, are estimated at 82,20,725 rupees, thus reducing the net Military charges to 11,80,75,931, inclusive of the value of stores to be received from England.

4. The revised Budget Estimate of the Expenditure of 1863-64 for all India, exceeds the Regular Estimate of 1862-63 by 24,03,166 rupees,‡ after eliminating from the latter those items which are refunds of retrenchments that had been credited as Receipts, or in other words, such items as have appeared both as Receipts and Expenditure in the Regular Estimate itself, and which have been ascertained to amount to 3,51,111 rupees.

‡	*Rs.*
Budget Estimate, 1863-64	12,62,96,656
Regular „ 1862-63	12,38,93,490
	24,03,166

5. The causes of this excess are briefly, 1st, the necessity for providing for the relief of one European Cavalry and five European Infantry Regiments, which has increased the cost of passage money from 12 lakhs of rupees in 1862-63 to 23 lakhs of rupees in 1863-64, of which about 9 lakhs are exclusively on account of the Relief in question; 2nd, the order issued in November last, to recruit the Regiments of Native Infantry in Bengal to the full established strength, which has entailed an additional charge of 8¼ lakhs of rupees: 3rd, the necessity of renewing, to a great extent, the Camp Equipage for the use of the Bengal Army, and furnishing the Native Troops with brown leather accoutrements, involving an additional expenditure in the Ordnance Department of 4 lakhs of rupees, as compared with

the expenditure of the previous year; 4th, the purchase of a larger quantity of Rum under orders of Government with a view to ensure a sufficient stock of seasoned spirits, thereby causing additional expenditure to the extent of $3\frac{3}{4}$ lakhs of rupees; 5th, the large demand for European Stores consequent on the decision to equip the Native Bengal Army with the new description of Musket, and also to replenish the Reserve Stock which had been heavily drawn upon during the last few years. This demand in itself swells the expenditure of 1863-64 by 11 lakhs of rupees in excess of that of 1862-63. 6th, the transfer of 79,816 rupees from the Civil to the Military Budget, on account of the Laurence Asylum: 7th, the addition to the Military Budget of 1,40,000 rupees, on account of the Punjab Frontier Police; and lastly, the larger proportion of the arrears at the beginning than at the close of the year 1863-64, viz., 7,50,000 rupees These, the main causes of the excess, as well as all other points in which the present Estimate differs from that of the preceding year, will be found fully explained in the Notes on the face of the Estimate.

5. The items above enumerated aggregate $47\frac{3}{4}$ lakhs of rupees, viz.:—

Passage Money	11 lakhs.
Recruiting Native Infantry	$8\frac{1}{4}$ „
Renewing Camp Equipage, &c.	4 „
Purchase of extra Rum	$3\frac{3}{4}$ „
New Arms for Native Infantry and Reserve of European Stores	11 „
Laurence Asylum	$\frac{3}{4}$ „
Frontier Police Force	$1\frac{1}{2}$ „
Larger arrears of 1862–63	$7\frac{1}{2}$ „
TOTAL	$47\frac{3}{4}$ lakhs.

Were it not for these exceptional causes, the general course of the Military expenditure would be found on a scale of greater economy than in the two preceding years.

6. There have been some changes made, in the present Estimates, in the classification of the headings, but to obviate any difficulty in readily coming to a conclusion as to the comparative results in the principal Departments in respect to the expenditure of the years 1862–63 and 1863–64, the alterations have been duly explained in foot notes attached to the Estimates. These changes have, however, been either necessitated by departmental re-organization, or have been introduced with a view to afford a more detailed and convenient division of the several minor heads of charge.

7. There are some features in the Estimates which require to be brought more prominently under the notice of Government. These I shall pass under review as briefly as possible.

8. *Commissariat Department.*—The relative cost of the Commissariat Departments at the three Presidencies, charges personnel and materiel inclusive, will be seen from the subjoined statement:—

ESTIMATES.	Bengal.	Madras.	Bombay.	All India.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Regular Estimate for 1862–63:				
Title I.	18,44,767	6,74,559	8,11,452	33,30,778
„ II.	1,21,84,573	44,77,855	35,69,962	2,02,32,390
TOTAL *Rs.*	1,40,29,340	51,52,414	43,81,414	2,35,63,168
Budget Estimate of 1863–64:				
Title I.	19,86,698	6,04,213	5,22,581	32,03,492
„ II.	1,35,65,299	45,64,413	38,11,614	2,19,41,326
TOTAL *Rs.*	1,55,51,997	52,58,626	43,34,195	2,51,44,818
Difference between Regular Estimate of 1862–63 and Budget Estimate of 1863–64 *Rs.*	+ 15,22,657	+ 1,06,212	— 47,219	+ 15,81,650

From the above an increase in Commissariat charges of 15,81,650 rupees is apparent. This is simply the effect of adequately recruiting reserve stock, which having vastly accumulated in the years prior to 1861–62, has been so freely used during the last two years (to the reduction of cash expenditure) as to necessitate a maximum replenishment of the same.

9. The excess is chiefly in the Bengal Presidency, and in the following items of charge:

	Rs.
Victualling Europeans	1 lakh.
Reserve Stock	6 lakhs.
Supplies to Medical Department	2 „
Supplies to Ordnance „	5½ „
Bedding	½ lakh.
TOTAL	15 lakhs of rupees.

The Commissariat expenditure of the Madras Presidency exhibits an increase of 1,06,212 rupees, and that of Bombay a decrease of 47,219 rupees, as compared with the Estimate of 1862–63.

10. The difference between the European forces to be provided for at Madras and Bombay is only 620, Madras having that number in excess of Bombay. The proportion is 1-22nd of the whole. The provision made for Commissariat expenditure is for Madras 45,64,413 rupees, and for Bombay 38,11,614 rupees, a difference of 7,52,799 rupees, or about one-sixth in excess. This difference may at first sight appear very disproportionate, but it is easily accounted for, as follows:

a. Victualling European Troops.—The Madras Estimate is 60,000 rupees in excess of that of Bombay, which is a fair representation of the cost of rationing 600 men per annum.

b. Victualling Native Troops.—While at Bombay, only the Native troops at Aden, 1,600 in number, are rationed at the expense of Government; the Madras Commissariat has to ration 4,900 men in the Straits, Pegu, &c. The difference of cost between Madras and Bombay on this account is 1,70,000 rupees.

c. Malt Liquor.—At the Bombay Presidency an instalment of the malt liquor, amounting to 5,000 hogsheads, has already arrived and been paid for; whereas in the case of Madras payment for the full supply of the year had to be estimated for. In this item alone the Madras Estimate is two lakhs of rupees above that of Bombay.

d. Horses.—The horses to be maintained at Bombay are 2,920, but at Madras 4,851, as the Madras Native Cavalry being on the regular system, Government have to provide and feed the horses of the same. Madras has been allowed one lakh more on this account.

e. Barrack Supplies.—In the Madras Presidency the Commissariat Department provides the barrack supplies, but in Bombay these are obtained directly by the Barrack Department itself, and do not appear in the Commissariat Estimate. The Madras Commissariat Estimate is therefore 1,72,000 rupees in excess of that of Bombay on this account.

f. Ordnance Department.—The local supplies for the Ordnance Department are, at the Bombay Presidency, obtained mainly by local purchase, but in Madras are provided by the Commissariat Department. The Madras Commissariat Estimate has therefore to bear an additional charge of upwards of two lakhs of rupees on this account, as compared with the Bombay Commissariat Estimate.

11. The above items aggregate nine lakhs of rupees; but the excess of the Madras Commissariat expenditure over that of Bombay being only 7½ lakhs, the inference is plain that the amount allowed in the Budget Estimate for Bombay Commissariat charges is liberal.

12. From the Estimates of Commissariat Charges, as submitted by the Controllers of the three Presidencies, the Military Finance Department has, in the course of its review, deducted the sum of 24,83,090 rupees, as shown in the margin. That the Estimates, as submitted, were susceptible of reduction

	Rs.
Bengal	14,77,967
Madras	3,85,319
Bombay	6,19,804
Total	24,83,090

to the above extent must necessarily imply much laxity in their preparation; but this defect would have been most conspicuous in the Madras Commissariat Estimate had it not been for the pains-taking preliminary review made of the same by the Controller of Military Finance, Madras.

13. The Estimate of the Madras Commissariat Charges for material supplies (Title II.), as forwarded to the Controller by the Commissary General, amounted to 61,36,969 rupees; but, on being examined by Colonel McGoun, was reduced to 49,49,732 rupees, being a reduction of 11,87,237 rupees as the result of that officer's review. But the amount at which he left it, viz., 49,49,732 rupees, has been further reduced by this Department to 45,64,413 rupees, for the reasons set forth in the Estimate itself.

14. For the last three years this Department has never ceased to urge on the responsible officers of the Commissariat Department at Madras the necessity for collecting accurate data for the preparation of Estimates. The mode in which such data could be collected has been indicated, and every facility afforded, by drawing up forms and giving instructions in detail, but, I regret to add, without any successful result, save in a few instances. The Commissary General at Madras has apparently contented himself with merely reiterating or re-issuing the instructions of this Department, without vigorously enforcing observance of the same on the part of his executive officers; and without heeding them himself when his share of duty had to be performed, viz., the collation and revision of the Estimates sent in by his executive officers. I feel constrained to record this opinion, as the Madras Commissariat Estimate, before revision by the Controller and by this Department, was a glaring illustration of how futile the best endeavours to ensure satisfactory results may be rendered when the officers immediately concerned in the preparation of the work cannot be brought, by a sense of duty, to zealously second and carry them out. That I am upheld in this opinion by the Controller of Military Finance, Madras, will be manifest from the following extracts from two official letters, and to which I beg to invite the attention of Government:

"You will thus be able to judge of the validity of my objections, and at the same time be able to form some idea of the difficulties which this department has experienced in examining Estimates so loosely and so carelessly prepared, involving as it has done much time and much labour, and causing other equally important duties to be set aside for a time. There is an evident tendency, on the part of executive commissariat officers to over-estimate and no apparent inclination in the Department to check the tendency." (Letter, No. 362, dated 24th January 1863.)

Title II., chap. III., sec. I.

"Under Title II. the most important chapter is that which provides for the Commissariat Expenditure. The Budget for 1863–64 is open to the same objections which were taken to the Budgets of 1861–62 and 1862–63; that the present one has not been prepared with the care and attention which the Budget system so imperatively requires, is sufficiently shown in the numerous errors pointed out in the Memorandum from this Department which accompanied the Budget Estimate; errors involving overcharges and over-estimates to the amount of 11,87,237 rupees, or about one-fifth of the estimated expenditure for the Department. In some ranges, viz., Nagpore, Wellington, Bangalore, and Bellary, the Estimates were carefully and correctly prepared, clearly showing that the defect was not in the forms, but in the general want of care and attention bestowed on them.

"I shall communicate fully with the Commissary General on the subject of his Estimate, and call for explanation from himself, and require it from his executive officers, on all points on which explanation may seem to be required.

"Incorrect Estimates involve labour and time, to the detriment of other no less important duties." (Letter A, dated 5th February 1863.)

15. There is one other point connected with the Commissariat Expenditure of

of the Madras Presidency which calls for the consideration of Government. It is the practice of storing grain at Cannanore, in addition to making money provision for compensation for dearness of provisions. On a previous occasion, the inutility of resorting to this measure was laid before the Madras Government by the Controller of Military Finance, but his views were overruled. Colonel McGoun now writes, "Under the head 'Victualling Natives,' is included 1,13,364 rupees for storing grain at Cannanore, for issue to the native troops; attention is again solicited to this provision, and to the remarks in the Memorandum accompanying on the subject. Compensation being admissible for the dearness of grain, it is again submitted for consideration that the practice of storing grain, in addition, for issue to the troops, might be discontinued without any individual injury. The recently held committees for verifying stock report that the grain in store at Cannanore is much injured from insects, and must necessarily lead to considerable loss to the State."

16. Under this representation the amount has been excluded from the Madras Commissariat Estimate. (*Vide* that document, page 23, note j.)

17. It will also be perceived that the Bengal and Bombay Commissariat Estimates have likewise been susceptible of very large reductions, and which have followed on the review of this Department.

18. *Stud Department.*—By the existing practice, the Superintendent of Studs appears to decide upon his own arrangements for the purchase of cattle during the year, and then to estimate the financial effect of those arrangements. It occurs to me that this is a latitude which should not be permitted to any head of department. The Superintendent of Studs should, I venture to suggest, submit to Government a general sketch of his intended operations for each year, assigning reasons in detail for his requirements in stallions, colts, mares, camels, bullocks, &c., with a statement of his existing resources; and when Government have considered and sanctioned the scope of his operations, he should then estimate their financial effect for the review of this Department. As the case at present stands, the responsibility of sanctioning the Stud Department operations is thrown upon the Military Finance Department. I would recommend this point to the consideration of Government.

18. *Pensions.* — The estimated amount to be disbursed in pensions is 68,92,985 rupees, as shown in the margin. The actuals of 1861-62 amounted to 63,16,307, showing a difference of 5,76,678 rupees in excess for 1863-64.

	Rs.
Bengal -	21,40,291
Hyderabad	1,77,968
Madras -	28,77,336
Bombay -	16,97,390
Total -	68,92,985

This increase is, to a great extent, nothing but the ordinary result of the extensive disbandment of troops which has recently taken place: but it is necessary to record that there are at present no reliable data available, except what is afforded by the actuals of 1861-62, for the preparation of a correct estimate of the amount required for pensions. In the Bengal Presidency, the pensions are paid half-yearly in arrears, and six months are allowed to the pension paymasters to make these disbursements, and three months in addition, to compile each half-year's accounts; so that the accounts of the pensions that fall due on the 1st May of each year do not reach the Audit Office until the month of January of the following year, and the accounts of those payable in November seldom reach before July, the following year. The effect of this is, that payments are being made from May to April of each year; but at the close of the year it is difficult to ascertain what amount has been disbursed within the year. In order to remedy this evil as far as possible, the pension paymasters have been required to send in monthly accounts of the *bonâ fide* payments made in each month; but this is only a partial remedy. The better plan, I consider, would be to make the pensions payable monthly. In Bombay the payments are made quarterly, but, in the Madras Presidency, monthly. I do not think that any insuperable difficulties would be encountered in making pensions payable monthly throughout India.

19. *Medical Department.*—The Estimate of the Madras Medical Department is very unsatisfactory, but this Department has been guided by general averages in fixing the amount. The principal Inspector General altogether failed to supply a satisfactory estimate, or to afford satisfactory data for the preparation of an estimate of medical charges. The Controller of Military Finance, Madras, has already laid the correspondence on the subject before that Government,

and I notice it here as one of the causes which have increased the labour of the Department in compiling the Estimates.

20. *Contingencies.*—Under the head "Contingencies," in the Bengal Estimate, is included a sum of 1,40,000 rupees for the pay of a portion of the frontier police force, on the authority of the Secretary to the Government of the Punjab Military Department, whose intimation on the subject was to the following effect:

"Owing to re-organization of the police force on the frontier, a portion of the force engaged on frontier duty, hitherto charged as Military Police, will have to be paid in the Military Department, consequently provision in the Military Budget of the ensuing official year, to the extent of 1,40,000 rupees for the pay of this force should be made. The formal sanction for this outlay in the Military Department has not yet been obtained, but will shortly be applied for." It is only necessary for me to observe that the officers of Military Finance have no means of checking or controlling this expenditure.

21. Prefixed to the Estimates will be found statements of the established and effective strength of the several arms of the service, both European and Native.

22. In the proceedings of the Government of India, Financial Department, No. 4648, dated 9th July 1862, the Military Finance Department were required to submit "a Schedule of all sanctioned fixed appointments and establishments in the Military and Civil branches of the Military Department in the three Presidencies, showing the monthly and annual cost in substitution of the books or registers formerly submitted by the Military Auditor General." This Schedule for 1863-64 is now under preparation, and will follow the Estimates without delay.

23. A consolidated Estimate of all three Presidencies is now in the press and will be shortly forwarded. Appendices also, in full detail for the guidance of departmental supervising and executive officers, as well as for the Examiners of the Military Finance Department, will be distributed to those concerned, and copies sent for the information of Government.

I have, &c.
(signed) *Arthur Broome*, Colonel,
Officiating Chief of the Military Finance Department.

(No. 71.)

MEMORANDUM from the Officiating Chief of the Military Finance Department to the Secretary to the Government of India, Financial Department, No. 2875 *b*, dated Calcutta, 17th April 1863.

THE Officiating Chief of the Military Finance Department has the honour to forward to the Secretary to the Government of India, in the Financial Department, the accompanying statement, showing the civil charges which have been provided for under separate chapters in the Military Estimate of 1863–64, so as admit of their ready transfer to the Civil Estimate.

CIVIL CHARGES omitted from Military Estimate, 1863–64.

Arthur Broome, Colonel,
Officiating Chief of the Military Finance Department.

(No. 71 *a*.)

FROM the Officiating Chief of he Military Finance Department to the Secretary to the Government of India, Financial Department, No. 2948 *b*, dated Calcutta, 29th April 1863.

IN continuation of this Department's letter, No. 2672 *b*, dated 20th March 1863, I have the honour to observe that, when submitting the regular Estimates of 1862–63, the Department was so busily engaged in the preparation of the Budget Estimates of 1863–64, that I reserved for subsequent report the points upon which I was called upon for information in letter from the Financial Department, No. 968 *a*, dated 25th November 1862.

2. In that communication I was required to state—

1st. Whether the grant made on the Budget Estimate of 1862–63 for passage money was adequate to meet the entire charge on that head, including the portion payable in India for the 3,000 Artillery recruits, and other drafts arriving from England during that year.

2nd. How far the retrenchments made by the Military Finance Department from the Budget Estimates of the three Controllers of Military Finance, have been confirmed by the actual progress of expenditure.

	Rs.
Bengal	7,00,000
Madras	3,00,000
Bombay	2,00,000
Total	12,00,000

3. In reply, I have the honour to state that there is every reason to believe that the amount allowed for passage money during 1862–63, viz., 12 lakhs of rupees, for the three Presidencies, in the proportions noted in the margin, will prove ample; for, in the Bengal Presidency alone, on the 1st March 1863, there was a balance of 1,75,000 rupees unexpended on the portion allotted to it.

4. As regards the second point, the details of the regular Estimates themselves afford assurance that the retrenchments made by this Department are fully upheld by the actual course of expenditure, as ascertained from the results of the first six months of 1862–63.

I may, however, further explain, as follows:

	Rs.
The original Budget Grant, sanctioned for the military expenditure of all India, amounted to, as per detailed Estimates of this Department, submitted with Report, No. 8335 *a*, dated 22nd April 1862 - - - - - - - - - -	12,22,79,186
Supplemental Grant, sanctioned by Government in letter to this Department from Financial Department, No. 968 *a*, dated 25th November 1862 - - - - - - - - -	17,17,023
Additional Grant for expenditure of Topographical Survey; Financial Resolution, No. 947 *a*, dated 25th November 1862 -	762
Additional Grant for expenditure of Topographical Survey; Financial Resolution, No. 221 *a*, dated 30th January 1863 -	800
Additional Grant for Pegu Survey; Financial Resolution, No. 1027 *a*, dated 31st December 1862 - - - - -	3,600
Additional Grant for Trigonometrical Survey; Financial Resolution, No. 239 *g*, dated 22nd August 1862 - - - - -	2,420
Additional Grant for purchase of horses for the Deolie and Erinpoorah cavalry; Financial Resolution, No. 939 *a*, dated 25th November 1862 - - - - - - - - -	6,000
Additional value of a prize elephant; Financial Resolution, No. 1179 *a*, dated 29th December 1862 - - - - -	1,250
Additional, insolvent bands and messes; Financial Resolution, No. 1043, dated 20th March 1863 - - - - - -	82,634
Additional, purchase of rice lanes in Dum-Dum; Financial Resolution, No. 1134, dated 24th March 1863 - - - -	12,000
Additional contract allowance for repair of arms, Madras Presidency; Financial Resolution, No. 499, dated 25th November 1862 - - - - - - - - - - -	30,000
Additional for servants in military cemeteries; Financial Resolution, No. 2 *a*, of August 1862, and No. 1048 *a*, dated 5th December 1862 - - - - - - - - - - -	347
TOTAL - - *Rs.*	12,41,35,922

REGULAR ESTIMATE:		
Charges, military - - - - - -	*Rs.* 12,30,32,237	
Adjusted charges - - - - - -	12,12,364	
	12,42,44,601	
Deduct—		
Miscellaneous charges, which are refunds of retrenchments, credited as receipts; in other words, charges which appear on both sides - - - - - -	3,51,111	
		12,38,93,490
	Rs.	2,42,432

5. So that virtually the Regular Estimate of 1862–63, based upon the actual transactions of the first six months of that year, indicates a rate of expenditure for the year of nearly 2½ lakhs below what the Government were prepared for.

6. I beg now to inquire whether the Regular Estimates of each Presidency for 1862–63 should be adopted as the basis of the Appropriation Audit, or whether the original Budget Grant, augmented by the several Supplementary Grants, shall continue to be retained as such basis.

7. The Budget Estimates of 1863–64 being completed, have this day been submitted to the Secretary to the Government of India, in the Military Department, as was intimated would be done in my letter to your address (No. 2925 *b*), dated 27th instant; but two printed copies are herewith forwarded, for the purpose of immediately meeting any of the requirements of your Department.

8. In the Proceedings of the Government of India, Financial Department (No. 4648), dated 9th July 1862, the Military Finance Department were required to submit "a Schedule of all sanctioned fixed appointments and establishments in the Military and Civil Branches of the Military Department in the three Presidencies, showing the monthly and annual cost, in substitution of the Books or Registers formerly submitted by the Military Auditors General." This Schedule for 1863-64 is now under preparation, and will follow the Estimates without delay.

9. Further, in your Department's letter to my address (No. 968 *a*), dated 25th November 1862, para. 4, I was required to submit a Cash Requirement Estimate, which should exhibit the amount payable in India, not only for the expenditure proper of India, but also all payments made in India for the British Government, such as on account of the force in China, pensions, and other items.

10. The regular Estimate of 1862-63 was to all intents and purposes an Estimate of the Cash Requirements in India, with the single exception that it comprised the value of stores to be received from England, and which can easily be eliminated therefrom. That Estimate was based for the most part on eight months' transactions, and, as suggested in my letter (No 2925 *b*), dated 27th instant, might be accepted as a fair index of the cash transactions of 1863–64, under the heads "Debt" and "Remittances"; but, if a fresh Cash Requirement Estimate of 1863–64, based upon 10 months' actual transactions of 1862–63, be absolutely necessary, it will be prepared in a simple form, for the year itself. An early expression of your wishes on this point is desirable.

11. In conclusion, I beg to add that I purpose to submit to the Military Department a brief report on some of the more prominent features of the Budget Estimates of 1863–64, and printed copies of the same will be forwarded to you for information.

(No. 71 *b*.)

MEMORANDUM from Officiating Chief of the Military Finance Department to the Secretary to the Government of India, Financial Department (No. 58 *c*), dated Calcutta, 13 May 1863.

THE Officiating Chief of the Military Finance Department has the honour to forward to the Secretary to the Government of India, Financial Department, the accompanying two complete copies of the Budget Estimate for 1863–64, and to request that the two printed copies of the Budget Estimate forwarded with this Department's Report, number and date as per margin,* may be returned, as they were not quite complete.

* No. 2948 *b*, dated 29th April 1863.

(No. 72.)

No. 3059.—FINANCIAL DEPARTMENT, FORT WILLIAM, THE 23RD JUNE 1863.

Read the following Papers regarding the Budget Estimate of the Military Department for 1863-64 :—From Officiating Chief of the Military Finance Department, No. 58*c*, dated 13th May 1863, with Enclosure. From ditto, No. 2875 *b*, dated 17th April 1863.

RESOLUTION.

THE Honourable the President in Council has had under consideration, in the Financial Department, the Report of the Officiating Chief of the Military Finance Department, dated 30th April 1863, upon the Budget Estimate of Military Expenditure for the financial year 1863–64. This Report was addressed to the Military Secretary, and a copy of it was communicated to the Financial Department by Colonel Broome's Office Memorandum, No. 58*c*, dated 13th May.

2. The Estimates from the Military Controllers of the three Presidencies have been compiled and revised in the Military Finance Department, in a manner which reflects credit on Colonel Broome and those who have assisted him in the work.

3. In the sixth paragraph of his Report, Colonel Broome refers to changes which have been made in the classification of the headings of the Estimate. As the Annual Estimate is the basis of the system of military account, changes should not be made in the form of the Estimate without obvious necessity, and never without the previous sanction of the Financial Department. Such changes are incompatible with the essential object of readily comparing the expenditure under each head from year to year.

4. The large deductions made by the Military Finance Department from the Estimates of Commissariat Charges, as submitted by the Military Controllers, show that the officers in charge of the Commissariat have not given that attention to making close Estimates of their annual expenditure which was to be expected from them, and it is hoped that there will be a marked improvement in the preparation of the Estimates of this Department for 1864-65.

5. On the part of the Commissary General at Madras, the neglect of this important duty is reported in terms which render further notice indispensable. The Government of Madras should be furnished through the Military Department with a copy of paragraphs 12, 13, and 14 of Colonel Broome's Report, and should be requested to favour the President in Council with their opinion upon the conduct of the Commissary General, after calling upon that officer for any explanation he may have to offer.

6. The course of proceeding commended in the 18th paragraph, in reference to the Stud Department, is obviously proper, *i. e.*, that the Superintendent of Studs should submit to Government a general sketch of his intended operations for each year, assigning reasons, in detail, for his requirements, with a statement of his existing resources, and that when Government have considered and sanctioned his intended operations, he should then submit an Estimate for the review of

of the Military Finance Department. It is requested that orders may be issued accordingly in the Military Department.

7. The charge (1,40,000 rupees) for the Punjab Frontier Police has been improperly admitted into the Military Estimate, and must be considered as cancelled. The charge is a civil one, and has been separately provided for in the Budget Estimate for police.

8. The same remark applies to 1,68,691 rupees, the charge for "Cantonment Joint Magistrates," which is also a civil charge, and is provided for under the proper head of the Civil Budget Estimate.

9. With respect to the statement of civil charges submitted with Colonel Broome's office memorandum, No. 2875 *b*, dated 17th April 1863, an early return should be furnished of the designation of the offices held by the military officers whose regimental pay and staff pay, &c., are therein included, as without such information the necessary transfers to the Estimates of the several Local Governments concerned cannot be made.

10. Deducting 3,08,691 rupees for the Punjab Frontier Police and Cantonment Joint Magistrates, the honourable the President in Council is pleased to sanction a grant of 12,61,60,600 rupees, as shown in the margin, on account of military expenditure and of civil charges to be defrayed by the Military Department in 1863–64.

	Military Expenditure.	Civil Expenditure.	Total.
	Rs.	*Rs.*	*Rs.*
Bengal	7,27,18,500	1,57,600	7,28,76,100
Madras	2,96,39,300	9,700	2,96,49,000
Bombay	2,36,30,200	5,300	2,36,35,500
Total *Rs.*	12,59,88,000	1,72,600	12,61,60,600

11. The Military Receipts in 1863–64 have been assumed in this department at 82,20,000 rupees, *i. e.* :—

	Rs.
Bengal	46,43,000
Madras	18,84,000
Bombay	16,93,000
Total *Rs.*	82,20,000

If there should be reason to think that any of these figures require alteration, early and full information should be given to this department.

Ordered, that a copy of the above resolution be sent to the Military Department, with a request that communications may be made to the Government of Madras, and the Superintendent of Studs, as suggested therein, and that a copy of the resolution be sent to the Officiating Chief of the Military Finance Department for his information and guidance.

Ordered, also, that a copy of the resolution be sent to the Officiating Auditor General of India for information.

REPORT of the Military Finance Department on the REGULAR MILITARY ESTIMATE of 1863-64.

(No. 1704 c.)

From the Officiating Chief of the Military Finance Department, to the Secretary to the Government of India, Financial Department.

Calcutta, 20 February 1864.

Sir,

AGREEABLY to the intimation conveyed in my letter, No. 1612, of the 4th February 1864, I beg now to review, as briefly as possible, the results of the Regular Estimate of 1863-64, for the Military Department, throughout India.

RECEIPTS.

2. *Revenue and Receipts.*—In the Budget Estimate, these were calculated at 91,79,400 rupees, but in the Regular Estimate at 77,01,400 rupees, being a difference of 14,78,000 rupees. Of this difference, 2,09,600 rupees is due to the reduction of the Income Tax from 4 to 3 per cent., 9,15,700 rupees to the abolition* of cash payments between departments, and the residue to the deduction of Recovered Retrenchments from charges, agreeably to Auditor General's letter, No. 446, dated 30th July 1863.

* Financial Resolution, No. 3837 of 18th August 1863.

3. *Debt.*—It will be observed that there is a large decrease, amounting to 2,23,04,900 rupees, in the Regular as compared with the Cash Requirement Estimate under the minor heads Deposits and Advances. In the Disbursement side, likewise, there is a decrease of 1,16,15,964 rupees, as shown below :—

	Cash Requirement Estimate.	Regular Estimate.	Difference.
	Rs.	*Rs.*	*Rs.*
Receipts	2,66,16,200	43,11,300	2,23,04,900
Disbursements	1,45,15,264	28,90,300	1,16,15,964
Difference - - - *Rs.*	1,21,00,936	14,12,000	1,06,88,936

so that the decreases on both sides are nearly proportionate, owing to the exclusion of mere book entries or paper transactions. The practice followed in reference to the Deposit and Advance account differs at the three Presidencies, and there is much room for amendment; but I purpose submitting a separate memorandum on the subject for the orders of the Financial Department, as any detailed explanation here would unnecessarily lengthen this report.

4. The other items on the receipt side, viz., Prize Funds, Local Remittances, and Remittances from other Governments, call for no further remarks than those contained in the explanatory notes attached to the estimates.

	Rs.
Bengal -	11,323
Madras -	29,034
Bombay	5,15,270
Rs.	5,55,627

5. The total estimated receipts amount to 14,47,36,300 rupees, and the cash in the hands of the military disbursing officers on the 1st May 1863, was 5,55,627 rupees as specified in the margin, making a total sum of 14,52,91,927 rupees to be accounted for.

MILITARY CHARGES.—PERSONNEL.

6. *Effective Army.*—There is a reduction of 9,92,115 rupees in the Regular as compared with the Budget Estimate under this head, of which, 7,03,567 rupees appertain to Bengal, being principally in the European and Native Infantry,

Infantry, and in Unposted, Unattached, and Unemployed Officers; 24,276 rupees, made up of small sums, appertain to Madras, and 2,64,272 rupees to Bombay, being, as in Bengal, in the items of Native Infantry and Unposted Officers.

7. *General Army Staff.*—The Regular Estimate exhibits an increase of 1,75,430 rupees in the staff of the three Presidencies, owing to the operation of General Order of Governor General, No. 156 A. of 13th October 1863, promulgating the new scale of staff salaries.

8. *Barrack Department.*—There is a decrease of 3,36,194 rupees in this department, the bulk of which, amounting to 301,272 rupees, affects the Bengal Estimate. The charges for Punkah-pulling and Tattie-watering were greatly over-estimated, as also the cost of the regular establishments. The Budget Estimate, however, was warranted by the actuals of 1861-62, as is the Regular Estimate by those of 1862-63, and the first six months of 1863–64.

9. *Medical Department.*—In the Indian Medical Establishment, the Regular Estimate indicates a net increase of 3,28,169 rupees, all of which belongs to the Madras Presidency, and is attributable to the unsatisfactory Estimate received from Madras, and referred to in this Department's Report, No. 2947 B., of 30th April 1863. In the British Medical Department there is a net decrease of 56,075 rupees.

10. *Ordnance Department.*—Net decrease, 63,353 rupees, owing to fluctuation in rank of officers and casualties among supernumerary warrant and non-commissioned officers.

11. *Pensions.*—Under this head, there is a decrease of 6,59,485 rupees, the amount in the Regular Estimate being 62,33,500 rupees as compared with 68,92,985 rupees in the Budget Estimate. Of the difference, 1,35,800 rupees is a transfer to Account Current, London, on account of the pensions granted before Acts 21 & 22 Vict. c. 106, from Lord Clive's Fund. The actual of 1862-63 amounted to 60,45,095 rupees, so that the reduction made would appear fully warranted.

12. *Topographical and Trigonometrical Surveys.*—In Financial Department's letter, No. 5240, of 29th October 1863, I was requested, when submitting the Regular Estimate, to report fully on "the actual financial requirements of the survey parties for the current year." The amount sanctioned in the Budget Estimate on account of the expenditure of these surveys, was 7,84,926 rupees: and subsequently sanction was accorded for the formation of a topographical survey party for the valley of Assam, and an extra grant of 30,707 rupees authorised to meet the extra expenditure during the current year. Also, to the establishment of a topographical party at Bombay in connection with the trigonometrical survey, at an annual cost of 55,000 rupees; to the purchase of instruments for 2,000 rupees, and training of surveyors at an annual cost of 3,600 rupees; to the formation of a second topographical party for Gwalior and Central India, at an annual cost of 9,586 rupees; and to increased pay to three officers of the Trigonometrical Survey. To meet all these additional charges, the Regular Estimate provides for an increase of only 50,976 rupees, as the actual rate of expenditure during the first six months is not in proportion to the Budget grant. But as that period is for the most part the recess season, the data are not altogether to be relied on. The Estimate of 1862-63 amounted to 7,82,088 rupees, and the actual sum disbursed was only 5,94,912 rupees, being less by 1,87,176 rupees than the Budget grant of that year.

Financial Resolution, No. 4147 of 27th August 1863.

Financial Resolution, No. 4163 of 28th August 1863.

Financial Resolution, No. 1656 of 22d April 1863.

Financial Resolution, No. 772 of 26th Sept. 1863.

13. *General Contingencies.*—The causes of the large increase of 9,80,088 rupees under this head, in the proportion of 3,91,900 rupees for Bengal, 2,73,018 rupees for Madras, and 3,15,170 rupees for Bombay, are stated in the remarks attached to the estimates; but I may here explain that in the Bengal Estimate it has been found necessary to increase the amounts allowed in the Budget Estimate on account of bounty, gratuity, and compensation to the troops, and railway charges, in addition to the extra grants made by Government, amounting to 87,900 rupees for the Nagpore Cavalry Chanda Fund, for the liquidation of debts of Insolvent Messes, compensation to the Rajah of Pachete and Ecbank, to the estate of Sir T. Metcalfe, and for subsistence allowance to Huzara Levies

and Tuniwal men. In Madras the addition is mainly on account of compensation for dearness of provisions. And, in Bombay, the augmentation was based on the progress of the actual expenditure, which, in the first six months, nearly exhausted the Budget grant.

14. On the whole Charges Personnel of the three presidencies, the regular estimate exhibits a decrease of 6,03,839 rupees, as compared with the Budget Estimate. The total of these charges amounts to 9,68,27,800 rupees; and the amount of similar charges in 1862-63 as recorded in the several military accountants' annual statements of receipts and disbursements otherwise termed actuals of 1862-63, was 9,70,37,404 rupees, showing a decrease of 2,09,604 rupees.

Military Charges.—Materiel.

15. *Barrack Department.*—In the Bombay Estimate there is a decrease under this head of 1,00,416 rupees, which is a mere transfer to the Commissariat Department, as explained in Notes 49 and 61, attached to that estimate.

16. *Clothing Department.*—The estimated expenditure in this department shows an increase of 64,526 rupees, in the proportion of 26,334 rupees for Bengal, 23,250 rupees for Madras, and 14,942 rupees for Bombay; *vide* Notes attached to the estimates.

17. *Commissariat Department.*—A net increase of 3,65,974 rupees has been necessary under this head, the actuals of the current year, as far as available, indicating that the expenditure in the presidencies of Madras and Bombay is likely to exceed the Budget grant, while in Bengal it will probably fall below the grant. The Bengal Estimate has been decreased by 36,899 rupees, and those of Madras and Bombay increased respectively by 2,14,786 rupees and 1,88,087. The increase in the Madras Presidency is mainly attributable to a revised allotment of army cattle determined on in the Quarter Master General's Department, by which it has become necessary to add 340 camels and 1,294 draught bullocks to the existing numbers, and the extra amount is for their purchase and keep. The extra provision has been limited to the probable cash requirements within the current official year; *vide* Note 59 to the estimate. A contract for American drill, formerly selling at 6 annas per yard, appears recently to have been entered into, at Madras, at the rate of *Rs.* 1. 1. 10. per yard, threatening an additional expenditure of 37,000 rupees on account of supplies to the Clothing Department. The article is procurable of good quality in this presidency at 8 annas 6 pie per yard. The Controller has been addressed on the subject. The Bombay Government have specially objected to the reductions made by this Department, in the Budget Estimate of 1863-64, under the following heads:—

Stock Charges.	Malt Liquor.
Transport Charges.	Feeding Horses.

These objections will be more particularly replied to in a separate letter to the Military Department, whence they have been referred for report to this Department; but I would beg here briefly to explain, that, with the exception of the item of malt liquor, in which this Department inadvertently estimated 2,000 butts at the rate for hogsheads, and the proportion of carriage for the same, the actuals of 1862-63 and those of the first six months of 1863-64 would appear fully to justify the reductions made. The amount allowed for Stock Charges and Victualling Europeans was together 16,40,271 rupees. The actuals of 1862-63 under these two items were 15,57,600 rupees, and those of the first six months of the current year are 7,63,631 rupees. For transport charges, 5,75,963 rupees were allowed; the actuals of 1862-63 amounted to 5,01,600 rupees, those of 1861-62 to 5,16,222 rupees, and of the first six months of the current year to 3,00,200 rupees. In the case of feeding horses, the Bombay Commissary General included the cost of forage, and this Department provided, under Title I., for the pay of grass-cutters instead; *vide* Notes 51 to 63, Bombay Estimate. The increase of 1,88,087 made in the regular estimate and above adverted to, is partly a transfer from Barrack Department (*vide* para. 15 of this Report) and partly the requisite addition to the amount required for malt liquor.

18. *Ordnance*

18. *Ordnance Department.*—There is a net decrease of 50,075 rupees in this Department, fully explained in the notes to the Estimates.

19. *Stud Department.*—The estimate has been reduced by 1,54,656 rupees, of which 1,25,552 rupees are from the Bengal Estimate, in consequence of the non-purchase of the sanctioned number of stallions and mares, and 29,104 rupees from the Madras Estimate, being a reduction in the keep and road expenses of remounts, the numbers having been reduced. The Remount Agent at Madras included an additional sum of 1,05,900 rupees for the purchase of 200 horses in addition to the 500 sanctioned in the Budget Estimate, but the amount has been excluded by this Department, as such requirements should, in my opinion, be duly considered and formally sanctioned by Government before admission into either the Budget or Regular Estimate, as expenditure of this kind cannot come under the category of ordinary expenditure.

20. The total charges materiel, exclusive of the special provision made for the expenditure of the Sitana expedition, amounts to 2,52,41,200 rupees, against a sum of 2,51,12,519 rupees in the Budget Estimate, showing an increase of 1,28,681 rupees. The actuals of 1862-63, exclusive of Europe stores, amounted to 2,50,54,570 rupees, so that the Regular Estimate of 1863-64 is in excess by 1,86,630 rupees. The comparison between the totals of Titles I. and II. of the Regular Estimate of 1863-64 and the actuals of 1862-63 is as below :—

	Regular Estimate, 1863-64.	Actuals of 1862-63.	Difference.	
			Decrease.	Increase.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Title I. - - - - - -	9,68,27,800	9,70,37,404	2,09,604	—
Title II. - - - - - -	2,52,41,200	2,50,54,570	- -	1,86,630
	12,20,69,000	12,20,91,974	2,09,604	1,86,630
		Net Decrease - - -	22,974	

Civil Charges.

21. The amount exhibited in the Budget Estimate on account of Civil Charges was 2,14,285 rupees, all of which being strictly charges appertaining to the Civil Estimates, have been transferred to Remittances under the minor heads, Miscellaneous, and Monies disbursed by Paymasters on account of Civil Charges. A detailed statement of these charges was transmitted to Government with this Department's letter, No. 1218 c, dated 21st November 1863. The only Civil Charges exhibited in the Regular Estimate are the refunds of income tax, amounting to 16,200 rupees, and these have been retained merely because they are not fixed charges, and did not appear in the Military Budget Estimate. It is necessary to add, that the comparisons above made between the Budget and Regular Estimates of 1863-64 and actuals of 1862-63, are all exclusive of Civil Charges.

22. The total disbursements in the Military Department, including the Debt and Remittance Accounts, according to the Regular Estimate, will be 14,48,68,000 rupees against total receipts of 14,52,91,927 rupees, while the total military charges will probably be only 12,20,69,000 rupees, exclusive of the 30 lakhs on account of the Sitana expedition, and 16,200 rupees on account of Civil Charges.

I have, &c.
(signed) *Arthur Broome*, Colonel,
Officiating Chief of the Military Finance Department.

Calcutta,
31 March 1864.

Arthur Broome, Colonel,
Officiating Chief, Military Finance Departme

MILITARY DEPARTMENT, ACCOUNT BRANCH.

(No. 284 B.)

MEMORANDUM.

Calcutta, 6 June 1864.

WITH reference to Letter No. 2035 C, dated 31st March 1864, from the late Military Finance Department, the undersigned has the honour now to submit a few remarks on the Military Budget Estimate of 1864–65, and which, for the sake of clearness, are arranged under the sub-divisions General, Bengal, Madras, Bombay, both as respects Receipts and Expenditure.

RECEIPTS.

GENERAL.

2. Civil Receipts.—The estimates of civil receipts submitted by the controllers of military finance of the respective Presidencies amounted in all to 9,84,583 rupees; but by limiting them strictly to such, as by existing arrangements will come under the direct cognisance of the officers of military account and audit, they were reduced to 7,13,000 rupees. (*Vide* remarks under the sub-division, Madras.)

3. Military Receipts.—The estimates of military receipts submitted amounted to 67,45,051 rupees, and were reduced to 66,13,000 rupees. (*Vide* remarks under each sub-division.)

BENGAL.

4. In the controller's estimate the receipts on account of income tax were slightly under-estimated, as also the recoveries in the Commissariat, Stud, and Pay Departments; while, on the other hand, the sale proceeds of ordnance stores were over-estimated. It was found necessary, therefore, to increase the controller's estimate by the net amount of 2,54,800 rupees.

MADRAS.

5. The controller considerably over-estimated the civil receipts, and, moreover, included bazar collections to the extent of 2,13,849 rupees, which, agreeably to financial resolution No 4865, dated 17th July 1862, should find no place in the military accounts. It is suggested that instructions be issued to the authorities at Madras to relieve the Military Department of the duty of receiving and accounting for these "collections." As respects military receipts, the sale proceeds of clothing, ordnance, and commissariat stores were over-estimated, probably from being guided by the receipts of 1862-63 and those of the earlier months of 1863–64, during which periods cash payments between departments were in force. The recoveries in the Remount Department were apparently based on the same data, the fact that in 1862–63 there was a redundancy of cattle in the remount depôt being lost sight of. The estimate of miscellaneous receipts in the Pay Department was nearly 125 per cent. in excess of the actuals of 1862–63, and was manifestly an error of the military accountant. It has been necessary, therefore, in this item alone, to reduce the controller's estimate by 2,82,149 rupees. The net total reduction made from the controller's estimate of civil and military receipts is 8,45,734 rupees.

BOMBAY.

6. A net total addition of 1,87,300 rupees has been made to the controller's estimate of civil and military receipts, the sale proceeds of ordnance and commissariat stores having been under-estimated as compared with the actuals of 1862–63 and those of 1863–64 as far as available, due allowance being made for the abolition of cash payments between departments.

EXPENDITURE.

General.

7. The Budget Estimates of military expenditure, as submitted by the controllers of the respective Presidencies, amounted to 12,56,33,451 rupees, exclusive of the value of Europe stores; viz.—

	Rs.
Bengal	7,09,83,136
Madras	2,99,97,705
Bombay	2,46,52,610
TOTAL - - - *Rs.*	12,56,33,451

8. But subsequent to the date of the submission of the estimates by the controllers, Government resolved on certain measures, which, with their financial effect, are indicated below :—

	Rs.	*Rs.*
Increases:		
I. Increased pay to native commissioned officers -	3,12,592	
II. Ditto of good-conduct pay to native privates -	5,67,965	
III. Transfer of 1st police battalion to native regular army - - - - - - - - -	1,34,000	
IV. Compensation to European army for extra articles of clothing in arrears for 1862–63 and 1863–64	6,00,000	
V. Provision in the military estimates for the Derajat Frontier Militia - - - - -	1,40,000	
VI. Compensation to zeminders in Bengal for loss of elephants - - - - - - - - -	65,400	
VII. Sanitary commission - - - - - -	1,65,600	
VIII. Compensation for dearness of provisions, Madras Presidency - - - - - - - - -	50,000	
Total additional Expenditure authorised by Government - -		20,35,557
Decreases:		
I. Abolition of East Indian regiment, pay and allowances, viz., 1,05,016 rupees, minus gratuities, 18,126 rupees - - - - - =	86,890	
II. Four regiments Madras Native Infantry, pay and allowances, viz., 3,86,500 rupees, minus gratuities, 1,11,192 rupees - - - =	2,75,308	
III. Transfer of pay proper of officers employed in Civil and Public Works Departments to Civil Budget Estimate - - - - - - -	6,37,483	
Total reductions in Expenditure authorised by Government - -		9,99,681
Net additional Expenditure authorised by Government - - *Rs.*		10,35,876

9. The aggregate amount of estimated expenditure which came under the review of the late Military Finance Department was, therefore, 12,66,69,327 rupees.

10. The revised Budget Estimate of expenditure submitted by the late Military Finance Department for the approval of Government, amounts to 12,31,49,500 rupees (inclusive of 9,600 rupees for civil charges), being a reduction, as compared with the amount that came under review, of 35,19,827 rupees.

11. The allotment for each Presidency is as follows :—

	Rs.
Bengal	6,98,96,100
Madras	2,92,93,400
Bombay	2,39,60,000
TOTAL - - - *Rs.*	12,31,49,500

12. The

12. The means by which so large a reduction was effected were, briefly, a close scrutiny of the various particulars of the "actuals" of 1862–63; the current posting up, in the departmental collective ledger of the audited expenditure of 1863–64 under the several major and minor heads of the Budget Estimate; a careful examination of the arrear and current inefficient balances, as submitted monthly by the military accountants; and the use of the compilations of averages prepared by the commissariat and medical examiners.

13. The more prominent of the reductions made on the data referred to were:—

	Rs.
I. Commissariat supplies	16,22,000
II. Pensions	8,00,000
III. Passage money	3,30,000
IV. Other departmental supplies	3,92,000
Rs.	31,44,000

14. The present Budget Estimate of military expenditure, contrasted with that of 1863–64, shows, notwithstanding the augmented pay of the native army and the other measures involving additional expense above adverted to, only an increase of 5,95,742 rupees, as noted in the margin (*a*), exclusive of the value of Europe stores; but if the value of Europe stores be added to both estimates, the result is in favour of the estimate of 1864–65 by 69,814 rupees (*b*).

		Rs.
(*a*) Estimate of 1864–65		12,31,39,900
Ditto of 1863–64		12,25,44,158
	Rs.	5,95,742

	Rs.	
(*b*) Estimate of 1864–65	12,31,39,900	
Add Europe stores	27,78,303	
		12,59,18,203
Estimate of 1863–64	12,25,44,158	
Add Europe stores	34,43,859	
		12,59,88,017
Rs.		69,814

15. Army and Army Staff.—As respects pay and allowances, and the cost of the General Army Staff and Establishments, and of the Medical Department, the comparison between the two years is as below:—

	Rs.
Estimate of 1863–64	7,52,30,455
„ of 1864–65	7,47,16,500
Difference in favour of Estimate of 1864–65 — *Rs.*	5,13,955

16. Administrative Staff.—The comparative estimated cost of the administrative staff (exclusive of Medical and Judge Advocate General's Departments, already included in army staff) is—

	Rs.
In 1863–64	96,01,414
„ 1864–65	93,23,900
Difference in favour of Estimate of 1864–65 — *Rs.*	2,77,514

17. Topographical and Trigonometrical Surveys—

	Rs.
In 1863–64	8,17,736
„ 1864–65	9,48,900
Difference against Estimate of 1864–65 — *Rs.*	1,31,164

18. Donations to Asylums, Divine Service, and Contingencies—

	Rs.
In 1863–64	27,29,699
„ 1864–65	36,21,300
Difference against Estimate of 1864–65 — *Rs.*	8,91,601

19. Passage Money—

	Rs.
In 1863-64 - - - - - - - -	22,99,080
„ 1864–65 - - - - - - - -	20,04,200
Difference in favour of Estimate of 1864–65 - *Rs.*	2,94,880

20. Extraordinaries—

	Rs.
In 1863-64, camp of exercise - - - -	50,000
„ 1864–65, sanitary commission - - -	1,65,600
Difference against Estimate of 1864–65 - - *Rs.*	1,15,600

21. Pensions—

	Rs.
In 1863-64 - - - - - - - -	68,92,985
„ 1864–65 - - - - - - - -	63,10,800
Difference in favour of Estimate of 1864–65 - *Rs.*	5,82,185

22. The decrease under army and army staff is, to some extent, due to the absorption of supernumeraries, and to the more prompt settlement of claims by which payments in arrear have been reduced; but this decrease is more than counterbalanced by the increase under the head of contingencies, which is mainly the result of a more liberal scale of compensation to native troops for dearness of provisions.

23. The decrease in the cost of administrative staff is owing to the fluctuation in the army rank of incumbents, and to sundry modifications of establishments. The increase in the Survey Department and the cost of sanitary commission nearly absorb the saving.

24. The decrease in the estimated amount of pensions is to be attributed to the better data now available in reference to these transactions, in consequence of the submission of monthly instead of quarterly accounts. The amount assigned under this head for each Presidency is fully warranted by the actuals of 1862–63, as also by the actuals of 1863–64, as far as recorded in this office.

25. The item of passage money is of an incidental character, and calls for no remark.

26. The net result deducible from the foregoing details is a decrease in charges personnel of 5,30,169 rupees in the Budget Estimate of 1864–65, as compared with the Budget Estimate of 1863–64. The whole of it, however, is due to the transfer from the former estimate of 6,37,483 rupees to the Civil Budget Estimate on account of the net pay of military officers in civil employ, without which transfer the total of the charges specified would, in 1864–65, have exceeded that of 1863–64 by nearly one lakh of rupees.

27. As regards army supplies, the amount provided for this year is in excess of the previous year's estimate by 9,99,345 rupees, as shown below:—

1863-64.	*Rs.*
Supplies by Barrack, Clothing, Commissariat, Ordnance, Medical, Stud, Educational, and Stationery Departments - - - - -	2,50,49,355
1864–65.	
Ditto - - ditto - - ditto - - -	2,60,48,700
Rs.	9,99,345

In

In this amount is included the sum assigned for compensation for extra articles of clothing in arrears for 1862-63 and 1863-64, viz., six lakhs of rupees. Deducting this sum, the present estimate is only $1\frac{2}{3}$ per cent. higher than that of last year. Considering the enhanced price of all articles of local supply, this result would not have been attained were it not for the reduction, to the extent below noted, in the demand for the undermentioned articles, viz. :—

	Rs.	
Malt liquor - - - - - -	3,30,600	less than in 1863-64.
Rum - - - - - - -	48,700	ditto.
Dieting sick, Medical Department -	1,46,600	ditto.
Rs.	5,25,900	

28. To this memo. are appended three statements, marked A, B, and C, in which the military charges incurred in India and by the Home Government on account of the Indian army have been apportioned to the European and native troops, with a view to deduce the cost per man per annum of each force. The charges have been allotted in as equitable a way as experience and the available data admitted, and the results, which are submitted not as absolutely correct, but as close approximations to the facts of the case, are, that the European force, numbering 74,570 of all ranks (commissioned officers included), costs in India $896\frac{3}{4}$ rupees per man per annum, or 89 *l.* 14 *s.*; that the native force, numbering 1,30,032 (European commissioned officers included), costs in India $352\frac{1}{2}$ rupees per man per annum, or 35 *l.* 5 *s.*; that the home charges, including the value of Europe stores, are at the rate of $224\frac{11}{16}$ rupees, or 22 *l.* 10 *s.* per man per annum of the European force, and 62 rupees, or 6 *l.* 4 *s.* per man per annum of the native force. The total cost, therefore, including both Indian and home charges, is per European 112 *l.* 4 *s.*, and per native 41 *l.* 9 *s.* per annum.

29. The Military Budget Estimate for 1864-65, and Sir Charles Trevelyan's Financial Statement, dated 7th April 1864, have formed the basis for this calculation, with the exception of two items, viz. :—

	Rs.
I. Pay of unemployed officers - - -	26,91,700
II. Cost of topographical and trigonometrical surveys - - - - - -	9,48,900
Rs.	36,40,600

The first item was omitted, because the charge is specially due to the present circumstances of the Indian army, and therefore abnormal. Moreover, it is one that will gradually decrease with the lapse of time. The cost of the surveys was not included, as the expenditure is not essentially military, and as there is reason to believe it will hereafter be dealt with as a civil charge.

Bengal.

30. The estimated expenditure for supplies in the under-mentioned departments is less, as compared with the estimate of 1863-64, by the amounts indicated—

	Rs.
Barrack Department - - - - - -	1,46,155
Commissariat Department - - - - - -	6,10,813
Medical Department - - - - - - -	2,72,238
Stud Department - - - - - - -	82,122
Rs.	11,11,328

On the other hand, the supplies under the following heads, &c., show an increase as compared with the estimate of 1863–64:

	Rs.
Ordnance Department	1,70,189
Passage money	1,18,200
Contingencies	4,28,186
Rs.	7,16,575

31. The decrease in the Barrack Department is the result of better data being available as the basis for an estimate. In the Commissariat Department, the reduced demand for malt liquor and rum. In the Medical Department, the more careful scrutiny into demands and better knowledge of actual requirement; and in the Stud Department, to a more limited purchase of cattle.

32. The increase in the Ordnance Department is on account of supplies of camp equipage and accoutrements to complete, as far as practicable, the sanctioned allotment of reserve stock. In passage money, on account of the larger relief this year, viz., four regiments of European infantry; and in contingencies, on account of provision for the Derajat Frontier Militia, and increased compensation and gratuities.

Madras.

33. The departmental supplies exhibit an increase as compared with the estimate of 1863–64, viz.:

	Rs.
Barrack Department	21,235
Commissariat Department	2,90,000
Medical Department	75,000
Ordnance Department	22,700
Remount Department	83,000
Contingencies	2,73,118
Rs.	7,65,053

34. The increase in the Barrack Department is the result of enhanced prices. In the Commissariat Department, a larger supply of rum and increase in transport charges and feed of horses, owing mainly to increased prices. The like reason causes the increased expenditure in the Medical and Ordnance Departments. In the Remount Department, the necessity for purchasing horses somewhat extensively causes the increase; and under the head contingencies, the increase is attributable to the higher rate of compensation to the native troops for dearness of provisions.

35. There is, however, a decrease in passage money of 4,49,080 rupees, owing to but one regiment (17th Lancers) having to be relieved this year.

Bombay.

36. The departmental supplies in Bombay, as in Madras, exhibit an increase in reference to the previous year's estimate, as below noted:

	Rs.
Barrack Department	44,600
Commissariat Department	4,62,700
Medical Department	50,900
Ordnance Department	36,000
Passage money	1,36,000
General contingencies	3,51,200
Total Increase *Rs.*	10,81,400

37. The

37. The increase in all the departments is to be attributed mainly to the extraordinary rise in the price of all articles of local supply in the Bombay Presidency. The increase in passage-money is owing to the relief of one European regiment from the Bombay Presidency, none having been relieved last year, and that in contingencies, to the necessity for making larger provision for the grant to native troops of compensation for dearness of provisions.

38. In concluding this memorandum, the undersigned would wish to bring under the consideration of Government an arrangement connected with the present enhanced price of all local supplies, which, if not placed under definite regulations, may tend improperly to swell the military expenditure, and to vitiate the budget estimate calculations. This refers to the establishment of Government bakeries and kindred arrangements for supplies to both Military and Civil Departments, as well as to private individuals.

39. On referring to Note 24 to the Bombay Budget Estimate, page 13, it will be perceived that, under the head Stock Charges, the Bombay Commissary General provided for an expenditure of 65,200 rupees for supplies of bread to the Civil and Marine Departments, and of 66,200 rupees for similar supplies to private individuals, but that both these items, not being military charges, were struck out by the late Military Finance Department, when reviewing the Estimate.

40. Although this course has been resorted to in the Estimates, it is confidently believed that unless orders to the contrary be issued, the disbursements which the Commissariat Department is required to make on account of such supplies, will be mixed up with its general disbursements on account of military expenditure, and also that the recoveries made from private individuals for the supplies in question will be classed with receipts arising from the sale of stores, &c.

41. With respect to supplies between departments, Government have ruled in the orders quoted in the margin, that (*a*) when it involves a cash payment, the supplying department must be placed in funds by the indenting department; and again (*b*) that the Civil Department should estimate for the monies required for all local disbursements, and that when the Commissariat Department is required to procure in the market the articles for which these disbursements are to be made, that department should be provided by the indenting establishments with transfer receipts for the value of the articles.

(*a*) Financial Department, No. 3837 of 18th August 1863.
(*b*) Financial Department, No. 5048 of 9th October 1863.

42. It is submitted that the supplies under reference now being made in Bombay to the Civil and Marine Departments come within the scope of the foregoing orders, and that transfer receipts for the value of these supplies should be furnished monthly, either in advance or arrears, to the Commissariat Department, in which the amount of such receipts should be treated as a set-off to the total expenditure incurred, the net expenditure only being shown in the military disbursements.

43. The recoveries from private individuals should be treated in a somewhat similar way. The present rule, by which the Financial Department prohibit receipts being deducted from expenditure, would cause these recoveries to flow into the public treasury as revenue, and increase the military expenditure, on the other hand, to an equal extent; but it is hardly fair to calculate on this illusory revenue, or burthen military charges with such extraneous debits. The difficulty would be overcome by authorising recoveries of this nature to be appropriated in meeting the expenditure, the military charges being recorded, less such recoveries.

44. With this memorandum are forwarded 25 copies of the Consolidated Budget Estimate of the Military Department for all India for 1864–65, 15 of which should be transmitted to the Financial Department.

Colonel,
Accountant General, Military Department.

(No. 2,018, dated 15 April 1864.)

(No. 175.)

Resolution by the Government of India, Financial Department.

The grant passed under C Army for the service of 1864–65, is 12,65,31,890 rupees, including the value, as per margin, of stores and freight expected from England, as per estimate of the Right honourable the Secretary of State for India. But as the grant has been based on a rough memorandum furnished by the Officiating Chief of the Military Finance Department, the Governor General in Council requests that proper Estimates for 1864–65 be submitted without further delay; that the grant passed should be considered as conditional only pending the issue of orders on the Estimates when received in this department; and that measures be taken to prevent a repetition of the delay in the submission of the annual Budget Estimate of Military Expenditure, which has occurred every year since the introduction of the new system of accounts.

	£.
Stores	328,744
Freight	4,445
£.	333,189
or *Rs.*	33,31,890

Ordered, that a copy of the above be sent to the Military Department, for the issue of the necessary orders, and also to the Auditor General of India for information and guidance.

BUDGET GRANT FOR MILITARY EXPENDITURE FOR 1865-66.

(No. 134.)

No. 1866, dated 1st April 1865.

RESOLUTION by the Government of *India*, Financial Department.

IN the absence of any Budget Estimate of the Military Department for 1865-66, the Governor General in Council has, on information obtained privately, been pleased to assume the Military Receipts at 850,000 *l.*, or 85,00,000 rupees, and to sanction the grant under C. Army at 13,754,560 *l.*, viz. :—

	£.
Ordinary Expenditure - - - - - - - -	13,306,310
Extraordinary Expenditure for the Bhootan War - -	100,000
Stores from England, including Freight - - - -	(*a*) 348,250
£.	13,754,560

Ordered, That a Copy of the above Resolution be sent to the Military Department, with a request that the Military Budget Estimate for 1865-66 may be sent as early as possible, to enable this Department to compile the usual Budget Statement in the form in which the Indian Accounts and Estimates are submitted to Parliament.

	Stores.	Freight.
	£.	£.
(*a*) Bengal - - - - - - -	183,350	2,494
Madras - - - - - - -	67,042	866
Bombay - - - - - - -	92,930	1,568
£.	343,322	4,928

£. 348,250.

FURTHER RETURN.

RETURN to so much of an Address of the Honourable The House of Commons, dated 3 July 1865;—*as calls for*,

COPY "of the MEMORANDUM submitted to the Government of *India* by the Accountant General, Military Department, dated the 20th day of December 1864."

India Office,
3 May 1866.

T. L. SECCOMBE,
Financial Secretary.

COPY of the MEMORANDUM, No. 1457 B., submitted to the Government of *India* by the Accountant General, Military Department, dated the 20th day of January 1865.

(*Vide* para. 2, Part I., page 278.)

Military Department, Account Branch, dated 20th January 1865, No. 1457 B.

MEMORANDUM.

WITH reference to the *Report of the Commissioners of Enquiry into Indian Accounts on the System of Audit and Account now pursued in the Military Department, published in the* Gazette Extraordinary of India of 13th October last, under the authority of Financial Resolution, No. 2695 of 30th September idem, the undersigned begs to submit, for the consideration of Government, the following observations on some of the main points noticed in that Report.

2. The more important representations may be classified as below:—

1st. That the Military Budget Estimates, as submitted by the Controllers of the three Presidencies, are unnecessarily elaborate and cumbrous; and that the revision and consolidation of these Estimates by the late Military Finance Department, and now by the Accountant General in the Military Department, has been and must be a source of delay and inconvenience.

2nd. That the process of business followed in the Disbursing and Examining Offices of the Military Department is extremely operose and complicated, requiring extensive agency, which under a similar system might be considerably reduced with very economical results.

3rd. That the Accounts are so greatly in arrears as to be valueless when finally prepared, besides being actually prejudicial as well to the interests of Government as to individual Officers; and that the Financial Returns submitted in the mean while are so defective as to render the expenditure recorded therein a *matter of opinion rather than of fact.*

4th. That the duties now performed by the Accountant General, Military Department, are comparatively unimportant, and that his functions are such as do not justify the appellation of "Accountant General" being given to him.

The Commissioners also submit a revised Form of Budget Estimate for adoption, and make the following recommendations:—

1st. That the Comptroller of Military Accounts in the Bengal Presidency should also be the Accountant General for India, aided by a Deputy.

2nd. That the Officers of Military Account at each Presidency should be consolidated and reconstituted, so as to form a Central Account Office at each Presidency.

3rd. That the Offices of the Presidency and Circle Paymasters be gradually abolished, the duties of the Presidency Paymaster being transferred to the Accountant General, and those of Circle Paymasters, for the most part, to Commissariat Officers and Civil Treasuries.

4th. That the Store Accounts should be separated from the Cash Accounts.

5th. That the whole system of Military Accounts should be remodelled on a plan which is sketched in the Commissioners' Report.

3. The undersigned will now review, as briefly as practicable, these several representations and recommendations in the order above set forth; doing this under a firm conviction that such a review based on some degree of practical knowledge of the details and some experience as regards the working of the system, will, if honestly and temperately conducted, prove useful in enabling Government to form a correct opinion on the several questions brought under consideration, on the present actual condition of the Military Account Department, and on the general accuracy and consequent value of the Commissioners' Report.

4. Whilst generally concurring with the Commissioners that the present system of Military Audit and Account has many defects, and that it is susceptible of much improvement, the undersigned, after a careful perusal of their Report, cannot but think that the condemnation of the entire system pronounced by the Commissioners is too sweeping, and that, to a considerable extent, it is based on an exaggerated view of trifling imperfections, on certain actual mis-statements, and on some erroneous deductions. Moreover, it appears to him that due allowance has not been made for the circumstances under which the existing system passed into its present condition, and the difficulties in the way of reform; whilst many improvements that have been introduced or suggested are altogether ignored.

5. He would specially submit that as regards the accounts, many of the defects of the present system were early and fully appreciated in the late Military Finance Department, the Chief of which reported as follows in October 1861:—

Report, No. 974 A. dated 8th Oct 1861.

"The prejudices and difficulties which interfered with the introduction of the Budget system have already, to a great extent, been overcome; but similar ground has to be gone over in reference to the account system. Old established ideas, and time-honoured modes of procedure have now to be swept away, and care must be taken not to allow the effort by which the changes are effected to be too soon relaxed, for fear of the re-action that may temporarily be felt, but at the same time I may assure Government that once the results of the change of system are fully exhibited, there can be no doubt as to its advantages being recognised and fully appreciated."

"Extensive reforms are, however, necessary before a simple and intelligible system of accounting can be substituted for the present system, that has become unnecessarily cumbrous, mainly by reason of misapprehension and misuse of technicalities, which, when properly applied, are invaluable."

6. The present arrangements consist partly of a remnant of the system which prevailed prior to the introduction of Budget Estimates and partly of reforms since then effected. The period, however, since the introduction of Budget Estimates has been one of continued change, either actual or anticipated, and the Military Finance Department had to contend against heavy arrears on the transfer of the Military Accounts to its administration. With every effort to that

that end, the necessary data for the preparation of a homogeneous system had not been available at the time of the Commissioners' arrival, and after that event, all measures affecting reform were necessarily stayed pending their investigations. But if due consideration be accorded to the measures from time to time adopted since the constitution of the Military Finance Department, it will be found that they have been the means of effecting great savings in almost every branch of the Military Department of Government, and that in other respects they possess merits which, the undersigned ventures to think, have scarcely been sufficiently recognised in the report now under notice.

Annual Budget Estimates.

7. In paras. 47 to 58, the Commissioners describe the process followed in reference to the Annual Budget Estimates, and state that the Estimates, which should be submitted to Government on the 31st January each year, have invariably been late, quoting Financial Resolution No. 2018 of 15th April last, in support of their statement. It is further affirmed that so long as the present system of requiring the Accountant General to review the Controller's estimates is continued, delay must be the result, because the former officer only receives the Estimates from the Controllers on the very day on which they should be submitted to the Financial Department; that the criticisms of the Accountant General, while apparently minute, are not justified by a careful investigation into facts, and consequently must result in putting departments to inconvenience. These views are illustrated by an example drawn from the Madras Estimates, and it is then suggested that no deduction, clerical errors excepted, should be made from an Estimate, unless the head of the department concerned has an opportunity of affording an explanation in substantiation of the figures submitted by him.

8. With reference to the statement regarding the late submission of the Estimates, it is unnecessary to make any observation, as Military Department Letter, No. 446, of 30th June last, explains that the Financial Resolution of 15th April, quoted in para. 51 of the Commissioners' Report, resulted from an oversight, and the error is alluded to in para. 11 of the Financial Resolution, No. 2695, of 30th September 1864, directing the Report to be published.

9. The question as to the revision of the Estimates compiled by the Controllers, cannot, however, be so easily disposed of. It is one of vital importance, and the Commissioners themselves have expressed somewhat contradictory views on this point. In para. 57 of their Report they deprecate any alteration in an Estimate without reference to the head of the department concerned, on the ground that the Accountant General's alterations are open to question, and that the practice occasions great delay. But further on in the Report, without any suggestion for altering the existing prescribed date for the final submission of the Estimates, they advocate a careful revision of the Madras and Bombay Estimates by the Accountant General, prior to consolidating them into a General Estimate for Military Services for all India. This will be seen at once by a reference to para. 250, in which, assuming that the functions of the present Accountant General, Military Department, will be allocated to the Controller at Calcutta, in addition to his own executive duties, they write—"The estimates from Madras "and Bombay would be forwarded to the Accountant General not later than the "31st January, and he would, after subjecting them to a careful revision, com- "pile them into a General Budget Estimate for Military Services for all India. "Any alterations that he may consider it necessary to make should not be "shown on the face of the Estimates, but should be explained to Government, "together with his observations on the Estimates generally, in a separate "Report."

10 The system of final revision thus recommended corresponds with the existing practice, excepting that at present the revision extends to the Estimates of the three Presidencies, and is not confined to those of Madras and Bombay. No valid reason is assigned for exempting the Budget Estimate of the Bengal Presidency from the independent inspection and revision it now annually undergoes,

goes, and assuredly no plea, derived from the experience of the past, can be adduced in favour of such exemption.

11. The undersigned considers it essential to observe that on no one occasion, since the introduction of the Budget Estimate system, have the Controllers sent up the Estimates in such a state as to be ready for *immediate* submission to Government. Not to encumber this memorandum with unnecessary details, it will suffice to substantiate this statement by referring only to the Budget Estimates of this Presidency as submitted by the Controller.

12. Under existing arrangements, all "Charges *Personnel*" are collected and arranged for the Budget Estimate by the Compiler, under the immediate direction of the Controller. The Estimates for *Matériel* supplies, to be provided by or for the Commissariat, Barrack, Medical, Clothing, Ordnance, and other Departments, are prepared by the respective heads of those departments and furnished to the Controller, who, after examination and check, proposes such modification as he may consider necessary or advisable, and incorporates them in the General Estimate for the Presidency.

13. In 1862-63, the Estimate for *Personnel* and *Matériel* charges submitted by the Controller at Calcutta, amounted to 7,06,62,591 rupees, and during the year, Government sanctioned supplemental grants to the amount of 10,90,968 rupees, making an aggregate of 7,17,53,559 rupees; but the Estimate, as revised by the late Military Finance Department, *inclusive of the extra grants during the year*, stood at 6,96,56,072 rupees, exhibiting a reduction of 20,97,487 rupees. The expenditure, according to the "Actuals," was only 6,90,85,037 rupees, and by the Appropriation Audit, 6,92,51,712 rupees, being by the former, 5,71,035 rupees, and by the latter, 4,04,360 rupees below the revised Budget Estimate, which is sufficient evidence that the reductions, so far from being arbitrary or unwarranted, did not go quite far enough. *Vide* Memo. on the Appropriation Audit, No. 849 B.C., dated 31st August 1864.

14. The Controller's Estimate of *Personnel* and *Materiel* charges for 1863-64, as submitted by him, amounted to 7,44,45,511 rupees, but it was very considerably modified, and omissions supplied; the reductions made under Title I., having been 34,38,169 rupees, and the additions, 36,44,019 rupees; and under Title II., reductions, 31,36,200 rupees; additions, 15,02,024 rupees. The Estimate, after revision by the late Military Finance Department, finally stood at 7,30,17,185 rupees, being a net reduction of 14,28,326 rupees. During the year, the Sittana Field Force was formed, and the actual extra cash expenditure on account thereof, although at first expected to involve a heavy additional outlay, has finally proved to have amounted to only 7,83,000 rupees of actual cash disbursement. The total Military Charges of the year for the Bengal Presidency, amount to 7,16,07,044. But in the Estimate, provision for Europe stores to the amount of 25,50,900 rupees was made, whilst the receipts during the year fell far short of this amount, having been only 10,43,244 rupees; excluding this item from both *Estimate* and *Actuals*, the comparison is as below:—

	Rs.
Budget Estimate of 1863-64, as *finally* sanctioned by Government, *exclusive* of the value of Europe stores - - - - - - - - - -	7,01,67,743
Extra grants sanctioned during the year - - -	2,58,612
	7,04,26,355
Actual expenditure, exclusive of the value of Europe stores - - - - - - - - - -	7,05,63,800
Expenditure in excess of the estimated amount *Rs.*	1,37,445

But as the expenditure on account of the Sittana Expedition, amounting to 7,83,000 rupees, which was never provided for, either in the Budget Estimate or by extra grants, is included in the above sum of 7,05,63,800 rupees, it should be deducted therefrom, thus leaving the "Actuals" of the services estimated for at 6,97,80,800 rupees, or 6,45,555 rupees, or nearly $\frac{9}{10}$ per cent. below the estimated amount.

15. The

15. The Estimate for 1864-65 was similarly revised; if carefully examined many of the alterations will be found to be owing to orders issued by Government after the Controller had forwarded his Estimate to the Accountant General, and to the transfers from one head to another occasioned thereby. The amount of the Controller's Estimate was 7,09,83,136 rupees, and notwithstanding the additional charges sanctioned by Government, the total of the revised Budget Estimate submitted for the approval of Government was 6,98,90,100 rupees, being a reduction on the former amount of 10,93,036 rupees.

16. In para. 54, the apparent minuteness of the revision of the Controller's Estimate is noticed as a defect, nearly every total being represented as altered, these alterations ranging, occasionally, so low as one rupee. The Commissioners were not, perhaps, aware that in the first place, under express orders from the Financial Department, the several items in the Estimate were required to be given in round numbers, and as the Controller did not attend to this injunction, it was necessary to reduce his totals accordingly. But in order that Government may appreciate the real nature and extent of the alterations actually made in the Bengal Budget Estimate of 1864-65, as submitted by the Controller, the following example of one heading or chapter is adduced, being that of the

EUROPEAN ARMY.

Eurasian Artillery.—Controller only provided for effective strength. Revised estimate provided for established strength.

Lahore Light Horse.—6,728 rupees were added to provide for the new rates of pay sanctioned in Military Department's Letter, No. 748, dated 26th January 1864, for the Commandant and Adjutant.

East Indian Regiment.—1,05,016 rupees were deducted consequent on the authorised disbandment of the regiment.

Engineers.—1,66,634 rupees were deducted from this head, of which 1,46,049 rupees was considered chargeable to the Civil Department for the pay proper of engineer officers in the employ of the Civil and Public Works Departments, and 20,550 rupees were transferred to the head *Sappers and Miners*, under which the Controller should have estimated for the amount, instead of under the head *Engineers*.

Staff Corps.—The Controller made provision for officers about to return from furlough, but this was deemed unnecessary, as it was considered that the number proceeding on leave would probably balance that of those returning, and the estimate was accordingly reduced by 59,000 rupees.

General List, Infantry and Cavalry, including the Cadres of old Corps.—Five per cent. was deducted to cover casualties, and the Estimate was revised agreeably to the postings made to regiments by G. O. C. C. dated 20th January 1864, the Controller's Estimate having been framed prior to the publication thereof.

17. Thus it will be seen that under this head the virtual alterations made by the late Military Finance Department were only six, three of them being necessitated by Government orders promulgated after the submission of the Controller's Estimate. The other alterations under the same head, 15 in number, were in small sums to reduce the amounts to round numbers.

18. As to the example given in para. 56, in proof of the averment that the alterations made by the Accountant General are not justified by a careful investigation of facts, the undersigned has to observe, that his attention was specially drawn by the Madras Controller to the high rate at which the feed of horses was estimated, who, at the same time, quoted the average rate of past years at 75½ rupees per horse per annum, but remarked that some extra allowance should be made for dearness of grain. Four lakhs, or 82½ rupees per horse, were consequently allowed.

19. A more correct knowledge of the course practically adopted in the revision and consolidation of the Military Estimates, and of the actual results of such revision, might possibly have modified the opinion of the Commissioners

sioners as to the supposed disadvantages of this process when applied by one independent officer to the Estimates of the three Presidencies.

20. There is reason to believe that the Commissioners were unaware of the means possessed by the Accountant General under the existing system for checking these important documents, for in para. 240 they observe "that the "Accountant General should have immediately at his command the state of "the expenditure of any item of a grant, and that he should be aware of the "state of the account of any of the disbursing officers." What is recommended in this paragraph as highly desirable to establish for the future, *is precisely the kind of information that the Accountant General, under the existing system, has at his command*, and not only for the Presidency of Bengal, but for all three Presidencies. Returns are received by which every item of expenditure is recorded under the Budget Grants, and from the monthly statements of increase or decrease of inefficient Balances, the Accountant General can see at once what is the state of the accounts of each Circle Paymaster; each Executive Commissariat or Stud Officer, indeed of every disbursing officer, in all three Presidencies. Moreover, he receives the Monthly Prices Current of each Presidency; also statements of commissariat purchases, or of contracts entered into, and has possession of the actual expenditure of each separate department, month by month. If Government desire accurate Estimates and Accounts, an audit of them by an independent officer, unconnected with their preparation, appears as necessary as an audit of actual disbursements. If the judgment and vigilance of Heads of Departments may be implicitly relied on in the one case, there is no reason why the same qualities should not be accepted as guarantees for absolute correctness in the other.

21. As a practical illustration of the reliance to be placed on the Estimates occasionally rendered, and the necessity for careful review, the undersigned would refer to the subjoined particulars of the Bengal Regular Estimate of 1862-63.

RECEIPTS.

REMITTANCES *from other Governments.*

	Estimate as submitted by Controller.	Military Finance Department's Estimate.	Actuals.
	Rs.	*Rs.*	*Rs.*
Government of N. W. Provinces - - - -	1,05,02,474	2,05,96,460	2,07,16,494
„ Punjab - - - - - -	2,39,19,289	2,19,21,250	2,17,95,451
„ Madras - - - - - -	3,59,553	2,42,800	2,07,888
„ Bombay - - - - - -	31,00,150	14,04,300	20,06,814
„ Hyderabad - - - - -	22,64,439	23,91,300	24,03,305
„ Central Provinces - - - -	17,88,474	16,42,300	16,59,851
„ Oude - - - - - -	45,18,459	42,66,600	47,94,752
Rs.	4,64,02,838	5,24,65,010	5,35,84,555

It will be observed, from these particulars that the modifications of the Military Finance Department, with one exception, brought the estimated amounts in much closer approximation to the actuals than as originally estimated by the Controller; and that in the case of the North-west Provinces, the modification made was to the extent of more than 100 lakhs of rupees, and even that extensive modification was a little below the actual result.

22. *Paras.* 59 *to* 63.—The Commissioners in these paragraphs condemn the unnecessary details furnished for the preparation of the Departmental Estimates for *matériel* supplies; some ludicrous instances of minuteness on the part of certain estimating officers are cited, and stress is laid on the want of uniformity in the compilation

compilation of these Estimates in the different Presidencies. Finally, it is stated that all the elaborate details received are not used in this office, as the Estimates submitted for revision are tested by general averages, or are arbitrarily reduced without any satisfactory reason assigned for the reduction.

23. The best refutation of these general statements and the clearest proof of the misconception of the real circumstances of the case, which led to such statements, will be found in the fact that in 1862–63, the year in which the Budget system was first properly introduced, the Estimates submitted from all three Presidencies were so wild that they were susceptible of a reduction of no less than 74 lakhs of rupees, or three-fourths of a million sterling, a reduction which the undersigned avers has been fully sustained by actual results, as set forth in his Memorandum No. 849 B. C., dated 31st August last, on the *Appropriation Audit*. From this important fact it was evident that implicit reliance could not be placed on the detailed Estimates of departmental officers. From 1862–63 to 1864–65 the reductions made by the late Military Finance Department from the Estimates submitted by the Controllers of the three Presidencies have aggregated 120 lakhs of rupees, whereas, by the Appropriation Audit of 1862-63 and the actuals of 1863-64, the Military Expenditure of those two years has only exceeded the Budget Estimates submitted by the late Military Finance Department by 10,98,538 in the former year and 10,96,532 rupees in the latter year, exclusive of the expenditure for the Sittana Expedition, which was not estimated for. These differences, for which, if necessary, satisfactory reasons could be adduced, give the same per-centage of nine-tenths in each year, and, the undersigned would submit, contrast favourably, considering the infancy of the Budget Estimate system in India, with the results obtained at home, and which, according to the *Statements of the savings and deficiencies upon the grants for Army services* published annually by the War Office and laid before Parliament, for the years specified below, and only for the items corresponding to those included in the Indian Estimates, are as follows:—

	Estimate.	Expenditure.	Net Difference in Expenditure.	Per-centage.
	£.	£.	£.	£.
1856–57 - - -	16,983,931	17,406,792	+ 422,861	+ 2½
1857–58 - - -	10,304,649	11,190,202	+ 855,553	+ 8½
1858–59 - - -	10,334,049	10,315,656	— 18,393	— 1/6
1859–60 - - -	10,751,276	11,512,750	+ 761,474	+ 7
1860–61 - - -	12,963,084	13,856,692	+ 893,608	+ 6 11/12
1861–62 - - -	14,211,047	14,220,155	+ 9,108	+ 1/16
1862–63 - - -	14,309,796	13,572,563	— 737,233	— 5⅙

From the above it will be perceived that out of the seven consecutive years specified, the War Office Estimates of only three proved to be anything like a close approximation to the actual expenditure, the average difference exceeding 4 per cent.; whereas in India, in the very first year 1862-1863, in which the Budget Estimate system was applied, the Estimate and expenditure approximated within 1 per cent., and so also for the following year 1863-64. This result may, to a great extent, be fairly attributed to the preparation and the use made of detailed appendices.

24. In the recent [and even present] financial state of India, considering the limited range for taxation, excessive estimates might have led to serious embarrassment as regarded Government, and great general inconvenienc eto the public. It was, therefore, the object of the Military Finance Department to secure Estimates as closely approximating to the actual expenditure as the diligence and judgment of Government officers could frame. Great importance was consequently attached to obtaining correct data, even although at the outset this might

be encumbered with some unnecessary detail, and recorded in various ways. As practical experience was obtained, the advisability of condensing this information, and rendering it on one uniform system, became evident, and careful attention was turned to this subject by the late Military Finance Department. With this view, prior to commencing the preparation of the Estimate for 1863-64, the undersigned submitted to Government a complete set of forms specially prepared for the exhibition and compilation of the necessary details on which alone a correct estimate could be based. With reference to the fluctuating nature of the demands for *matériel*, it was considered unadvisable, as it was almost impracticable, to give precise and minute instructions regarding entries of this nature; general rules were, therefore, laid down, and the arrangement of the details left to departmental officers. These forms, which when properly filled in constitute the substantiating Appendices to the Estimates, were submitted to and approved by Government, both in the Financial and Military Departments, in the following terms:—

FINANCIAL DEPARTMENT.

No. 796 A., *dated* 29*th October* 1862.

His Excellency the Governor General in Council has been pleased to express his satisfaction with the Book of Instruction and Forms which you have compiled with great care and judgment as a guide for the preparation of future Military Estimates.

MILITARY DEPARTMENT.

No. 994, *dated* 30*th December* 1862.

In acknowledging Letter, No. 1071 B., dated 9th September 1862, from the Officiating Chief of the Military Finance Department, the undersigned is directed to express to Colonel Broome the acknowledgments of Government, in the Military Department, for the very carefully framed forms prepared in his department to ensure, as far as possible, uniformity in the preparation of the Estimates. They appear, on the whole, to be most clear and satisfactory.

25. These are the forms, slightly modified by subsequent orders and changes of establishments, which in para. 7 of the Financial Resolution, No. 2695, are condemned as *prolix*, containing *unnecessary* and *excessive* detail, and which are to be discontinued.

26. As already observed, they were prepared after practical experience as to what had been found requisite, and they were framed to correspond with the principle on which the Estimate was required to be prepared; that principle being that each responsible officer should furnish, as concisely as to be intelligible, the details of his probable expenditure to his immediate superior, and that being revised by the latter, they should be submitted to the general Departmental Head, who, viewing them as a whole, would pronounce judgment thereon, and forward them for final approval. For example, the executive commissariat officers, within their respective ranges, furnish their Estimates (*Form C.*) to the several Deputy Commissaries General, and the latter, reviewing them, forward them (*Form B.*) on to the Commissary General. The review of each Deputy Commissary General is based upon the details furnished, but he seldom makes alterations therein; he rather submits suggestions to the Commissary General. The latter needs the details to form a judgment on these suggestions, and then finally prepares a revised Estimate for his entire department (*Form A.*), under the several prescribed heads of the Budget Estimate. If this duty were always judiciously performed, and there was but little variation in the nature and amount of the services to be provided for, it might, perhaps, be unnecessary that the details should be furnished to this office, as it has in its possession a general index to the correctness with which heads of departments discharge the duty in question, this index being the quarterly averages of the preceding year, and the monthly record of the expenditure under each major and minor head of the Budget Estimate for the same year. But if the Estimate of the forthcoming year should

should exhibit any unusual increase or decrease when tested by the means above indicated, the readiest way of reconciling the discrepancy is to examine the details of the Appendices ; otherwise voluminous correspondence and great delay would ensue, especially as regards the Estimates of the Presidencies of Madras and Bombay.

27. In reference to the alleged elaborate character of the Appendices submitted with the Budget Estimates, in para. 7 of the Financial Resolution on the Commissioners' Report, it is observed that the unnecessary details are attributable " to the want of that frequent personal communication between heads of depart- " ments regarding doubtful items in the Estimates, whereby access would be " gained to the books and records, and prolix returns and numerous vouchers " in support of the Departmental Estimates would become superfluous."

28. The personal communication alluded to can only thoroughly apply to the controllers and the heads of departments who estimate for their respective departmental services, and not to any personal communication between the Accountant General and heads of departments ; for, as regards the Madras and Bombay Estimates, such a procedure is evidently impracticable ; and even with respect to the Bengal Presidency, the brief period available for revision and general consolidation must practically limit the extent of such communication. Moreover, it is a question if such frequent personal references might not occasionally give rise to protracted discussion and indirectly encourage departmental opposition. The undersigned ventures to think that if the reductions made in the last three years' Estimates, and which, as regards the first two years at least, are proved to have been warranted, had all been personally discussed with the heads of departments concerned, it is very doubtful, setting aside the delay, if they would have been carried out to anything like the actual and requisite extent.

29. Government must exercise the final check over these important statements, and for this purpose some qualified and responsible officer must minutely look into the several details, and submit the results of his review for consideration and orders. A certain amount of communication at the discretion of this officer may occasionally be desirable ; and the undersigned was in such personal communication with the Commissary General and the Inspector General of Ordnance on several points connected with their Departmental Estimates for 1864-65.

30. But with reference to the number, bulk, and form of the substantiating Appendices, the undersigned submits that, on close investigation, it will be found that the Commissioners have not so considerably reduced these *details* as might, at first sight, be inferred from their report. Attached to this Memo. as Appendices A. and B., are two comparative samples ; the first showing the Commissioners' form for exhibiting the details of the pay and allowances of a corps, compared with the mode previously adopted in the Account Department ; the second, the two modes of framing an estimate for victualling Europeans. As regards the first (*Appendix* A.) the differences appear to be, that the *rates* of pay in the case of units of ranks are omitted, the amount being given in the total column ; that the specification of the grades and pay of native followers is omitted, the amount for the entire number being lumped together and inserted in one line. But as there is no reason assigned why the European and native establishments should not be exhibited in like detail, more especially as the pay of the latter is not uniform at the three Presidencies, and alterations are therein made from time to time according to prevailing circumstances, the omission of the specification is of very doubtful advantage. In like manner the Staff pay of non-commissioned officers and the contract allowances are each exhibited in one sum, a change the benefit of which is equally questionable. But the most important change is the omission from the Commissioners' form of all necessary *additions* and *deductions* to and from the Estimate. This data, which the undersigned from his experience considers essential, is given in detail in the existing forms, and is printed in italics in the sample now submitted. In Grant 3 of the new form of Estimate, the pay of officers and men is shown in separate columns, but in the proposed form of substantiating Appendix, they are totalled together. A column is given in the Estimate for the deduction on account of non-effective

or absent officers, but no detail of these absentees is given in the Appendix; and consequently there are no data for verifying the totals entered in that column.

31. But more important still, no provision is made either in the Estimate or Appendices for officers in excess to establishments, or for the additional pay on account of length of service to paymasters, quarter-masters, riding-masters, or veterinary surgeons, &c. These omissions certainly reduce the bulk of the Appendices for each arm of the service, but the undersigned considers that they greatly impair the value of these documents, as they are no longer what they profess to be, substantiating vouchers for the entries in the Estimate. As only one such Appendix is required for each arm of the service, and as the total saving or space effected is equal to about three pages in a bulky volume, this trifling reduction is obtained at a considerable sacrifice of efficiency and completeness of information.

32. The Commissioners refer to these Appendices as a principal feature of their plan, and consider that they "will be found exceedingly useful, not only to "officers commanding regiments, but also to the Military Department, and will "save many references to the Accountant General." With the two forms before them, Government can judge which in reality is calculated to prove most useful and to give the fullest amount of necessary information.

33. The second sample (Appendix B.) is that of an Executive Commissariat officer for victualling Europeans. There is little perceptible difference between the form at present in use in the Commissariat Department and that proposed by the Commissioners; the one being a mere recast of the other, with a change in the position of the several columns. The only improvement of which the undersigned is aware, is not a reduction, but an addition, viz., that the average daily cost of the ration per man is exhibited.

34. Government can also judge of the difference between these forms, and the extent and value of the proposed changes.

35. The Commissioners have only given the one form for material supplies above referred to, with reference to which they observe—

"Para. 264.—The sum required for the provisions of Europeans should be "based upon the actual rates paid to the contractors for the rations to be sup- "plied: the Commissariat officer of each range or station should prepare a "statement, showing the probable strength to be maintained during the ensuing "year, and he should carefully calculate the entire cost of one ration per man "per annum. We submit for universal adoption throughout India a Return of "this nature, which will enable the Commissary General to see what is the "relative comparative cost per ration at every principal military station in the "Empire."

36. As regards the various other supplies to be made by each executive officer of the Department, they further observe—

"Para. 265.—In regard to the other items on this grant, the Commissary "General should furnish whatever Returns or Statements the Accountant "General may require: but they should, as far as possible, be limited to Returns "of a general nature, and should not descend into those minute particulars "which have hitherto been furnished."

37. The undersigned has already pointed out that there are practical difficulties in prescribing any detailed form for these fluctuating requirements, and in the foregoing paragraph the Commissioners have done precisely what he did, viz., given general directions. But analogous services will necessitate analogous details, and the supplies and services provided for in the new form of Estimate are, in addition to "Victualling Europeans,"

Victualling Natives.
Hospital supplies (medical).
Compensation for dearness of provisions.
Purchase of reserve stock.
Malt liquor.
Rum and arrack.
Carriage of Commissariat supplies.
Contingent expenses.
Purchase of live stock.
Transport charges (in detail).
Freight and charges of stores from England.
Feed of horses.
Camp contingencies.
Cattle, gear, implements, &c.
Miscellaneous.

There

There are 27 Commissariat ranges in Bengal, and each executive officer in charge must estimate for nearly all the above services, so that the number of these Appendices or vouchers is likely to be increased rather than decreased. Supposing that the average of each officer's vouchers was only 12, the total for the 27 ranges would be 324.

38. By recent orders of Government the Ordnance Department is authorised to obtain its own supplies of stores of local produce, and the practice will probably be extended to the Stud and Clothing Departments. On the principle laid down by the Commissioners, each executive officer of these Departments must estimate for his own requirements, so that there will be no reduction in the general total of vouchers consequent on this change.

39. It is doubtful whether or not the Commissioners intend that all these numerous Appendices should be printed and attached to the Estimates, as in para. 261 they only refer to the Appendices for establishments as necessary to be so attached. The paragraph in question is quoted below:

"One of the principal features in this grant is the substantiating Appendices; "in these will be found the approved establishment of each regiment of cavalry "or infantry, European and Native, of the Batteries of Artillery, and of the "various Irregular Corps; the total cost of the pay, allowances, and charges is "succinctly shown, and the aggregate estimate of the cost of each arm of the "service is given; the number per establishment is distinctly represented."

40. The undersigned would venture to suggest that it would be sufficient to print one set of these Pay or Regimental vouchers for each Presidency. This might not be absolutely necessary for Madras and Bombay as regards the European establishments; but as the Native establishments differ and should be exhibited in detail, it would be desirable to render each Estimate complete in itself.

41. In paras. 64 and 65 the Commissioners propose to do away with the Regular and Cash Requirement Estimates, being of opinion that one carefully compiled Estimate of Military Services is sufficient for all practical purposes. As regards the *Regular Estimate*, the undersigned is disposed to agree with them in thinking that it causes a great deal of work, without, as far as he is cognisant, commensurate result; but so long as the Budget Estimate of each Presidency is made to represent the entire charges of the army of that Presidency, irrespective whether the full amount thereof is disbursed within the limits of that Presidency or not, so long will a *Cash Requirement Estimate* be necessary. For instance, provision to the extent of *Rs.* 20½ lakhs is made in the Bengal Budget Estimate for malt liquor, but nearly two-thirds of the supply is landed at Kurrachee, paid for by the Bombay Government, and treated as an adjusted charge of the Bengal Presidency. Hence Bombay in its *Cash Requirement Estimate* must make provision for this sum, although it is no charge of that Presidency and finds no place in its Budget Estimate. In this and in several other instances the Commissioners, accustomed to deal with a system of account for one government and one army, appear to have lost sight of the specialties incident to a system of account which must provide for the requirements *of three separate governments and three distinct armies.*

42. As regards the proposed form of Budget Estimate (on the details of which the undersigned was consulted by Mr. Whiffin) he would beg to express his general concurrence; but he would at the same time observe that previous to the commencement of the preparation of the Budget Estimate of 1864-65, he personally suggested to the Financial Member of Government that the Estimate should in size, classification, and general arrangement be made to approximate as closely as practicable to the English form; in other words, *to adopt a form in all essentials similar to that now proposed by the Commissioners and sanctioned by Government.* He was, however, instructed to introduce only such changes as were considered to be undoubted improvements; in accordance with which decision, provision was made for fixed establishments of men and estimated effective strength of officers; the medical establishments of the British army were incorporated with the several arms to which they were attached, and educational establishments were separated. *Effective* and *non-effective* services were shown under distinct classes, and the *personnel* and *matériel* expenditure of each Depart-

ment brought under the same chapter, although exhibited in separate sections. Under the same instructions the cost of stores from Europe was removed from the body of the estimate. But the size of the paper, the arrangement of the columns, and the explanations given at the side, were all introduced *under special orders from the Financial Member of Government.*

43. Thus, as regards the Budget Estimates, the undersigned ventures to think that he has satisfactorily shown that their revision and consolidation has not in reality ever been creative of delay; that such revision and modification, so far from being objectionable, arbitrary, or unwarranted, has practically been productive of very great advantage and economy; and that the independent minute revision, on the part of Government, of this important document (as also of the statement of final appropriation of the amounts granted) by an officer specially appointed to, and conversant with the nature of the duty, unconnected with their original preparation and unbiassed by departmental tendencies, is most essential. That the undersigned was fully alive to the advisability of improving the form of Estimate, that he had introduced some changes and suggested others.

That the reforms now proposed by the Commissioners are not very important or radical; that in some cases their advantage is questionable, and that the reduction of details as regards either the number or bulk of the Appendices is not likely to prove so extensive as was anticipated by Government in the Financial Department, as may be inferred by paragraph 7 of the Resolution, No. 2695.

Further, that, but for the completeness of the existing Appendices, not only would there have been a difficulty in securing the accuracy which has characterised the Estimates already prepared, but without the details thus furnished, the Commissioners would not have had the data for scrutinising the present system, suggesting amendments, or preparing their proposed forms.

44. As intimately bearing on the subject of the *Estimates*, it is desirable, at the same time, to notice the Commissioners' remarks on the *Appropriation Audit Statement.*

In para. 196 they observe, "This is a most voluminous statement; it is supposed to represent the actual audited Expenditure on account of Military Services, "and should, according to the instructions on this subject, be based entirely on "adjusted charges after the closing of the annual books. This Return is compiled "solely for the use of the Accountant General, but it is of no practical use; in the "first place, it is compiled before the annual or general books are commenced, the "Appropriation Account for the year 1862–63 having been rendered to the "Accountant General on the 19th July last, the books for 1861–62 having only "just been closed, and those for 1862–63 not yet opened; moreover, the expen-"diture, as shown by the returns, differs very materially from the 'actuals' for the "same period, as given by the Accountant General in the printed Budget Estimate "for the year 1864–65."

45. On this paragraph the undersigned would observe; in the first place, this statement can scarcely be called a *voluminous* one. According to the existing orders, it must correspond with the Budget Estimate headings of the same year, without which no practical comparison could be made between the estimated and actual expenditure, and the Statement for all three Presidencies were so prepared for 1862–63, the first year for which there was sufficient data. The Bengal Statement consisted of 28 manuscript pages, and those of Bombay and Madras of 22 and 20 severally, whilst the whole were consolidated into 21 pages of printed foolscap, including the detailed explanatory statements, as submitted to Government with Memo. No. 849 B. C. of 31st August 1864.

46. Secondly, as regards the time and mode of preparation, the Commissioners appear to have fallen into an error as to existing *instructions* on this subject, and to have mistaken the *suggestions* contained in the Report, No. 10 of the Budget and Audit Committee, dated 18th January 1861, which were not sanctioned by Government, for the *actual orders* on the subject, as contained in the Financial Resolutions, Nos. 119 of 16th November 1860, and 877, of 26th January 1861. In No. 119 it is stated in paras. 15 and 16: "All questions arising during the "course of the year, for which the Estimates have been sanctioned, having been "disposed of, the final Appropriation Audit of the two Departments (Civil and Military)

"tary) will be conducted independently by the head of that department, who will "satisfy himself and report to Government on the mode in which the several con- "trollers of finance, and all officers subordinate to them, have performed their "respective duties."

"Whenever those duties have been efficiently performed, and the limits of the "Budget Estimates been carefully observed, the Appropriation Audit will be effected "by the head of the Finance Department (Civil or Military) without reference to "his colleague, or to any other authority."

47. In the latter resolution these orders are reiterated, and the Chief of the Military Finance Department is specially designated as "Appropriation Auditor "in the Military Department," a function which the undersigned considers to have passed to him in his present capacity.

48. Thus it is evident that the preparation of these important statements was to commence as soon as practicable, from the data available, and that waiting several years for the closing of the books was not contemplated.

49. Thirdly, the foregoing extracts and explanations clearly and sufficiently dispose the assertion of the Commissioners that the Appropriation Audit Return, as prepared by the Military Accountant, is compiled *solely for the use of the Accountant General.* As to the other assertion, that it is of *no practical use*, the undersigned would refer to the statement furnished with his Memo. No. 849 B. C. of 31st August 1864, in which, notwithstanding the defective data and the difficulties attending a first attempt, a tolerably close approximation to the actual expenditure under the several heads was exhibited, the nature and extent of the errors were explained, and the evils of the present Financial Returns and the mode of recording "*settlements*" were clearly exhibited and brought prominently to notice.

50. The course adopted in that statement was to compare the Estimates and Disbursements under the several Budget heads, including the adjusted charges in the accounts of other Governments, with explanations as to the variations that existed, whether of excess or deficit. This course is precisely that *subsequently* prescribed by Circular, No. 76, of 14th November 1864, issued to the Civil Finance Officers, and based on Financial Department Letter, No. 3003, of 14th October 1864.

51. But still more remarkable is the identity between the forms proposed by the Commissioners for corresponding statements and those actually adopted by the undersigned. The fact is, that both were copied as closely as practicable from the forms in use at home. In Appendix C. will be found a comparison between the two forms of *explanatory statements*, the only difference between them being that the headings correspond to the Estimates for which they were framed, and that the Commissioners' form being included in one page leaves scanty space for remarks. The Commissioners', being merely a specimen form, comprises only a few items of *personnel*, chiefly connected with the European army, and therefore, for better comparison, the form in use is similarly restricted to corresponding headings.

52. On the Report of the Commissioners on this subject, the correctness of which Government can now appreciate, it has been ordered, in the Financial Department Resolution, No. 2695, that "*the inadmissible substitute for an annual* "*appropriation audit, described in para.* 196" of the Report is to be discontinued. The undersigned, with all respect, begs to represent that this resolution, which he ventures to think is based on a misconception of the real facts, is likely to prove inconvenient and injurious to the interests of Government.

53. The Commissioners have recommended that a statement, similar in principle and form, should be regularly prepared, but based on the annual books, which they propose should, when brought up to date, replace the Financial Statements now in use.

The Financial Department has, since the date of that resolution, authorised the preparation, in the Civil Account Department, of a statement *precisely similar in principle and in form to that adopted in the Military Department, and based on similar data.*

 54. Undoubtedly,

54. Undoubtedly, if the books were brought up to date and prepared, so as to correspond to the Budget headings, they would afford the best data for the purpose; but when it is borne in mind that the Bengal books for 1861-62 have only recently been completed, that it will be useless to attempt to complete those for 1862-63 and 1863-64 in the new form, and that even if this were done, they would not correspond with the Budget headings of those years for comparison, the only possibility of obtaining any close approximate information as to the expenditure of those years under the several Budget heads, will be by continuing the present practice; or, in other words, re-adopting in the Military Department the same course as that recently prescribed for the Civil Account Department. The books for 1864-65 can be prepared on the new system with advantage, and the data for comparison will be available, as the figures of the old form of Budget Estimate for that year must be re-cast, so as to correspond with the new heads when preparing the Estimate for 1865-66.

55. A *Budget Estimate*, to be of any practical use, must be followed by an *Appropriation Audit* to show how the sums granted under the several heads of service have been applied; and a statement, that may give only a close approximation to this, is better than none. The undersigned readily admits that the Appropriation Audit for 1862-63 was only an approximation; but with practical experience and an amended system of recording expenditure, there would necessarily be an annual improvement; and he unhesitatingly expresses his conviction that the similar statements for 1863-64 and 1864-65 could be not only prepared at much earlier dates, but afford much closer approximation to actual results. This might be satisfactorily proved by preparing that for 1864-65 on the Financial Statements, and subsequently on the data given by the military books when they are brought up.

56. But until the books are brought up to date, which must take some time, at least in Bengal and Madras (those for Bombay for 1863-64 are closed), the undersigned earnestly recommends the preparation of these Returns as at present, based on the Financial Statements. Unless this is done Government will not know how far the actual annual expenditure in the Military Department corresponds with the amounts sanctioned under the several heads of service.

57. The second point is the operose arrangements at present existing in the several offices of military account.

The opening portion of the Commissioners' Report, from paras. 1 to 45, contains a sketch of the existing military account system extracted chiefly from the rules and regulations for the guidance of officers of military account, published by Government in the Military Department on the 1st April last. Some slight errors, however, occur in describing the system, which it may be well to notice. In para. 20 it is stated that the vouchers enfaced for payment by the Ordnance Examiner are discharged by Commissariat officers. This is not the case; they are discharged by paymasters, as is admitted in paras. 146 and 172 of the Report.

With reference to para. 43 it may be observed that the Cultivation Accounts of the Stud Department are furnished to the Examiner of Stud Accounts only, and not to the Military Accountant, as stated in the Commissioners' Report.

Presidency and Circle Paymasters.

58. In paras. 36 and 88 it is reported that a bulky *Personal* or *Ledger Account* is kept by Paymasters with *every officer, Commissioned or Warrant, in the Circle.* After inquiry in the Presidency Pay Office, the undersigned begs to state that no such *Personal Ledger* as that referred to by the Commissioners exists. An *Advance and Retrenchment Ledger* is necessarily kept up, in which all advances made, or retrenchments ordered, are posted against the names of the officers concerned. In this country, commanding officers receive and are authorised to make many advances to meet the exigencies of the service, the actual necessity for which is subsequently investigated. It becomes necessary, therefore, to debit the officer with the amount until the propriety of such advances is admitted and they are adjusted by duly authenticated and properly vouched

vouched bills. Again, the circumstances of individual officers in India necessitate numerous advances to them, which are afterwards recovered from their pay. Moreover, retrenchments are ordered for over or erroneous drawings, which the Paymaster discharging the bill of the payee has not the means of detecting. These have to be recovered from subsequent issues of pay. Under these circumstances an indexed ledger of all such advances and retrenchments is necessary to the right conduct of the duties of the officers entrusted with the recovery thereof, viz., the Circle Paymasters, as, without such ledger, control would be merely nominal, and the actual loss to Government considerable.

59. Such a ledger may not be necessary either at home or in the Colonies, because the Staff of the British army receive consolidated allowances, and the regimental pay of officers is a definite lump sum, according to rank, adjusted by the regimental paymasters, who must each keep some register of claims against individual officers. But in India the case is widely different. Besides the regular army staff, every officer (not of the Staff Corps, or not receiving a consolidated allowance) employed either in the Public Works, Revenue, Judicial, or other Civil Department, draws the net pay of his rank on his individual abstract through the Circle Paymasters. In the Bengal Presidency alone there are 388 officers attached to the General Army Staff and departments; there are, also, a very large number of unemployed invalid, pensioned, warrant, and medical officers, all of whom draw pay on their individual abstracts. Their pay varies, some drawing a consolidated allowance, others a Staff salary in addition to Staff Corps pay of rank; and a few in addition to regimental pay and allowances. Against numbers of these officers retrenchments are issued, or they have received authorised advances for passage money, or travelling allowances, or for pay on proceeding to join distant stations; and it is the Circle Paymaster's duty to see the same adjusted.

It is necessary to add that, under the present constitution, there are no regular paymasters appointed either to the Royal Artillery or to Native cavalry or infantry regiments. The pay transactions of the regimental officers of these corps are therefore conducted, for the most part, by the Circle Paymasters.

60. From paras. 77 to 94, the mode of business in the Presidency Pay Office is criticised. As the direct supervision over this office is vested in the Controller of Military Accounts, who, by section 2, para. 16, of the Rules and Instructions for Officers of Military Accounts, is required to *inspect personally, or cause to be inspected, all Offices of Examination, Account, Disbursement, or Issue*, that officer may probably explain the circumstances which caused its operations to appear so unnecessarily cumbrous to the Commissioners.

61. But the undersigned has to remark that the Table drawn out, showing the number of payments made by each Circle Paymaster, and the cost of each payment, as recorded in para. 77 of the Report, is calculated to convey an erroneous idea. By the showing of the Report itself, there are 48,420 vouchers which undergo a preliminary examination, and are paid at a total cost of 2,51,200 rupees, or at an average of 5·2 rupees per voucher. But as these vouchers represent military charges to the amount of more than 568 lakhs, the cost of the establishment for payment, including the military and staff pay of paymasters, is only about $\frac{1}{2}$ per cent. per annum, or eight annas for every hundred rupees *examined, registered, and paid.* The proportion of a regimental paymaster's pay to the amount he disburses annually is $1\frac{3}{5}$ rupees per cent. per annum. The data, however, on which the Table has been based are apparently defective; the number of vouchers having been obtained from the Controller's office, does not in all probability represent the numerous advances made, and recoveries of advances and retrenchments effected. Further, the Controller appears only to have given the Commissioners the number of payments by cheques, and it is evident that the numerous *Public Service, Privilege Remittance,* and *Sepoy Remittance Transfer Receipts* have all been lost sight of. The number of these *Transfer Receipts* issued in the month of August last by the Presidency Paymaster alone was 357, and the total amount annually represented by such *Receipts* in the Bengal Presidency is 66,59,300 rupees.

62. It would also appear that in this enumeration of documents *Last Pay Certificates* and *No-demand Certificates* granted by paymasters to officers proceeding home, or from one station to another, have been omitted. The Commis-

sioners have also lost sight of the fact that in the case of regimental and individual abstracts, the deductions to be made on account of income tax and service funds, and the deposits in and withdrawals from regimental savings banks have all to be calculated, registered, and accounted for in Circle Pay Offices. These deductions or receipts, including deposits and recovery of advances, amount annually to 23,65,417 rupees, but the Commissioners have apparently ignored these transactions. The statement prepared cannot be accepted as complete, being clearly restricted to the number of payments on account of military charges, without reference to the numerous transactions which have to be recorded in the Paymaster's Accounts Current under the several heads of *Receipts*, *Debt*, and *Remittances*, all of which have to be carefully recorded, and subsequently checked by the Military Accountant.

63. Another error is made in describing the course pursued in regard to each payment made by the Paymaster of Invalids, Fort William and Chinsurah. It is stated "that a bill or claim is made out for the amount to be paid; it is sent "to the Examiner, Pay Department; it is enfaced and signed by that officer, "returned to the Paymaster at Fort William or Chinsurah, as the case may be, "and by them presented to the Presidency Paymaster, who, after manipulating "the claim through his books, issues a cheque on the Bank of Bengal for the "amount." The Controller, who was referred to by the undersigned on the point, writes: "The Commandant of Invalids, Fort William, and Paymaster, Chinsurah "Depôt, forward their bills to the Presidency Paymaster, who sends them to the "Examiner for pre-audit. The bills are returned by the Examiner, not direct "to the officers, but to the Presidency Paymaster, who charges them in his "disbursements, and sends to the officers who submitted the bills cheques for "the amounts."

64. The other objections to the process of business followed in the Presidency and Circle Pay Offices are, that they are examining offices; that the examination made therein is too minute; that the Monthly Accounts Current and the supporting documents involve a vast amount of labour; that the inefficient Balance Statements are exceedingly voluminous. As regards the examining duties performed in the pay offices, they appear advisable for expediting the payments, as well as for insuring strict accuracy. If the bills were sent in the first instance to the Examiner for final audit, there would be great delays, as such audit would necessarily require deliberation, and at distant stations such an arrangement would be most inconvenient. Then, again, any error or irregularity in the Examiner's Office would be beyond detection, as the Paymaster's duty in reference to a passed bill is to disburse the money without question. There is now a pre-audit by the disbursing officers, who are held responsible for money disbursed on their audit until the vouchers are finally and deliberately examined and admitted.

65. The special object of the Commissioners was doubtless to simplify the modes of procedure, and to reduce the amount of work, but the proposed remedies appear likely also to reduce a considerable amount of wholesome check. Whatever may be the defects of the existing system, it has undeniably possessed the advantage of security as regards the interest of Government and also of individuals; there having been only one instance of fraud (by forgery of a cheque) within the last four years, and that was immediately detected. This is an important consideration. If claims were to be passed in the first instance in the Examiner's Office, and then presented for payment, the protection now resulting from the double check might be materially affected by collusion or negligence; a contingency which acquires greater importance when the nature of the present available subordinate agency is taken into consideration.

66. With reference to para. 84, the undersigned would observe, that the proposition on which G. O. G. G., No. 693, dated 17th November 1863, directing that batteries of artillery should be paid by the Paymasters of the circles in which the head quarters of their brigades are located, was based, emanated from the Controller of Military Accounts, and is one which, from its obvious inconvenience, would never have been recommended by the undersigned for adoption.

67. A more serious matter, however, is the proposition in paras. 315 and 316 to abolish the whole of the Circle Paymasters, and to distribute the miscellaneous payments

payments amongst the commissariat officers and civil treasuries. This proposition is founded on a new system of payment sketched by the Commissioners in paras. 301 to 308, and which is briefly as follows: That paymasters of British regiments, officers commanding batteries of artillery and native regiments, should be made *direct* accountants and submit their pay lists *direct* to the Accountant General; that the monies requisite for the payment of the troops should be obtained on approved estimates from the civil treasuries, the accounts being subsequently adjusted in reference both to pay lists and estimates by the Accountant General.

68. The Commissioners are of opinion that by excluding payments on account of European and native troops, the average monthly payments for Miscellaneous Military Services will be reduced to 1,827 in the five circles, that is, exclusive of the Presidency circle. This inference the undersigned believes will be found fallacious. The best way of representing the transactions compressed under the term Miscellaneous Military Services, is to take the actual disbursements made throughout the Bengal Presidency in 1863–64 on account of military charges, and deduct therefrom the amount for the payment of *Troops*, *Pensions*, and *Commissariat*, *Clothing*, and *Stud Departments*' services, as shown below:—

	Rs.	*Rs.*
Total Disbursements on Account of Military Charges - -	- - -	7,03,53,259
Deduct Amount of Pay of European and Native Troops - -	3,60,78,266	
„ Amount of Pensions - - - - - - - -	19,51,786	
„ Amount of Commissariat Charges - - - -	1,47,88,914	
„ Amount of Stud Department Charges - - -	8,33,169	
„ Amount of Clothing Department Charges - -	10,88,188	
		5,47,40,323
Miscellaneous Military Services - - -	- - *Rs.*	1,56,12,936

or nearly one-fourth of the entire expenditure of the Presidency.

69. At the rate of 1,827 vouchers per mensem, the aggregate for the year would be 21,924; which number, on the sum of 1,56,12,936 rupees, gives an average per voucher of 712 rupees: considering the ordinary rank of the officers drawing pay on individual abstracts, and that the various remittance receipts are generally for comparatively small sums, the average thus obtained is a remarkably high one, leading to the inference that the number of vouchers has been greatly understated. But besides the *payments*, the *military receipts*, which have all to be recorded in the accounts, amounted during 1863–64 to 37,00,000 rupees.

70. The proposition to transfer such extensive payments to commissariat officers and civil treasuries is, in the opinion of the undersigned, open to the most serious objections. The officers in charge of civil treasuries will, from want of knowledge of the military regulations, be constantly liable to error, resulting in over-payments, and it would be scarcely fair to enforce retrenchments against them; thus, Government will lose one security they now possess, viz., the responsibility of the disbursing officer. As regards commissariat officers, Government has very recently recorded that their "whole attention and energies "are urgently demanded for their own departmental duties," and has sought to give them relief. To reverse this course and throw upon them the burden of transactions of the Pay Department, in addition to their legitimate work, could only tend to destroy the efficiency of both descriptions of service. Further, as the disbursements they would make under such an arrangement must come under the audit of both the Pay and Commissariat Examiners, two descriptions of accounts will have to be prepared, or the monthly account current will have to be subdivided into two sections. These are the objections that naturally suggest themselves; but the undersigned wishes it to be distinctly understood that he sees little difficulty in the proposition to make paymasters of British regiments and officers commanding batteries of artillery and native regiments, direct accountants, provided they draw advances, &c., as at present, through circle paymasters.

71. The relief obtained by this arrangement would probably admit of some reduction of the existing number of pay circles, or, which the undersigned considers

siders preferable, of the incorporation of the Pension Pay Offices in those of the circle paymasters. But whatever may be the nature or extent of such modification, the undersigned considers it most desirable that for the numerous and extensive miscellaneous military payments to be made throughout India, a certain number of Circle Pay Offices should be retained. The work must be done somewhere, and surely it stands to reason that it would be better done by a few specially selected officers, acquainted with the duties and the pay regulations, than if distributed amongst a number of civil and commissariat officers in addition to their proper duties, already sufficiently onerous. These officers, moreover, would necessarily require some assistance in the shape of additional office establishments; and in this respect alone, it is very questionable if there would be any actual saving, whilst there can be very little doubt that the work would not, or rather could not, be as efficiently performed, and the mistakes that must naturally be looked for might occasion considerable loss to Government.

Examiner, Pay Accounts.

72. In para. 95 it is stated that in the Pay Examiner's Office "every issue of "pay to officers, commissioned or warrant, is entered in the ledger to the personal "account of such officer," and that there are no less than 12 ledgers, each containing 700 names. It is true that a ledger or register of every payment made to officers is kept up in the Examiner's Office, but the 12 volumes referred to comprise *two years'* transactions. It is submitted that some such record is absolutely necessary to prevent double drawings or overpayments in a country like India, where so many officers draw pay on their individual abstracts. It is likewise highly serviceable in investigating claims made on account of the estates of officers. The undersigned has little doubt that if the examiners were consulted, they would affirm that such a register is at once their safeguard and the surety to Government that unauthorised claims are not admitted, either inadvertently or by collusion.

73. In para. 98 it is asserted that the Weekly Disbursement Lists of Paymasters, which would be exceedingly useful to the Compiler, are retained by the Pay Examiner. In explanation of this, the undersigned would observe that every disbursement list received by the Examiners is regularly placed at the disposal of the Compiler, and returned by him to the Pay Examiner when no longer required.

Examiner of Commissariat and Stud Accounts.

74. In paras. 13, 15, 23, 130, 134, 143, and 144, the Commissioners describe the duties of the Examiners of Commissariat, Ordnance, Barrack, and Medical Accounts, more particularly in reference to those functions by which vouchers passing through the hands of the first of these officers are subsequently re-examined by the others. In para. 13 it is stated that the vouchers for the services of the Barrack, Ordnance, and Medical Departments, are examined by the Commissariat Examiner. In para. 114, that the Commissariat Examiner credits the aggregate amount of these vouchers for each service in his books or statements under the general head "Charges on account of other Military Departments," and that retrenchments made by the Examiners to whom they are forwarded are, on being communicated, embodied in his own. In para. 130 it is recorded, "the "amount of work falling within the sphere of the Commissariat Examiner is by "no means so extensive as would at first sight appear, for out of 9,501 vouchers "for the month of March, no less than 4,960 are passed on to the Medical, "Ordnance, and Barrack Examiners. The Commissariat Examiner certainly "examines these vouchers before passing them to other departments, but they "form no element in his detailed compilation statement." In para. 134 it is asserted that "the Medical Examiner accepts the result of the examination of "the Commissariat Examiner," and in para. 143 it is affirmed that the Commissariat Examiner examines the vouchers appertaining to the Ordnance Service, both as to their arithmetical calculations and correctness of rates, and yet that the Ordnance Examiner examines them *ab initio*.

75. These

75. These are somewhat conflicting statements, but Government has been pleased, in para. 17 of the Financial Resolution of the 30th September 1864 last, to direct the "discontinuance of the second examination by the Ordnance "Examiner of the cash charges for Commissariat purchases for the Ordnance "Department." It is proper, however, to explain clearly that the "second "examination" in question was not a re-audit. The Commissariat Department expends cash in making supplies to the Ordnance, Barrack, and Medical Departments. The Commissariat Examiner's audit affects the cash so expended in these respects: 1st, that the supplies were made on adequate authority; 2ndly, that the cash paid was no more than the rates prevailing for such supplies in the district in question. But unless Government desire to lose sight of the way in which supplies once purchased are *appropriated*, the second audit by the Departmental Examiners becomes necessary. The present system is not only that the cash disbursed for supplies should be supported by adequate authority, and consistency of rates, but that the *supplies* so received should be correctly accounted for departmentally. Without the latter, there would be no limit to demands; without the former, no control over prices paid.

This process, however, will not be necessary in future, as, on the decision recently announced, that the Ordnance Department shall obtain its own supplies of local stores, the vouchers in support of the cash disbursements of that department will be submitted direct to the Ordnance Examiner, whose audit will be final. This principle of direct supply may probably be extended to the Clothing, Stud, and Medical Departments.

76. In para. 132, the returns of averages prepared in the office of the Commissariat Examiner are said to be duties of an extraneous nature, not directly concerned with the examination of accounts. The undersigned would submit that, for practical purposes, these returns are most valuable, and that nowhere but in the Commissariat Examiner's Office could they be properly prepared. These returns indicate the upward or downward tendency of market prices, between one year and another, or between portions of the same year. They give the average cost severally of the feed and keep of horses, mules, bullocks, elephants, and camels; the average cost of the hire of camels and bullocks; and, what is of more importance, the average cost of rationing the troops throughout the whole extent of the Bengal Presidency; the average cost per man or given number of men, of the consumption of spirits and malt liquor. In a word, all data drawn from actual expenditure, whereby the cost of any special service may be approximately ascertained and general estimates may be tested. It would be matter for deep regret if the Military Account Department were deprived of such excellent data and such admirable means of check.

Examiner, Medical Accounts.

77. From paras. 133 to 141 the duties of the Medical Examiner are briefly reviewed, and two statements are made, viz.,—

1st.—That the Medical Examiner exercises no control over the amount expended on account of medical supplies.

2nd.—That he himself admits that his professional knowledge does not in any way facilitate the control over the expenditure.

These statements would not appear to be borne out by the actual process of business; for in all doubtful questions of excessive expenditure, the Commissariat Examiner confers with the Medical Examiner, and on the result of that conference, the charges are admitted or retrenched. Dr Francis, the present Medical Examiner, affirms that the Commissioners misunderstood him; that what he intended to convey was that professional knowledge is not now *absolutely* required to control excess of expenditure, the scale of consumption of various articles having been framed upon professional experience; but that if any check is to be exercised over the expenditure, that check, both morally and otherwise, would be more efficiently exercised by a professional than by a non-professional examiner. Further, there are many questions involving expenditure in the interests of the Army and the State which require professional judgment and

experience for their disposal, and which would naturally be referred by the principal Inspector General to the Medical Examiner to work out upon data with which his office is supplied; and the Medical Examiner himself is in a position to use his professional experience in pointing out how savings may be effected.

78. But in reality the necessity for maintaining a professional examiner for hospital expenditure is matter of opinion. The facts which came under the cognizance of the late Military Finance Commission and Department were so forcible as to evoke strong advocacy in favour of the appointment. The undersigned, in his report quoted in the margin, has already laid his own views on the subject before Government, supported by the strongly expressed opinions of the controllers of military accounts at Madras and Bombay, that the maintenance of the appointment was not only a security against extravagance in the treatment of patients, but was attended with most economical results as compared with the expenditure of former years with respect to the supplies both of Europe and local stores. It must rest with Government to give the considerations urged the attention they may merit, and to decide whether it is for or against their interest to continue the appointment. The amount of the strictly medical expenditure, in local matériel supplies, is annually 18,00,000 rupees, in the three Presidencies, and for the professional audit of this large amount Government pay in staff salaries 25,200 rupees, or 1·4 per cent., without taking into account the amounts actually saved under the existing system of scrutiny.

No. 1537, dated 26th January 1864.

The undersigned is cognisant of many instances in which objections taken in the office of the Medical Examiner on professional grounds have been supported by the principal Inspector General of the Medical Department, and have been followed either by retrenchments or deterrent orders.

Examiner, Ordnance Accounts.

79. In paras. 143 to 170 the present system of keeping the Ordnance and Barrack Accounts is described ; the only objection urged against it is, that there is too much minuteness and more than needful detail. The general excellence of the system, however, has elicited from the Commissioners an acknowledgment in the following terms (para. 379) : "The system of Store Accounts in India is "much in advance of that pursued in England ; here all stores are reduced to "their money value, and the stock in hand at the end of each year, in the "arsenals, magazines, and forts, in the charge of regiments or of barrack "masters, is shown not only in quantities, but in value also. In England and "in the colonies, officers in charge of stores are debited with them in quantities "only."

80. But whilst on the one hand the Commissioners complain of too much minuteness, on the other hand they reprobate the plan adopted by the Examiner to arrive at the value of *stock in charge of regiments and batteries* by taking averages. When it is considered that the equipments of each regiment of the same arm of the service are identical, that every battery of artillery is also similarly equipped, according to its class, the ascertained value of the stores in use with three or four regiments of infantry and cavalry, and with three or four batteries of artillery, calculated proportionately for the whole number of regiments for each arm, and the whole number of batteries of each class, would afford, as the Examiner affirms it does, as close an approximation to the result as would be attained if the whole were calculated in detail by stock-book rates. Considering that, consequent on the differing condition of the various articles, even stock-book rates would not represent the *intrinsic* value of the regimental stores and equipments, the plan adopted by the Examiner to arrive at the approximate value of such stock is less open to objection than the Commissioners appear to imagine.

81. In order to avoid the detail with which the office of the Ordnance Examiner is incumbered, the Commissioners in paras. 338 to 397, make sundry suggestions.

1st. That officers should be delegated to examine the accounts of the arsenals and magazines on any of the lines of railway.

2nd. That

2nd. That the arsenal and magazine accounts should be closed quarterly, and then examined by the delegated officers.

3rd. That after the examination of the last quarter's accounts, the balance should be carried to the ledger for the new year, and the ledger appertaining to the year just closed at once forwarded.

4th. That all unserviceable, obsolete, or redundant articles should be eliminated from the stores in arsenals, &c.

5th. That the returns of arms and equipments of regiments and batteries should be prepared and submitted annually, instead of half-yearly, as heretofore.

There are other minor recommendations, but the foregoing are the most important, and can be treated together.

82. The system of Travelling Auditors the undersigned considers cumbrous, inefficient, and likely to lead to enhanced expense, whilst the only object appears to be the saving of office work in making copies of the annual ledgers. It is proposed that these peripatetic auditors should visit the several arsenals and magazines quarterly, taking with them "all the vouchers appertaining to the receipts and issues of stores." These vouchers are not always rendered with sufficient punctuality to admit of their being made available in the mode proposed, and amongst the most important checks on the magazine receipts are the half-yearly returns, which are now no longer to be forwarded. Again, when the ledger is closed after the final quarter, it is to be sent to the Examiner's Office, and as no copy is to be retained in the arsenal, much inconvenience would be practically experienced, when any reference to the previous year's transactions, which is likely to be of frequent occurrence, is rendered necessary.

83. The undersigned considers that it would be a much simpler and more efficient arrangement if, without waiting for the final disposal of obsolete and superfluous stores, these articles were all transferred to separate lists, and the ledger headings confined to authorised articles of military equipments, and materials requisite for preserving, repairing, and packing them. Forms of ledger might then be printed suitable to every arsenal, magazine, and depôt, of which one clerk could fill up a number of copies, if necessary, with less trouble and in less time than he could prepare one manuscript copy with the numerous headings at present in use. These ledgers should be balanced quarterly, but it would suffice to send one annually to the Examiner, another copy being permanently retained in the arsenal or magazine.

The separate statements of obsolete and redundant stores would of course vary in extent at the several establishments, and their periodical preparation and submission would keep the state of these articles under constant observation, and tend to ensure their being certainly, though gradually, disposed of.

84. It has long been a desideratum to clear the arsenals and magazines of the numerous obsolete and really useless articles contained in them; but this operation requires careful and judicious management. Stores that are likely to deteriorate or which create expense in their preservation, should be got rid of as speedily as practicable, care being taken not to glut the local markets by throwing large quantities of articles not in general demand into them at once. But as regards stores that are not likely to spoil and require no special care, the same urgency for their disposal does not exist, and they might be got rid of gradually in the manner most likely to ensure good prices. Again, there are many articles, large in quantity and of considerable intrinsic value, for which, however, no remunerative price could be obtained, owing to the limited demand, but which could be turned to beneficial and economical use in Government establishments in the course of time. Old cast-iron is a case in point. Unserviceable shot and shell are most acceptable in the Government foundries, but except at the presidency towns, would realise little or nothing *as old iron*, owing to the absence of iron foundries where alone they could be turned to account in that way. Large unserviceable pieces of iron ordnance would always be useful where there is a port, for mooring blocks; whilst there is a probability of serviceable pieces of suitable dimensions being turned to good account under the new plan of inserting a steel bore or lining. Lastly, there is a class of stores which on political grounds it would always be undesirable to sell. Old shot and shell and ordnance

if not broken up would come under this category, as would component parts of small arms, &c. The latter should be utilised as far as practicable in magazines, and when they cannot be otherwise disposed of, might advantageously be worked up into masses of fagotted iron for use in the arsenals and manufacturing establishments.

85. The detailed arrangements as to the time and mode of disposing of these stores might most appropriately be left to the discretion and experience of the heads of the Ordnance Departments at the several presidencies.

86. As regards the discontinuance of the half-yearly returns of arms and equipments which Government has sanctioned, the undersigned, with all respect, cannot but consider the measure as likely to be productive of inconvenience. The present interval of six months is a long one to pass without any examination or check, and, when extended to a year, the difficulty of preparing and examining the returns—of which 690 are, or ought to be, rendered—will be proportionately increased, as also it is to be feared will be the amount of error and delay. The only remedy for these evils would be for corps to send in monthly statements of receipts and issues, which would involve much more trouble than the preparation of the half-yearly returns. The undersigned would venture to suggest that the opinions of the Inspector General and the Examiner of Ordnance Accounts should be called for on this question.

Military Accountant.

87. The third point of objection is that the Military Accounts are so greatly in arrears as to be valueless, and that the Financial Returns are so defective that the expenditure they represent is *more a matter of opinion than of fact.*

88. The undersigned is not only ready to admit the general correctness of this objection, but would observe that he particularly called the attention of the Commissioners to the defects of the existing arrangements, and that the expression quoted in paras. 72 and 199 of the Report, and italicised in the above paragraph, was the one specially used on that occasion. But the undersigned would also beg to bring prominently to notice—as the Commissioners have not done so—that these defects of principle and practice belonged to the system which obtained when the Military Accounts were prepared in the Civil Department of Account, and were transferred, with the accounts, to the Military Finance Department in the beginning of 1861; since which date they have been frequently brought to notice, and remedies suggested, but without effect.

89. The form and principle on which the military books are prepared do not accord with the Budget system more recently introduced. The books are a mere record of transactions between the several disbursing officers, and contain the details of the aggregate of the remittances, refunds, and payments made by those officers between themselves and to claimants against the Government, without reference to the classification of the Budget Estimate. This defect in the preparation of these books was perceived as soon as the Budget Estimate system was brought into practical operation in 1862-63, and a form of journal was proposed by the undersigned in August 1862, adapting the books to the order of the Estimates, and substituting a monthly adjustment, in classification of departments, for the existing annual adjustments of individual officers. In the proposed form it was contemplated that the expenditure in each department should be represented monthly in the aggregate for each description of service, provided for in the estimate, under the major heads. It was further desired that at the close of the year the aggregate monthly debits to each head of service as shown in the monthly ledger (which was also provided for), should be totalled, and an abstract journal for the entire year formed therefrom. This arrangement would entirely have superseded the necessity for the Financial Returns at present in use.

90. This proposition was submitted to the Audit Board, and provisionally approved, if an entire separation between the civil and military books—which had been recommended in 1862—were sanctioned by Government. Such separation, however, was not finally acceded to, and the proposition for the modification of the form of the military books necessarily fell to the ground.

91. As

91. As regards the delay in completing the Military Books, it is to be observed that the Office of the Military Accountant was only constituted in February 1861, and that three years' accounts, viz., 1859-60, 1860-61, and 1861-62, have been compiled and submitted since that date, whilst those of another year are in hand. The Commissioners, in a separate report, state that the books of the Civil Department for the year 1860-61 are not closed. The extent of the existing heavy arrears cannot therefore fairly be attributed to remissness in the office of the Military Accountant.

92. It is, however, highly desirable that a prompt remedy should be applied to this objectionable condition of the accounts; the undersigned would therefore recommend that the books of 1862-63 and 1863-64 should be at once brought up, by means of an extra establishment, on the old plan,—merely separating cash from store expenditure,—and that those of 1864-65 should be put in hand at once to be completed in the form submitted by the Commissioners in Appendix No. 18 of their Report, subject to any modifications that practical experience may render necessary, as already suggested in para. 54 of this Memorandum.

93. It may be here observed that the form of journal proposed by the Commissioners is, in principle, similar to that suggested by the undersigned in August 1862; but as the details of the former are arranged to correspond with the headings of the new form of Estimate, they are of course preferable for general adoption at present. The main differences between the two forms are, that in the one proposed by the undersigned, the entries of payments for military services were more condensed (the details being given in the Compiler's Statement), and that in the form prescribed by the Commissioners, the books are opened with a credit for the gross amount of the sanctioned Estimate of the year, under the several grants, and closed by making "Military Grants" debtor to *sundries* for the actual expenditure under the several grants, and also debtor to *Imperial Revenue* for any unexpended and surrendered balance;—an arrangement the practical utility of which the undersigned does not recognize, but to which—viewing it as a mere matter of form—he does not desire to raise any objection.

In the Commissioners' Form the debit and credit sums are entered on opposite sides of the same page, instead of on separate debit and credit pages; and these sums are subdivided into "Service" and "General" Accounts, and exhibited in separate columns so headed, in order to correspond with the proposed divisions of the ledger. Both these arrangements appear to be very advisable.

94. The great stumbling block in the correct preparation of the Military Accounts, and the exhibition of the actual Military Expenditure, is the differing mode adopted at the three Presidencies of dealing with the inefficient balance. On the subject of the inefficient balance the Commissioners have written strongly. From paras. 68 to 76 of their Report they dwell on this point; but although it is an admitted evil, they apparently have not fully comprehended its actual effects and consequences. They clearly imply that the whole of the inefficient balance, amounting, according to their statement (*vide* para. 70 of the Report), to nearly 21 lakhs of rupees in round numbers, in Bengal, has resulted from the tardy adjustment of the advances made on account of the pay of British troops. This is not the fact. The inefficient balance comprises, in addition to such advances, those made by Commissariat and Stud Officers, the Superintendent of Clothing, and the Inspector General of Ordnance, for the services of their respective departments, and which, until adjusted, remain to the debit of the disbursing officers, who are never allowed credit for any such disbursements until they can produce valid vouchers. Moreover, it comprises advances for the payment of Pensioners (the Budget Grant for which in the Bengal Presidency alone amounts to 20½ lakhs); and, although the Pension Paymasters send their accounts for audit monthly, there is always a large sum outstanding, owing to the number of pensioners scattered all over the country. Further, the inefficient balance includes the numerous advances made to individual officers and to officers commanding stations and corps, under the regulations of the service. The amount of inefficient balance on the 30th April 1864 was 28,74,835 rupees, composed as per margin, and the bulk of the comparatively small amount outstanding for years prior to 1861-62 is almost wholly attributable to transactions during the mutinies.

	Rs.
Advances in years prior to 1861-62	1,69,521
in 1862-63	1,76,783
in 1863-64	25,28,531
	28,74,835

95. In

95. In para. 68 the Commissioners also assert that in consequence of the inefficient balance, a large sum for the pay of officers and men (and for which a grant is obtained) is withdrawn from the actual expenditure; and in para. 73 they more explicitly observe that "the Budget Estimates provide for the pay of "officers and men for a year, from 1st May to 30th April, but the expenditure, as "shown in the annual statement of receipts and disbursements, is, so far as regards "the European force, limited to pay for the officers to the end of February, and "for men to the end of March; in respect, however, to the native army, the pay, "both of officers and men, is included to 31st March." In these statements the Commissioners have apparently fallen into a double error.

96. In the first place no sum for the pay of officers and men is withdrawn from the actual expenditure, for although advances may have been obtained and held in the inefficient balance, these amounts are actually disbursed by daily payments to the troops, and are invariably charged in the annual statement exhibiting the expenditure of the year in which they are made, either as audited charges or inefficient balance. If in the latter, it is true that they are, when vouched for in the following year, debited as audited charges in the expenditure of that year, and thus are twice exhibited as military charges, for the pay of British troops; but this acknowledged evil is in a great measure rectified by deducting the amount of such inefficient balance from the aggregate charges of the latter year, the closing balance being of course included; thus bringing down the recorded expenditure to twelve months' charges, corresponding to the provision of the Estimate. Secondly, as regards the dates of payment, the European troops are paid daily by means of advances to their regimental paymasters, and the amount paid, and recorded in the annual expenditure, is up to the close of the year. European officers and native troops are paid one month in arrear, so that the estimated payment and record of annual expenditure on their account is for the twelve months, from 1st April to 31st March.

97. Again (para. 72) it is stated that the Military Accountant's annual statement of receipts and disbursements exhibits the audited expenditure only, on which account it never can agree with the like statement prepared in the Financial Department, as the latter shows the audited expenditure, plus the amount of inefficient balance at the end of the year, minus the amount of that item at the commencement of the year. Here there is another error, and an apparent misconception as to the real nature of the statement in question. In the preceding para. the undersigned has affirmed that the advances made for the pay of British troops at the close of the year are included in the "actuals." The course followed by the Military Accountant in preparing his annual statement being to include in the "actuals" every rupee disbursed up to the 30th April, whether audited and vouched for or not; which is done, as explained already, by deducting from the audited expenditure the *opening* and adding thereto the *closing* inefficient balance, *precisely in the same manner as is said to be done by the Financial Department*; and which course, in the opinion of that department, gives so close an approximation to the "actuals," that it may be accepted as such. Some other cause, therefore, than that assigned, must exist for any want of agreement between the annual returns of the Financial Department and those of the Military Accountant.

98. But in para. 191 of the Commissioners' Report, they correctly state, notwithstanding the previous assertion just discussed, regarding the annual statement of receipts and disbursements--"this includes both audited and unaudited expenditure." Such contrariety of statement can only be accounted for on the supposition that they mistook what they termed the *Annual Account of Receipts and Disbursements* and the *Annual Return* (statement) *of Receipts and Unaudited Disbursements* for two separate and distinct documents, whereas in fact they are one and the same. This misconception, if such existed, is the more remarkable, as they had the necessary information at their disposal; for in paras. 9, 29, and 188, when detailing the statements required from and prepared by the Military Accountant, they specify but one annual statement of receipts and disbursements. It is possible that the *abstract* annual statement, which is a forerunner to the detailed annual statement of receipts and disbursements, may have misled them. The abstract statement is required by the Financial Department as a preliminary to the details of the "actuals."

99. The

99. The Commissioners now propose that the foundation of the accounts should be *monthly statements of audited receipts and disbursements.* The proposition is one in which the undersigned fully concurs, provided the existing rules for prompt audit are rigidly maintained. In fact it is identical with a proposition that was made three years ago by the Military Finance Department to the Accountant General to the Government of India, but was strongly objected to, and after subsequent discussion at the Audit Board, and the appointment of a Sub-committee, it was ruled that, as the bulk of the Military Charges are audited and classified in time for incorporation in the annual statement of receipts and disbursements, the Military Accountant should classify the *unaudited* expenditure (inefficient balance), and add it to the *audited* expenditure, and thus meet the views of the Financial Department; but it was specially ordered that the statement should be termed that of *Receipts* and *Unaudited Disbursements.* As regards the Military Department, the more correct designation of the document in question would be that of *Receipts* and of *Audited* and *Unaudited Disbursements.*

100. The monthly and quarterly statements required by and prepared for the Financial Department, in like manner exhibit both audited and unaudited expenditure, being also designated *Returns of Receipts and Unaudited Disbursements*; but the monthly statements of disbursements which are prepared for and used in this office contain *only the audited* expenditure, classified according to the Budget headings. These are posted up, on receipt, in books for each Presidency, so that the amount of audited expenditure for all India, as compared with the Budget Grants, is always known up to a tolerably late date. Separate statements of inefficient balances, with their increase and decrease, and of cash balances, are also received, and from the whole of these is obtained the closest approximation to actual aggregate expenditure which is believed to be practicable under the existing system.

101. Thus it will be seen that the system now recommended by the Commissioners, is the one that has all along existed in the late Military Finance Department, as also in this office, for *military account* purposes, and which it was ineffectually sought to introduce into the statements prepared for submission to the Financial Department.

102. It may likewise be observed that the undersigned, after the formation of his present office, prepared and submitted monthly statements based on these data, showing the progress of expenditure for all India, under the major heads of the Budget Estimate. These statements Government in the Financial Department considered useless and unnecessary, and directed the discontinuance of their preparation.

103. The real element of error in the prescribed statements, and which under the present system must still exist in all statements based even on audited expenditure, is to be found in the fact that expenditure incurred, but not vouched for, in preceding years, will necessarily be incorporated therein.

As bearing on this subject specially, and on that of the inefficient balance generally, it is advisable here to notice the statement made by the Commissioners in para. 112 of their Report. It is therein observed that, notwithstanding the order of Government to the contrary, the Accountant General, Military Department, has directed that the items of expenditure should be classed in the accounts current, as under:—

1. Arrear of former year - - { Settlement. / Payment.
2. Current.

They inferred, that as the expenditure of the year is the amount that may come in course of payment during the year, the above subdivision is both unnecessary and inconvenient, and suggested that orders might be at once issued to stop this useless classification of charges. Government in the Financial Department, in Resolution No. 2695, acted on this suggestion; but it is necessary to note that the Commissioners were neither very correctly nor very fully informed on this point.

104. No orders on the subject of the discontinuance of the distinction between arrear and current charges were ever issued by Government to the late Military Finance Department; but in the letter quoted in the margin, the Financial Secretary directed the Auditor General to discontinue the distinction in question from 1st May 1864. This letter was embodied in a circular by the Auditor General addressed to the civil finance officers, and copy was sent for the *information* of the late Military Finance Department. In reference to this circular, the Controllers at the several Presidencies were instructed by the undersigned *to discontinue the distinction in all periodical returns rendered to the civil finance officers*, but to continue to observe the classification, until further orders, in all returns prepared for the Military Finance Department. Subsequently, and with effect from the commencement of the present official year, it was directed that the items of expenditure in all purely departmental accounts current, returns and compilations, should be merely subdivided into *Settlements and Payments*, without any reference to "current" or "arrear" charges.

Auditor General.

Sir,—In reply to your Letter, No. 1097, dated 23rd February 1864, I am directed to inform you that his Excellency in Council agrees with you in thinking that all distinction between arrears and current in reference to all heads of Revenue and Expenditure may cease from 1st May 1864, to the great simplification of the Financial Statements, which ought to follow the Estimates in every respect.

105. The undersigned, in exercising his discretion within the sphere of his own department in the issue of these orders, was influenced by the peculiar nature of the transactions designated "*Settlements*," the character of which has not always been clearly appreciated, and the erroneous application of which has practically been a cause of great inconvenience in exhibiting the actual expenditure of the year. *Settlements* are not component parts of the *payments* that come in course of the year, and as long as the inefficient balance is treated as a *charge account* in the financial statements that are submitted to Government, it is absolutely necessary to maintain the distinction between the two. "Settlements" are, first, the adjustments by the production of adequate vouchers, of sums disbursed in the Pay and other Departments in *previous years*, but which were not permitted to be taken credit for in the accounts current of disbursing officers for want of authentic vouchers: secondly, they are the adjustments of payments made *in previous years* by the Civil for the Military Department, but under the sanction of civil authorities, and for which, therefore, they (the civil authorities) could not obtain credit in the Military Department without the production of the necessary vouchers. The adjustment takes place when the vouchers are forthcoming. This explanation may be illustrated by two examples:—

During the mutiny, there was a Recruit Depôt established at Barrackpore, and the officer in charge of it disbursed moneys to the extent of 24,195 rupees, in settlement of the claims of recruits. What with the confusion that prevailed at the time, and the officer in question being unaccustomed to deal with European troops, he has not yet been able to produce an unexceptionable account; but were he able to do so to-morrow, that amount would be at once placed to the debit of "Charges Military" in the financial returns and compilations of the current year, although, of course, there would be no actual payment made in the year. Under the existing system, this charge would be balanced by a corresponding deduction in the closing inefficient balance; the objection, however, is that it would appear in the general books as a portion of the military charges of the year.

Again, a sum of 1,85,057 rupees, paid in 1857–58 by the Civil Department on account of the Goorkha field force, was ordered to be adjusted during the last official year, to the debit of charges military. This charge appeared in the returns and compilations of that year, but being under the head of "arrears" was investigated in this office, and found to be a mere paper adjustment as described.

106. If there be no means of distinguishing between these "*Settlements*" and the actual amount of Cash "*Payments*" that may be made within the year, the recorded expenditure of the year will never bear its true relation to the Budget Estimate, nor will Government be able to determine what was the *bonâ fide* expenditure during the year out of the money resources at command. No stronger or more practical argument could be adduced in favour of this subdivision than the unsatisfactory results of the Appropriation Audit of 1862–63, as set forth in Memorandum, No. 849 B. C., dated 31st August 1864, by the Accountant General, Military Department.

107. The undersigned would here observe, that the defective mode of recording the

the expenditure has been a subject of much and anxious consideration, and that he has, on several occasions, brought it to the notice of the Financial Member of Government. Being part of a general system inherited from the Civil Department, he had himself no authority to introduce any change in principle; all that he could do was to eliminate from the financial returns such items as could be ascertained to be mere adjustments, with a view to confining the "actuals" exclusively to cash expenditure. The means available for tracing out all these adjustments were imperfect, and the processes tedious, and it was to insure reliable and clearly defined data that he had ordered the separation in the periodical returns *required for his own office*, of *cash payments* and mere *settlements*.

108. It may further be observed, that the measures adopted by the late Military Finance Department to obtain more correct data were not without result in the recorded expenditure; in proof of which the following statement is submitted, exhibiting the average effective strength of the army during the last three years; the total expenditure as recorded in the annual receipt and disbursement statements, and the average charge per man. As it is impracticable to allot precisely the relative cost of the European and Native force, it has been assumed that the cost of one European is equal to three Native soldiers, and the calculation has been made accordingly:—

Years.	Europeans.	Natives.	Total for Calculation.	Recorded Expenditure.	Average Cost per Man.
				Rupees.	*Rupees.*
1861-62 - -	73,597	1,44,063	1,22,618	14,47,77,546	1,180
1862-63 - -	69,634	1,28,781	1,12,561	12,81,53,749	1,138
1863-64 - -	67,875	1,29,439	1,11,021	12,63,12,685	1,137

As a principle, the larger the force, the less should be the average cost per man, as much of the administrative machinery and establishments must remain the same whether the force is strong or weak; but it will be seen that this result is reversed in the foregoing statement, the cost being less, the smaller the force. When it is also borne in mind that the reductions were mainly in the least expensive arm, that of the infantry, whilst there was a considerable proportionate increase in the more costly arm of the artillery; that several measures were introduced during the last year involving increased expenditure; and that there was a gradual but very general increase in the cost of material and labour; it may be fairly inferred that the reduction in the recorded expenditure is one of account rather than reality; in fact, that *the record has annually become more correct*.

109. With reference to the orders of Government above referred to in para. 103, the undersigned has submitted separate memoranda, but he has considered it advisable to refer thus fully to the question here, in order to render this memorandum more complete in itself.

110. In para. 73 of their Report, the Commissioners stated that they would propose an arrangement by which the anomaly and inconvenience arising out of the inefficient balance might be obviated; but no definite proposition to this effect can be traced in their Report, and none as emanating from them has come under the cognizance of the undersigned. He, however, pointed out to the Commissioners personally, as also in a written memorandum which he gave to Mr. Whiffen,—that there were two ways of obviating the inconvenience arising from the present mode of treating the efficient balance, *viz.*, either to carry it to the "*Debt Account*" in the financial returns and only debit "*Charges Military*" as the amount is adjusted from time to time, or at once to charge the amount to "*Charges Military*," and carry it to the personal debit of the disbursing officer, to be eventually adjusted or recovered as the case may be. This suggestion had reference exclusively to those disbursements included in the inefficient balance of paymasters which would in all probability eventually become *Mili-*

tary Charges, and not to such transactions as affect the cash balance, viz., items that from their very nature must be exhibited in the debt and remittance accounts.

111. In coming to any decision on this point, it is very essential that care should be taken not to do injustice to disbursing officers who are compelled, under regulations, to make sundry advances which they may not always have the means of readily recovering. In the case of departmental services, such as supplies made by Commissariat Officers, that are required to be vouched for, but for which vouchers are not forthcoming on the 30th April, they might, after being debited to the charges military of the year in which supply was made, be transferred in a subsidiary account to the personal debit of the Disbursing Officer until the necessary vouchers are produced; but in the case of advances to officers authorised by regulations, or advances on account of the pay of British troops, if either treated as a *Debt* transaction of the year in which made, or as *Charges Military*, the Disbursing Officer would be fairly entitled to personal credit, and the recovery or adjustment should devolve upon the Military Accountant.

112. In paras. 74 and 75, the Commissioners imply that, notwithstanding it is one of the rules of the Military Account Department "that the Military Accountant will take care that outstandings are not allowed to remain unsettled, and that he will carefully scrutinize the state of all inefficient balances," nothing has been done in the matter, because they are able to cite three instances in which amounts of *one*, *two*, and *six* pie have been brought forward from December 1861 and August 1862. The instances are certainly absurd enough, and should not have been allowed to exist, but it is just possible that their very insignificance was the cause why no notice was taken of them. In justice to the Military Accountant, however, the undersigned would record the following facts regarding what has really been effected towards the reduction of the inefficient balance:—

On the 1st May 1862, the inefficient balance outstanding was—

	Rs.
For years prior to 1861-62 - - - - - - - -	6,82,390
For the year 1861-62 - - - - - - - -	38,83,448
	45,65,838
Balance of the above remaining *unadjusted* on the 30th April 1863 - - - - - - - - - - - -	4,09,018
Amount of outstandings adjusted in 1862-63 - - - *Rs.*	41,56,820

In the first month of 1862-63 a new inefficient balance appertaining to that year was necessarily created to the amount of 17,83,267 rupees, and this went on gradually increasing, until at the end of the year it amounted to 23,67,778 rupees. This, with the unadjusted balance of preceding years above noted, viz., 4,09,018 rupees, made the aggregate inefficient balance with which the year 1862-63 closed and the year 1863-64 commenced. Therefore, on the 1st May 1863, it stood as below:—

	Rs.
Balance appertaining to years prior to 1862-63 A. - - -	4,09,018
Balance appertaining to 1862-63 B. - - - - -	23,67,778
	27,76,796
Balance remaining unadjusted on 30th April 1864 A. - 1,69,521	
Ditto - - - ditto - - - B. - 1,76,782	
	3,46,303
Adjusted during the year 1863-64 - - - - - *Rs.*	24,30,439

But the year 1863-64 created its own inefficient balance, which, commencing in May 1863 with 11,70,693 rupees, rose towards April 1864 to 25,28,531. This, with the residue of the balance of preceding years, viz., 3,46,303 rupees, gave an opening balance for 1864-65 of 28,74,834 rupees.

113. From

113. From the above it will be evident that the bulk of the inefficient balance is of recent origin, *i. e.*, only the accumulation of one year, and that each year's balance, except a small residue, is cleared off in the following year. It will also be apparent that great exertions have been made to clear off and keep down this unsatisfactory but—under the present prescribed system—inevitable item in the military account; for, while the year 1862-63 opened with an inefficient balance of 45,65,838 rupees, the year 1864-65 opened with only 28,74,834 rupees, and the aggregate of the inefficient balance on the 1st October last was only 20,21,502 rupees.

114. It is highly desirable that some definite rules should be laid down for the future treatment of the inefficient balance, and especially for that large portion of it created by advances on account of the pay of British troops in April of each year, which alone amounts to nearly 28 lakhs of rupees for all India. If it could be ruled that at the close of the present official year the advances for April 1865 should be audited in common with the advances for the previous months of the year, and treated as military charges of the year itself, this standing anomaly might be got rid of, but not without some inconvenience, as the accounts of the year would in such case exhibit 13 months' payments, but in all future years the charges would be confined to the actual 12 months' disbursements.

115. In paras. 102 and from 187 to 212, the Commissioners have commented on the state of the Military Accountant's Office, but they have made several erroneous statements and deductions in reference thereto. They record that the compiler annually furnishes the Military Accountant with 868 statements, *whereas the number of statements annually rendered by the compiler to that officer was only* 39; but as this statement has been recorded in the Commissioners' Report with a degree of detail that would seem to give it precision, the undersigned will briefly review these details.

I. The 868 statements are said to comprise 52 weekly primary statements for seven pay ranges=364.

The Military Accountant *does not see one of these.* They are merely the compiler's calculations from the weekly disbursements, which he prepares in rough, and posts into seven books kept in *his own* office, being one book for each pay circle.

Again II. Twelve monthly statements under three sub-divisions for each of seven ranges=252.

Neither does the Military Accountant *see one of these.* They are the aggregation, under each range, of the weekly calculations, the compilation being subdivided formerly into arrears of *former years*, *last year*, and *current charges*, but from the commencement of the current year the order was to confine them to "*settlements*" and *payments.*

Lastly III. Twelve general statements, under three sub-divisions, for each of seven ranges=252.

The Military Accountant does annually receive 12 general statements, and heretofore under three sub-divisions, or three each month, but *not* for each of seven ranges, as the ranges are represented by parallel columns in each page of the statement. Thus—

Disbursements.	Presidency.	Allahabad.	Lucknow.	Meerut.	Lahore.	Trans-Ravee.	Hyderabad.	Total.
European Artillery - - -	000	000	000	000	000	000	000	0000

This makes, giving credit for the sub-divisions, 36 statements in the year; but the Commissioners omitted to state that one general annual statement in three sub-divisions was also forwarded, comprising the seven ranges. This adds three to the 36, making 39 in all; but by the Commissioners calculation it would have made 21 additional, giving an aggregate of 889!! It is to be observed,

observed, however, that in para. 192 the Commissioners admit that only three monthly statements are furnished by the compiler to the Military Accountant.

116. It appears advisable here to note that the monthly statements of disbursements in the pay department, prepared by the compiler, are sent to the Military Accountant for the purpose of being incorporated with the compilations of the Examiner sof the Commissariat, Ordnance, and other Departments, into one general compilation statement for the month, which is forwarded to this office.

117. Referring, in para. 192, to the compilations rendered by the compiler to the Military Accountant, it is observed "these statements are compiled in the "greatest detail, furnishing particulars of the expenditure on items not particu- "larised in the Budget Estimate, and showing the amount expended at each "station; the Military Accountant, however, does not record these minute "particulars, as all that he acts upon is the total amount of expenditure under "each major and minor head of the Budget Estimate." This is not quite correct. The compiler's statements or compilations are prepared according to forms prescribed for the three Presidencies, in accordance with the major and minor budget headings. All the vouchers in support of the paymasters' disbursements are sent to him, and he assorts them, classifying those that relate to Military charges of the Bengal Presidency, under the budget headings; and separately exhibiting charges defrayed either on account of Civil Departments or other Presidencies, which latter, it is inferred, are what the Commissioners designate— "expenditure on items not particularised in the Budget Estimate." The way in which the Military Accountant deals with these compilations is as follows. The details of the military charges are incorporated in the general monthly compilation. The particulars of the civil charges, and charges against other Governments, are communicated monthly in detail to the several civil account officers concerned, and to the Military Accountants, Madras and Bombay. They are, in addition, exhibited by the Military Accountant in his quarterly and annual statements to the debit of the several civil departments or Presidencies. The compiler's labour, therefore, in particularising these charges is not, as the Commissioners imply, thrown away, but is absolutely necessary for the completion of the Military Accountant's financial statements.

118. The annual return of quick and dead stock is stated (para. 195) to have been furnished for no later period than the year 1861-62. This is a return solely required by the civil finance officers, and although the designation comprises *dead stock*, none has been exhibited therein since 1853–54, having been discontinued under orders from the civil financial authorities. In the military books of 1860-61, the head "Fortifications and Military Buildings" was debited with 3,38,55,527 rupees, being the sum expended up to that date, during the last 50 years, on military public works. Under instructions from the Auditor General, this large sum was written off to "Profit and Loss" in the military books of 1861-62. The return of quick stock is merely a detail of the cash outstanding to the debit of the several military disbursing officers.

119. Commenting on the voluminousness of the general books, and the fact of their being in arrears, the Commissioners sum up by observing—"it thus "appears that, although there are two annual accounts of expenditure, an "abstract of the general books, and the general books themselves, there are no "two that agree with each other." *No abstract of general military books has ever as yet been prepared in this Presidency*, and consequently there could be no disagreement between the abstract and the general (military) books themselves.

120. That there is no agreement between the annual financial returns of receipts and disbursements and the general books, is unavoidable under the present system; the former representing, as far as practicable, the actual receipts and expenditure of the year, whilst the latter is a record of the adjustments in account, *e. g.*, the books of 1861–62 exhibited a debit of nearly 3½ crores of rupees to profit and loss, as noted in the preceding paragraph, which of course found no place in the financial returns of the expenditure of the year.

In fact the undersigned is under the strong impression that, notwithstanding the labour and expense incurred in the preparation of the military books, with their full details, they are never turned to any practical use after they have been rendered by the Military Accountant.

121. The

121. The heaviest charges brought against the office of the Military Accountant are contained in paras. 201 to 205 of the Commissioners' Report. They are as follow:—

1st. That in the advances repayable account, as exhibited in the ledger of 1860-61, there is a sum of 19,77,084 rupees to credit, and a sum of 11,31,789 rupees to debit. That is, that Government owe the former amount to "sundry accounts," and that "sundry accounts" owe Government the latter amount.

2nd. That as Government appeared more indebted to others than others were indebted to them, the Military Accountant made no investigation, being "beguiled" by the idea that the balance was on the right side.

3rd. That although this account shows 11,31,782 rupees as "owing by "officers and others to Government, the Military Accountant appeared to be "almost entirely ignorant of the fact."

4th. That of the sum of 19,77,084 rupees owing by Government, 16,04,673 rupees belong to the deposit account, the ledger of which has not been brought up for 13 years, in consequence of which remissness "there are large sums "due to the estates of deceased officers, which should have been long since "closed, and many other transactions that a small amount of investigation "would have cleared off."

5th. That the "Advances Repayable Account" was the pioneer of the inefficient balance, the latter having had its origin in the fact that the former became so unmanageable and overgrown that it was necessary to break new ground.

122. In a separate memorandum the undersigned has submitted the Military Accountant's own representation and appeal on these charges. It may, therefore, suffice here to state that the head "Advances Repayable" is that of an obsolete account. Its sub-division, "Deposits," has in recent years been separated and made a primary account, and the *Advances Repayable* have been merged in the *Inefficient Balance*. Apart from *Deposits*, the amount of *Advances Repayable* owing by Government on the 30th April 1861, was 3,72,411 rupees. This head of account originated in the practice in former years of allowing paymasters to take credit at once for advanced passage money from port to port, for survey and cadet advances, for advances for recruiting purposes, and clothing necessaries, and such like, the recoveries made on these accounts being credited to the same head. It becomes apparent that the advances in question being taken credit for, or, in other words, *charged* when made a separate or personal account, with a view to their recovery, was obliged to be kept up. Hence the Advances Repayable Ledger. Of this sum of 3,72,410 rupees, 1,99,001 rupees represents the recoveries on account of the value of chargers selected by officers, all of which have been since adjusted, although the ledger has not been posted up. The residue, 1,73,409 rupees, consists of a variety of sums of differing amount, the majority of which have been adjusted during 1861-62, 1862-63, and 1863-64, but the precise amount cannot be stated, because the ledger is in arrears. The actual residue, however, relates chiefly to irrecoverable amounts of many years' standing.

123. The *Deposits Account* exhibited, on the 30th April 1861, a balance in favour of Government of 16,04,673 rupees; but this sum was the accumulation of nearly five-and-twenty years. The head *Deposits of the Pay Department* was first opened in the year 1839-40, but no very considerable increase took place in the amount to its credit until the years of the mutiny, 1857-58 and 1858-59, when the receipts suddenly rose from 1,49,553 rupees to 10,38,085 rupees in the former year, and to 15,10,654 rupees in the latter. The increase since 1858-59 has been only 94,000 rupees. The deposit ledgers, although not balanced, have been duly posted up to the 30th April 1864, and if it were true that this account did now exhibit a sum of 16,04,673 rupees, as due to sundry officers, the Military Accountant would deserve all the blame implied by the Commissioners; but the

fact is, that it only exhibits an unadjusted balance of 2,67,321 rupees, as will be seen from the subjoined details and explanation:

	Rs.	*Rs.*
Sums due to military officers and others on the 30th April 1861, as per Deposit Ledger of 1860–61 - - - -	- -	16,04,673
Deduct—		
Sums deposited in the military chest with the Delhi Field Force by prize agents, adjusted during 1862–63 - - -	6,42,578	
Sums deposited in the military chest with the Delhi Field Force by civil officers, adjusted during 1862-63 - -	2,02,465	
Amount of certain audited bills held under the head of Deposits by the Lucknow Paymaster, connected with advances made to Major Hutchinson, of the Engineers, from the Lucknow Civil Treasury during the siege of Lucknow, adjusted during 1862–63 - - - - - - - -	55,254	
		9,00,297
Sums due to military officers and others on the 30th April 1864, as per Deposit Ledger of the year 1863-64, consisting of the undermentioned items:		
1. Pay of mutinied regiments, held in deposit by the Jullunder Paymaster, to be adjusted, with the sanction of Government, to profit and loss - - -	2,54,000	
2. Old balance, previous to the mutiny, accumulating since 1839–40 - - - - - - -	1,49,553	
3. Miscellaneous, being deposits on account of pay and for expected retrenchments, &c. - - - -	3,00,823	
		7,04,376
TOTAL - - - *Rs.*		16,04,673

124. The sum of 3,00,823 rupees, shown as miscellaneous deposits, comprises 1,37,773 rupees on account of pay deposited in 1860–61 by officers, for the sake of security, which was withdrawn and adjusted in the following year; as also 45,000 rupees deposited on account of expected retrenchments, the bulk of which has been since adjusted. There is, therefore, standing to the credit of the Government, 1,17,768 rupees, in addition to the amount accumulated since 1839–40, viz., 1,49,553 rupees, or, in all, 2,67,321 rupees, as stated above, and not 16,04,673 rupees, as affirmed by the Commissioners. It must "further be stated that in the" *Deposit Account there is not one rupee appertaining to the estates of deceased officers and men*, as all sums connected therewith are, as concerns the British Army, remitted by rolls to England by the regimental paymasters and officers commanding batteries of artillery; and the estate assets of the Indian Army are included in the monthly statements prepared by the Presidency paymaster, and forwarded to England through the Secretary to the Government of India, Military Department. Estate monies do not, as a rule, come into the deposit accounts of paymasters.

125. Respecting the balance of 11,31,782 rupees, owing by sundry officers to Government on the 30th April 1861, it appears, from information available in the Military Accountant's Office, to have been for the most part adjusted, leaving only, on the 30th April 1864, a balance of 1,18,624 rupees, as is shown in the following details:—

	Rs.	*Rs.*
Sums due to Government on the 30th April 1861, as per Advances Repayable Ledger of 1860–61 - - - -	- -	11,31,782
Deduct—		
Adjusted during 1861–62 on various accounts - - -	1,13,425	
Advances to Lieut. Colonel W. H. Robbins, who was deputed to Australia to purchase horses for the Indian Government, adjusted during 1862–63 - - - - - -	7,24,201	
Advances to Mr. J. C. Wilson, for purchase of horses in Sydney for the Indian Government, adjusted during 1862–63 - - - - - - - - - -	39,645	
Carried forward - - - -	8,77,271	11,31,782

Passage-

	Rs.	*Rs.*
Brought forward - - - - - -	877,271	11,31,782
Passage-money of certain officers on the ship "Sarah Sands," transferred in the year 1862-63 from the head of Advances Repayable to debit of Charges Military - - - -	59,500	
Advances to Messrs. Carew & Co., contractors, for the supply of rum, adjusted during 1862-63 - - - - - -	50,000	
Advances to officers of the G. T. Survey, adjusted up to 30th April 1864 - - - - - - - - - -	26,387	
		10,13,158
Sums due to Government on the 30th April 1864, as per Advances Repayable Ledger of the year 1863-64 - - - - - *Rs.*		1,18,624

126. As regards the observation that the "*Advances Repayable Account*" was the pioneer of the *inefficient balance*, the Commissioners are in error. The inefficient balance existed as a separate account simultaneously with the *Advances Repayable Account*, and so existed within the experience of the present Military Accountant for 20 years before they were merged into one account.

127. The undersigned has stated that the Deposit Ledgers have been posted up to the 30th April 1864, but the Commissioners are correct in declaring that they have not been balanced for the last 13 years. This omission of duty is not chargeable against the Military Account officers, as, on the transfer of the accounts in 1861 to the Military Account Department, *they were found to be unbalanced from* 1850-51. The Military Accountant, however, is so far open to charge of neglect, that he should have brought the omission to notice, and sought the means of balancing these ledgers.

128. The real circumstances connected with the incomplete state of these ledgers are, that being *subsidiary* and not *primary* books, much importance was not attached to them. Moreover, the Deposit Ledgers for the years 1851-52, 1852-53, and 1853-54, have been missing for several years past, *and were never made over to the present office of the Military Accountant.* The loss of these ledgers was to a great extent the reason for not balancing the ledgers of subsequent years; but the omission has not interfered in any way with the general accounts of the Military Department, or with the military books in which the sums shown as deposits received, or deposits repaid, are brought to credit or debit, as the case may be, under the head of "Advances Repayable of the Military Department" by means of the account of the division paymasters, and not from the Deposit Ledgers. Further, if any refund of a deposit should be called for at any time, a reference would, in the first instance, be made by the party concerned to the divisional paymaster, into whose office the money had been paid; and as all the divisional paymasters keep up registers of sums received in deposit or repaid to parties, the non-balancing of the Deposit Ledgers could not have been the cause of inconvenience either to the Government or individuals.

129. From paras. 211 to 218 the Commissioners dwell on the unsatisfactory state of the adjustments between Civil and Military Departments on account of advances from the Civil Treasuries. This subject will form matter for a special report to Government, as the undersigned does not agree in the opinion of the Commissioners that the adjustment of such advances is peculiarly the business of the Military Accountant, rather than that of the civil finance officers.

The transactions between the Civil and Military Departments are briefly as follow:—

1st. Payments made, or recoveries effected, by the Civil Department on account of the military, which comprise cheques drawn by military officers on the Civil Treasuries or monies remitted by military officers to the Civil Treasuries on account of recoveries effected by them, or direct payments by the Civil Department for military purposes.

2nd. The disbursements made by the Pay and Commissariat Departments for Durbar purposes, such as pensions of local and contingent corps and commissariat supplies to the Civil Department. Also receipts by divisional paymasters of advances drawn by military officers from Civil Treasuries on brigade or station orders.

130. With reference to these two classes of transactions, there are monthly statements rendered by the local civil accountants to the Military Accountant for all payments or recoveries made, in the Civil for the Military Department; and in like manner monthly statements are rendered by the Military Accountant for all payments or recoveries made in the Military for the Civil Department. Thus, so far as the Military Department is concerned, there is a monthly inter-communication which should lead to speedy adjustment of the transactions between the Civil and Military Departments. But it must be remarked, the sums charged against the Military Department in the civil books of any one year cannot correspond in amount with those credited in the military books, because the vouchers for the sums so debited in the Civil Department do not always reach the Military Department for audit and adjustment within the year in which the charges are incurred. The same is the case with debits in the military books against the Civil Department. It is believed that the Accountant General to the Government of India in the Civil Department receives annual balanced accounts current from the local civil accountants, which show the credits or debits against the Military Department; and as he receives monthly intimation from the military accountant of transactions in the military affecting the Civil Department, it would seem that he (the Accountant General to the Government of India in the Civil Department) has the best means of reconciling the differences in the debits and credits between the Civil and Military Department in the military and civil books.

131. In closing this portion of his remarks on the Commissioners' Report, the undersigned feels bound to express his regret that such grave charges (implied if not direct) of inefficiency, ignorance, and neglect, should have been made and published against an officer of Lieut. Colonel Hill's high character and standing, without intimation to himself or to the head of his department, and without any opportunity of previous explanation or denial.

Accountant General, Military Department, and Controllers.

132. The next point is the comparatively unimportant duties of the Accountant General, which duties do not justify that designation, and which might be transferred to the Controller in Calcutta, who would then act as Controller for Bengal and Accountant General for India in the Military Department:

The undersigned feels some hesitation in offering any opinion on this particular point, as it is difficult to avoid the influence of personal feelings and interests, and he can scarcely hope to escape the natural suspicion of being actuated by them. As, however, the question is one of considerable importance to Government, he will endeavour to review it conscientiously, and to the best of his ability, with reference to the appointment and not to the individual incumbent.

133. In para. 221 the Commissioners observe as follows:—"The only duties that we could discover that are now intrusted to the Accountant General, are:—

"I. Consolidation of Budget Estimates.

"II. Abstracting Monthly Returns of Receipts and Expenditure.

"III. Passing on papers referred to him by the Military Department, to "the other branches, for the information required.

"IV. Deciding doubtful questions referred to him by the Controller."

As regards the first named of these duties, the Commissioners have recorded their opinion that the action of the Accountant General is creative of delay and embarrassment, whilst from the amount of detail furnished, it is impossible he can exercise any practical check over the estimates as submitted by the several departments. From the *facts* stated in paras. 8 to 43 of this memorandum, Government can form an opinion of the *theory* of the Commissioners on this subject is correct.

With reference to the second duty, which the Commissioners appear to consider equally useless, it may be observed, that this is the only detailed record that is kept of the progress of military expenditure in all India under the various Budget heads, and this, moreover, *audited expenditure*, which the Commissioners have themselves recommended should form the basis of all accounts and statements.

It

It is only by a detailed record of this nature that the progress of expenditure can be known and carefully watched.

The third portion of the duties as noted by the Commissioners is almost imaginary. Of the numerous questions referred to him for report by the Military Department, the undersigned is not cognizant of passing on one to the Controller (the only officer of the Account Department with whom he communicates directly) for report or to give the information required; and during the nine months that the office has existed, he has only on a very few occasions—less than a dozen—had to call on the Controller for information to enable him to complete any report called for.

The fourth and last of these duties specified is correctly stated to be rarely exercised.

134. As regards the real nature and extent of the duties performed in its Account Branch, the Military Department is best able to state if they are light and unimportant, as represented.

Without going into detail, it may suffice to observe, that the whole of the duties which formerly devolved on the chief of the Military Finance Department, have been transferred to the Account Branch of the Military Department, with two exceptions; these being, that the Accountant General is no longer a member of the Audit Board, and that minor and personal details having reference to the Bengal Military Establishment only, are now reported on by the Controller direct, instead of by or through the late Chief of the Military Finance Department. As to the character, extent, and importance of these duties, Government has recorded opinions very different from those entertained by the Commissioners, and the undersigned can honestly say that he finds it difficult to get through them satisfactorily, with continuous and earnest application.

135. Viewing these duties as light and unimportant, the Commissioners suggest the transfer of them to the Controller of Calcutta, not only in addition to those he now performs, but to other extensive duties which they propose to allot to all the Controllers, including those now performed by the military accountants, compilers, and the Presidency paymasters, with a more direct control over all the examiners.

The present duties of the several Controllers, if fully and efficiently performed, are calculated to afford ample employment, and the addition of the last mentioned duties, even allowing for the proposed compensating assistance of deputies and book-keepers, will tax their energies and exertions very considerably. To add further to the most heavily-worked of the three Controllers the duties of Accountant General for India, is to impose upon that officer, independent of the heavy responsibility, an amount of detailed and yet important work, greater in the opinion of the undersigned—an opinion not formed without some practical experience—than any individual, whatever might be his mental or physical ability, could efficiently perform.

136. The Commissioners consider the designation of "Accountant General" a misnomer, as that officer keeps no accounts in the strict sense of the word. This is perfectly true, he does not keep the books or originate any accounts; but this is equally applicable to the Controller, who at present keeps no accounts, and who does not even prepare any financial statements, but merely passes on to the Accountant General for scrutiny and consolidation those prepared by the military accountant and compiler.

137. The Commissioners accustomed to deal with the English system as organized for one Government and one army, have evidently regarded through the medium of such experience, the very different arrangements made, after long and careful consideration, to meet the specialties and requirements of three separate Governments and three distinct armies; and have consequently, and not unnaturally, misunderstood the real nature of the duties and the especial object of the appointment of the Accountant General to the Military Department in India. They infer, because the Financial Department Resolution No. 1031 of 25th February 1864, constituting the appointment, ruled that the *relation* of that officer to the Military Department (referring to close connection and subordination) was to be similar to that of the Accountant General to the War Office at Home, that the *duties* also were to correspond, altogether overlooking the fact that the circumstances were not analogous.

138. They contrast the duties of the two officers, and draw the inference that whilst there is little affinity between them, the functions of the Controller of Calcutta, *although he keeps no accounts*, are almost identical with those of the Accountant General of the War Office. Here, again, they have lost sight of the fact that there are three Controllers, one for each Presidency, and that their functions, position, and authority are precisely similar, but exclusively confined to the operations of their respective Presidencies; the result of these operations being scrutinized, reviewed, and consolidated by the Accountant General in the returns, statements, and reports connected with the military expenditure of India generally.

139. As regards any possible practical comparison between the English and Indian systems, it can only be generally stated that the functions divided between the Accountant General and his assistants at home, are also divided between the Accountant General and the Controllers in India, but in a different manner; the latter being rather on the footing of responsible local deputies, subject to the supervision and general control, as regards system, of the Accountant General in his capacity as agent for the Military Department.

140. The Commissioners, nevertheless, consider "that as the different officers of control, audit, and book-keeping can in England be directed by one officer, there is no reason why the same should not be carried out in this country," and they therefore propose, not that there should be one office of Audit and Account and one controlling officer for India, as might be expected from such a preamble, but that the only existing controlling office should be abolished; that there should still be a separate Account and Audit Department at each Presidency, as at present, under a Controller; that the designation of one of these Controllers should be changed, and whilst he should himself be practically released from all supervision, he should exercise over the other two Controllers the same supervision that is now maintained over all three by the Accountant General. The Commissioners further assume that this was the ultimate intention of Government when introducing the present organization. It is unnecessary for the undersigned to point out the fallacy of this assumption, which could scarcely have been entertained had the Commissioners carefully read the resolution to which they so often refer.

141. It may be well, even though necessitating some little repetition, briefly to review and compare the two systems "as proposed" and "as existing."

By the former, there would be a head officer of account and audit at each Presidency, exercising the present supervising duties of Controllers, with the additional executive duties now performed by the military accountants, compilers, and Presidency paymasters, whilst the Controller in Calcutta would exercise a general supervision over the other two Controllers, in his capacity as Accountant General to the Military Department of the Government of India, and would scrutinise, review, and consolidate the estimates and the recorded expenditure of all three Presidencies, *his own included*. This system, which leaves the Controllers at Madras and Bombay subject to supervision and check, practically frees the corresponding officer in Bengal from any such surveillance. He would, *as Accountant General*, audit his own accounts, and report on his own operations *as Controller*. Should these, from error of judgment, or any other cause, result in loss to the State, Government would possess no further information on the subject than he might see fit to communicate. However improbable might be such reticence, it is undesirable that its existence should be possible; and such possibilities it is the object of official legislation to obviate. If supervision and scrutiny is necessary as regards the Controllers at Madras and Bombay, surely it is equally requisite with reference to Bengal; and as a principle it appears to be very undesirable that Government should employ as its agent in such scrutiny an officer whose official interests are concerned, and whose official proceedings are to be scrutinized. It is further to be observed, that the Commissioners' plan is invariably to confer the higher position and the duty of supervision and check over his *confrerès* upon the Controller of Calcutta, although he might not be the best qualified for the position, or although he might be, as is the case at present, the junior of the three Controllers.

142. Under the existing system, each Controller is the head and responsible officer of account and audit for his own Presidency, but all his operations are carefully

carefully scrutinised and blended into one general result as regards India, by the Accountant General, who represents the Military Department of the Government of India, and is the agent of that department in its account branch. The Military Department is responsible for the military expenditure, and must exercise a careful watch over and scrutiny into that expenditure, whether estimated or actual and recorded, for which purpose a separate branch is attached to the department, and an officer of experience, conversant with the system obtaining in, and specially selected from, the Military Account Department (to which the appointment has emphatically been declared the highest prize) is placed at the head of that branch as an independent and unbiassed scrutineer and supervisor, and also, not the least important of his duties, although entirely overlooked by the Commissioners, as a referee and adviser of Government on questions relating to military expenditure. For the efficient performance of these duties, it is desirable that the officer so employed should not only possess the requisite special qualifications, and a certain rank, but also that he should not be overburdened with office details, or in any way responsible for the accounts and statements submitted for his scrutiny or report.

143. That the Military Department should be accountable for the military expenditure may be looked upon as an axiom, and in that case it is most essential that the record of that expenditure should be carefully scrutinised by some responsible member or agent of that department, as, whilst it would be impossible to record that expenditure at less than its actual amount, experience has shown how easy it is to record it in excess of the legitimate figures, and also that this is the natural tendency if not carefully checked by the Military Department.

144. When the new arrangements were introduced last year, the title of "Auditor General" might possibly have been a more convenient as well as a more appropriate designation for the officer at the head of the Account Branch of the Military Department; but it is questionable if any advantage would be gained sufficient to warrant the change at present.

145. Putting aside the question of general supervision and scrutiny, it remains to consider the Commissioners' propositions as regards the position and duties of the several Controllers in their respective Presidencies. At present they are supervising officers, having each a departmental staff of executive officers, who, although under their control, exercise a certain amount of independent action, and are each personally responsible for the efficient performance of their special duties. These are the Military Accountant, whose duties are important and onerous, he being the only real (military) accountant at the Presidency, to which he is the military book-keeper; the auditors of the several Departments termed "Examiners," and the "Compiler," who is in some respects an assistant to the Controller, but whose work is considerably utilised by the Military Accountant. There are also a body of disbursing officers entirely under the Controller, consisting of the Presidency, Circle or Division, and Pension Paymasters.

146. The Commissioners propose to abolish at each Presidency the appointments of Military Accountant, Compiler, and Presidency Paymaster, merging their duties in those of the Controller, to whom they also propose to give a more direct control over the examiners. To assist the Controller in these additional duties, it is further suggested to allow him a deputy, a principal, and an assistant book-keeper, or, in other words, to give three additional officers under new designations in place of the three it is proposed to reduce. The main feature of the change, however, is the substitution of a few liberally paid uncovenanted officers,—though from what sourse they are to be obtained is not stated—for a corresponding number of commissioned officers now at the heads of the several branches.

147. It is further proposed to abolish not only the Medical Examiner and Circle Paymasters, but also the officers *on probation*, a measure which the undersigned considers most objectionable. In a pecuniary point of view, the nominal saving would be very small. Six probationers are allowed for all India, it being ruled that in future three will be appointed for Bengal and three for Madras and Bombay together. The staff salary is only 100 rupees on entering the department, and ultimately only 150 rupees, even when they have gone through all the requisite tests, until they succeed to some temporary or perma-

nent vacancy. The advantage of having a body of officers who have some regimental and Indian experience—they are generally either junior captains or senior subalterns—in course of regular training for the duties of the department, is very great; and as they have to go the round of the several branches, and serve practically in each, and finally to pass a tolerably strict examination, they are surely better fitted to fill vacancies in the department than officers taken from the service generally, without any special training or experience; moreover, they are occasionally very useful during their course of training in acting as assistants to the officers in whose branches they are temporarily employed.

148. That the present system of the Account Department at each Presidency'—more especially as regards the Controller's connection with, and authority over, his subordinate officers, and the more convenient and economical distribution of duties,—is open to improvement, the undersigned is quite ready to admit, although not equally disposed to support the changes suggested by the Commissioners. To enter fully into this important question would extend this memorandum beyond reasonable bounds. But as the subject is one requiring careful consideration from several points of view, the undersigned is prepared, should Government desire it, to submit a separate memorandum, containing a proposition for remedying what is undoubtedly defective, with the least amount of injury to individual interests and the avoidance of unnecessary changes.

149. There is, however, one recommendation of the Commissioners, in which the undersigned fully concurs, viz., the bringing the several branches of the Department under one roof and in direct communication with each other, whereby much time and labour would be saved, and the necsssary amount of the records greatly diminished. This is more especially applicable to Calcutta; but at the other two Presidencies, improvements in this respect might be made.

150. The separation of the store from the cash accounts, which was recommended by the undersigned, is another proposition in which he heartily concurs, as he also does in the suggestion to have one store examiner at each Presidency to take the place of the ordnance examiner.

151. Having thus commented on the main points of the Commissioners' Report, and on their most important suggestions, the undersigned will now only notice a few further errors into which they have fallen, and which it is desirable should be explained, in justice to the Departments and individuals concerned.

152. In paragraphs 82 and 83 of the Report is given "an example of the extraordinary waste of time in dealing with small matters," this example being the process of obtaining audit for stationery contingent charges, and the inference being that it is one of the cumbrous and operose processes of the Military Account Department. In fact, however, the "stationery" is not a Military Department, and charges on account of that Department are necessarily subject to civil rules, and the course of procedure condemned by the Commissioners is that laid down by the Government of Bengal, as per notification of 9th July 1862, paragraphs 27 and 29.

153. In paragraphs 297 and 298, the Commissioners observe that general questions regarding increase of expenditure, new or increased salaries, gratuities, pensions, and alterations in orders affecting pay and allowances, should be referred to the Financial Department, so that "something like uniformity in the rates of remuneration may be observed;" an instance of the necessity for such reference is quoted in the case of the remuneration granted *by the military authorities* to the soldier clerks in the office of the Deputy Adjutant General of Artillery, "a rate of pay much in excess of that granted to commissioned officers of the junior ranks." It is unnecessary for the undersigned to point out that the system of referring such questions to the Financial Department thus strongly advocated is that in force at present. As regards the particular instance cited, it may be observed that the whole question was referred to the Financial Department at every stage of the various proceedings, and that the final settlement above referred to, was made by Financial Department Resolution No. 2046, dated 23rd August 1864.

154. In paragraph 413, the Commissioners allude to the new pay code as having been under compilation for the last five years; they recommend that it should

should be finished without further delay, and suggest that the officer who has been specially appointed for this duty should be relieved from all extraneous work, as they are informed that the officer in question has been able to devote but a limited portion of his time to this primary duty, which has to a great extent caused the delay.

The whole of this paragraph is replete with error, which a reference to Lieutenant Colonel Becher or the undersigned would have obviated. A pay code *for Bengal* was put in hand more than five years ago, but owing to various circumstances, and chiefly the radical changes that had taken place in the constitution of the army, was never completed. The pay code *for India* to which the Commissioners refer, had been in hand little more than two years when the Commissioners penned their remarks, and certainly, as far as the compiler was concerned, there had been no delay; he had no extraneous duties to perform, except in connection with the committee on the Commissariat Subordinate Department, which, up to August last, had in reality not interfered with the compilation of the code, although subsequent to that period he was fully occupied for several months with committee work. Undoubtedly the completion of the code is very desirable in many respects, and no one is more anxious to further its completion than Lieutenant Colonel Becher; but Government are well aware that the delays that have occurred have been caused by the necessity for reference to the authorities at the several Presidencies, and the time occupied in obtaining replies and opinions. The undersigned has on other occasions recorded his opinion that the work, as far as it has gone, has been most efficiently and carefully performed, and that all that was practicable has been done to expedite its progress.

155. After reviewing in detail the working of the several branches of the Military Account Department, with "the view of showing the operose arrangements which at present exist, both as regards the compilation of the estimates and the record of the expenditure," the Commissioners come to the conclusion that "*both of these important duties are in an exceedingly unsatisfactory state.*"

156. As regards the estimates, their objections as to the delay and the injurious results of the revision by the Accountant General have been fully discussed in this memorandum, and the undersigned trusts that both accusations have been satisfactorily disproved. As a remedy for the supposed defects, a new form of Estimate is proposed, the main features of which are a closer approximation to the form employed in England. To this form, as modified by Financial Resolution No. 2695, the undersigned has no objection to offer, in fact, it closely assimilates to the form he proposed to adopt last year. But, as far as full information is concerned, he cannot pronounce it an improvement on the form recently in use.

Several minor points will require modification, especially as regards the other two Presidencies, and the new forms of Appendix will have to be carefully considered, the Commissioners having only given a few, and those undoubtedly requiring alteration.

157. As it is most essential that these forms should be finally settled and made uniform and suitable to the three Presidencies, the undersigned ventures earnestly to recommend that their arrangement be left to the experience and discretion of the Military Department in its Account Branch, so as to insure the required uniformity and greater dispatch.

Should Government accede to this recommendation, early orders will be desirable. The bulk of the Appendices for the Estimate of 1865-66 must be in the old form, but those which it may be considered necessary to print with the Estimate will be prepared or modified in this office in communication with the Secretary to the Military Department, unless orders are received to the contrary.

158. The undersigned would observe, that since the greater portion of this memorandum was written and in type, Financial Resolutions Nos. 4014 and 4118 of December 1864, have been received; the former directing the exclusion of all charges, which are not actual cash disbursements, from the record of annual expenditure, and the inclusion only of audited expenditure, the latter sanctioning the separation of the military from the civil books at the three Presidencies.

With reference to these resolutions and to the Commissioners' Report on *the unsatisfactory state of the record of expenditure*, the undersigned would express a hope that he has satisfactorily shown in this memorandum that his predecessor and himself were fully alive to the real existing defects.

That both had advocated the separation of the military from the civil books, that the undersigned had submitted a detailed proposition, two years prior to the Commissioners' Report, for remodelling the military books with a view to such separation, and also to the separation of the store from the cash accounts, on a plan very similar to that now recommended in the Report, in which it was suggested that the expenditure should be recorded monthly, in accordance with the departmental classification of the Budget Estimate headings.

That both Colonel Balfour and the undersigned strongly urged the adoption of the plan of recording the audited expenditure, and that in purely departmental statements this system was alone employed.

That the undersigned constantly brought to notice the evil of including in the record of annual expenditure *settlements* which were not actual payments, and that he had used his best endeavours, as far as lay in his power, to eliminate them from his record of actual expenditure.

That the undersigned prepared and submitted a form of appropriation audit for the year 1862-63, which is similar in principle to that recommended by the Commissioners, the only real difference being that the two forms work up to different Estimate headings, and precisely similar to the form subsequently sanctioned by the Financial Department for the Civil Account Department.

159. From the foregoing, it will be evident that the main defects of the system are not fairly attributable to the Military Account Department, and that had the various suggestions connected with them, made by Colonel Balfour and the undersigned, met with the approval and sanction of Government in the Financial Department, these defects would not have now existed.

160. The Commissioners, in closing their Report, observed "that several of the recommendations contained in their Report had already been under the consideration of the Controller, who had abstained from issuing directions thereon, pending the result of this inquiry." Although they notice these minor recommendations which the Controller had under consideration, they appear to have been entirely ignorant of the important recommendations that had actually been submitted, as noted above, as they never allude to them.

161. As regards the working of the Department, the Commissioners have admitted that the audit is close up to date, and the work exceedingly well done, and they also allow that the system of store accounts is much in advance of that pursued in England. Government are well aware that fraud or defalcation is of rare occurrence, and that the existing system of check is an efficient one. The undersigned would further beg leave to invite the attention of Government to a Report addressed by himself as officiating chief of the Military Finance Department, No. 2014 B, dated 6th January 1863, exhibiting the cost, percentage, and working of the several offices of account at the three Presidencies. In that report it was shown that the entire cost of disbursement, record, and audit for all India, cost Government ·71 per cent. on the whole amount so disbursed, recorded and audited, and *that the whole of this cost was covered* in the year reviewed by the *bonâ fide* recoveries enforced, whilst the cash balances in the several military treasuries had been reduced by two-thirds.

162. Now that the system has been brought into more regular order, the savings effected by the most careful audit would of course not be so great as represented in the report under notice; but they are still of importance, and the undersigned is convinced that, in reality, the Military Account Department is an economical one to Government.

163. In considering the present condition of the Department and the system of military account, it must be borne in mind that both have been subjected to great drawbacks, and their efficiency much impaired by continual change.

The

The Department of Audit was re-organized, and the accounts transferred from the Civil to the Military Department after a period of especial disorder, and encumbered with many arrears and difficulties of adjustment. A new system had to be introduced out of conflicting elements, and during this process there was a continued series of changes. When, at the close of 1861-62, the undersigned found himself placed at the head of the Military Finance Department, the advice he received from his predecessor Colonel Balfour, from Lord Elgin, the Governor General, and from Mr. Laing, the Financial Member of Council, was to avoid all unnecessary changes, and to rest satisfied for the present with consolidating and bringing into smooth working order those which had already been introduced.

164. Before a year had elapsed, orders were received from home for the abolition of the Military Finance Department, and for more than twelve months it was in a moribund condition; whilst the future arrangements were doubtful, it was no time to introduce changes. When the new organisation was carried out, it also became known, although not officially communicated, that the whole system was to be examined and its revision considered. This knowledge, in like manner, caused all plans of improvement to be held in suspense. Thus, it will be evident that the system and department have since the organisation of the latter been subjected to continued change, either actual or anticipated,—as stated in the commencement of this memorandum,—which has necessarily militated greatly against efficiency and improvement.

165. A further series of changes are now proposed, some of which the undersigned considers unadvisable, and has stated the grounds of objection to them, others are decidedly advantageous and their introduction very desirable; prominent amongst these are the separation of the military from the civil books, the separation of store from cash accounts, and the preparation of the books in the new form, so as to insure a prompt and correct record of military expenditure under the several budget headings as now sanctioned.

166. Government having authorised the new form of estimate and the separation and preparation of the military books in the mode proposed, the ground-work for estimating and recording expenditure is established; but all subsidiary and subordinate changes might, with great advantage, be introduced gradually and after due consideration, as recommended by the Commissioners themselves.

167. Whatever may be the nature and extent of the changes finally sanctioned, it is of great importance that the opportunity should be taken to introduce them in one uniform mode, suitable to the three Presidencies; and this can only be ensured by all orders and directions emanating from one source, and all forms—as far as practicable—being made applicable to all India.

168. On these grounds the undersigned would suggest that in all sanctioned changes,—the principle having been laid down in the Financial Department,—the details should be carried out by the Military Department, through the agency of its account branch, in communication with the several controllers.

The changes already sanctioned would then be carried out as rapidly as possible, and those proposed brought forward gradually for consideration and sanction with a full report upon each.

169. Should these views meet approval, the points on which early orders would be specially required are—

I. Sanction to the preparation of a complete set of Appendices for the estimate; those to be printed with the estimate to be attached to the statement as submitted on 28th February next; and the remainder to be prepared and issued with the sanction of the Military Department, in full time for the compilation of the departmental estimate for 1866-67.

II. Sanction to entertain extra establishments in the offices of the military accountants at Calcutta and Madras to bring up the books in arrears, those up to 1863-64 inclusive, being prepared on the old plan, merely separating

stock from cash expenditure, as recommended in paragraph 92 of this Memorandum. The books for 1864-65 being prepared on the form proposed by the Commissioners, at all three Presidencies, by the regular establishments of the military accountants' offices, the progress being reported monthly.

III. That the appropriation audit statements for 1863-64 be rendered from the data existing for that year, and consolidated in the form observed in the statement rendered for 1862-63 with this Office Memorandum No. 849, B C, dated 31st August last. The annual account of receipts and expenditure, with explanatory statement of variations, compiled from the books, to be substituted for 1864-65 and future years.

IV. That until the military books can be brought up, and the new form of abstract books introduced, a monthly statement of receipts and disbursements be prepared on the data available, but in the form of abstract sheet prescribed by the Commissioners in Appendix No. 17 of their Report.

With these arrangements, the expenditure can be estimated, recorded, and scrutinised in general accordance with the views of Government, until the more complete and detailed arrangements can be efficiently introduced.

170. In conclusion, the undersigned has to apologise for the length of this Memorandum; but with reference to the importance of the several points to be considered, the necessity for a certain amount of detailed explanation and the number of erroneous deductions and statements which had to be brought to notice, he has found it impossible to condense all that he deemed it advisable to state into a smaller compass.

(signed) *Arthur Broome*, Colonel,
Acct. Genl. Mily. Dept.

Appendix (C.)

As at present.

Explanatory Statement of the Sums expended, "More or Less," under each of the Sub-divisions of the Budget Estimate of the Bengal Presidency for 1862–63.

	Expenditure, 1862-63.	Estimate, 1862–63.	Expenditure		CAUSES OF VARIATION.
			More than Estimate.	Less than Estimate.	
	Rs.	*Rs.*	*Rs.*	*Rs.*	
European Artillery	40,67,670	45,52,507	-	4,84,837	In the early part of this year orders were received for the re-organization of the European Artillery in India, and a supplemental grant of 2,80,112 rupees was sanctioned, in order to provide for this arm of the service on the new scale of strength, both of officers and men. The drafts did not arrive as early as was expected, and the pay of officers serving with the Native Artillery has been compiled and classed under that head, although estimated for with the European Artillery.
European Cavalry	24,96,820	28,59,507	-	3,62,687	The actual disbursements are a close approximation to the original Estimate; but as Government did not consider the proposed reduction of 14 troops of men with seven troops of officers final until the sanction of the Secretary of State for India was obtained, a supplemental grant for 4,33,460 rupees was sought and obtained, but as no drafts arrived during the year to fill up casualties, the major portion of the supplemental grant became a saving.
European Infantry	1,08,77,230	1,10,55,198	-	1,77,968	The decrease is attributable to casualties during the year and to fluctuation in the number and rank of officers present in India; also to several officers of British Infantry being on the staff, their pay appearing under that head.
Engineers	1,72,088	2,07,316	-	35,228	Decrease caused by the employment in the Department of Public Works and other departments of officers who at the commencement of the year were unemployed
Sappers and Miners	2,35,587	2,24,122	11,465	-	Ordinary fluctuations.
European Invalids	2,50,572	2,36,263	14,309	-	Accessions and ordinary fluctuations.
Officers, Staff Corps (unemployed)	1,62,443	18,81,829	-	7,22,009	There was no correct data on which to calculate the financial effect of the retiring bonus offered to Indian officers. This cause and the orders directing unemployed officers to do duty with cavalry and other corps, have resulted in the large saving under this head.
Officers of Mutinied Corps	9,97,377				
Officers Unposted	4,40,525	6,84,932	-	2,44,407	These filled the place in corps of the relieved officers, and many were temporarily posted to regiments to do duty. Hence the apparent decrease.
Officers Unattached	97,349	53,376	43,973	-	Increase caused by additions and returns of officers from Europe.
Officers, Veteran Establishment	18,537	15,528	3,009	-	
Officers, Local	5,400	7,418	-	2,018	Ordinary fluctuations.
Officers, Retired	1,67,350	52,110	1,15,240	-	The effect of the bonus given to officers to retire.
Officers, Warrant and Non-commissioned Officers employed in P. W. D.	2,09,762	33,909	1,75,853	-	There was no correct list of these officers in the beginning of 1862, and not being on the military staff or attached to regiments, they were in many instances classed with unemployed officers.
General Army Staff	12,80,722	13,20,377	-	39,655	Ordinary fluctuations in rank of officers.
Staff of Irregular Forces	2,12,485	2,33,279	-	20,794	There were several reductions in the irregular forces during the year.
Garrison and Cantonment Staff	9,19,797	11,00,557	-	1,80,760	Several bazars and depôts were abolished during 1862–63, and there were many changes in the rank of the officers holding these various appointments consequent on the retirement of other officers. Most of the new incumbents having joined the Staff Corps were restricted to half batta pay in addition to the pay of their appointments, whereas the former incumbents drew full batta pay.
Office Establishment of General Army Staff	2,36,738	2,11,794	24,944	-	A sum of 8,000 rupees was granted during the year to the Adjutant General's establishment to bring up arrears, and also a personal allowance of 1,200 rupees per annum to the Registrar. Further, an increase of 9,066 rupees was granted to the Quartermaster General's establishment. *Vide* Financial Resolution, No. 5159, of 31st July 1862.
Total, Title 1 — *Rs.*	0	0	0	0
